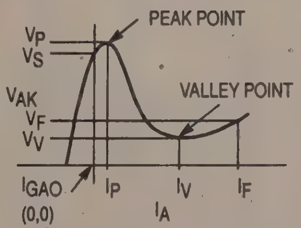
[1] Applied to A-version only. Non- A-version is unspecified. [2] Denotes 2N6346-49 Series only. [3] Sensitive gate. [4] High performance. [5] High performance, sensitive gate. †VGT @ 28°C (V) = 0.8. *1000 piece tape and reel. ** VGT @ 25°C (V)=–40°C.

Thyristor Triggers

Programmable Unijunction Transistor — PUT

Similar to UJTs, except that I_V, I_P and intrinsic standoff voltage are programmable (adjustable) by means of external voltage divider. This stabilizes circuit performance for variations in device parameters. General operating frequency range is from 0.01 Hz to 10 kHz, making them suitable for long-duration timer circuits.



Plastic TO-92 (Case 29-04/16)

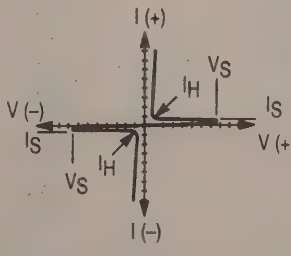
Silicon Bidirectional Switch (SBS)

The versatile trigger device exhibits highly symmetrical bidirectional switching characteristics which can be modified by means of a gate lead. Requires a gate trigger current of only 250 μAdc for triggering.



Mfr.'s Type	V_S (V)		I_S (μA) Max.	I_H (mA) Max.

Analog To Digital Converters

8-Bit A/D Converters

Mfr.'s Type				Description	Databook Reference	V_{CC} (V)	Power Consumption (mW)	Accuracy ± (LSB)	Conversion Time (µs)	No. of Leads	Temperature Range (°C)
TO-220	SOIC	PDIP	PDIP								
—	—	ADC0801LCN	—	8-Bit µP Compatible ADC with Differential Input	Note 1	5	13	1/4	110.000	N20	0 to +70
—	—	ADC0803LCN	—	8-Bit µP Compatible ADC with Differential Input	Note 1	5	13	1/2	110.000	N20	0 to +70
ADC0804LCJ	ADC0804LCWM	ADC0804LCN	—	8-Bit µP Compatible ADC with Differential Input	Note 1	5	13	1/2	110.000	J20, M20, N20	0 to +70
ADC0808CCJ	—	ADC0808CCN	ADC0808CCV	8-Bit µP Compatible ADC with 8-Channel Multiplexer	Note 1	5	15	1/2	100.000	J28, N28, V28	0 to +70
—	—	ADC0809CCN	ADC0809CCV	8-Bit µP Convertible ADC with 8-Channel Multiplexer	Note 1	5	15	1	100.000	N28, V28	0 to +70
—	—	ADC0820CCN	—	8-Bit High Speed µP Compatible ADC with Track/Hold	Note 1	5	75	1	1.200	N20	0 to +70
—	ADC0831CCWM	ADC0831CCN	—	8-Bit Serial I/O ADC	Note 1	5	15	1	32.000	M14, N8	0 to +70
—	—	ADC0833CCN	—	8-Bit Serial I/O ADC with 4-Channel MUX	Note 1	5	23	1	32.000	N14	0 to +70
—	—	ADC0834CCN	—	8-Bit Serial I/O ADC with 4-Channel MUX	Note 1	5	15	1	32.000	N14	0 to +70
—	ADC0838CCWM	ADC0838CCN	—	8-Bit Serial I/O ADC with 8-Channel MUX	Note 1	5	15	1	32.000	M20, N20, V20	0 to +70
—	—	ADC0841CCN	—	8-Bit µP Compatible ADC	Note 1	5	15	1	40.000	N20	0 to +70
ADC0844CCJ	—	ADC0844CCN	—	8-Bit µP Compatible ADC with 4-Channel MUX	Note 1	5	15	1	40.000	J20, N20	0 to +70
—	—	ADC0848BCN	—	8-Bit µP Compatible ADC with 8-Channel MUX	Note 1	5	15	1/2	40.000	N24	0 to +70
—	—	ADC0848CCN	—	8-Bit µP Compatible ADC with 8-Channel MUX	Note 1	5	15	1	40.000	N24	0 to +70
—	—	ADC0851BIN	ADC0851BIV	8-Bit Analog Data Acquisition and Monitoring System	Note 1	5	50	1/2	18.000	N16, V20	–20 to +85
—	—	ADC08032CIN	—	8-Bit High-Speed Serial I/O ADC with 2-Channel MUX	Note 1	5	20	1/2	8.000	M14, N8	–20 to +85
—	ADC08034BIWM	ADC08034BIN	—	8-Bit High-Speed Serial I/O ADC with 4-Channel MUX	Note 1	5	20	1/2	8.000	M14, N14	–20 to +85
—	—	ADC08061BIN	—	500 ns ADC with S/H	Note 1	5	100	1/2	0.560	N20	–20 to +85
—	ADC08138BIWM	—	—	8-Bit High-Speed Serial I/O ADC with 8-Channel MUX	Note 1	5	20	1/2	8.000	M20	–20 to +85
—	ADC08234CIWM	—	—	8-Bit Serial ADC with MUX, Reference, and Track/Hold	Note 1	5	20	1/2	2.000	M14, N14	–20 to +85

10-Bit A/D Converters

ADC1001CCJ	—	—	—	10-Bit µP Compatible ADC	Note 1	5	32	1	200.000	N20	–40 to +85
ADC1001CCJ-1	—	—	—	10-Bit µP Compatible ADC	Note 1	5	32	1	200.000	N20	–40 to +85
ADC1005BCJ	—	—	—	10-Bit µP Compatible ADC	Note 1	5	130	1/2	50.000	N20, V20	–40 to +85
ADC1005CCJ-1	—	—	—	10-Bit µP Compatible ADC	Note 1	5	130	1	50.000	N20, V20	–40 to +85
	—	ADC1031CIN	—	10-Bit Serial I/O ADC with Analog Multiplexer and Track/Hold Function	Note 1	5	20	1/2	13.700	N8	–20 to +85
—	—	ADC1034CIN	—	10-Bit Serial I/O ADC with Analog Multiplexer and Track/Hold Function	Note 1	5	20	1/2	13.700	C16, M16, N16	–20 to +85
—	—	ADC1038CIN	—	10-Bit Serial I/O ADC with Analog Multiplexer and Track/Hold Function	Note 1	5	20	1/2	13.700	C20, M20, N20	–20 to +85
—	—	ADC10061CIN	—	10-Bit 600 ns ADC with Sample/Hold	Note 1	5	235	1	0.600	C20, M20, N20	–20 to +85
—	—	ADC10062CIN	—	10-Bit 600 ns ADC with Input Multiplexer and Sample/Hold	Note 1	5	235	1	0.600	C24, M24, N24	–20 to +85
—	—	ADC10154CIN	—	10-Bit ADC with 4-Channel MUX, Track/Hold and Ref.	Note 1	5, ±5	33*	0.6	4.400	C24, M24, N24	–20 to +85
—	ADC10158CIWM	ADC10158CIN	—	10-Bit ADC with 8-Channel MUX, Track/Hold and Ref.	Note 1	5, ±5	33*	0.6	4.400	C24, M24, N24	–20 to +85
—	ADC10664CIWM	ADC10664CIN	—	10-Bit 360 ns ADC with 4-Channel MUX and Sample/Hold	Note 1	5	235	1.5	0.466	C28, M28, N28	–20 to +85

*For unipolar operation. Note 1: 1995 Data Acquisition Databook.

Digital to Analog Converters

Mfr.'s Type			Description	Databook Reference	V_{CC} (V)	Power Consumption (mW)	Linearity (Max.) (%)	Settling Time (ns)	No. of Leads	Temperature Range (°C)
CERDIP	SOIC	PDIP								
DAC0800LCJ	—	DAC0800LCN	8-Bit DAC	Note 1	±(5 to 15)	500	0.19	100.0	J16, N16	0 to +7
—	—	DAC0801LCN	8-Bit DAC	Note 1	±(5 to 15)	500	0.39	100.0	N16	0 to +7
—	—	DAC0806LCN	8-Bit DAC	Note 1	±(5 to 15)	33	0.78	150.0	N16	0 to +7

Logic (continued)

DM74AS Logic

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
DM74AS00M	DM74AS00N	Quad 2-Input NAND Gate	14
DM74AS02M	DM74AS02N	Quad 2-Input NOR Gate	14
DM74AS04M	DM74AS04N	Hex Inverter	14
DM74AS08M	DM74AS08N	Quad 2-Input AND Gate	14
DM74AS1000AM	DM74AS1000AN	Quad 2-Input NAND Driver	14
DM74AS1004AM	DM74AS1004AN	Hex Inverting Driver	14
—	DM74AS1032AN	Quad 2-Input OR Driver	14
DM74AS1034AM	—	Hex Non-Inverting Driver	14
DM74AS10M	DM74AS10N	Triple 3-Input NAND Gate	14
DM74AS157M	DM74AS157N	Quad 2/1 Data Sel/Multiplexer	16
—	DM74AS20N	Dual 4-Input NAND Gate	14
—	DM74AS21N	Dual 4-Input AND Gate	14
DM74AS240WM	DM74AS240N	Octal Inv Bus/Line Driver	20
DM74AS244WM	DM74AS244N	Octal Bus/Line Driver	20
DM74AS245WM	DM74AS245N	Tri-State Octal Transceiver	20

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
—	DM74AS257N	Quad Tri-State 2/1 Multiplexer	16
DM74AS258M	DM74AS258N	Quad Tri-State 2/1 Multiplexer	16
—	DM74AS27N	Triple 3-Input NOR Gate	14
DM74AS286M	DM74AS286N	9-Bit Parity Generator	14
—	DM74AS30N	8-Input NAND Gate	14
DM74AS32M	DM74AS32N	Quad 2-Input OR Gate	14
DM74AS373WM	DM74AS373N	Tri-State Octal Latch	20
—	DM74AS374N	Tri-State Octal D Flip-Flop	20
—	DM74AS573N	Octal D-Type Latch	20
—	DM74AS574N	Octal D-Type Flip-Flop	20
—	DM74AS640N	Tri-State Octal Transceiver	20
DM74AS646WM	DM74AS646NT	Octal Bus Transceiver	24
—	DM74AS648NT	Octal Bus Transceiver	24
DM74AS804BWM	DM74AS804BN	Hex 2-Input NAND Line Driver	20
—	DM74AS874NT	Octal D-Type Flip-Flop	24

MM74C Logic

—	MM74C00N	Quad Two-Input NAND Gate	14
—	MM74C02N	Quad Two-Input NOR Gate	14
—	MM74C08N	Quad 2-Input AND Gate	14
—	MM74C10N	Triple 3-Input NAND Gate	14
—	MM74C154N	4 Line To 16 Line Decoder	24
—	MM74C157N	Quad 2-Input Multiplexer	16
—	MM74C164N	8-Bit Serial In/Parallel Out Shift Register	14
—	MM74C221N	Dual Monostable Multivibrator	16
—	MM74C240N	Tri-State Octal Buffers	20
—	MM74C244N	Tri-State Octal Buffers	20
—	MM74C32N	Quad 2-Input OR Gate	14
—	MM74C373N	Octal Flow-Through Latch 3-State	20
—	MM74C374N	Octal D Flip-Flop 3-State	20

—	MM74C42N	BCD To Decimal Decoder	16
MM74C74M	MM74C74N	Dual D Flip-Flop	14
—	MM74C85N	4-Bit Comparator	16
—	MM74C902N	Hex Inverting Buffer	14
—	MM74C905N	12-Bit CMOS Successive Approximation Register	24
MM74C906M	MM74C906N	Open Drain Hex Buffer-Active Pull	14
—	MM74C911N	Display Controller	28
—	MM74C912N	Display Controller	28
—	MM74C914N	Hex Schmitt Trigger Inverter	14
—	MM74C922N	16 Key Keyboard Encoder	18
—	MM74C923N	20 Key Keyboard Encoder	20
—	MM74C925N	4-Digit Counter w/Multiplexer D Segment Driver	16
—	MM74C926N	4-Digit Counter w/Multiplexer D Segment Driver	18

74F Logic

74F00SC	74F00PC	Quad 2-Input NAND	14
—	74F02PC	Quad 2-Input NOR	14
74F04SC	74F04PC	Hex Inverter	14

Quick Cross

► **NTE's Computer Based Cross Reference Disk for Semiconductors and Relays**

NTE Electronics, Inc. has taken its entire Semiconductor and Relay Cross References and put them on IBM PC compatible diskettes. These disks, once loaded into your PC, will only take up a little more than 2 Megabytes of disk space. You will have instant access to over 250,000 Semiconductor Cross References and 22,000 Relay Cross References. Minimum system requirements are an IBM PC compatible computer with 640K RAM, 5 MB hard disk.

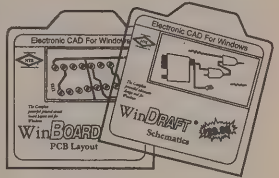
WinBoard and WinDraft for Windows

— NEW —



WinBoard has everything you need for high-speed circuits, analog designs and dense SMT boards. Add in point-and-click editing, powerful copper pour, routing and a library of over 700 module footprints-plus a graphical editor for customer jobs — and you can see why WinBoard is so hot.

WinDraft is the ideal front-end complement to WinBoard. In just minutes, WinDraft can turn your PC into an electronic drafting table. You can do it all — from wiring and drawing to printing and finishing. And WinDraft makes your life even easier with a full graphical library editor, Bill of Materials (BOM), a clean-up tool and on-line help for troubleshooting.

The WD350 and WB350 include an 85-page getting started and tutorial manual for the programs.

Thermo-Pads

NTE's THERMO-PADS do away with the old fashioned and messy mica wafer and conductive grease method of mounting power semiconductors. These thermally conductive insulators offer low heat transfer resistance while still providing high electrical isolation between the parts of the assembly. The elastomeric material combines the electrical isolation of rigid insulators with the ability to conform to rough surfaces and reduce contact resistance in much the same manner as thermal greases. Proper selection and use of these thermo-pads results in a securely-mounted power semiconductor and minimum resistance to the the heat transfer between it and the heat sink.

Typical Properties
Color: .009 Inch Thickness — Gray; Test Method — Visual. **Breaking Strength, Lbs./Inch:** .009 Inch Thickness — 100; Test Method — ASTM D 1458. **Elongation, Percent:** .009 Inch Thickness — 4; Test Method — ASTM D 412. **Volume Resistance Ohm Metre Minimum Normal:** .009 Inch Thickness — 1.0 × 10^{13} , Test Method — ASTM D 257. **Volume Resistance Ohm Metre Minimum Moist:** .009 Inch Thickness — 1.5 × 10^{10}, Test Method — ASTM D 257. **Breakdown Voltage, Minimum Normal:** .009 Inch Thickness — 5000; Test Method — ASTM D 149. **Moist:** .009 Inch Thickness — 2500; Test Method — ASTM D 149. **Dielectric Constant 1000 Cups (HZ):** .009 Inch Thickness — 5.5; Test Method — ASTM D 150. **Continuous Use Temp. °C:** .009 Inch Thickness –60 to +180. **Thermal Conductance W/m-k:** .009 Inch Thickness — 0.7. **Thermal Vacuum Weight Loss Percent (TML) Maximum As Manufactured:** .009 Inch Thickness — .40; Test Method — NASA. **Thermal Vacuum Weight Loss Percent (TML) Maximum Post Cure 24 Hrs @ 400°F:** .009 Inch Thickness — .25; Test method — SP-R-0022A. **Volatile Condensable Material, Percent, Maximum (CVCM) As Manufactured:** .009 Inch Thickness — .11; Test Method — NASA. **Volatile Condensable Material, Percent, Maximum (CVCM) Post Cure 24 Hrs.@ 400°F:** .009 Inch Thickness — .07; Test Method — SP-R-0022A. **Hardness, Shore A:** .009 Inch Thickness — 85; Test Method — ASTM D 2240. **Specific Gravity:** .009 Inch Thickness — 2.0-2.1. **Thickness (Expressed In Inches):** .009 Inch Thickness — .009 (+.002, –.001). **Thermal Resistance (TO-3 Transistor) °C/Watt:** .009 Inch Thickness — .50.

Logic

74ABT Logic Devices

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
74ABT125D	—	Quad Buffer, 3-State	14
74ABT244D	74ABT244N	Octal Buffer/Line Driver, 3-State	20
74ABT245D	74ABT245N	Octal Transceiver, 3-State	20
74ABT541D	74ABT541N	Octal Buffer/Line Driver, 3-State	20
—	74ABT573N	D-Type Transparent Latch	20
74ABT574D	74ABT574N	Octal D Flip-Flop, 3-State	20
74ABT657D	—	Octal Transceiver with Parity Generator/Checker	24
74ABT821D	—	10-Bit D-Type Flip-Flop, 3-State	24
74ABNT841D	—	10-Bit Bus Interface Latch, 3-State	24

74F Fast TTL Logic Devices

74F04D	74F04N	Hex Inverter	14
74F06D	—	Hex Inverter Buffer/Driver, Open-Collector	14
74F07D	74F07N	Hex Inverter Buffer/Driver, Open-Collector	14
—	74F08N	Quad 2-Input AND Gate	14
74F1244D	74F1244N	Octal Bus/Line Driver	20
74F125D	—	Quad 3-State Bus Buffer	14
74F14D	—	Hex Schmitt Trigger	14
—	74F153N	Dual 4-Input Multiplexer	16
—	74F164N	8-Bit Serial In/Parallel Out Shift Register	14
74F166D	74F166N	8-Bit Shift Register	16
74F191D	74F191N	Binary Up/Down Counter	16
74F244D	74F244N	Octal Buffer, 3-State	20
74F245D	74F245N	Octal Bus Transceiver	20
74F269D	74F269N	8-Bit Bidirectional Binary Counter	24
74F273D	74F273N	Octal D-Type Flip-Flop	20
74F283D	—	4-Bit Adder	16
74F299D	—	Octal Shift/Storage Register, 3-State	20
74F3037D	74F3037N	Quad 2-Input NAND Transceiver/Line Driver	16
74F32D	74F32N	Quad 2-Input OR Gate	14
74F367D	—	Hex Buffer, 4-Bit and 2-Bit, 3-State	16
74F373D	74F373N	Octal 3-State Latch	20
74F374D	74F374N	Octal D Flip-Flop, 3-State	20
74F377D	74F377N	Octal D Flip-Flop with Enable	20
74F38D	74F38N	Quad 2-Input NAND Buffer, Open-Collector	14
—	74F393N	Dual Binary Ripple Counter	14
—	74F521N	8-Bit Ident Comparator	20
74F540D	74F540N	Octal 3-State Driver/Buffer	20
74F541D	74F541N	Octal 3-State Driver/Buffer	20
74F543D	74F543N	Octal Transceiver, Bidirectional Latch	24
74F573D	74F573N	Octal D-Type Latch	20
74F574D	74F574N	Octal D Flip-Flop	20
74F579D	74F579N	8-Bit Counter Common I/O, 3-State	20
74F595D	74F595N	8-Bit Shift Register with Latch	16
74F646D	74F646N	Octal Bus Transceiver and Register	24
74F652AD	74F652AN	Octal Bus Transceiver and Register, Non-Inverting, 3-State	24
74F657D	74F657N	Octal Buffer with Parity Generator/Checker	24
74F74D	74F74N	Dual D-Type Edge Triggered Flip-Flop	14
74F760D	—	Octal Bus/Line Driver, Inverting	20
74F779D	74F779N	8-Bit Counter	16
74F786D	74F786N	4-Input Asynchronous Bus Arbiter	16
74F821D	74F821N	10-Bit Register, Non-Inverting, 3-State	24
74F823D	74F823N	9-Bit Register, Non-Inverting, 3-State	24
74F827D	74F827N	10-Bit Buffer/Driver, Non-Inverting, 3-State	24
74F841D	74F841N	10-Bit Latch, Non-Inverting, 3-State	24
74F85D	74F85N	4-Bit Magnitude Comparator	16

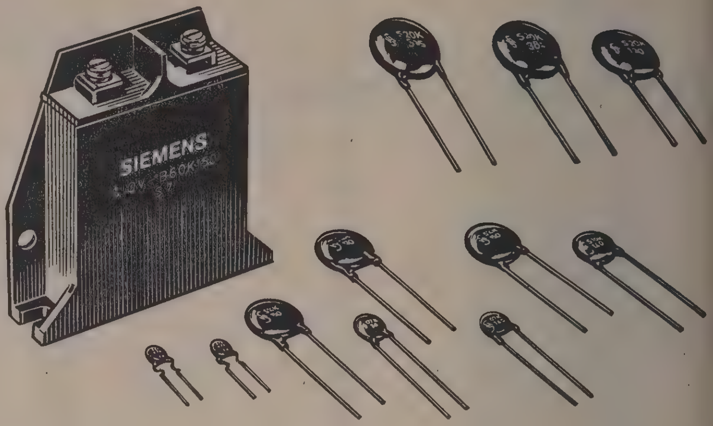
SIOV™ Metal Oxide Varistors

The SIOV will fit applications requiring protection at operating voltage levels as low as 11 volts and as high as 1100 volts with energies rated up to 15000 Joules, depending on the device selected.



Typical Protection Applications

- Protection of Semiconductors (Diodes, Transistors, Thyristors, ICs, Etc.)
- Appliances Connected to 110 V or 220 VAC
- Industrial Equipment Vulnerable to Transients on the AC Power Line (Computers, Traffic Controls, Motor Controllers, Etc.)
- Protection of Equipment Connected to Telephone or Signal Lines, Such as Security Systems, Railroad Equipment, Fire Alarm Systems, Etc.
- Arc Suppression Across Relay and Switch Contacts
- Protection of Instrument Input Terminals from Accidentally Connected High Voltages
- Power Control Equipment for Power Distribution Lines
- GFI (Ground Fault Interrupters)

Features

- Nanosec. Switching Response Time, <15 nsec., with Minimal Lead Length
- High Transient Current Capability (Up to 100,000 Amps)
- No Extinguishing or Follow-On Current Limitations
- Small Size for Compact Designs
- Wide Operating Temperature Range: –40 to +85°C
- Compatible with Automatic Insertion; Tape and Reel Configuration Available on S05, S07, S10 and S14 Series
- Excellent Clamping Characteristics
- Low Standby Power Consumption

Benefits

- Eliminates Dangerous Voltage Transients
- Lowers Overall System Costs by Reducing Downtime and Maintenance Costs
- Improves Component and System Reliability
- Reduces Lightning Effects
- Reduces EMP/RFI Interference
- Promotes Personal Safety

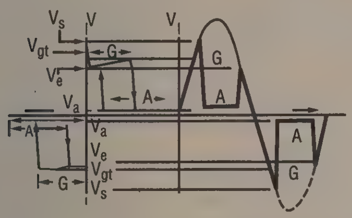
SVP — Surge Voltage Protectors

- **High Surge Current Capacity at 20KA Maximum**
- **High Insulation Resistance at ≥1010 Ohm**
- **Low Capacitance — Down to 1pF**
- **High Breakdown Speed**
- **Low Cost**
- **Small Size**
- **Designed to Meet Industry Specifications**
- **Proven Performance: Millions in Service**

The SVP is bipolar and has a symmetrical V-1 characteristic as shown below.



Voltage-current characteristic and voltage variation across the protector.

Vs	striking voltage	Ve	extinguishing voltage
Vgt	glow voltage	G	glow range
Va	arc voltage	A	arc range

Surge Voltage Protectors. SVPs are gas discharge tubes, hermetically sealed, composed of 2 or 3 electrodes properly spaced by insulators and filled with a rare gas. SVPs mainly serve to provide a conductive path for unwanted, excessive transients, which prevents the transient energy and associated voltages from damaging sensitive equipment and components, and from harming personnel. Designed for rapid switching at a specific voltage level (breakdown voltage) from a non-conductive state to a conductive state (arc mode) when subjected to an excessive voltage transient. The SVP momentarily carries very high currents during conduction. After discharge of the transient, the circuit allows the SVP to restore itself. In the restored conduction, the high impedance of the SVP causes very little loss. Normal AC or DC operating circuit voltages may cause the SVP to remain in a conducting mode after the transient has passed, unless the following precautions are taken: for AC Applications — the AC follow current must not be exceeded; For DC Applications — if the normal operating voltage across the tube is greater than the glow voltage, and the current into the SVP while in arc mode, (10-20 V across the SVP) does not exceed 0.2A, a 0.68 µfd. capacitor placed in parallel with the tube will cause it to extinguish. If the DC is greater than the given values, current must be momentarily interrupted. **Electrical Characteristics Common To All Types:** Transition Time — 0.1 µs typ. **R_{INS}:** ≥ 10,000 megohm. **Capacitance:** 1 pF typ. at 1 MHz. **Operating and Storage Temperature Range:** –55°C to +130°C.

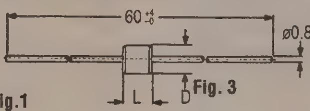


Fig.1

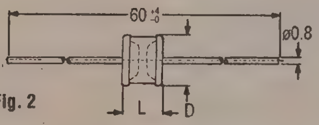

Fig. 2

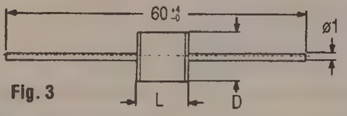

Fig. 3

Button Type SVPs. Compact medium-duty 2-electrode tubes provide protection for most circuit applications. Features high breakdown speed by means of a patented process. Economical; easily mounted onto PC boards.

Special Button Type SVPs. Special L71 types for AC applications undergo AC burn-in to guarantee good extinguishing characteristics at high follow currents — excellent for CATV amplifiers and other applications where AC Voltage is present.

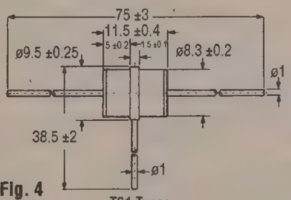

Fig. 4

T61 Types

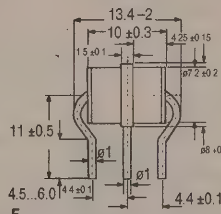

Fig. 5

T23 Types

Three-Electrode Type SVPs. Developed and refined through experience gained from actual use in telecommunications equipment. These units are designed to meet or exceed parameters specified in REA Specification PE-80.

[1] 11 cycles, 60 Hz, 1 Time. [2] 60 VRMS. [3] Line to ground, single side. [4] Changing polarity after each surge. [5] Suggested Siemens limiting Varistor (SIOV). [6] In accordance with IEEE C62.31.

If you don't see it, call! We carry Simple Technology's complete line of 1500 memory upgrade products for portables, workstations, servers, printers, desktop systems, PDAs, and more. Please call for current pricing and availability.

Every Simple Technology product is tested for 100% compatibility and is backed with a lifetime warranty.

Simple Technology memory upgrades are recognized and approved by leading computer manufacturers.

INDIVIDUALLY TESTED 100% COMPATIBLE

LIFETIME WARRANTY

ThinkPad 760 E Series
STM7340/8. 8 MB Memory Module, EDO
STM7340/16. 16 MB Memory Module, EDO

NEC

Versa 6000, 6030 Series
STN-V6000/8. 8 MB Memory Module
STN-V6000/16. 16 MB Memory Module
STN-V6000/32. 32 MB Memory Module

Versa 2000 Series
STN-VERSA/8S. 8 MB Memory Module
STN-VERSA/16S. 16 MB Memory Module

Versa 4000 Series, E, V, M, P
STN-VERSA/4E. 4 MB Memory Card
STN-VERSA/8E. 8 MB Memory Card
STN-VERSA/12. 12 MB Memory Card
STN-VERSA/16. 16 MB Memory Card
STN-VERSA/20. 20 MB Memory Card
STN-VERSA/32. 32 MB Memory Card

Texas Instruments

Extensa 450 Series, 550 Series, 560 Series, 570 Series
STI-EXTENSA/8. 8 MB Memory Module
STI-EXTENSA/16. 16 MB Memory Module

Extensa 510, 515
STI-EXT510/8. 8 MB Memory Kit, EDO

TravelMate 5000 Series
STI5000/8. 8 MB Memory Module
STI5000/16. 16 MB Memory Module

SIMM Memory Modules

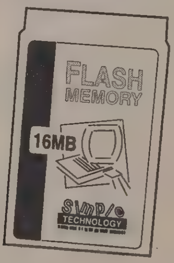
Standard Memory 72-Pin, Non-Parity, 70ns

STI321000-70T. 4 MB (1 × 32) Tin Lead
STI322000-70T. 8 MB (2 × 32) Tin Lead
STI324000-70T. 6 MB (4 × 32)Tin Lead
STI324100-70T. 32 MB (8 × 32) Tin Lead

Standard Memory 72-Pin, Parity, 70ns

STI361000-70T. 4 MB (1 × 32) Tin Lead
STI362000-70T. 8 MB (2 × 32) Tin Lead
STI364000-70T. 16 MB (4 × 32)Tin Lead
STI364100-70T. 32 MB (8 × 32) Tin Lead

Digital "Film" for Your Digital Camera



Linear Flash PC Cards

1 MB, 2 MB, 6 MB, 10 MB, 12 MB, 14 MB available, call for current pricing and availability. **Compatible with These Digital Cameras:** Chinon 3000, DayCam 10-C in 4 MB-20 MB capacities.
STI-FL/4A. 4 MB Memory.
STI-FL/8A. 8 MB Memory.
STI-FL/16A. 16 MB Memory.

ATA Flash PC Cards

4 MB, 12 MB, 40 MB available, call for current pricing and availability. **Compatible with These Digital Cameras:** Kodak DC-50, Nikon E2, Nikon E2S, Fujix 505, Fujix 515, Fujix 440 in 4MB-20MB capacities.
STI-ATAFL/8. 8 MB ATA Memory.
STI-ATAFL/16. 16 MB ATA Memory.
STI-ATAFL/20. 20 MB ATA Memory.

CompactFlash™

STI-ATACF/4. 4 MB Memory
STI-ATACF/8. 8 MB Memory
STI-ATACF/AD. Adapter to Type II

Simple Technology Removable Hard Drives

Each Simple Technology removable hard drive is pre-formatted with Ontrack Disk Manager (software included). Guaranteed for one full year. 13 msec. average seek, 128 KB buffer. **Data Transfer Rate:** 810 MB, 11.1 MB/sec.; 1.3 GB, 16.6 MB/sec.; 2.1 GB, 16.6 MB/sec.

Mfr.'s Type			Computer Model
Hard Drive Capacity

Logic

SN7400: TTL Logic

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
SN7400D	SN7400N	Quad 2-Input NAND Gate	14
—	SN7402N	Quad 2-Input Positive-NOR Gate	14
—	SN7404N	Hex Inverter	14
SN7405D	SN7405N	Hex Inverter with Open Collector Outputs	14
SN7406D	SN7406N	Hex Inverter with Open Collector Outputs	14
SN7407D	SN7407N	Hex Inverter with Open Collector Outputs	14
—	SN7410N	Triple 3-Input Positive-NAND Gate	14
—	SN74121N	One Shot Multivibrator	14
—	SN74123N	Dual Monostable Multivibrator	16
—	SN74128N	50 Ohm Line Driver	14
—	SN74132N	Quad 2-Input Positive-NAND Schmitt Trigger	14
—	SN74145N	BCD-to-Decimal Decoder/Driver	16
SN7414D	SN7414N	Hex Schmitt-Trigger Inverter	14
—	SN74150N	Data Selector/Multiplexer	24
—	SN74154N	4-to-16 Line Decoder/Demultiplexer	24
—	SN74156N	Dual 1 - 4 Decoder with Open Collector Outputs	16
—	SN74157N	Quad 1-of-2 Data Selector/Multiplexer	16
—	SN74159N	4 - 16 Line Decoder/Demultiplexer	24
—	SN74164N	8-Bit Parallel-Out Serial Shift Register	14
SN7416D	SN7416N	Hex Inverter/Driver	14
—	SN74175N	Quad D-Type Flip-Flop	16
SN7417D	SN7417N	Hex Buffer/Driver with Open Collector Outputs	14
—	SN74279N	Quad Set/Rest Latch	16
—	SN7430N	8-Input Positive-NAND Gate	14
—	SN7432N	Quad 2-Input Positive-OR Gate	14
—	SN7437N	Quad 2-Input Positive-NAND Buffer	14
SN7438D	SN7438N	Quad 2-Input NAND Buffer with Open Collector Outputs	14
—	SN7445N	BCD-to-Decimal Decoder/Driver	14
—	SN7447AN	BCD-to-7 Segment Decoder/Driver	16
—	SN7474N	Dual D-Type Flip-Flop	14
—	SN7486N	Quad 2-Input Exclusive-OR Gate	14
—	SN7490AN	Decade Divide-by-12 Counter	14
—	SN7425N	Dual 4-Input NOR Gate	14

74ACT11: Advanced CMOS TTL Logic

74ACT11008D	74ACT11008N	Quad 2-Input Positive-AND Gate	16
74ACT11240DW	74ACT11240NT	Octal Buffer/Line Driver with 3-State Outputs	24
74ACT11244DW	74ACT11244NT	Octal Buffer/Line Driver with 3-State Outputs	24
74ACT11245DW	74ACT11245NT	Octal Bus Transceiver with 3-State Outputs	24
74ACT11373DW	74ACT11373NT	Octal D-Type Transparent Latch with 3-State Outputs	24
—	74ACT11374NT	Octal D-Type Flip-Flop with 3-State Outputs	24
74ACT11544DW	—	Octal Registered Transceiver with 3-State Outputs	28
74ACT11593DW	74ACT11593NT	8-Bit Binary Counter with 3-State I/O Register	24
74ACT11657DW	—	Octal Xceiver with Parity Generator/Counter	28
74ACT11898DW	—	10-Bit Parallel-Out Shift Register	20
74ACT16241DL	—	16-Bit Buffer/Line Driver with 3-State Outputs	48
74ACT16244DL	—	16-Bit Buffer/Line Driver with 3-State Outputs	48
74ACT16245DL	—	16-Bit Bus Transceiver with 3-State Outputs	48
74ACT16373DL	—	16-Bit D-Type Transparent Latch with 3-State Outputs	48
74ACT16374DL	—	16-Bit D-Type Flip-Flop with 3-State Outputs	48
74ACT16470DL	—	16-Bit Registered Transceiver with 3-State Outputs	56
74ACT16474DL	—	18-Bit Flip-Flop	56
74ACT16540DL	—	16-Bit Buffer/Line Driver with 3-State Outputs	48
74ACT16541DL	—	16-Bit Buffer/Line Driver with 3-State Outputs	48
74ACT16543DL	—	16-Bit Registered Transceiver with 3-State Outputs	56
74ACT16620DL	—	16-Bit Transceiver with 3-State Outputs	48
74ACT16646DL	—	16-Bit Bus Xceiver AND Register with 3-State Outputs	56
74ACT16648DL	—	16-Bit Bus Xceiver AND Register with 3-State Outputs	56
74ACT16652DL	—	16-Bit Bus Xceiver AND Register with 3-State Outputs	56
74ACT16861DL	—	20-Bit Transceiver with 3-State Outputs	56
74ACT16864DL	—	18-Bit Transceiver with 3-State Outputs	56

SN74ALS: Advanced Low Power Schottky TTL Logic

SN74ALS00AD	SN74ALS00AN	Quad 2-Input Positive-NAND Gate	14
SN74ALS02AD	—	Quad 2-Input Positive-NOR Gate	14
SN74ALS04BD	SN74ALS04BN	Hex Inverter	14
SN74ALS05AD	SN74ALS05AN	Hex Inverter with Open-Collector Outputs	14
SN74ALS08D	SN74ALS08N	Quad 2-Input Positive-AND Gate	14
SN74ALS1005D	SN74ALS1005N	Hex Inverting Buffer with Open-Collector Outputs	14
—	SN74ALS1034N	Hex Driver	14
SN74ALS1035D	SN74ALS1035N	Hex Noninverting Buffer with Open-Collector Outputs	14
SN74ALS109AD	SN74ALS109AN	Dual J-K-Bar Flip-Flop	16
SN74ALS10AD	SN74ALS10AN	Triple 3-Input Positive-NAND Gate	14
—	SN74ALS11AN	Triple 3-Input Positive-AND Gate	14
SN74ALS139D	SN74ALS139N	Dual 2-To-4 Decoder/Demultiplexer	16
SN74ALS151D	SN74ALS151N	8-To-1 Data Selector/Multiplexer	16
SN74ALS153D	SN74ALS153N	Dual 4-To-1 Data Selector/Multiplex	16
SN74ALS157AD	SN74ALS157AN	Quad 1-Of-2 Data Selector/Multiplex	16
SN74ALS161BD	SN74ALS161BN	4-Bit Synchronous Binary Counter	16
SN74ALS163BD	SN74ALS163BN	4-Bit Synchronous Binary Counter	16
SN74ALS1645ADW	SN74ALS1645AN	Octal Bus Transceiver with 3-State Outputs	20
—	SN74ALS165N	8-Bit Parallel-Load Shift Register	16
SN74ALS174D	SN74ALS174N	Hex D-Type Flip-Flop	16
SN74ALS175D	SN74ALS175N	Quad D-Type Flip-Flop	16
SN74ALS240ADW	SN74ALS240AN	Octal Buffer/Line Driver with 3-State Outputs	20
SN74ALS241BDW	SN74ALS241BN	Octal Buffer/Line Driver with 3-State Outputs	20
SN74ALS245A-1DW	SN74ALS245A-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS245ADW	SN74ALS245AN	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS251D	SN74ALS251N	1-Of-8 Data Selector/Mux with 3-State Outputs	16
SN74ALS253D	SN74ALS253N	Dual 4-To-1 Data Selector/Mux with 3-State Outputs	16
SN74ALS259D	SN74ALS259N	8-Bit Addressable Latch	16
SN74ALS273DW	SN74ALS273N	Octal D-Type Flip-Flop	20
SN74ALS29821DW	SN74ALS29821NT	10-Bit D-Type Flip-Flop with 3-State Outputs	24
SN74ALS29827DW	SN74ALS29827NT	10-Bit Buffer/Driver with 3-State Outputs	24
SN74ALS29863DW	SN74ALS29863NT	9-Bit Transceiver with 3-State Outputs	24

SN74ALS: Advanced Low Power Schottky TTL Logic (continued)

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
SN74ALS299DW	SN74ALS299N	8-Bit Universal Shift/Storage Register	20
SN74ALS32D	SN74ALS32N	Quad 2-Input Positive-OR Gate	14
SN74ALS373ADW	SN74ALS373AN	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74ALS374ADW	SN74ALS374AN	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74ALS520DW	SN74ALS520N	8-Bit Identity Comparator	20
SN74ALS521DW	SN74ALS521N	8-Bit Identity Comparator	20
SN74ALS540DW	SN74ALS540N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74ALS541DW	SN74ALS541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74ALS569ADW	SN74ALS569AN	4-Bit Synchronous Up/Down Binary Counter	20
—	SN74ALS573CN	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74ALS574BDW	SN74ALS574BN	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74ALS576BDW	SN74ALS576BN	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74ALS623ADW	SN74ALS623AN	Octal Transceiver with 3-State Outputs	20
SN74ALS640B-1DW	SN74ALS640B-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS640BDW	SN74ALS640BN	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS641A-1DW	SN74ALS641A-1N	Octal Bus Transceiver with Open-Collector Outputs	20
SN74ALS645A-1DW	SN74ALS645A-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS645ADW	SN74ALS645AN	Octal Bus Transceiver with 3-State Outputs	20
SN74ALS651DW	SN74ALS651NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74ALS652-1DW	SN74ALS652-1NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74ALS652DW	SN74ALS652NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74ALS666DW	SN74ALS666NT	Octal D-Type Transparent Read-Back	24
SN74ALS688DW	SN74ALS688N	8-Bit Identity Comparator	20
SN74ALS74AD	SN74ALS74AN	Dual D-Type Flip-Flop	14
SN74ALS841DW	SN74ALS841NT	10-Bit D-Type Latch with 3-State Outputs	24
SN74ALS867ADW	SN74ALS867ANT	8-Bit Synchronous Up/Down Binary Counter	24
SN74ALS869DW	SN74ALS869NT	8-Bit Synchronous Up/Down Binary Counter	24
SN74ALS86D	SN74ALS86N	Quad 2-Input Exclusive-OR Gate	14
SN74ALS874BDW	SN74ALS874BNT	Dual 4-Bit D-Type Flip-Flop with 3-State Outputs	24
SN74ALS990DW	SN74ALS990N	8-Bit D-Type Transparent Read-Back	20
SN74ALS992DW	SN74ALS992NT	9-Bit D-Type Read-Back Latch with 3-State Outputs	24
SN74ALS996DW	SN74ALS996NT	8-Bit D-Type Read-Back Latch with 3-State Outputs	24

SN74AS: Advanced Schottky TTL Logic

SN74AS00D	SN74AS00N	Quad 2-Input Positive-NAND Gate	14
SN74AS04D	SN74AS04N	Hex Inverter	14
SN74AS08D	SN74AS08N	Quad 2-Input Positive-AND Gate	14
SN74AS1000AD	SN74AS1000AN	Quad 2-Input Positive-NAND Buffer/Driver	14
SN74AS1004AD	SN74AS1004AN	Hex Inverting Driver	14
SN74AS1032AD	SN74AS1032AN	Quad 2-Input Positive-OR Buffer/Driver	14
SN74AS1034AD	SN74AS1034AN	Hex Driver	14
SN74AS11D	SN74AS11N	Triple 3-Input Positive-AND Gate	14
SN74AS138D	SN74AS138N	3-To-8 Decoder/Demultiplexer	16
SN74AS157D	SN74AS157N	Quad 1-Of-2 Data Selector/Multiplexer	16
SN74AS158D	SN74AS158N	Quad 1-Of-2 Data Selector/Multiplexer	16
SN74AS161D	SN74AS161N	4-Bit Synchronous Binary Counter	16
SN74AS163D	SN74AS163N	4-Bit Synchronous Binary Counter	16
SN74AS174D	SN74AS174N	Hex D-Type Flip-Flop	16
—	SN74AS1804N	Hex 2-Input NAND Driver	20
SN74AS240DW	SN74AS240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74AS245DW	SN74AS245N	Octal Bus Transceiver with 3-State Outputs	20
SN74AS258D	SN74AS258N	Quad 2-To-1 Data Selector/Mux with 3-State Outputs	16
SN74AS27D	SN74AS27N	Triple 3-Input Positive-NOR Gate	14
SN74AS280D	SN74AS280N	9-Bit Parity Generator/Checker	14
SN74AS286D	SN74AS286N	9-Bit Parity Generator/Checker	14
SN74AS32D	SN74AS32N	Quad 2-Input Positive-OR Gate	14
SN74AS373DW	SN74AS373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74AS374DW	SN74AS374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74AS573ADW	SN74AS573AN	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74AS574DW	SN74AS574N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74AS640DW	SN74AS640N	Octal Bus Transceiver with 3-State Outputs	20
SN74AS646DW	SN74AS646NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74AS648DW	SN74AS648NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74AS651DW	SN74AS651NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74AS652DW	SN74AS652NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74AS760DW	SN74AS760N	Octal Buffer/Line Driver with Open-Collector Outputs	20
SN74AS804BDW	SN74AS804BN	Hex 2-Input NAND Driver	20
SN74AS805BDW	SN74AS805BN	Hex 2-Input NOR Driver	20
SN74AS808BDW	SN74AS808BN	Hex 2-Input Positive-AND Driver	20
SN74AS821ADW	SN74AS821ANT	10-Bit Bus Interface Flip-Flop with 3-State Outputs	24
—	SN74AS867NT	8-Bit Synchronous Up/Down Binary Counter	24
SN74AS869DW	SN74AS869NT	8-Bit Synchronous Up/Down Binary Counter	24
SN74AS873ADW	SN74AS873ANT	Dual 4-Bit D-Type Latch with 3-State Outputs	24
SN74AS874DW	SN74AS874NT	Dual 4-Bit D-Type Flip-Flop with 3-State Outputs	24
SN74AS885DW	SN74AS885NT	8-Bit Magnitude Comparator	24

SN74BCT: BiCMOS Bus Interface Logic

SN74BCT2240DW	SN74BCT2240N	Octal Buffer with 3-State Outputs (Series Resistors)	20
SN74BCT2244DW	SN74BCT2244N	Octal Buffer with 3-State Outputs (Series Resistors)	20
SN74BCT2245DW	SN74BCT2245N	Octal Bus Xver with 3-State Outputs (Series Resistors)	20
SN74BCT244DW	SN74BCT244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74BCT245DW	SN74BCT245N	Octal Bus Transceiver with 3-State Outputs	20
SN74BCT25245DW	SN74BCT25245NT	25-Ohm Octal Bus Transceiver with 3-State Outputs	24
SN74BCT2827CDW	SN74BCT2827CNT	10-Bit Buffer with 3-State Outputs (Series Resistors)	24
SN74BCT2828BDW	SN74BCT2828BNT	10-Bit Buffer with 3-State Outputs (Series Resistors)	24
SN74BCT2953DW	SN74BCT2953NT	Octal Reg Transceiver with Clock Enable	24
SN74BCT373DW	SN74BCT373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74BCT543DW	SN74BCT543NT	Octal Registered Transceiver with 3-State Outputs	24
SN74BCT646DW	SN74BCT646NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74BCT8245ADW	SN74BCT8245ANT	Scope Octal Bus Transceiver	24

SN74F: F-TTL Logic

SN74F00D	SN74F00N	Quad 2-Input Positive-NAND Gate	14
SN74F02D	SN74F02N	Quad 2-Input Positive-NOR Gate	14

Logic (continued)

SN74F: F-TTL Logic (continued)

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
SN74F04D	SN74F04N	Hex Inverter	14
SN74F08D	SN74F08N	Quad 2-Input Positive-AND Gate	14
SN74F1056D	—	8-Bit Schottky Barrier Diode	16
SN74F11D	SN74F11N	Triple 3-Input Positive-AND Gate	14
SN74F125D	SN74F125N	Quad Bus Buffer Gates with 3-State Outputs	14
SN74F126D	SN74F126N	Quad Bus Buffer Gates with 3-State Outputs	14
SN74F138D	SN74F138N	3-To-8 Decoder/Demultiplexer	16
SN74F157AD	SN74F157AN	Quad 1-Of-2 Data Selector/Multiplex	16
SN74F161AD	SN74F161AN	4-Bit Synchronous Binary Counter	16
SN74F163AD	SN74F163AN	4-Bit Synchronous Binary Counter	16
SN74F240DW	SN74F240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74F243D	SN74F243N	Quad Bus Transceiver with 3-State Outputs	14
SN74F244DW	SN74F244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74F245DW	SN74F245N	Octal Bus Transceiver with 3-State Outputs	20
SN74F257D	SN74F257N	Quad 2-To-1 Data Selector/Mux with 3-State Outputs	16
SN74F260D	SN74F260N	Dual 5-Input Positive-NOR Gate	14
SN74F27D	SN74F27N	Triple 3-Input Positive-NOR Gate	14
SN74F280BD	SN74F280BN	9-Bit Parity Generator/Checker	14
SN74F30D	SN74F30N	8-Input Positive-NAND Gate	14
SN74F32D	SN74F32N	Quad 2-Input Positive-OR Gate	14
SN74F373DW	SN74F373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74F374DW	SN74F374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74F38D	SN74F38N	Quad 2-Input P-NAND Buffer with Open Collector Outputs	14
SN74F521DW	SN74F521N	8-Bit Identity Comparator	20
SN74F541DW	SN74F541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74F543DW	SN74F543NT	Octal Registered Transceiver with 3-State Outputs	24
SN74F573DW	SN74F573N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74F574DW	SN74F574N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74F74D	SN74F74N	Dual D-Type Flip-Flop	14

SN74HC: High Speed CMOS Logic

SN74HC00D	SN74HC00N	Quad 2-Input Positive-NAND Gate	14
SN74HC02D	SN74HC02N	Quad 2-Input Positive-NOR Gate	14
SN74HC04D	SN74HC04N	Hex Inverter	14
SN74HC05D	SN74HC05N	Hex Inverter with Open-Collector Outputs	14
SN74HC08D	SN74HC08N	Quad 2-Input Positive-AND Gate	14
SN74HC10D	SN74HC10N	Triple 3-Input Positive-NAND Gate	14
SN74HC125D	SN74HC125N	Quad Bus Buffer Gates with 3-State Outputs	14
SN74HC126D	SN74HC126N	Quad Bus Buffer Gates with 3-State Outputs	14
SN74HC132D	SN74HC132N	Quad 2-Input P-NAND Schmitt-Trigger	14
SN74HC138D	SN74HC138N	3-To-8 Decoder/Demultiplexer	16
SN74HC139D	SN74HC139N	Dual 2-To-4 Decoder/Demultiplexer	16
SN74HC14D	SN74HC14N	Hex Schmitt-Trigger Inverter	14
SN74HC151D	SN74HC151N	8-To-1 Data Selector/Multiplexer	16
SN74HC157D	SN74HC157N	Quad 1-Of-2 Data Selector/Multiplex	16
SN74HC161D	SN74HC161N	4-Bit Synchronous Binary Counter	16
SN74HC163D	SN74HC163N	4-Bit Synchronous Binary Counter	16
SN74HC164D	SN74HC164N	8-Bit Parallel-Out Serial Shift Register	14
SN74HC165D	SN74HC165N	8-Bit Parallel-Load Shift Register	16
SN74HC166D	SN74HC166N	8-Bit Parallel-Load Shift Register	16
SN74HC174D	SN74HC174N	Hex D-Type Flip-Flop	16
SN74HC175D	SN74HC175N	Quad D-Type Flip-Flop	16
SN74HC240DW	SN74HC240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HC244DW	SN74HC244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HC245DW	SN74HC245N	Octal Bus Transceiver with 3-State Outputs	20
SN74HC251D	SN74HC251N	1-Of-8 Data Selector/Mux with 3-State Outputs	16
SN74HC257D	SN74HC257N	Quad 2-To-1 Data Selector/Mux with 3-State Outputs	16
SN74HC273DW	SN74HC273N	Octal D-Type Flip-Flop	20
—	SN74HC32N	Quad 2-Input Positive-OR Gate	14
SN74HC367D	SN74HC367N	Hex Driver with 3-State Outputs	16
SN74HC373DW	SN74HC373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74HC374DW	SN74HC374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74HC377DW	SN74HC377N	Octal D-Type Flip-Flop with Clock Enable	20
SN74HC393D	SN74HC393N	Dual 4-Bit Binary Counter	14
SN74HC4040D	SN74HC4040N	12-Bit Asynchronous Binary Counter	16
SN74HC540DW	SN74HC540N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HC541DW	SN74HC541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HC573ADW	SN74HC573AN	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74HC574DW	SN74HC574N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74HC590ADW	SN74HC590AN	8-Bit Binary Counter with 3-State Outputs	16
SN74HC594DW	SN74HC594N	8-Bit Shift Register with Output Register	16
SN74HC595DW	SN74HC595N	8-Bit Shift Register with 3-State Outputs	16
SN74HC7001D	SN74HC7001N	Quad P-AND Gate with Schmitt-Trigger	14
SN74HC74D	SN74HC74N	Dual D-Type Flip-Flop	14
SN74HC86D	SN74HC86N	Quad 2-Input Exclusive-OR Gate	14

SN74HCT: High Speed CMOS-TTL Logic

SN74HCT00D	SN74HCT00N	Quad 2-Input Positive-NAND Gate	14
SN74HCT04D	SN74HCT04N	Hex Inverter	14
SN74HCT08D	SN74HCT08N	Quad 2-Input Positive-AND Gate	14
SN74HCT138D	SN74HCT138N	3-To-8 Decoder/Demultiplexer	16
SN74HCT240DW	SN74HCT240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HCT244DW	SN74HCT244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HCT245DW	SN74HCT245N	Octal Bus Transceiver with 3-State Outputs	20
SN74HCT273DW	SN74HCT273N	Octal D-Type Flip-Flop	20
SN74HCT32D	SN74HCT32N	Quad 2-Input Positive-OR Gate	14
SN74HCT373DW	SN74HCT373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74HCT374DW	SN74HCT374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74HCT541DW	SN74HCT541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74HCT573DW	SN74HCT573N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74HCT574DW	SN74HCT574N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74HCT646DW	SN74HCT646NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
—	SN74HCT652NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74HCT74D	SN74HCT74N	Dual D-Type Flip-Flop	14

SN74LS: Low Power Schottky TTL Logic

SN74LS00D	SN74LS00N	Quad 2-Input Positive-NAND Gate	14
SN74LS02D	SN74LS02N	Quad 2-Input Positive-NOR Gate	14
SN74LS04D	SN74LS04N	Hex Inverter	14

SN74LS: Low Power Schottky TTL Logic (continued)

Mfr.'s Type		Description	No. of Leads
SOIC	PDIP		
SN74LS05D	SN74LS05N	Hex Inverter with Open-Collector Outputs	14
SN74LS06D	SN74LS06N	Hex Inverter with Open-Collector Outputs	14
SN74LS07D	SN74LS07N	Hex Buffer with Open-Collector Outputs	14
SN74LS08D	SN74LS08N	Quad 2-Input Positive-AND Gate	14
SN74LS10D	SN74LS10N	Triple 3-Input Positive-NAND Gate	14
SN74LS123D	SN74LS123N	Dual Monostable Multivibrator	16
SN74LS125AD	SN74LS125AN	Quad Bus Buffer Gates with 3-State Outputs	14
SN74LS126AD	SN74LS126AN	Quad Bus Buffer Gates with 3-State Outputs	14
SN74LS132D	SN74LS132N	Quad 2-Input P-NAND Schmitt-Trigger	14
SN74LS137D	SN74LS137N	3-To-8 Decoder/Demux with Address Latch	16
SN74LS138D	SN74LS138N	3-To-8 Decoder/Demultiplexer	16
SN74LS139AD	SN74LS139AN	Dual 2-To-4 Decoder/Demultiplexer	16
SN74LS145D	SN74LS145N	BCD-to-Decimal Decoder/Driver	16
SN74LS148D	SN74LS148N	8-To-3 Line Priority Encoder	16
SN74LS14D	SN74LS14N	Hex Schmitt-Trigger Inverter	14
SN74LS151D	SN74LS151N	8-To-1 Data Selector/Multiplexer	16
SN74LS153D	SN74LS153N	Dual 4-To-1 Data Selector/Multiplexer	16
SN74LS156D	SN74LS156N	Dual 2-To-4 Line Decode/Demux with Open Collector Outputs	16
SN74LS157D	SN74LS157N	Quad 1-Of-2 Data Selector/Multiplexer	16
SN74LS161AD	SN74LS161AN	4-Bit Synchronous Binary Counter	16
SN74LS163AD	SN74LS163AN	4-Bit Synchronous Binary Counter	16
SN74LS164D	SN74LS164N	8-Bit Parallel-Out Serial Shift Register	14
SN74LS165AD	SN74LS165AN	8-Bit Parallel-Load Shift Register	16
SN74LS166AD	SN74LS166AN	8-Bit Parallel-Load Shift Register	16
SN74LS174D	SN74LS174N	Hex D-Type Flip-Flop	16
SN74LS175D	SN74LS175N	Quad D-Type Flip-Flop	16
SN74LS193D	SN74LS193N	4-Bit Synchronous Up/Down Binary Counter	16
SN74LS19AD	SN74LS19AN	Hex Schmitt-Trigger Inverter	14
SN74LS221D	SN74LS221N	Dual Monostable Multivibrator	16
SN74LS240DW	SN74LS240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS241DW	SN74LS241N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS244DW	SN74LS244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS245DW	SN74LS245N	Octal Bus Transceiver with 3-State Outputs	20
SN74LS251D	SN74LS251N	1-Of-8 Data Selector/Mux with 3-State Outputs	16
SN74LS253D	SN74LS253N	Dual 4-To-1 Data Selector/Mux with 3-State Outputs	16
SN74LS257BD	SN74LS257BN	Quad 2-To-1 Data Selector/Mux with 3-State Outputs	16
SN74LS259BD	SN74LS259BN	8-Bit Addressable Latch	16
SN74LS273DW	SN74LS273N	Octal D-Type Flip-Flop	20
SN74LS280D	SN74LS280N	9-Bit Parity Generator/Checker	14
SN74LS283D	SN74LS283N	4-Bit Binary Full Adder	16
—	SN74LS292N	30-Bit Programmable Counter	16
SN74LS299DW	SN74LS299N	8-Bit Universal Shift/Storage Register	20
SN74LS30D	SN74LS30N	8-Input Positive-NAND Gate	14
SN74LS32D	SN74LS32N	Quad 2-Input Positive-OR Gate	14
SN74LS365AD	SN74LS365AN	Hex Driver with 3-State Outputs	16
SN74LS367AD	SN74LS367AN	Hex Driver with 3-State Outputs	16
SN74LS368AD	SN74LS368AN	Hex Driver with 3-State Outputs	16
SN74LS373DW	SN74LS373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74LS374DW	SN74LS374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74LS377DW	SN74LS377N	Octal D-Type Flip-Flop with Clock Enable	20
SN74LS378D	SN74LS378N	Hex D-Type Flip-Flop with Clock Enable	16
SN74LS38D	SN74LS38N	Quad 2-Input P-NAND Buffer with Open Collector	14
SN74LS393D	SN74LS393N	Dual 4-Bit Binary Counter	14
SN74LS540DW	SN74LS540N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS541DW	SN74LS541N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74LS590D	SN74LS590N	8-Bit Binary Counter with 3-State Outputs	16
SN74LS592D	SN74LS592N	Binary Counter with Input Registers	16
SN74LS593DW	SN74LS593N	8-Bit Binary Counter with 3-State I/O Registers	20
SN74LS595D	SN74LS595N	8-Bit Shift Register with 3-State Outputs	16
SN74LS597D	SN74LS597N	Shift Register with Input Latch	16
—	SN74LS624N	Voltage-Controlled Oscillator	14
SN74LS628D	SN74LS628N	Voltage-Controlled Oscillator	14
SN74LS640-1DW	SN74LS640-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74LS640DW	SN74LS640N	Octal Bus Transceiver with 3-State Outputs	20
SN74LS645-1DW	SN74LS645-1N	Octal Bus Transceiver with 3-State Outputs	20
SN74LS646DW	SN74LS646NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74LS652DW	SN74LS652NT	Octal Bus Xceiver AND Register with 3-State Outputs	24
SN74LS670D	SN74LS670N	4-By-4 Register File	16
SN74LS682DW	SN74LS682N	8-Bit Magnitude Comparator	20
SN74LS684DW	SN74LS684N	8-Bit Magnitude Comparator	20
SN74LS688DW	SN74LS688N	8-Bit Identity Comparator	20
SN74LS74AD	SN74LS74AN	Dual D-Type Flip-Flop	14
SN74LS85D	SN74LS85N	4-Bit Magnitude Comparator	16
SN74LS86AD	SN74LS86AN	Quad 2-Input Exclusive-OR Gate	14

SN74S: Schottky TTL Logic

SN74S00D	SN74S00N	Quad 2-Input Positive-NAND Gate	14
—	SN74S02N	Quad 2-Input Positive-NOR Gate	14
SN74S04D	SN74S04N	Hex Inverter	14
SN74S05D	SN74S05N	Hex Inverter with Open-Collector Outputs	14
SN74S1050D	SN74S1050N	12-Bit Schottky Barrier Diode	16
SN74S1051D	SN74S1051N	12-Bit Schottky Barrier Diode	16
SN74S1053DW	SN74S1053N	16-Bit Schottky Barrier Diode	20
SN74S1056D	SN74S1056SC*	8-Bit Schottky Barrier Diode	16
SN74S112AD	SN74S112AN	Dual J-K Negative-Edge Flip-Flop	16
SN74S124D	SN74S124N	Dual Voltage-Controlled Oscillators	16
SN74S138AD	SN74S138AN	3-To-8 Decoder/Demultiplexer	16
SN74S163D	SN74S163N	4-Bit Synchronous Binary Counter	16
SN74S175D	SN74S175N	Quad D-Type Flip-Flop	16
—	SN74S225N	16x5 Asynchronous FIFO, 10 MHz	20
SN74S240DW	SN74S240N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74S241DW	SN74S241N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74S244DW	SN74S244N	Octal Buffer/Line Driver with 3-State Outputs	20
SN74S280D	SN74S280N	9-Bit Parity Generator/Checker	14
SN74S32D	SN74S32N	Quad 2-Input Positive-OR Gate	14
SN74S373DW	SN74S373N	Octal D-Type Transparent Latch with 3-State Outputs	20
SN74S374DW	SN74S374N	Octal D-Type Flip-Flop with 3-State Outputs	20
SN74S38D	SN74S38N	Quad 2-Input Positive-NAND Buffer with Open Collector Outputs	14
SN74S74D	SN74S74N	Dual D-Type Flip-Flop	14
SN74S85D	SN74S85N	4-Bit Magnitude Comparator	16

*Single in line package.

THOMSON CONSUMER ELECTRONICS
SK Replacement Cross-Reference Directory

SK Replacement Solid State Devices are"Top of the Line" quality units, purchased to OEM standards, from original manufacturers. This guide contains 3600 SK devices which replace over 235,000 parts. Each transistor, TRIAC, SCR, Thyristor, Integrated Circuit can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than original specified components. The easy to use cross reference section enables you to locate the exact replacement needed for over 235,000 solid state devices.

902-0010. SKG202G..**EACH 4.95**

Thomson Consumer Electronics SK Cross

This comprehensive PC-based cross reference software contains information on over 235,000 semiconductor devices which can be accessed easily and quickly. Advantages included the ability to scroll through the entire cross reference, descriptions next to the part number, technical notes below descriptions, transistor complements, matched pairs and matched complementary pairs listed in the description. The minimum system requirements are an IBM PC compatible computer with 640K RAM, 3½" floppy drive, and 14 Megabytes of hard disk space.

Drivers

Power driver ICs provide an ideal interface between low power control circuitry and high power motor drive or power supply output devices. A wide variety of power MOSFET driver ICs combine high speed with high output current drive capability which greatly simplifies power stage design. Transformer isolated solutions are also provided for both power MOSFET and IGBT drive applications.

Mfr.'s Type	Description	Power Driver	FET Driver	Isolated Driver Pairs	Input Configuration	Output Rise Time (nS)	Maximum Voltage (V)	Peak Output Current (A)
UC2950T	Half Bridge Bipolar Switch	Single	—	—	Sink/Source TTL	—	35	4.0
UC3705N	High Speed Power Driver	Single	—	—	Complementary	60	40	1.5
UC3707N	Dual Channel Power Driver	Dual	—	—	Complementary	50	40	1.5
UC3708N	Dual Non-Inverting Power Driver	Dual Noninverting	—	—	Inverting	75	35	3.0
UC3709N	Dual High Speed FET Driver	—	Single	—	Non-Inverting	40	40	1.5
UC3710N	High Current FET Driver	—	Single	—	Complementary	40	20	6.0
UC3711N	Dual Ultra High Speed FET Driver	—	Dual	—	Non-Inverting	20	40	1.5
UC3724N	Isolated Drive Transmitter	—	Single	FET Drv	Non-Inverting	30	40	2.0
UC3726N	Isolated Drive Transmitter	Single	—	IGBT Drv	Non-Inverting	75	40	4.0
UC3727N	Isolated High Side IGBT Driver	Single	—	IGBT Drv	Non-Inverting	75	40	4.0

Interface

Interface chips include octal E1A line driver and receivers, and SCSI (small computer system interface) 18-line and 9-line terminators. Octal line drivers and receivers are used to interface terminal servers, printers, network routers, and video terminals over long distances. Terminators are used to at the end of long cables in SCSI application to prevent line reflections, which would result in false signals and interference.

Communications Interface Drivers and Receivers

Mfr.'s Type	Description	Number of Drivers	Number of Receivers	Supply Voltage (V)	EIA232 V.28	EIA423 V.10	EIA422 V.11	V.35	AppleTalk
UC5170CN	Octal Line Driver	8	—	±10	Yes	Yes	No	No	No

SCSI Active Terminators

Mfr.'s Type	Description	Signal Line Channels	Channel Capacitance (pf)	Termination Impedance (Ω)	Disconnect High or Low	Input Voltage Range (V)	Supports Active Negation	SCSI Hot Plug Current (nA)
UC5601N	18 Line SCSI Active Terminator	18	10	110	High	4.0 to 5.25	No	<10
UC5602N	18 Line SCSI Active Terminator	18	11	110	High	4.0 to 5.25	No	<10
UC5603N	9 Line SCSI Active Terminator	9	6	110	High	4.0 to 5.25	Yes	<10

Intelligent Motion Circuits

Motor control ICs include a wide variety of voice coil drivers, stepper motor drivers, and both brush and brushless DC motor controllers. On board power drivers provide a complete motor drive design solution for low power applications. High power solutions combine sophisticated control and fault protection features with easy interface to external power amplifiers.

PWM Motor Controllers and Drivers

Mfr.'s Type	Description	Hall Logic	Microstepping	Number of Outputs	Output Current Per Output (A)	Current Sense Amplifier
L293N	Push-Pull 4 Channel Driver	—	—	2	1.0	—
L293DN	Push-Pull 4 Channel Driver	—	—	2	0.6	—
UC3517N	Stepper Motor Drive Circuit	—	—	2	0.5	—
UC3625N	Brushless DC Motor Controller	Yes	—	2	—	Differential
UC3637N	Switchmode Controller for DC Motor Driver	—	—	2	0.1	Differential
UC3638N	Switchmode Controller for DC Motor Driver	—	—	2	0.5	Differential
UC3717AN	Stepper Motor Drive Circuit	—	—	2	1.0	Single Ended
UC3717N	Stepper Motor Drive Circuit	—	—	2	1.0	Single Ended
UC3770AN	High Performance Stepper Motor Drive Circuit	—	Yes	2	1.0	Single Ended
UC3770BN	High Performance Stepper Motor Drive Circuit	—	Yes	2	2.0	Single Ended

Phase Locked Frequency Controllers

Mfr.'s Type	Description	Phase Locked Loop Control	Internal Oscillator	Phase Drive Logic	Divide Logic	Maximum Frequency (MHz)	Sense Amplifier
UC3633N	Phase Locked Frequency Controller	Yes	Yes	—	2/4/8	10	Yes
UC3635N	Phase Locked Frequency Controller	Yes	Yes	—	2/4	10	Yes

Power Factor Correction

Power Factor Correction (PFC) circuits are preregulators used in off-line power supplies that make the input current have the same wave shape and phase as the input voltage. All of these devices except for the UC3852N employ average current mode control and RMS input voltage feed-forward for optimal dynamic response while achieving power factors better than 0.99. Power factor correction is needed to meet IEC-1000 which regulates input line current harmonics.

Mfr.'s Type	Description	Differentiating Features	Maximum Practical Operating Frequency	Output Drive (A)	Start-Up Current (mA)	Under-Voltage Lockout (V)
UC3852N	8-pin PFC Controller	Critical conduction control	Variable	0.5	1.00	16.3/11.5
UC3853N	8-pin PFC Controller	Minimal external components	125 KHz with ext. sync.	1.0	1.50	11.5/9.5
UC3854AN	Enhanced PFC Controller	Improved UC3854N	200 KHz	1.0	1.50	16.0/10.0
UC3854BN	Enhanced PFC Controller	Improved UC3854N	200 KHz	1.0	1.50	10.5/10.0
UC3854N	PFC Controller	RMS input voltage feed-forward	200 KHz	1.0	1.50	16.0/10.0
UC3855AN	Zero Voltage Switched PFC Controller	Zero Voltage Switching	500 KHz	1.5	0.15	16.0/10.0
UC3855BN	Zero Voltage Switched PFC Controller	Zero Voltage Switching	500 KHz	1.5	0.15	10.5/10.0

Power Management Circuits

Battery Management

Power Supply Support

Mfr.'s Type	Description	Application
UC3730N UC3902D UC3902N UC3908D	Thermal Monitor 8-Pin Load Share Controller 8-Pin Load Share Controller Programmable Voltage Clamp	This device combines a temperature transducer, precision ref. and temp. comparator Used to interconnect two or more power supplies connected in parallel to share a common load Used to interconnect two or more power supplies connected in parallel to share a common load Connects across the output of a power supply to protect the load from overvoltage transients
UC3908T UC3910D UC3910N	Programmable Voltage Clamp 4-Bit DAC and Voltage Monitor 4-Bit DAC and Voltage Monitor	Connects across the output of a power supply to protect the load from overvoltage transients DAC and voltage monitor used in conjunction with UC3886 for Intel Pentium® Pro applications DAC and voltage monitor used in conjunction with UC3886 for Intel Pentium® Pro applications

PWM Controllers

PWM Controllers consist of a reference voltage, ramp generator, latched PWM comparator, error amplifier, clock and output driver. The pulse width of the converter's power switch is modulated (adjusted) with changes in input voltage or output current. Used in conjunction with an external inductor in buck, boost of flyback topologies, these converters provide a regulated output voltage at high efficiency.

Mfr.'s Type	Description	Application	Topology	Peak Output Current	Output Frequency	Outputs	Startup Current	Maximum Duty Cycle
UC3548N	Voltage Mode PWM Controller	Primary Side Control of Isolated Power Supplies	Forward, Flyback	2.00 A	1.0 MHz	Single, Totem Pole	500.0 µA	76%
UC3578N	Floating Buck Controller	PWM Controller Drives External NMOS FET	Buck	1.60 A/1.2 A	100.0 KHz	Single, Totem Pole	500.0 µA	90%
UC3823AN	High Speed PWM Controller	DC-DC	Buck, Boost	2.00 A	1.0 MHz	Single, Totem Pole	0.1 mA	Programmable
UC3823BN	High Speed PWM Controller	Off-Line	Buck, Boost	2.00 A	1.0 MHz	Single, Totem Pole	0.1 mA	Programmable

Switching Regulators

Switching regulators consist of reference supply, error amplifier, oscillator, comparator, and a switching element. In conjunctions with an external inductor, diode, and capacitor, the switching regulator offers output power capability with minimum loss.

Mfr.'s Type	Description	Application	Topology	Peak Output Current	Output Frequency	Outputs	Maximum Duty Cycle

1997 IC MASTER

- ► **Digital**
- ► **DSP**
- ► **Microprocessor**
- ► **Interface**
- ► **MPU Development Systems**
- ► **Linear**
- ► **PLDs**
- ► **ASICs**
- ► **Memory**
- ► **Chip Sets and Multifunction Devices**
- ► **Plus Two Free IC Updates**

The 1997 IC MASTER is organized for easier access with ICs listed by manufacturer and by function category. Functional and numerical search guide to over 120,000 commercially available ICs, including over 13,000 new ICs. Includes hundreds of new and updated manufacturer supplied data pages. Alternate Source Directory is an industry wide listing of 120,000 current and discontinued pin-for-pin equivalents. Includes complete Manufacturers and Distributors Directory.

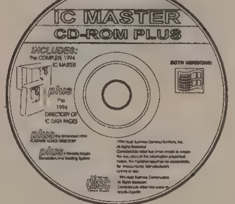
Pinout and Package Data for Over 75,000 Devices
The new pinout and package data for over 75,000 devices is available on the World Wide Web at http://icmaster.com or by calling the IC MASTER Pinout and Package Fax-Back Service. Pinout and package data for additional devices will be added throughout the year.

New and Expanded Data

- ► **Over 13,000 New Device Listings Including 2,000 New Listings in Memory, 1,100 New Listings in Digital, and 1,000 New Listings in Linear**
- ► **Alternate Source Directory Expanded with Complete List of Over 9,000 NTE Parts**
- ► **Application Note Directory Includes More Than 4,400 Notes, with Hundreds of New Application Notes**

504-1097. 1997 IC MASTER (3 Volume Set)..**EACH 190.00**

1997 IC MASTER CD-ROM for Windows



Your direct link to the IC industry, with the latest product information on 120,000 integrated circuits, including more than 13,000 new device listings...on a single compact disk!

Includes pinout and package data for over 75,000 devices with Internet and Fax-Back Service access to pinout and package data updates. Now users also have ability to download and search database updates from the Internet. The new and expanded IC MASTER CD-ROM is the entire IC MASTER on a single compact disk. It includes the world famous Alternate Source Directory with NTE parts, hundreds of manufacturer supplied data pages, the complete IC MASTER Manufacturers and Distributors Directory, and the entire IC MASTER Directory of IC Manufacturers' Data Pages.

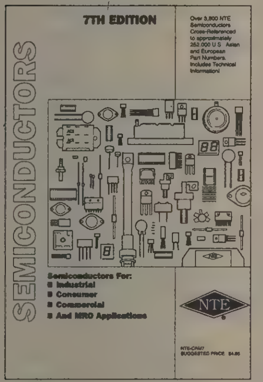
The CD-ROM permits device selection by flexible category search and key word search. It features a redesigned and simplified interface to speed searches. Also available in multi-user and network versions.

504-1597. 1997 IC MASTER CD-ROM for Windows..**EACH 235.00**

1997 IC MASTER Alternate Source Directory on Floppy Disk

Put the famous Alternate Source Directory section of the IC MASTER on your IBM or compatible PC. This industry wide listing of 120,000 current and discontinued pin-for-pin equivalents includes the complete list of 9,000 NTE parts. Customize the ASD to fit your needs, add parts, delete parts, add prices, approval notes, and more. Fast, easy and very user friendly. Includes complete vendor contact information. Does not include specifications or data sheets.

504-1397. 1997 IMASD 3.5" HD..**EACH 179.50**



NTE Selection Guide

► **Over 253,000 Devices Replaced with NTE Numbers**

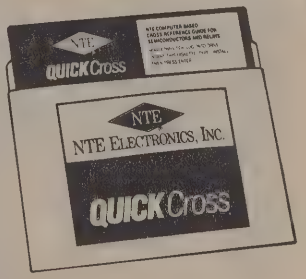
The NTE catalog has become the industry's guide when you need semi-conductors for maintenance and repair work. Now available is the 6th edition containing over 250,000 cross references to American, European and Japanese, industrial and commercial devices. The catalog includes short form specifications and cross reference in a new easier to read format for the over 3500 devices in NTE's line. Each NTE transistor, triac, silicon controlled rectifier (SCR), integrated circuit, thyristor or microprocessor can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than originally specified components.

The easy to use cross reference section enables you to locate the exact replacement needed for over 253,000 solid state devices.

935-0020. NTE-CRM7..**EACH 4.95**

Quick Cross

► **NTE's Computer Based Cross Reference Disk For Semiconductors and Relays**



NTE Electronics, Inc. has taken its entire Semiconductor and Relay Cross References and put them on IBM PC compatible diskettes. These disks, once loaded into your PC, will only take up a little more than 2 Megabytes of disk space. You will have instant access to over 250,000 Semiconductor Cross References and 40,000 Relay Cross References. Minimum system requirements are an IBM PC compatible computer with 640K RAM, 5 MB hard disk.

935-0003. QC-001. 5¼" (1.2M)..**EACH 7.00**

Thomson Consumer Electronics SK Replacement Technical Manual and Cross Reference

- ► **Bipolar Transistors**
- ► **Field Effect Transistors**
- ► **Zener Diodes**
- ► **Diodes and Rectifiers**
- ► **Bridge Rectifiers**
- ► **Industrial Rectifiers**
- ► **Silicon Controlled Rectifiers**
- ► **TRIACs**
- ► **Metal Oxide Varistors**
- ► **Optoelectronics**
- ► **Linear Integrated Circuits**
- ► **Digital Integrated Circuits**

SK Replacement Solid State Devices are "Top of the Line" quality units, purchased to OEM standards, from original manufacturers. This guide contains 3,600 SK devices which replace over 235,000 parts. Each transistor, TRIAC, SCR, Thyristor, Integrated Circuit can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than original specified components.

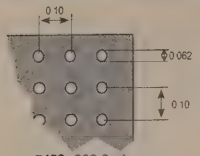
902-0010. SKG202G..**EACH 4.95**

Thomson Consumer Electronics SK CROSS

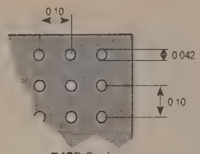
This comprehensive PC-based cross reference software contains information on over 235,000 semiconductor devices which can be accessed easily and quickly. Advantages included the ability to scroll through the entire cross reference, descriptions next to the part number, technical notes below descriptions, transistor complements, matched pairs and matched complementary pairs listed in the description. The minimum system requirements are an IBM PC compatible computer with 640 K RAM, 5¼" or 3½" floppy drive, and 14 Megabytes of hard disk space.

902-0022. SKG202DK1. Two 3½" (1.2 M) Disks..**PER SET 5.00**
902-0032. SKG202DK2. Eight 5¼" (360 K) Disks..**PER SET 7.50**

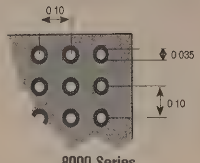
Prototyping General Purpose Boards



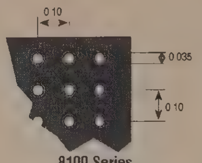
7100- 062 Series
Non-Plated Holes



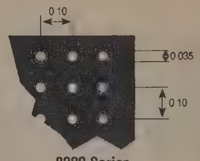
7100 Series
Non-Plated Holes



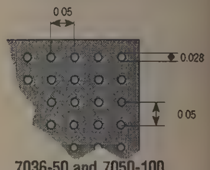
8000 Series
Plated Through Holes
No Plane



8100 Series
Plated Through Holes
One Plane



8200 Series
Plated Through Holes
Two Planes



7036-50 and 7050-100
50 Mil. Grid

Twin Industries general purpose prototype boards provide a versatile solution for many research and development projects. **Available In Four Different Types:** perf board with non-plated holes, the 7100 series; perf board with plated through holes, the 8000 series; perf board with plated through holes with a plane on one side, the 8100 series; perf board with plated through holes and planes on both sides, the 8200 series. Boards are available in a number of sizes. Material is FR-4 fiber glass with UL Flammability Class 94V-0. They are .062" thick with .035" plated through holes and .042" non plated on a 0.1" × 0.1" grid spacing.

Stock No.	Mfr.'s Type	Description	Width	Length	EACH
237-0100	4010-4565	Interleave plane design. .042 Plated through holes on a 0.1" grid.	4.50	6.50	**45.00**
237-0101	7036-50	2.8" × 3.4" of plated holes on a .05" grid. 2/18 gold fingers on .156 centers.	3.50	4.00	**28.00**
237-0102	7044-54	Prototype board with 2/22 .156 I/O connector. Capacity: up to 54 16-pin sockets.	6.20	4.50	**28.00**
237-0103	7050-100	Plated holes on a .05" grid and 4.0" × 8.0" of plated holes on a .10" grid.	8.00	8.00	**58.00**
237-0104	7072-54	2/36 connector on .100 centers. Space provided for 54 ICs with up to 16 pins per socket.	6.20	4.50	**28.00**
237-0105	7100-062-4565	Protoboard featuring a 0.1" × 0.1" grid of non-plated .062" through holes.	4.50	6.50	**7.50**
237-0106	7100-062-4585	Protoboard featuring a 0.1" × 0.1" grid of non-plated .062" through holes.	4.50	8.50	**11.25**
237-0107	7100-1010	Protoboard featuring a 0.1" × 0.1" grid of non-plated through holes.	10.00	10.00	**22.50**
237-0108	7100-1020	Protoboard featuring a 0.1" × 0.1" grid of non-plated through holes.	10.00	20.00	**45.00**
237-0109	7100-144	Prototyping board with 2/50 connector on .100 centers. Space provided for 144 ICs with up to 16 pins per socket.	9.25	8.00	**45.00**
237-0110	7100-410	Protoboard featuring a 0.1" × 0.1" grid of non-plated through holes.	4.00	10.00	**9.00**
237-0111	7100-44EXT	Extender I/O connector 2/22 on .156 center.	4.50	6.50	**45.00**
237-0112	7100-45	Protoboard featuring a 0.1" × 0.1" grid of non-plated through holes.	4.00	5.00	**4.50**
237-0113	7100-4517	Protoboard featuring a 0.1" × 0.1" grid of non-plated through holes.	4.50	17.00	**22.50**
237-0114	7100-4565	Protoboard featuring a 0.1" × 0.1" grid of non-plated through holes.	4.50	6.50	**7.50**
237-0115	7100-8517	Protoboard featuring a 0.1" × 0.1" grid of non-plated through holes.	8.50	17.00	**45.00**
237-0116	8000-1010	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, no plane.	10.00	10.00	**59.00**
237-0117	8000-1020	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, no planes.	10.00	20.00	**118.00**
237-0118	8000-410	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, no plane.	4.00	10.00	**23.60**
237-0119	8000-45	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, no plane.	4.00	5.00	**11.80**
237-0120	8000-4565	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, no plane.	4.50	6.50	**19.67**
237-0122	8100-1010	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, one plane.	10.00	10.00	**59.00**
237-0123	8100-1020	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, one plane.	10.00	20.00	**118.00**
237-0124	8100-1020-DB	Protoboard featuring a 0.1" × 0.1" grid of plated through holes. The board is separated into two planes, perfect for prototypes with two VCC levels.	10.00	10.00	**59.00**
237-0125	8100-410	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, one plane.	4.00	10.00	**23.60**
237-0126	8100-45	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, one plane.	4.00	5.00	**11.80**
237-0127	8100-4565	Protoboard featuring a 0.1" × 0.1" grid of plated through holes, one plane.	4.50	6.50	**19.67**
237-0128	8100-546	Protoboard with space provided for 546 ICs with up to 16 pins per socket.	12.00	22.00	**220.00**

Active Extender Cards — *NEW* —

Type PCI-EXT+64 PCI Bus Extender Card. The PCI-EXT+64 is a high-speed PCI Bus Extender Card with switchable bus isolation switches, supporting both 32 and 64-bit PCI cards. This allows for "Hot Insertion" of the boards that are being tested without having to power down or reboot the host system. Special power monitoring and current limiting features insure a highly robust debug environment. Slot power on/off switch eliminates rebooting. Auto overload and voltage protection.
237-0190. PCI-EXT+64 .... **EACH 495.00**

Type 3300-4EXACR PC Card PCMCIA. Four layer card with extensive use of grounding to minimize noise and maximize signal integrity. Sixteen DIP switches enable breaking signals to isolate problems. Each of the three power sources are fused, monitored with LEDs and have a connection point for a current meter. Two pushbutton switches provide interrupt card detect 1 and 2 which simulates the removal and reinsertion of the PC Card.
237-0205. 3300-4EXACR .... **EACH 229.00**

Type PC/AT 150 ISA Bus Active Extender. Swap board-under-test without the need to reboot your entire system. External voltage (+5 V, –5 V, +12 V and –12 V) from an external power supply is allowed in additional, instead of the PC bus voltages, for Voltage Margin Testing of the Board-Under-Test. No software is required to operate, but program control can be used for automatic operation. Automatic shut down takes place when +5 V to the Board-Under-Test drops below 4.5 volts. Easily accessible test points are provided for all bus signals for connections to scope or a logic analyzer. These signals are available and labeled on both sides of the boards.
237-0206. PC/AT 150 .... **EACH 320.00**

Type VME100 Active 6U VME Bus Extender. Swap board-under-test without the need to reboot your entire system. External power supply is allowed for Voltage Margin Testing of the Board-Under-Test. No software is required to operate. On-Board +5 V current limiting and short circuit protection. On-Board fuses to protect the system motherboard +12 V and –12 V traces in case of shorts from the Board-Under-Test. Test points are provided for all bus signals for connections to scope or a logic analyzer.
237-0207. VME100 .... **EACH 535.00**

Type PMC2PCI-64 PCI Mezzanine Extender. Swap board-under-test without the need to reboot y our system. Designed to work with either 32 or 64-bit PCI bus for supporting 32 or 64 bit mezzanine cards. Allows testing of PCI Mezzanine cards in the PCI local bus, while allowing access to both sides of the Mezzanine board for easy troubleshooting. Test points are provided for all PCI bus signals for connectors to a scope or a logic analyzer. On-Board Power-On Reset simulates the bus reset to the board under test every time the extender is turned on. On-Board current to voltage converters allow current measurement for the +5 V, +12 V and +3.3 V by using only a simple voltmeter at provided terminals.
237-0208. PMC2PCI-64 .... **EACH 425.00**

Electronic Network Designers

The ultimate prototyping tool. Now you can build a working circuit board directly from your breadboarded prototype in one simple step, error free. The patented Electronic Network Designer is a tool for the rapid prototyping of electronic circuits. It is comprised of a base matrix of nickel silver connector clips in arrays of six, over which a PCB is aligned. The designer prototypes the circuit through the board, using the clips to make the connections until the circuit is tested and ready for soldering. The circuit is soldered before being removed from the unit, and the painstaking process of transposing to a hard wired system is eliminated.

Type 8100-01NAA. Board Size. Length: 6.875". **Width:** 8.00". **Thickness:** 0.031". **Electronic Network Designer Size. Length:** 7.75". **Width:** 11.00". **Thickness:** 1.25".

Vectorbord® — Punchboards

Precision drilled or prepunched, Vectorbord® Prototyping Boards are convenient economical design tools and cost efficient alternatives to custom designs. Available in several hole patterns, many are copper clad. Sockets and pins, terminals, tools, and accessories are available separately to facilitate construction of your prototype boards, see Accessories page.

Circbord® — Printed Circuit Prototyping Boards

Circbord® prototyping boards with printed circuitry cover a wide range of design requirements—without the expense of edge connectors. All boards have provisions for I/O connectors. Several circuit patterns are available. All bus and pad surfaces are solder coated for user convenience. Holes are 0.042" diameter, hole patterns are based on 0.1" grids. Sockets and pins, terminals, tools, and accessories are available separately, see Accessories page.

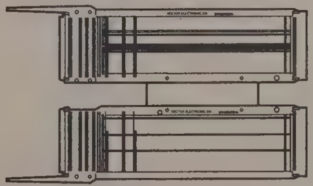
Vectorbord® Metric Extender Card



Model VMEE-M J1 and J2 Extender (assembly) is for 160 mm and 220 mm depths. Three-layer construction, controlled impedance design, and patented signal trace shielding minimize crosstalk. Jumpers are provided for interrupting all signal lines. Mounting pads for additional DIN connector or for test point mounting of logic analyzer also included.

PCI Developer's Kit (P/N 4624-10)

PCI Developer's Kit for Fast Development of Adapter Card to PCI Bus; Become Familiar with the PCI Bus Through Hands-On Use

- Allows Engineers an Initial Design Advantage
- Allows Programmers Master Bus Compliance Early in the Product Cycle
- Provides Prototype Space and Additional Boards and Accessories for Circuit Layout
- Provides Bus Mastering Functions Compliant with PCI Spec 2.1
- Includes Software Tools for Diagnostic and Device Programming
- Includes Chip and Kit Documentation, Including Schematics and Circuit Layout Drawings
- Makes Bus Interface Easy and Cost Effective

Kit contains four PC boards including; PCI board with the AMCC matchmaker chip, with memory and provisions for flash memory on board for actual software use; one ISA board for communicating with another computer (or the same computer); and two additional breadboards for additional development which plug on to the Matchmaker board; Software for bus interface diagnostics and design configuration, and documentation books and quick reference guide.

Package quantities of 100 or 1000. Consult factory for applicable tools.

Press-In Terminals

T46 — for 0.042" Diameter Holes

- ► Single and Double-Tailed (Accessible from Both Sides) Wire-Wrap Terminals
- ► 0.025" Square Posts
- ► Provides Secure Contact without Soldering or Staking
- ► Rectangular Base with Stepped Shank Presses Into Plain or Plated-Thru Holes and Is Retained without Etching or Soldering

977-0980. T46-5-9/C. 1-9 .... PER PK./100 7.97

977-1079. T46-5- 9/M. 1-9 .... PER PK./1000 65.37
10-Up .... PER PK./1000 62.10

Package quantities of 100 or 1000. Use P158 insertion tool, sold separately.

Terminals

T44, T68 — for 0.042" Diameter Holes

- ► Wire Wrap Tail with Two-Pronged Receptacle for Wires or Leads
- ► 0.025 Square Posts
- ► Rectangular Terminal with Stepped Shank Presses Securely Into Plated or Unplated Holes, Requires No Staking or Soldering
- ► Bifurcated End Holds Soldered Leads Securely
- ► For 3 Level Wire Wraps

977-0972. T44/C. 1-9 .... PER PK./100 5.21
10-Up .... PER PK./100 4.95

T49 Klipwrap Terminal — for 0.042" Diameter Holes

- ► Wire Wrap Tail (0.025" Square) with 3-Pronged Clip for Up to 22 Gauge Wires
- ► Up to 3 Wires May Be Pressfit, Crimped or Soldered Into Clip
- ► Tail For 3 Level Wire Wraps

977-5060. T49/C. 1-9 .... PER PK./100 8.45
10-Up .... PER PK./100 8.03
977-5036. T49/M. 1-9 .... PER PK./1000 66.98
10-Up .... PER PK./1000 63.63

Package quantities of 100 or 1000. Use P158 or A13, A13-1, P156 insertion tools, sold separately.

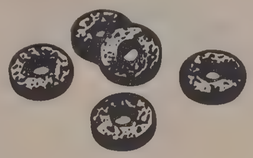
K32 (J Pin Terminal) — for 0.042" Diameter Holes

- ► Wire Wrap Pin (0.025" Square) Fits and Connects Two Adjacent Holes (0.042" D) on a .1" Grid
- ► Short Log Can Be Bent to Secure Pin
- ► Shorting Pin Allows Wire Wrap Connection to Wiring Side Pads or Circuits

977-0595. K32/C. 1-9 .... PER PK./100 8.79
10-Up .... PER PK./100 8.35
977-1078. K32/M. 1-9 .... PER PK./1000 56.30
10-Up .... PER PK./1000 53.49

Package quantities of 100 or 1000. Use P158 insertion tool, sold separately.

Solder Washers For 042" and .055" Holes



Multi-functional solder washer kits, with three sizes of washers. Different sizes provided to fit over sockets and tails of most Vector socket pins and wiring terminals. Ideal tools for committing pins to voltage and ground planes.

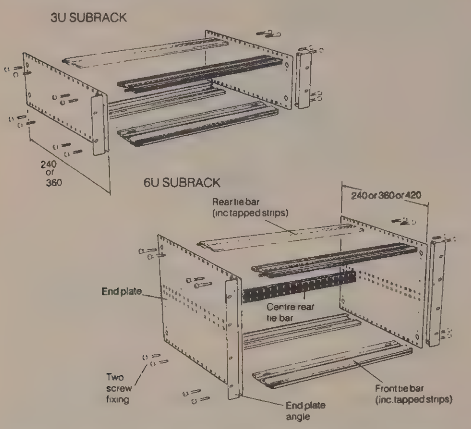
VERO
VERO ELECTRONICS

VME Backplanes, Card Cages, Extender Cards, Prototyping Boards and Assemblies

KM6-II Card Cages



Conforming fully to IEC 297-3 these card cages are manufactured utilizing fully conductive components. This is a versatile design which uses large cross section extrusions for superior mechanical strength. Tapped strips, all fixings and assembly instructions are supplied with the kit in addition to the structural members. Backplane spacer strips and card guides must be ordered separately.

Stock No.	Mfr.'s Type	Size	EACH
961-0100	950-202581E	3U × 84HP × 180 mm	66.50
961-0101	950-202585H	3U × 84HP × 240 mm	69.50
961-0102	950-202582C	6U × 84HP × 180 mm	94.50

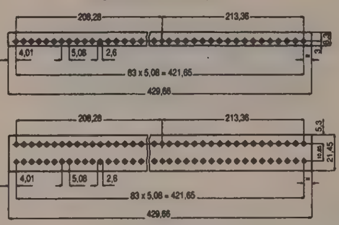
961-0108	950-202598K	9U × 84HP × 420 mm	203.00

Backplane Spacer Strips

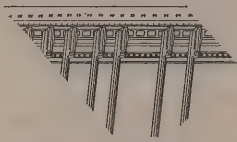
INSULATING SPACERS



In order to maintain the correct dimension between the backplane and the front panel these spacer strips must be used. Two types are available; Insulating (for VME type applications) and Conductive (for Multibus type applications).

Stock No.	Mfr.'s Type	Size	EACH
961-0111	950-10014H	Insulating single level, 84 HP	1.70
961-0112	950-10015E	Insulating two level, 84 HP	2.50

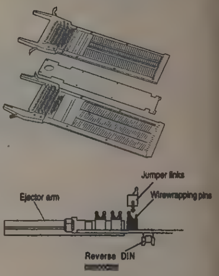
Card Guides



These positive retention guides are molded with two anti-vibration clips per guide which restrict any free play lateral movement of the daughter board. A "bolt down" hole is provided which permits the guide to be secured to the front tie bars. Additional tapped strips must be purchased to use this feature.

Stock No.	Mfr.'s Type	Size (mm)	EACH
961-0109	950-232662J	160 × 1.6, packet of 10 pcs	4.30
961-0110	950-232663G	220 × 1.6, packet of 10 pcs	5.85

Extender Cards



VME extender cards are of a multilayer construction with a full ground plane and in addition 'guard tracks' are provided between each signal line. Jumper links are provided for signal interrogation and a logic analyzer or termination module may be fitted. A conversion kit can join the J1 and J2 together. Double sided extender cards provide line to line extension of 96 way DIN 41612 connectors. Two versions are available, 3U and a monolithic 6U. Multilayer extender card with excellent cross talk performance, 3 layer construction with full central ground plane and 'guard tracks' between each signal line. Line jumper pins and logic analyzer or termination module are provided.

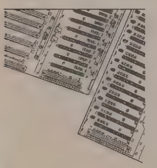
VMExcel Monolithic Backplanes



VMExcel is a six layer (+5 V - Signal - 0 V - +5 V - Signal - 0 V) stripline, controlled impedance (57 Ω) backplane. Excellent cross talk performance is achieved using 'guard track' technology and an anti-cross talk termination component layout. Decoupling capacitor positions are provided between each slot to permit fine tuning of system parameters.

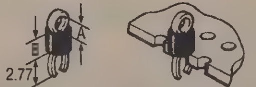
*Faston power connections

Terminal Assemblies — NEW —



This assembly is designed to act as a terminal on PC boards for attachment of scope probe, etc. The spring design allows the terminal to be inserted into a plated through hole board without damaging the hole plating. The terminal will remain in place when the board is reversed for soldering. The sintered glass bead has a recommended maximum working temperature of 475°C. All solder pins are manufactured from brass to BS 2873 CZ 124 and have a tin finish over a copper flash. **Color:** Black.

SLIDE MOUNTING COMPATIBLE

Fig. A — Vertical Mount

A vertical mount microrack comprises of the following: **Rack:** Mountable card cage with cover over the board area. **Card Cage:** To suit 160 mm deep VME boards. **Fan Tray:** Fitted below card cage (three fans). **Monolithic Backplane:** (Combined Monolithic J1/J2 — our VMExcel product). **Power Supply:** fitted into a standard, hinged, rear module which has i/o connector cutouts. The product is fully wired and ready to be powered up.

Cool Cat

— NEW —

Aavid interactive thermal management design catalog on disk. Once loaded onto your computers you will have the ultimate tool in thermal management design. The program is "Windows" based and allows you to enter the thermal requirements needed which are then translated into the Aavid part numbers that meet those criteria. The tutorial that accompanies the 2-disk program will assist you in utilizing "Cool Cat" to the fullest. As you enter the "Cool Cat" software you will be presented with seven product families. Each family is designed to help you select a thermal solution(s) for your specific application. Depending on the family you have entered, there may be several options for which you will have to choose from to help with your heat sink selection. To proceed, input such information as the type of device to be cooled, the total volume available for your thermal solution and/or the manufacturer of the device to be cooled, to narrow down your selection. As you narrow down your search to a specific solution, use the "Finish", "Interface Material", and other menus to configure the product. The correct Aavid part number will always be displayed below the schematic.

Family Name	Typical Device to be Cooled
Digital Products	BGA, MQUAD, PLCC, PGA, QFP
PC Board Products	Jedic Style Devices
Extrusion	TEC, Mid-Ranged Semiconductor
Bonded Fin	Motor Drives, Traction Drives

Family Name	Typical Device to be Cooled
Liquid Cooling	IGBT, RF Transistors
Interface Materials	Heat Sink Accessories
Attachment Methods	Heat Sink Accessories

Ther-O-Bond Adhesive

Ther-O-Bond is a 2-part thermally conductive epoxy adhesive system that also has good electrical insulating qualities. It bonds readily to metal, ceramics, glass, plastics and many other materials. An easy-to-spread thixotropic paste, it offers high heat transfer, low shrinkage, and a coefficient of thermal expansion comparable to that of copper and aluminum. It cures overnight at room temperature, or in 2 hours at 65°C. Pot life is about 60 minutes.

Typical Properties — Series 1500. Color: Black. **Thermal Conductivity, Btu/Ft.²/Hr./°F/In.:** 9.0. **Tensile Strength, psi at 25°C:** 9800. **Dielectric Strength, Volt/Mil.:** 600.

Ther-O-Link 1000 Thermally-Conductive Compound

Ther-O-Link Series 1000 compound was developed to reduce the high thermal resistance of the air gap otherwise present between mating surfaces of a heat sink and semiconductor. It provides an excellent thermal path by displacing the air gap between the two mating surfaces. Ther-O-Link provides a low thermal resistance of only 0.05°C/W when using a 0.001." film on a one-inch square area. Ther-O-Link will not become hard, and retains its viscous consistency even after continuous operation up to 200°C. It has the consistency of a viscous hand lotion and will wet-out the surfaces and displace more air than heavier compounds. Ther-O-Link is easily brushed on to the mating surfaces of semiconductor devices. When applying, spread or brush the compound evenly over the entire mating surface. For maximum performance, proper torque should be used when mounting stud-mounted devices. The compound can easily be removed with a damp cloth using any commercially-available clean-up solvent.

Typical Properties — Series 1000. Specific Gravity: 2.1-2.1. **Viscosity:** Paste. **Thermal Conductivity, Btu/Ft.²/Hr./°F/In.:** 5.2. **Thermal Resistivity, °C In./Watt:** 52. **Volume Resistivity, Ohm-Cm:** 1015. **Dielectric Strength, Volts/Mil.:** 250. **Weight Loss, % After 24 Hours at 200°C:** 0.6.

IN-SIL-8™ Pads, Silicone-Based Insulators with Thermally Conductive Fillers

— NEW —

- Thermally Conductive Composite of Silicone Rubber and Fiberglass Provides Better Thermal Conduction Than Mica and Grease
- Customer Applied or Factory Applied
- Quick Application Is Over 4 Times Faster Than Mica or Grease
- Doesn't Attract Dust or Foreign Particles
- Won't Contaminate Solder Baths
- Can Withstand Environmental Changes without Changing Its Properties
- Rigors of Assembly: Doesn't Crack Under Pressure; Resists Puncture and Tearing
- Aging and Continuous Use: Won't Dry Up or Deteriorate; Maintains Low Thermal Resistance; Flame Retardant
- Dielectric Constant 100 Hz (ASTM D 1450): 5.5

Shooter Stand Alone Low Cost EPROM Programmer

- ► Stand Alone or PC Based Through Serial RS-232 Port
- ► Supports EPROMs and EEPROMs
- ► Load, Program, Verify From Front Panel
- ► Upload/Download Motorola, Intel Binary, Hex Files
- ► Edit Files in PC or In Shooter RAM
- ► Works with Dumb Terminal or Any PC
- ► Compact Size Fits in Briefcase
- ► Free IBM PC Communications Software (Prolink)
- ► Ideal for Engineers, Technicians and Field Personnel
- ► Built-In DIP Socket, Optional PLCC Adapters
- ► One Year Warranty
- ► Satisfaction Guaranteed

ChipMaster 2000™

- ► Contains a 48-Pin ZIF Socket Module, Universal (100-260 VAC) Switching Power Supply, 6-Foot Printer Cable, Installation Diskette and Operation Manual
- ► Allows You to Not Only Program ICs but Also Test TTL and CMOS Logic ICs, As Well As Check Dynamic and Stati Memory
- ► Interfaces with PC Compatible 386 and Higher Computers Including Laptops
- ► Free Lifetime Software Updates and Technical Support Are Available Via Logical's BBS
- ► Made and Supported in the USA
- ► Two Year Warranty on Parts and Labor

ChipMaster 2000 is a software expandable, universal device programming work station that supports a wide variety o programmable devices and tests digital ICs. The hardware and software architecture of ChipMaster 2000 is easil expandable to support your future design needs and device library requirements. This state-of-the art universa programmer offers you the most advanced programming features with a user friendly interface.

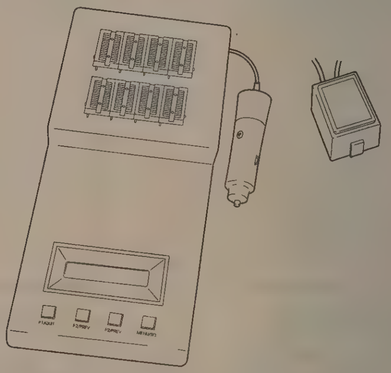
XPRO-1 Stand Alone Intelligent EPROM/FPGA Gang Programmer



- ► Copy, Program, Verify, Test Chips, EPROMs, PROMs, Micros Stand Alone or PC Based
- ► Easy To Use LCD and Keypad Lets Your Program-In Most Frequent Used Devices
- ► Built In High Speed Serial Port, Lets You Integrate with PC in DOS or Windows 3.1
- ► 1, 4, 8 Meg Internal RAM Buffer Options, Allows Data Storage Within Unit
- ► Single Socket or Gang of 8 Adapter in DIP or PLCC Direct Docking Heads
- ► High Speed Gang Algorithms for Fast Production Throughput
- ► Cluster Multiple Units for Expanded for Production Setup (64 EPROMs At A Time)
- ► Powerful Development Facility, Download in Motorola, Intel, Binary, Hex File Formats
- ► Programs EPROM, EEPROMs, Serial PROMs, Micros, FPGAs, EPLDs
- ► Lifetime Free Software Update Via BBS, 100% Made-In-USA
- ► Battery Backed Up, Protects Against Accidental Data Loss Due to Power Glitches
- ► 12-Bit DAC Controlled, Highly Accurate, Requires No Calibration
- ► External Power Source, UL, CSA, VDE Approved, ISO 9000 Traceability
- ► Optional TSOP, PCMCIA, PQFP, BGA, PGA, SOIC, LCC Socket Adapters

UV Erasers Ultra Fast EPROM — Erasing 1-200 Devices at a Time

- ► One Year Warranty
- ► Satisfaction Guaranteed

UV Eraser to Meet Every Need

The Logical Devices family of UV eraser are professionally designed for erasing UV EPROMs and microcontrollers at an optimum speed and safety. All products are designed to avoid any leakage of Ultraviolet rays which can be harmful to human eyes and skin. Each unit is equipped with a safety interlock switch which is activated only when the unit tray is sealed shut. The Ultraviolet Eraser units come in a variety of sizes and models and could even be custom made to a specific application.

Stock No.	Mfr.'s Type	Description	Capacity	Timer	Erase Time	Dimension Inches	EACH

EPROM Erasers

SPECTROLINE®

All Spectroline erasers are handsomely styled of rugged, anodized aluminum and stainless steel. They have a safety interlock to protect the user against accidental exposure to hazardous short wave (254 nm) UV radiation. Also, the devices are protected by conductive foam pads which prevent electrostatic charge build-up. **All models are UL listed. PE-Series are CSA approved.**

Mfr.'s Type	Auto Timer Shut-Off	Chip Erasing Capacity	Typical Intensity (μW/cm^2)

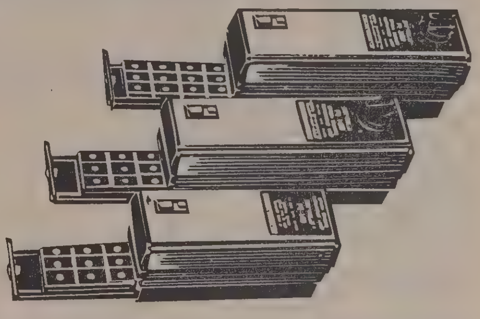
PE-Series Lamps

- **Small Capacity, Medium Intensity**
- **Efficient and Complete Erasing in as Little as 11 to 13 Minutes, Depending on the Model**
- **Type PE-240T Erases 12 Chips, Type PE-140 and PE-140T, 9 Chips**



PE-140, PE-140T, and PE-240T are desktop lamps specifically designed for personal and small-system users. They are the perfect choice for fast and complete EPROM erasure. The PE-140 and PE-140T use a single 4 watt UV tube, while the PE-240T uses two 4 watt UV tubes. Tube life is rated at 6,000 hours. Safety features include fully shielded UV tubes with UV-absorbing light indicators to signal when tubes are lit. The PE-140T and PE-240T feature the added convenience of a 60-minute timer for automatic unit shut-off.

Stock No.	Mfr.'s Type	Description	Inside Tray Dimensions	EACH
986-0140	PE-140	Lamp with One 4-watt Tube	2"W × $6\frac{5}{8}$"L × $\frac{5}{8}$"H	**155.00**

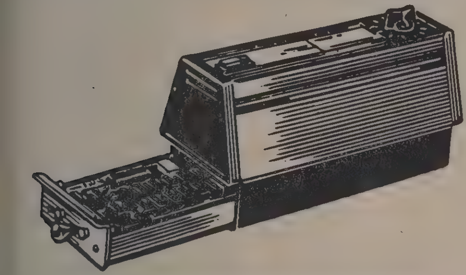
986-0240	PE-240T	Lamp with Timer and Two 4-watt Tubes	2"W × $6\frac{5}{8}$"L × $\frac{5}{8}$"H	**225.00**
986-2537	BLE-2537S	Tube for PE-Series Lamps	–	**27.50**



PL-265T Lamp

- **Medium Capacity, Medium Intensity**
- **Compact and Economical**
- **Erases up to 30 Chips**
- **Efficient and Complete Erasing in as Little as 11 Minutes**
- **Accepts PC Boards up to 4" × 9"**

PL-265T is ideal for data processing centers and other medium-volume EPROM users. This unit uses two 6-watt UV tubes. Tube life is rated at 6,000 hours. The PL-265T lamp erases up to 30 EPROM chips or will accept PC boards up to 4" x 9". A specular aluminum reflector assures maximum intensity. The loading drawer contains a removable tray insert which is adjustable to varying heights to ensure optimum exposure. Safety features include UV-absorbing light indicators to signal when tubes are lit. A 60-minute timer automatically shuts off unit at the end of each erasing cycle.

Stock No.	Mfr.'s Type	Description	Inside Tray Dimensions	EACH
986-0265	PL-265T	Lamp with Timer and Two 6-watt Tubes	$4\frac{1}{8}$"W × 9 $\frac{7}{8}$"L × $1\frac{3}{8}$"H	**325.00**

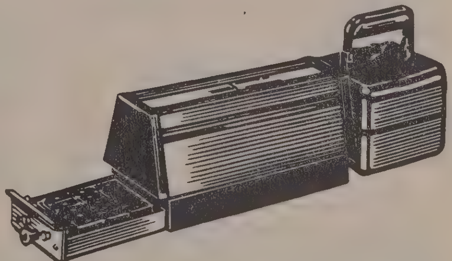
PR-Series Lamps

- **PR-125T Erases 25 Chips**
- **PR-320T Erases 42 Chips**
- **Medium Capacity, High Intensity**
- **Complete Erasing in as Little as 6 Minutes**



PR-125T and PR-320T are designed for medium to large-volume EPROM users. The PR-Series features high-intensity UV grid tubes that provide maximum irradiance uniformity, for extremely fast and efficient erasing. Grid tube life is rated at 5000 hours. They can completely erase EPROMs on PC boards up to 4" x 9". The PR-125T can hold up to 25 EPROMs while the PR-320T accommodates up to 42 individual EPROMs. A specular aluminum reflector assures maximum intensity. The loading drawer contains a removable insert which is adjustable to varying heights to ensure optimum exposure. Safety features include UV-absorbing light indicators to signal when tubes are lit. Other features include a 60-minute timer which automatically shuts off the unit and a carrying handle to ease portability.

Digital Ultraviolet Radiometers

- **Measure UV Intensity with ±5% Accuracy**
- **Reliable Solid-State Circuitry**
- **Calibrated to NIST Standards**
- **Perfect for Calculations**
- **Durable Plastic Case**

DM-254X and DS-254E precisely measure the UV output of EPROM erasers. They make erase time calculations easy and accurate, and are perfect for monitoring the useful life of your eraser's UV source. The DS-254E not only measures UV irradiance, but actually calculates proper erasing time. Both units feature $4\frac{1}{2}$ digit LED display, measuring range 0-19, 990μW/Cm^2 with accuracy of ±5%. Calibrated to NIST standards. Both come complete with four non-rechargeable, 1.5V alkaline batteries.

Stock No.	Mfr.'s Type	Description	EACH
986Q0245	DM-254X	Digital UV Radiometer	**630.00**
986Q0254	DS-254E	EPROM Meter/Calculator	**1102.50**

PC-Series Cabinets

- **Large Capacity, Ultra-High Intensity**
- **Complete Erasing in Less than 5.5 Minutes**
- **Erase from 84 to 336 Chips Depending on Model**
- **Accepts PC Boards from 8" × 12" to 32" × 12"**

PC-1100A, PC-2200A, PC-3300A, and PC-4400A Erasing Cabinets are specifically designed for high-volume production requirements. In as little as 5.5 minutes, their high-intensity, UV grid lamps completely erase programmed memories. Quartz grids are mounted on a specular-aluminum reflector, providing uniform irradiance with a typical peak intensity of 18,500μW/cm^2. The 8" x 8" modular assemblies feature a special drop-in design making replacement quick and easy. As well as erasing individual EPROMs, these cabinets will accept various quantities of PC boards, wafers, and metric cards. The PC-3300 and PC-4400A will accommodate open-face stocking tubes. UV-absorbing light indicators signal when grids are lit. Chamber temperature is controlled by powerful internal cooling fans, maintaining maximum UV intensity and prolonging grid life, which is rated at 5000 hours. Also features adjustable tray to ensure optimum exposer.

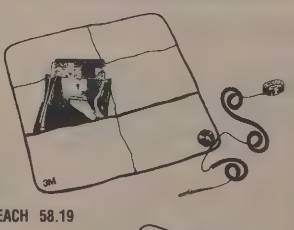
Portable Field Service Grounding Kits



The 3M 8501 Portable Field Service Kit provides effective static protection in a compact package for the electronics field technician. The entire kit folds to a size that fits easily into most tool cases. Two pockets sewn into the work surface provide storage for the cords.

3M 8501 Portable Field Service Kit. Meets the requirements of MIL-W-87893, Type III.

617-2009. 8501	EACH	58.19

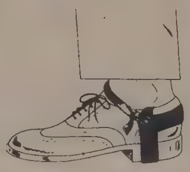
3M 8506 Economy Field Service Kit ***— NEW —***

617-9548. 8506	EACH	31.31

3M 8505 Small Lightweight Kit. Offers the same level of static control as the full-sized 3M 8505 Field Service Kit, yet is small enough to fit in a shirt pocket.

617-8502. 8505	EACH	60.82

Shoe Grounding Assembly



This long lasting assembly effectively grounds personnel when they are in contact with conductive flooring. One size fits most shoes and boots. A comfortable elastic handle strap and 24-inch long conductive ribbon for insertion into the shoe complete the ground path to the operator. To be effective, the shoe grounders must be worn on both feet. Models are available with a one megohm or a 240 K ohms resistor. Contains a one megohm resistor. **Note: The 2051 Grounding Assembly is not to be used in areas where the individual may come in contact with electrical circuitry exceeding 250 volts.**

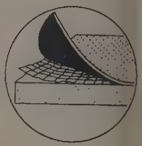
Dissipative Three-Layer Floor and Table Mats



3M 8200 Series Mats are soft table and floor mats with a unique three-layer construction. The top layer is durable static-dissipative vinyl which has sufficiently low resistivity to discharge static-laden conductors, yet will prevent the shorting of pins on the backs of printed circuit boards laid on the mat.

8200 Series Floor Mat

Includes one 15 ft. (4,6M) 3040 Ground Cord and two 3050 Female Snap Fasteners (installed).

Stock No.	Mfr.'s Type	Description	EACH
617-8201	8201	4' × 6' Brown Floor Mat	198.59
617-8203	8203	4' × 6' Gray Floor Mat	198.59
617-8205	8205	4' × 6' Granite Floor Mat	198.59

8210 Series Table Mat

Includes two 3050 Female Snap Fasteners (installed) and one 3048 Wrist Strap Grounding System.

617-8211	8211	2' × 4' Brown Table Mat	86.84
617-8213	8213	2' × 4' Gray Table Mat	86.84
617-8214	8214	2' × 4' Blue Table Mat	86.84
617-8215	8215	2' × 4' Granite Table Mat	86.84

Work Station Grounding Kits

Each Work Station Grounding Kit contains:
- **Table Mat; 2 × 4 ft. (0,6 × 1,2m)**
- **Floor Mat; 4 × 6 ft. (1,2 × 1,8m)**
- **3040 Ground Cord; 15 ft. (4,6m)**
- **3048 Grounding System For Wrist Strap/Table Mat**
- **2214 Adjustable Wrist Strap**

8011 Series

A complete static control solution for the work environment that requires more rigid surfaces with higher conductivity. Both table and floor mats are made from black Velostat conductive plastic for optimum static protection.

617-2040. 8011 (Black)	EACH	215.78

8020 Series

The 8020 Work Station Grounding Kits provide the complete static protection offered by all 3M kits. Both the floor and table mats are made from our soft three-layer static-dissipative material.

617-8023. 8023 (Gray)	EACH	259.01
617-8024. 8024 (Blue)	EACH	259.01
617-8026. 8025 (Granite)	EACH	259.01

8030 Series

These kits contain two different types of static control mats. The table mat is made of the soft three-layered, static-dissipative 8200 material (optional color), while the floor mat is of the more rigid, conductive black Velostat material.

617-8029. 8030 (Gold)	EACH	247.91

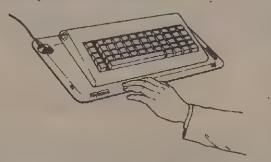
617-8036. 8035 (Granite)	EACH	247.91

Work Station Monitors

Work Station Monitors use DC current to make a resistance determination. They continuously pulse a signal which is returned to the monitor through a special wrist strap and cord that contain two separate sets of independent conductors. They measure operator resistance to ground, have a resistor by-pass warning, use a safe, low current signal pulse, provide dual ground paths, and have passive system actuation. Remote Input Jack Size: 3³⁄₁₆" × 1" × 1½".

617-0723. 722	EACH	193.80

Keyboard Static Control Pads



3M Static Control Pads drain away static charge instantly when touched. The unique layered construction not only creates a static-free environment, but also cushions your keyboard, prevents slippage and reduces noise.

617-2013. 9210. Keyboard Pad 23" × 9.5", Brown	EACH	28.26
617-9212. 9212. Keyboard Pad 23" × 9.5", Gray	EACH	28.26

Test Kit for Control Surfaces

The 3M 701 Test Kit contains a lightweight, user-friendly megohmmeter plus all of the components needed to make testing mats and other surfaces simple and accurate. All of the items are packaged in a foam-lined carrying case.

The kit is compatible with EOS/ESD Standard S4.1-1990, "Worksurfaces-Resistive Characterization" and with MIL-W-87893A, "Workstation, Electrostatic Discharge (ESD) Control."

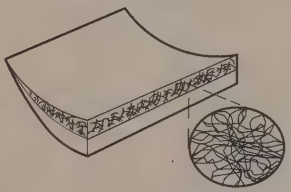
2750 Static-Shielding Bag — Transparent and Reusable



- ► Transparent — 70% Light Transmission
- ► Reusable Without Verification — Electrical Properties Guaranteed for the Life of the Bag
- ► 7 Mils Density Polyethylene
- ► Meets Shielding and Static-Dissipative Requirements of 81705C
- ► Volume-Loaded, Long Lasting Anti-Stat Effective Down to 10% RH
- ► <6% Conductive Stainless Steel Fibers (Non-Corroding)

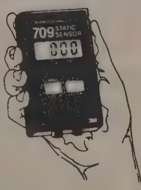
Static Sensor



The 3M 709 Static Sensor is an accurate, hand-held, lightweight unit designed to measure static voltages on objects and surfaces. The 709 features a digital (LCD) display and two range settings: LOW to measure up to 1990 volts and HIGH to measure up to 19,900 volts. The sensor comes with one standard 9 volt transistor battery and has a battery test circuit, which displays the battery voltage level on the LCD readout when activated. For remote monitoring or permanent recording, the 709 provides two pin-type output jacks.

VELOSTAT® Electrically Conductive Hinged Container

This rugged container protects your static sensitive PC boards or other devices from all external static fields or static charges on personnel and materials that exceed 20,000 volts. Made of carbon-loaded electrically conductive polyolefin plastic. Strong, light weight, non-corrosive, ideal for storage and shipping. Molded pin hinges are far more durable than traditional snap hinges. **Color:** black.

Scotch™ 40 Anti-Static Utility Tape

3M Scotch™ 40 Anti-Static Utility Tape represents a breakthrough in PSA tape technology. This new tape, which generates less than 50 volts on unwind and removal from stainless steel, helps prevent ESD damage to sensitive electronic components in manufacturing environments. Use this tape a third hand to hold work orders, notes or documentation in place, or to hold down obstructions. This tape can also be use as a sealing tape to secure static shielding bags, boxes contacting electronic components, DIP tubes or to hold IC rails.

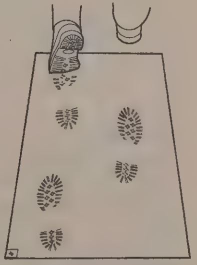
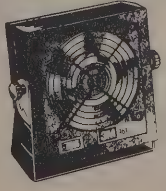
Clean-Walk Mats



- ► Long Lasting 2 MIL Polyethylene Backing
- ► Mats Can Adhere to Any Clean, Dry Floor
- ► Unique Design Has No Beveled Edge or Frame to Trap Dirt
- ► Large Surface Has Room for Two Steps to Effectively Capture Contaminants
- ► 4 Mats Per Box, 30 Sheets Per Mat

617-5801. Model 5800. 18" × 36"	PER BOX/4	115.31



Ionized Air Blower

This compact electrical 961 Ionized Air Blower neutralizes static charge on nonconductive materials and helps prevent static from damaging sensitive electronic components. Designed to be very user-friendly, the ionizer's gentle air flow does not disturb papers or delicate components, and the fan is extremely quiet at low speed. 100/120 V, 50/60 Hz.

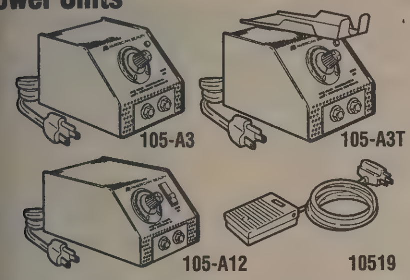
Power Units



NOTE: All American Beauty power units are standard 120 VAC, 60 Hz, with 3-wire cord and NEMA plug. Also available on special order for 220/240 VAC, 60 Hz. All power ratings based on 50% duty cycle.

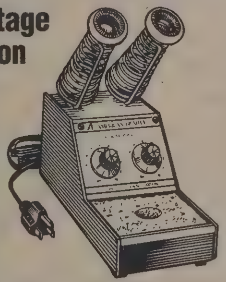
Variable Power Control Unit
Infinitely variable, stepless dialing. Ideal where precise settings and repeatability are essential. Dial reads zero to 100, gives exact guide for duplicating heat output at a later date. **Wattage Range:** 0 to 100 W. Pilot light. Fuse. Ventilated steel case, 3¾" × 3⅞" × 5¼" (9.53 × 9.84 × 13.34 cm) with black and white crackle finish. **Shipping Weight:** 7½ lbs. (3.40 kg).
709-2303. Model 105-A3-120 .... **EACH 226.00**

Variable Power Control Unit with Automatic Switching
Same as 105-A3-120, except for cradle-type ON-OFF switch for wirestripping applications. Power turns ON when handpiece if lifted from cradle, OFF when handpiece is returned to cradle. Eliminates need for footswitch. Extends element life. Saves power. **Shipping Weight:** 7½ lbs. (3.40 kg).
709-6060. Model 105-A3T-120 .... **EACH 280.00**

Medium Power, Infinitely Variable Unit
A power range of 0 to 250 watts (0.8 to 2.8 volts) makes this unit a desirable power source for a wide variety of handpieces. Combines rugged construction with economy and convenience. Stepless dialing from 0% to 100% of power range for precision and repeatability. Has ON/OFF switch, pilot light and fuse. Ventilated steel case with black and white crackle finish. **Size:** 7⅛" × 4½" × 3¹¹/₁₆" (18.10 × 11.43 × 9.37 cm). **Shipping Weight:** 7¾ lbs. (3.52 kg).
709-6050. Model 105-A12-120 .... **EACH 320.00**

Footswitches
For foot control of all power units up to an including 1000 W. Eliminates sparking on contact and removal of electrodes from work. Provides more accurate timing of soldering operations. Recommended in most applications. A rugged industrial switch with six-foot (1.83 m), three-wire cord and NEMA plug. **Shipping Weight:** 1 lb. (.45 kg).
709-2310. Model 10519. **1-4** .... **EACH 44.00**
5-Up .... **EACH 36.00**

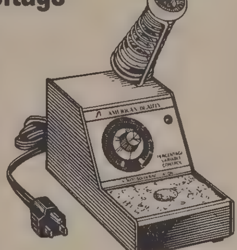
V-3500 Variable Voltage Dual Soldering Station



- **Output Voltage Infinitely Variable from 0% to 100% of Line Voltage**
- **Accepts Miniature and Pencil-Type Irons Up to 60 Watts**
- **3-Conductor Power Outlets for Two Irons (Irons Not Included, Order Separately)**

Gives the operator simultaneous, independent control of two soldering irons for special purposes such as: a) alternate use of two irons to compensate for large heat requirements; b) when different size irons are needed by the same operator; c) controlling iron output during idle situations.
709-3500. Model V3500 .... **EACH 198.00**

V-3600 Variable Voltage Soldering Station

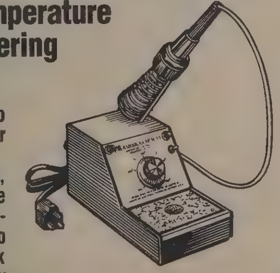


- **Output Voltage Infinitely Variable from 0% to 100% of Line Voltage**
- **3-Conductor Power Outlet for Iron (Iron Not Included, Order Separately)**
- **Spring-Type Iron Holder**

Powers and controls one soldering iron. Plug in almost any iron up to 60 watts to make a complete soldering station.
709-3600. Model V3600 .... **EACH 138.00**

Model V3800S. Sponge for V3600, V3500, 5000, 5100, 5200 Soldering Station.
709-3800. Model V3800S .... **PER PKG./6 8.30**

5000 Series Temperature Controlled Soldering Stations



- **Holds Temperature to Within ±5°F (9°C) or Less**
- **Zero Cross-Switching, Total Grounding of the Station's Iron and All-Metal Housing to Protect Sensitive Work**
- **Iron Completely Isolated when Idling in Station's Spring-Type Holder**
- **Iron Equipped with Paragon Quality Tip No. 646 (Chisel)**
- **Deep-Well, Self-Moistening Tip Cleaner**
- **Meets or Exceeds MIL SPECS, Including DOD-2000-1B**
- **120 AC, 60 Hz 3-Wire Cord, NEMA Plug**

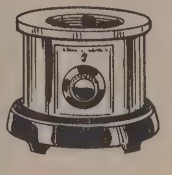
Three 50-watt all-electric stations. Each utilize a different mode of temperature selection to meet different needs. **Overall Size:** Length — 8⅞"; Width — 3¾"; Height — 8¼" (22.54 × 9.53 × 20.95 cm) including soldering iron holder.

Model 5000. Offers continuous temperature selection from 600° to 800°F.
709-5000. Model 5000 .... **EACH 250.00**

Model 5100. Specifications similar to Model 5000 except temperature selection limited to four most used settings — 600°, 650°, 700°, 750°F (316°, 343°, 371°, 399°C).
709-5100. Model 5100 .... **EACH 250.00**

Model 5200. Specifications similar to Model 5000 except that this model has no external temperature controls. Temperature set by supervisor by means of selector control inside of cabinet. Settings limited to 600°, 650°, 700°, 750°F (316°, 343°, 371°, 399°C). Replacement sponges and Paragon Quality® tips are available from your Allied Distributor.
709-5200. Model 5200 .... **EACH 250.00**

General-Purpose Solder Pots



Cast iron crucible. **Depth:** 1½". **Heat Range:** adj. 325°-750°. **Model 300.** Center tapped, ¼-20. I.D. 2¼". **Size:** Height — 5⅛"; Base Dia. — 5¾"; Top O.D. — 4¾". Includes dross skimmer. **Model 600.** Center tapped, 5/16"-18 I.D. 3½". **Size:** Height — 5½"; Base Dia. — 7"; Top O.D. — 6". Cast iron base. Includes dross skimmer.

Stock No.	Mfr.'s Type	Capacity	Elements	Shipping Wt.	EACH
709-1300	300	1 lb.	(2) 160 W	6½ lbs.	264.00
709-1600	600	2½ lbs.	(2) 300 W	9 lbs.	300.00

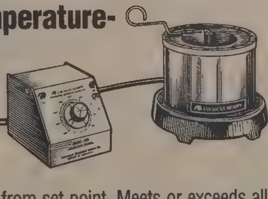
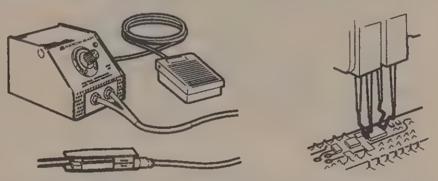
Solid State, Temperature-Controlled Solder Pots



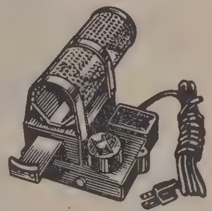
Model 675 features remote control module with solid-state, close tolerance temperature control ± 5°F from set point. Meets or exceeds all MIL spec. requirements including DOD-2001-B. 400-800°F range. 2¾ lb. capacity. Removable dross skimmer included. Permanently attached control module can be placed up to 18" from solder pot.
709Q0675. Model 675 .... **EACH 940.00**

Surface Mount Handwork System Kit



Designed for rework, salvage and manual fabrication of SMD circuits. One tool does it all — holds the SMD, solders and desolders. the handpiece is a micro-tweezer whose gripping points are also heating elements, specially shaped to work between closely spaced SMDs. To protect adjacent components, traces and substrates, no heat is applied until the tweezer is firmly positioned. Only then is current turned on via Footswitch to supply a controlled level of heat — just enough for soldering and desoldering of two size flat pack SMDs. The kit consists of the Power Unit (105A3-120V), a Footswitch (10519), Elements (105156, 105157, 105160), and a 105131 handpiece.
709Q6070. Model 105SMD-120. Kit .... **EACH 452.00**

Temperature Regulating Stands



Maintain soldering iron at preset safe idle temperature, during downtime. Fast return to full on. Extends element life, prevents cooking and detinning tips. Saves current. **Note:** For perforated guard (as shown) add "SG" to catalog number. 3-wire cord with NEMA plug, standard.
709-0475. Model 475. For 100-600 W Irons .... **EACH 138.00**
709-0476. Model 476. For 30-85 W Irons .... **EACH 142.00**

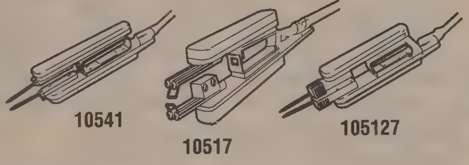
Tweezers

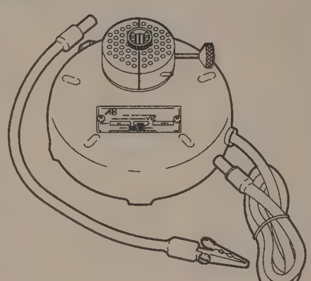


Regular Tweezer
For "squeeze and pull" stripping of thermoplastic insulation from wires up to 14 gauge. Now improved to meet increasing need for faster stripping of "tough" insulations such as Teflon and other PTFE-based materials. Now accepts special flat-blade heating elements designed to mount at 90° for a more powerful bite. Still accepts standard elements that mount at 45°. Strips lengths ⅛" to 1½" (3.18 to 38.10 mm). Use with 15 to 100 W power (50 W for continuous operation; 100 W with intermittent switching). **Length:** 4½" (11.43 cm). **Weight:** 4 oz. (.11 kg). **Cord:** 4' (1.22 m). **Shipping Weight:** 1 lb. (.45 kg).
709-2319. Model 10517. **1-3** .... **EACH 124.00**
4-Up .... **EACH 103.00**
709-2322. Element .... **PER PKG./2 4.00**

Regular Tweezer
For perfect contact and control on microminiature setups. Holds part for soldering. Stainless steel electrodes .078" (1.98 mm) dia., may be formed or bent. Space between electrodes 0" to ⅜" (0 to 9.53 mm). Use with 15 to 100 W power. **Length:** 5" (12.70 cm). **Weight:** 4 oz. (.11 kg). **Cord:** 4' (1.22 m). **Shipping Weight:** 1 lb. (.45 kg).
709-2313. Model 10541. **1-3** .... **EACH 90.00**
4-Up .... **EACH 75.00**

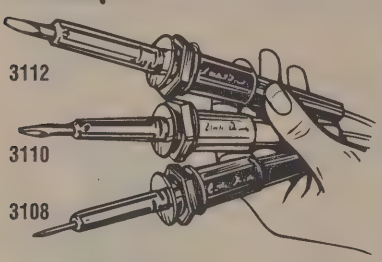
Medium Tweezer
Handles connections up to ½" (12.7 mm) dia. including heavy gauge wire, terminals, lugs, posts, etc. Replaceable stainless steel electrodes .125" (3.18 mm) dia. may be bent to fit job. Use with 15 to 250 W power. **Length:** 7" (17.78 cm). **Weight:** 9 oz. (.26 kg). **Cord:** 4' (1.22 m), ten gauge stranded wire. **Shipping Weight:** 2 lbs. (.91 kg).
709-6040. Model 105127. **1-3** .... **EACH 208.00**
4-Up .... **EACH 173.00**

Model 105V12 Roundhouse



- Industrial and Model/Hobby Applications
- Great for Holding Small Parts
- Versatile Holding Fixture for Your Resistance Soldering Needs
- Provides Return Path to American Beauty Resistance Power Units
- Functions as a Stand-Alone Workstation, Too
- No-Stick Aluminum Vise Resists Solder Build-Up
- Precision Vise Has Positionable Chromed Pins to Securely Hold Rectangular, Round and Even Odd-Shaped Parts
- Requires Only 5½" Benchtop Space
- Comes with 12" Extension Lead with Alligator Clip
- Vise Diameter: 2"
- Overall Height: 3.5"

709-6030. Model 105V12 .... **EACH 66.86**



Little Dandy® Miniature Irons

Here's an economy-line of miniature irons that will stand up to rugged treatment without "letdown" performance. Easy to use, fits comfortably in your hand, and gives you unbelievably long service. Use for custom jobs or production runs. No sweat for Little Dandy Irons!

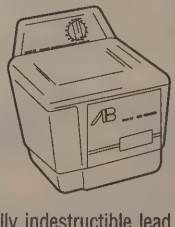
Model S-3300 Ultrasonic Cleaner



- Clean Components and Small Instruments
- 100% American Made
- Stainless Steel

The small size and simple operation of this ultrasonic cleaner makes cleaning practical at work bench or lab table. Completely self-contained and self-tuned with solid state circuitry for dependability and long life. Stainless steel tank with stainless steel tank cover. One pilot-lighted on/off switch. No radio-frequency interference. Virtually indestructible lead zirconate titanate transducer. **Capacity:** ½ gal. (1.8 liters). **Tank Size:** 5½" × 6" × 4" (14.0 × 15.2 × 10.2 cm). 50 W cleaning power. 75 W input. **Shipping Weight:** 7 lbs.

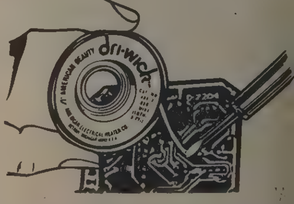
Dri-Wick® Fine De-Soldering Tool on a Spool



Tested, proved...and backed by American Beauty. Dri-Wick is used in U.S. space program, at flight centers and by subcontractors. Proved most efficient for de-soldering, re-work, salvage. Any place you can put solder, you can remove it in a second with Dri-wick. Lay Dri-wick on joint and apply tip of hot soldering iron. Capillary action draws out all solder, leaves joint clean, ready for salvage or rework. Specially woven copper, each strand coated with water-white resin. Packaged 5 ft. per spool, 25 spools per carton. (No. 484-6, 2½ ft. spools.) Six widths. Test quickly indicate best width to use. Table below gives general guidance.

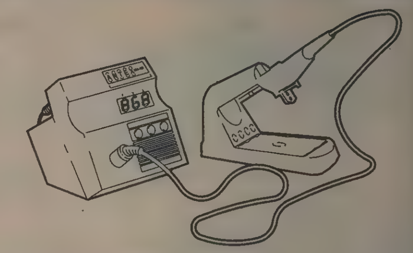
690-SD Soldering Station

— NEW —

690-SD Digital Read-Out, Multi-Program Station

- **2 Memory Settings**
- **°C or °F Read-Out**
- **Dial-In Tip Selector for Accurate Offset**
- **Lockable, with PIN Security**
- **Basic Self Diagnostics**
- **Uses 180 Series Tips; 180-IS Tip Attached**
- **This Station Features the 690-SD Static Dissipative Soldering Unit, the SD-50 Static Dissipative Temperature Controlled Iron and the ST-6 Bench Stand**



The 690-SD is a Multi-program, digital read-out static dissipative, temperature controlled iron and soldering station. Built to meet the US Mil Std 2000A and EN 1 000 1 5-1, the temperature range is 60 to 450°C and repeatability to 2°C. Program selection and settings are made using three buttons. Each station is shipped with easy-to-use, multilingual instructions.

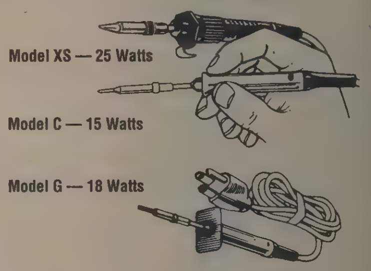
Soldering Irons

- **Safe for Delicate Components**
- **3-Wire Ground Plug**
- **Slide-On Replaceable Tips**
- **Heat to Full Operating Temperature in 45 Seconds**
- **Long-Lasting Elements**



Antex Soldering Irons put the heat into the tip, not into the environment. This gives you faster heat up, quicker recovery times and a cooler handle. It takes only 45 seconds to be ready to solder, while most other irons require a full 2-5 minutes. Antex has also shortened the distance from your fingertips to the end of the tip to give greater control and soldering accuracy. The Antex product line is designed for all electronic and industrial assembly and field service soldering. Each iron features a heating element directly under the tip for optimum thermal efficiency.

Series 140 Tips for Models C, G and TC25 Soldering Irons

These tips are designed for .135" heating element shafts and are made from a special copper alloy giving them maximum strength at high temperatures and maximum heat conductivity for rapid heat up and recovery times. All tips easily slide-on over the heating element. There are no set screws to freeze or threads to bind. To change tips, simply remove your old tip and slide the new one on.

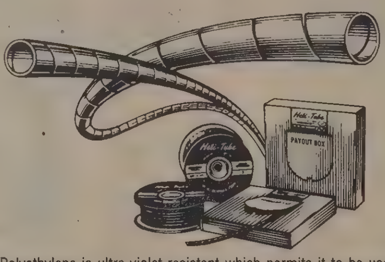
Heli-Tube



Spirally Cut Cable Wrap

U.L. Recognized Heli-Tube® is a spirally cut expandable plastic cable harness. Bundles wires cables or hoses firmly but allows flexibility. Wrap on like tape, can be re-used, quickly and simpl Resists abrasion and insulates. Clamps bundles t standoff. Dampens vibration. Can have wir breakouts in any orientation. Wires can be routed o re-routed after Heli-Tube® is in place; either ne wires or replacement wires. Stocked by Allied i 100' spools of Clear Polyethylene, Blac Polyethylene, and Black Fire-Resistant Polyethylene The Clear Polyethylene is a low cost material idea for general applications. Not affected by ordinar solvents and extremely resistant to abrasion **Maximum Operating Temperature:** 101°C t 215°F. **Minimum Operating Temperature:** –76°C t –105°F. **MIL Spec. and Approvals:** Fed. Spec LP390, MIL 1631D, MIL P26692. The Blac Polyethylene is ultra-violet-resistant which permits it to be used in direct sunlight for long periods of time. Sam temperature range and MIL spec. as Clear Polyethylene. The Black Fire-Resistant Polyethylene is self-extinguishing **Maximum Operating Temperature:** 93°C to 200°F. **Minimum Operating Temperature:** –19°C to –1°F.

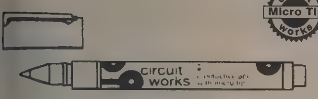
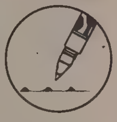
Micro Tip 2200 Circuit Works Conductive Pen





- Fine Line Conductive Traces
- Improved Silver Conductor
- Precise Trace Application
- Makes Instant Conductive Silver Traces
- Dries in Minutes at Room Temperature
- Valved Pen Tip for Easy Application
- Can Be Soldered at Low Temperatures
- Use Where Conductive Traces Are Needed
- Lower the Cost of PCB Fabrication and Repair
- Speed Prototype and Design of PCBs
- Cut Rework Time and Materials

974-0005. 2200-MT..**EACH 16.40**

2400 Circuit Works Conductive Epoxy

- Solderless Electronic Connections
- Quick No or Low Heat Cure
- Strong Electronic Component Bonding
- Maximum Conductivity
- Two Part, Easy to Mix, 1 to 1 Ratio System
- Convenient Tubed Packaging
- Small, Cost Effective Quantities

974-0004. 2400 Conductive Epoxy..**EACH 17.49**

3300 Circuit Works Overcoat Pen

circuit works overcoat pen

- Insulates Against Shorting and Arcing
- Protects Against Abrasion, Moisture and Chemicals
- Helps Prevent Static Discharge Problems on Sensitive Circuits
- Matches Coloring and Durability of Solder Masks for Nearly Invisible Repairs
- Dries in Minutes at Room Temperature with Minimal Shrinkage
- Compatible with the 2200 Circuit Works Conductive Pen

974-0002. 3300. Clear Overcoat Pen..**EACH 15.56**
974-0003. 3300. Green Overcoat Pen..**EACH 15.56**

Rosin Flux Solder Removal Braid

When it comes to removing the Blob, the original Soder-Wick® Brand is still the best. Removing blobs, bridge, icicles or faulty components is quick and easy work for Soder-Wick® Brand Desoldering Braids. Years of nnovative research has expanded our line. Fine-Braid™ with pure white rosin flux.

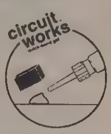
4300 Circuit Works Quick-Bond Kit

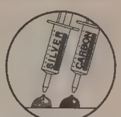


Circuit Works Quick-Bond Gel and Accelerator. Provide strong instant bonding of metals, rubbers, and plastics in design, prototype and repair applications. Not for use on polyethylene or polypropylene.

- Provides Strong, Instant Bonding to Rubbers, Metals and Plastics
- Gel Formula Is Easy to Apply and Stays in Place; Ideal for Filling Gaps, Wide Tolerances or Bonding Dissimilar Materials
- Triple Distilled Cyanoacrylate for Long Shelf-Life and Improved Adhesive Performance
- Quick-Bond Accelerator Insures Reliable Instant Bonding
- Accelerator Is Safe for Metals, Plastics and Rubbers; Contains No Ozone Depleting Materials
- Adhesive Features Excellent Resistance to Impact, Weathering and Thermal Cycling

974-0006. 4300. Quick Bond Kit..**EACH 8.04**

7100/7200 Circuit Works Conductive Grease



Circuit Works Conductive Greases provide electrical and thermal conductivity, proven lubrication properties, and protection from moisture, oxidation and other environmental hazards. 7100 Circuit Works Silver Conductive Grease. Contains pure silver for maximum electrical and thermal conductivity while maintaining superior lubrication properties. 7200 Circuit Works Carbon Conductive Grease. Relies on cost-effective carbon for good conductivity and lubrication properties. Both greases are inert, thermally stable over a wide temperature range, and exhibit excellent lubricating properties when used at low to moderate loads and speeds. Circuit Works greases use advanced silicone lubrication technology to protect components against moisture, corrosion, radiation and oxidation while remaining compatible with metal, rubber and plastic.

974-0012. 7200 Carbon Grease..**EACH 11.95**

Chemicals

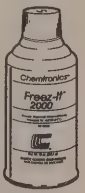
Freez-It® 2000 Antistat

Circuit refrigerant cools sensitive components with minimal risk of static discharge.

- Fast Cooling to –60°F (–51°C)
- Nonflammable
- Antistat Minimizes Static Voltage
- Leaves No Residue
- Nonabrasive, Safe for Most Surfaces
- Contains No Ozone Depleting Compounds
- CFC and HCFC Free

Designed for use on components sensitive to static discharge. Use to locate thermal intermittent components, test for trace continuity, and provide heat sink protection during soldering and desoldering.
898-0045. ES1051. 10 Oz. Aerosol..**EACH 10.88**

Freez-It® 2000



Circuit refrigerant for locating thermal intermittent components.

- Quickly Lowers Temperature to –60°F (–51°C)
- Nonflammable
- Ultra-Pure Formulation Leaves No Residue
- Nonabrasive, Safe for Most Surfaces
- Contains No Ozone Depleting Compounds
- CFC and HCFC Free

Use to locate thermal intermittent components and test PC boards for trace continuity from stress fractures or to cool the entire board. Provides heat sink protection for components during soldering and desoldering operations. Effectively hardens adhesives for easy removal.
898-0010. ES1050. 10 Oz. Aerosol..**EACH 10.50**

Ultrajet® 2000

High pressure duster cleans electronics without scratching delicate surfaces.

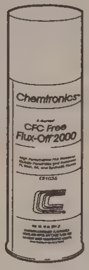
- 82 psig at 77°F
- Nonflammable
- Removes Dirt, Dust and Dry Contaminants
- Deep Cleans Hard to Reach Areas
- Nonabrasive, Safe for Most Materials
- Ultra-Pure, Leaves No Residue
- Contains No Ozone Depleting Compounds
- CFC and HCFC Free
- May Be Used On Energized Equipment

Cleans keyboards, circuit boards, surface mount devices, computers and other electronic components, assemblies, photographic and video equipment.
898-0020. ES1020. 10 Oz. Aerosol..**EACH 10.20**

— NEW —

CFC Free Flux-Off® 2000

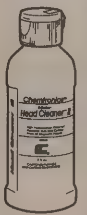
Fast drying aerosol quickly and completely removes R, RMA, RA and synthetic flux.



- Superior Wetting; Solvent Flushes Areas Under Components Clean
- Effective Spot Cleaner For Removing Flux, Oil, Ionic and Non-Ionic Soils
- Noncorrosive, Safe for Most Surfaces
- No Rinsing Required
- No Ozone Depleting Compounds
- CFC and HCFC Free
- Not For Use on Energized Equipment
- Available in 1, 5 and 55 Gallons

Perfect for fast repair and rework. Use on printed circuit boards, SMD pads, plugs, sockets, heat sinks, switches, relays, and chip carriers.
898-0035. ES1035. 10 Oz. Aerosol..**EACH 11.39**

Head Cleaner™ II



Safe and effective cleaner for removing dust, oils and metal oxides from magnetic heads and drives.

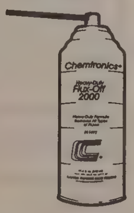
- Reduces Head Wear and Improves Performance
- Evaporates Quickly; Leaves No Residue
- Safe On Most Plastics and Elastomers
- No Ozone Depleting Compounds
- CFC and HCFC Free
- Not for Use On Energized Equipment

Specially formulated to safely clean optical and magnetic tape/disk heads, memory systems, and tape transport mechanisms.
898-0025. ES820L. 8 Fl. Oz. Liquid..**EACH 8.00**

Commercial Chemicals

— NEW —

Heavy-Duty Flux-Off® 2000 (For Commercial Use Only)



Fast drying, nonflammable extra strength solvent removes heavy and encrusted flux deposits.

- Removes R, RMA, RA, and Synthetic Flux
- Effectively Cleans Oil, Grease, and Other Contaminants From PC Boards
- Check Compatibility On Acrylics, ABS, Polycarbonates and Polystyrenes
- Contains No Class I CFC
- May Be Used On Energized Equipment

Removes flux and contaminants from printed circuit boards, connectors, telecommunications devices and other precision equipment.
898-0030. ES1692. 14.5 Oz. Aerosol..**EACH 13.43**

Electronics Cleaner/Degreaser 2000 (For Commercial Use Only)

Fastest drying nonflammable electronics cleaner and degreaser.

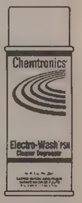
- Nonflammable
- Nonfoaming Ultrasonic Cleaner
- Noncorrosive, Safe for Metals
- Removes Oil, Grease, Dirt, Silicone, Flux, Adhesive and Other Contaminants
- Check Compatibility On Acrylics, ABS, Polycarbonates and Polystyrenes
- Contains No Class I CFCs
- May Be Used On Energized Equipment

Engineered for use on PC boards, motors and electronic devices.
898-0040. ES1601. 14.5 Oz. Aerosol..**EACH 13.09**

Commercial Only Cleaners and Degreasers

— NEW —

Electro-Wash® PSN Cleaner Degreaser



The general purpose, nonflammable cleaner and degreaser safe for use on plastics.

- Contains No CFCs; Contains HCFCs
- Nonflammable; May Be Used on Energized Equipment
- Safe for Use On Most Plastics
- Removes Dirt, Oils, Grease, Oxides and Other Contaminants
- Excellent Wetting and Penetrating Action — Flushes Tight Tolerance Areas Clean
- Evaporates Quickly — Leaves No Residue
- Removes Flux Residues

898-0095. ES1675. 12 Oz. Aerosol..**EACH 19.73**

Pow-R-Wash™ Contact Cleaner

The high performance, nonflammable cleaner safe for use on powered-up contacts and surrounding plastics.

- Contains No CFCs or VOCs; Contains HCFCs
- Nonflammable; May Be Used on Energized Equipment
- Safe for Use On Most Plastics
- Removes Oily Carbon Soils, Dirt, Greases and Other Soils from Contact Surfaces
- Low Surface Tension — Flushes Tight Tolerance Areas Clean
- Evaporates Quickly — Leaves No Residue
- Excellent Dielectric Properties

898-0110. ES1674. 12 Oz. Aerosol..**EACH 21.72**

Value Line

Duster
General purpose duster for electronics and office equipment.

- ► Nonflammable
- ► Moisture Free
- ► Leaves No Residue
- ► Removes Dirt, Dust, and Other Particles
- ► Will Not Scratch or Abrade Surfaces
- ► CFC and HCFC Free

898-0080. CV3012. 10 Oz. .... **EACH 6.55**

Cleaner/Degreaser
General purpose cleaner and degreaser.

- ► Removes Grease, Dirt, Oil, Carbon and Oxidation
- ► Safe for Use on Most Plastics and All Metals
- ► Fast Drying, Leaves No Residue
- ► Flushes Tight Tolerance Areas Clean
- ► Features All-Way Spray Valve
- ► No Ozone Depleting Compounds
- ► CFC and HCFC Free
- ► Not for Use on Energized Equipment

898-0085. CV2116. 10 Oz. .... **EACH 7.73**

No Flash Contact Cleaner (For Commercial Use Only)
Nonflammable, Non-Corrosive Contact Cleaner

- ► Removes Built-Up Grease, Dirt, Oil, Carbon and Oxidation
- ► Restores Electrical Continuity of Contacts and Switches
- ► Excellent Dielectric Properties
- ► Safe for Use on Metals
- ► Fast Drying, Reduces Down Time
- ► Flushes Tight Tolerances Areas Clean
- ► Features All-Way Spray Valve
- ► Check Compatibility with Plastics
- ► May Be Used on Energized Equipment

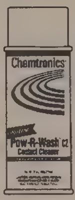
898-0090. CV1116. 12 Oz. .... **EACH 10.55**

No Ozone Depleting Chemistry

Electro-Wash® CZ Cleaner Degreaser
The first non-ozone depleting, nonflammable cleaner and degreaser safe for use on plastics.

- ► CFC/HCFC Free
- ► Nonflammable; May Be Used On Energized Equipment
- ► Safe for Use On Most Plastics
- ► Cleans Encrusted Dirt, Oils, Oxides, and Other Soils
- ► Removes Acrylic Conformal Coatings
- ► Excellent Wetting and Penetrating Action — Flushes Tight Tolerance Areas Clean
- ► Evaporates Quickly — Leaves No Residue
- ► Available in 1, 5, and 55 Gallons

898-0050. ES7100. 12 Oz. Aerosol .... **EACH 30.18**
898-0055. ES7108B. 5 Oz. BrushClean™ System .... **EACH 16.09**



Pow-R-Wash™ CZ Contact Cleaner
The first non-ozone depleting, nonflammable cleaner safe for use on powered-up contacts and surrounding plastics.

- ► CFC/HCFC Free
- ► Nonflammable; May Be Used On Energized Equipment
- ► Safe for Use on Most Plastics
- ► Rapidly Removes Oily Carbon Soils, Greases and Oxides
- ► Low Surface Tension — Flushes Tight Tolerance Areas Clean
- ► Evaporates Quickly — Leaves No Residue
- ► Available in 1, 5 and 55 Gallons

898-0060. ES7300. 12 Oz. Aerosol .... **EACH 31.18**
898-0065. ES7308. 5 Oz. Aerosol .... **EACH 15.00**

Flux-Off® CZ Flux Remover
The first non-ozone depleting, nonflammable flux remove safe for use on plastics.

- ► CFC/HCFC Free
- ► Nonflammable; May Be Used On Energized Equipment
- ► Safe for Use on Most Plastics
- ► Cleans Type R, RMA, RA and Most No-Clean, Syntheti and Water Soluble Fluxes
- ► Low Surface Tension — Flushes Tight Tolerance Area Clean
- ► Evaporates Quickly — Leaves No Residue
- ► Available in 1, 5, and 55 Gallons

898-0070. ES7200. 12 Oz. Aerosol .... **EACH 32.0**
898-0075. ES7208B. 5 Oz. BrushClean™ System .... **EACH 16.3**

Anti-Static

SD-7 Plast-N-Glas®
Non-streaking cleaner for transparent surfaces that protects against electrostatic build-up.

- ► Nonflammable
- ► Controls Static, Cleans and Polishes In One Application
- ► Foaming Spray Won't Run or Drip; Ideal for Optical Surfaces
- ► Prevents Attraction of Dust and Dirt
- ► Compatible with Plastics, Glass and Stainless Steel
- ► Prevents Electrostatic Point Sources
- ► Not for Use on Anti-Glare Coatings or Mesh Screens

898-0115. ES1668. 16 Oz. Aerosol .... **EACH 7.18**

SD-22 Mat and Benchtop Reconditioner
Cleans and reconditions ESD mats and benchtops while adding static dissipative protection.

- ► Nonflammable
- ► Nonabrasive
- ► Noncorrosive, Chloride and Amine-Free
- ► Safe on Surfaces Not Harmed by Water
- ► Will Not Dry Out ESD Mats
- ► Available in 1, 5, and 55 Gallons

898-0120. ES1664T. 16 Fl. Oz. Sprayer .... **EACH 10.91**

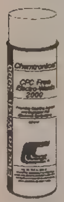
Hand Guard™
Hand lotion specially formulated for electronic technicians.

- ► Nongreasy Formula Contains Aloe Vera and Vitamin E
- ► Special Formulation Minimizes Potential for Static Damage
- ► Contains No Lanolin, Silicone or Mineral Oil that Could Inhibit Solderability of Printed Circuits and Components

Emollients penetrate deeply to relieve dry, chapped or chemically irritated skin. New easy to use pump dispenses the right amount of lotion every time.

898-0125. C805. 8 Fl. Oz. Liquid Pump .... **EACH 5.7**

Precision Cleaners

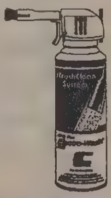


CFC Free Electro Wash® 2000 (For Commercial Use Only)
Fast drying one step cleaner and degreaser safe for most plastics.

- ► High Pressure Aerosol Cleans Soils, Oxidation and Contaminants
- ► Low Surface Tension; Solvent Flushes Area Under Components Clean
- ► Cleans and Degreases in One Step, No Rinsing Required
- ► No Ozone Depleting Compounds
- ► CFC and HCFC Free
- ► Not for Use on Energized Equipment
- ► Available in 1, 5, and 55 Gallons

898-0100. ES1210. 12.5 Oz Aerosol .... **EACH 14.27**

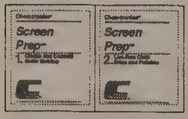
CFC Free Flux-Off® 2000 BrushClean™ System
Cleaning system quickly and completely removes R, RMA, RA, No-Clean and Synthetic Flux



- ► CFC and HCFC Free
- ► No Ozone Depleting Compounds
- ► Not for Use on Energized Equipment
- ► Fast Drying Solvent
- ► Noncorrosive, Safe for Most Surfaces
- ► No Rinsing Required
- ► Excellent Material Compatibility
- ► Superior Wetting; Solvent Flushes Areas Under Components Clean
- ► Effective Spot Cleaner for Removing Flux Oil, Ionic and Non-Ionic Soils

898-0105. ES835B. 5 Oz. BrushClean System .... **EACH 7.09**

Screen Prep™



A convenient to use wet and dry cleaning and static control system for use on monitor screens.

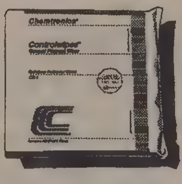
- ► Cleans and Provides a Static Dissipative Treatment
- ► Safely Removes Dust, Dirt and Oils
- ► Controls Static-Generated Dust

Wet pad is premoistened with a unique static control cleaner the removes vision inhibiting contaminants and controls dust. Dry pad wipes screen optically clear.

890-0150. CSP20. #1 3" × 4" Pad; #2 4" × 6" Wiper .... **PER PK./25 18.45**

Controlwipes™

Solvent resistant high absorbency wipe.



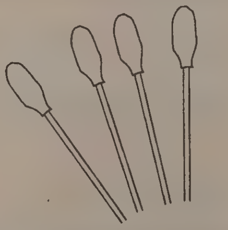
- ► Packaged in a Class 100 Cleanroom Environment
- ► Polyester Cellulose Blend
- ► Strong, Will Not Tear or Shred
- ► High Absorbency and Liquid Retention
- ► Will Not Abrade Surfaces
- ► Spunlaced Fabric Will Not Unravel or Lint
- ► Resistant to Most Solvents, Alcohols and Dilute Acids

Safe for critical applications requiring excellent contamination control on precision instrumentation and other applications.

898-0155. C910. 9" × 9" Wipers .... **PER PK./150 24.18**

Foamtips™

High absorbent precision cleaning swabs with a wide variety of head sizes and shapes.



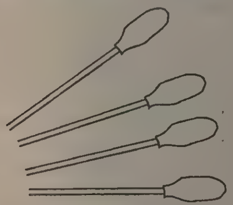
- ► Precision Cleaning Swabs with 100 PPI Polyurethane Foam Head
- ► Purest Medical Grade Foam

Foamtips™ swabs are available in a wide variety of head sizes and shapes. The Foamtips Pro has a blue scrubber side and a soft absorbent side.

898-0170. CF4050 .... **PER PK./50 12.73**

Flextips™

Flexible head is ideal for cleaning optics and small confined areas.



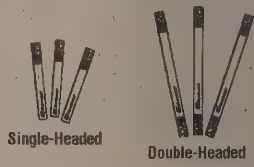
- ► Superior Durability
- ► 100 PPI Open Foam Head
- ► Nonabrasive

Provides gentle, nonabrasive brushing of sensitive surfaces.

898-0175. CX50. Flextips .... **PER PK./50 19.5**
898-0180. CXM50. Flextips Mini .... **PER PK./50 20.5**

Chamois Tips™

The ideal swab for cleaning audio and video heads and optical pick ups.

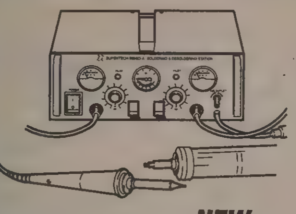


- ► Synthetic Chamois Cloth Head
- ► Flexible, Formable ABS Handle Bends to Clean Hard-to-Reach Areas
- ► Available in Single and Double Headed Styles
- ► Solvent Bonded, No Adhesive Leeching
- ► Material Is Free of Oils and Residues
- ► Use with Head Cleaner™ II to Clean Magnetic Heads and Drives

Chamois Tips clean the magnetic heads of VCRs and other sensitiv assemblies.

898-0160. CC50. Chamois Tips .... **PER PK./50 26.7**
898-0165. CCD50. Double Headed .... **PER PK./50 48.9**

Soldering/ Desoldering Station



- ► Supertech 999SD-A's Superior Performance Is Unsurpassed in Providing You with the Very Best in State of the Art Temperature Controlled, Hand-Held Soldering/Desoldering Equipment
- ► The Self-Contained "High-Flo" Diaphragm Vacuum Pump Is Engineered to Provide Continuous, Maintenance-Free Operation, Delivering an "Amazingly Quiet" Vacuum Force of Over 60 cm/Hg (23 in/Hg)
- ► Vacuum Pump Actuation Occurs "On-Demand" Via a Finger Actuated, Thyristor Switching Circuit, Located for Ease of Operation on Desoldering Handle
- ► The Nichrome Element Wire Is Precision Wound at the End of the Stainless Steel Barrel to Ensure Maximum Temperature as Close to the Working Surface of the Tip as Possible — This Results in Both a Rapid Heat-Up and Instant Recovery
- ► XYTRONIC's "Hassle Free" Design Incorporates Electronic Circuitry That Enables the User to Fine Tune Tip Temperature from 150°C (300°F) Through 450°C (850°F) without Changing Tips
- ► The Revolutionary "Zero Voltage" Electronic Switching Design Protects Voltage and Current Sensitive Components (CMOS Devices etc.) Against Current and Transient Voltage Spikes Commonly Produced by Poorly Designed, Mechanically Switched Stations
- ► The Power Unit Is Isolated from the A.C. Line by a Transformer and Only 24 VAC Isolated Voltage Is Used to Drive All Heating Elements; the Desoldering Tip Is Grounded Through the Power Unit to Ensure Less than 0.4 Millivolt and 0.5 Ohm Resistance
- ► Engineered to Meet the Demanding Needs of Today's Electronics Industry, Technicians and Assembly Experts Alike; 999SD-A Not Only Increases Productivity but also Achieves New Standards of Quality in Partnership with XYTRONIC's Superior Operating Performance

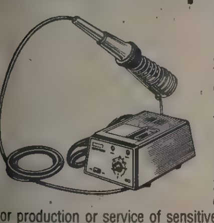
Solid-State Temperature Controlled Solder Station



Auto-temp solder station for precise temperature control. Features electronically controlled low-voltage system and LED power indicator. User-set temperature with front panel control. Fast warm-up. CMOS-safe, fully grounded conical tip included — a wide variety of tips available. Provides accurate control over a range of 200° to 900°F with meter indication of exact temperature at all times. Designed or production or service of sensitive electronic circuits. **Specifications. Line Voltage:** 110-125 VAC. **Heater Power:** 48 W. **Heater Voltage:** 24 V. Comes with ip, cleaning sponge, and iron holder.

796-0155. Type 12-070	**EACH**	**119.40**

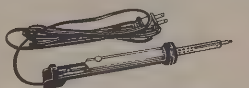
Solder Popper



The Solder Popper combines the popular snap-vacuum solder removal tool with a soldering iron for fast, one-hand operation, and is an excellent tool for field repair or production work. Has a tightly sealed vacuum pump that snaps up all of the solder quickly. A removable reservoir stores solder and cleans out in seconds. The 30 watt iron melts solder rapidly and features a long-life tip that unscrews for easy replacement.

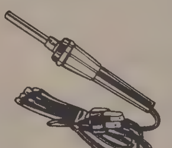
796-2161. Type 12-2161. Replacement 'O' Ring Seal	**EACH**	**1.97**

Tempmaster Soldering Iron

The Tempmaster is an iron for practically all uses. The temperature may be user-set from very low (barely melting 60/40 solder) up to 840°F for brute-force work. Lower temperatures at about mid-range are ideal for most assembly and service work. Higher ranges may be used when heating large areas or solder removal braid. Temperature setting is readily adjusted by turning a control on the handle with a screwdriver. The Tempmaster has a grounded tip via 3-prong U-plug for ESD damage prevention. Replacement tips are available in a variety of shapes — see GC Nos. 12-072 through 12-078.

796-1248. Model 12-048	**EACH**	**48.75**

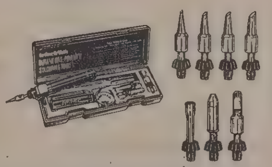
25 Watt Soldering Iron



A well made iron that is tough enough for daily use in production or at the service bench. Three-wire grounded tip prevents inducing ESD failures. A wide range of long-life tips is available (Nos. 12-072 through 12-078) for special applications.

796-1238. Model 12-038	**EACH**	**29.58**

P-1 Cordless, Refillable Butane Gas-Powered Soldering Tool



Designed and engineered for micro-precision soldering applications, the patented Portasol® soldering tool is cordless, refillable, and operates up to 90 continuous minutes on standard butane lighter fuel. The tool is ergonomically designed to minimize operator fatigue, at a weight of 2.5 oz. and length of less than 7", can be used for virtually any anti-static* soldering or desoldering applications. The tool eliminates all risk of leakage current to sensitive circuits and allows anti-static soldering. Product features include a fast, flint sparked ignition in the cap and an adjustable temperature control for providing the equivalent of 10-60 watts of power. This allows the tool to melt solder in less than 40 seconds. Refilling the tool is simple and takes only 20 seconds. The unit comes standard with a 2.4 mm (3/32") soldering tip. A complete range of optional soldering tips, 1.0 mm (1/32"), 2.4 mm (3/32"), 3.2 mm (1/8"), 4.8 mm (3/16"), and heat tool accessories make the unit ideal for a variety of applications. Heat tool accessories include a blow torch, hot blower and hot knife.

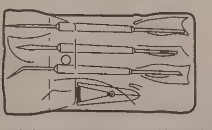
Heat Gun

UL Listed, 115 VAC. A dual range heat gun for use in heating shrink tube and drying coatings, adhesives, etc. Low temperature range setting produces a nominal 700°F (2,000 BTUs), high range 975°F (4,000 BTUs). Maximum setting draws 10 amps, low heat draws 5 amps. A light weight design that is easy to handle. Designed so that it may be put down to cool without a special holder.

796-1297. Model 12-997	**EACH**	**73.81**

Solder Aid Kit



Seven tools provide complete solder maintenance capabilities to technicians, hobbyists, and electronics designers. Spring-loaded "extra fingers" clamp onto hot wires, while sharp-angles scraping tool cleans away excess solder with ease and accuracy. Hard to reach wires are quickly tamed with versatile wire clip. Smooth out solder beads with handy brush and detail tiny circuitry with 30° angled soldering prong. Kit contains the right tools for every job.

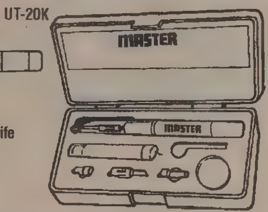
UltraTorch Soldering Iron, Heat Tool, Torch, and Hot Knife — *NEW* —



- ► **Completely Portable**
- ► **Solder and Desolder**
- ► **Heat Shrink, Torch and Hot Knife**
- ► **Silver Solder**
- ► **Hot Knife Strips Insulation**
- ► **Perfect for Field Service**
- ► **Electric/Electronic Repair**
- ► **Hot Knife Strips Insulation**

The Master Ultratorch heat tool Model UT-20 is an economically priced, refillable butane gas powered soldering iron, flameless heat tool, butane torch and hot knife. It's lightweight and easy to handle. The tool is started with a flint lighter which is built into its cap. The unique interchangeable tips make the UT-20 a perfect tool for engineers, electricians, repairmen, hobbyists and do-it-yourselfers. It's now possible to solder, desolder, heat shrink, torch, strip insulation and do many other applications all with one portable tool. Also use Master Ultratane™ butane fuel to power your Ultratorch. With its special "non-clogging" formula, it's the only approved butane for use with Master Ultratorch heat tools.

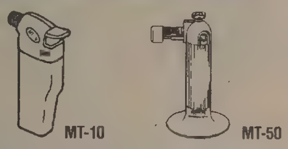
Master Microtorch MT-10 and MT-50

— *NEW* —



Perfect for hundreds of Microtorch applications. Aluminum welding, automotive repairs, light brazing, electrical and electronic repairs, lab use, melting plastics, shrinking tubing and connectors, silver soldering, soldering and desoldering, windshield repair, hundreds of other uses.

Master Microtorch Model MT-10

- ► **Compact Palm Size**
- ► **Self Igniting**
- ► **Adjustable Flame**
- ► **Powered by "Refillable" Fuel Cell**
- ► **20 Minute Run Time On Fuel Tank**

A butane powered microtorch. Generates a long sharp blue flame approximately 2500°F/1300°C. Perfect for many microtorch applications. It features a wind resistant flame and waterproof self-ignition system with deadmans switch. The flame can be adjusted by the regulator on the front of the fuel cell. A safety lock insures the switch is not turned on when not in use. The MT-10 runs 20 minutes on a full charge. Its compact size makes it perfect for tool kits and field service kits. Unit comes ready to use with fuel cell included. Refill fuel cell with Master Ultratane butane.

Master Microtorch Model MT-50

- ► **Hand Held or Tabletop Use**
- ► **Self Igniting**
- ► **Adjustable Flame**
- ► **Built-in Refillable Plastic Fuel Tank**

A butane powered microtorch. This Master microtorch generates a long sharp blue flame of approximately 2500°F/1000°C. Perfect for many microtorch applications. It features a built in self-ignition system with an easy to adjust flame. The flame is adjustable by turning the air control sleeve forward or backward producing a broad or pinpoint flame. The MT-50 has a 2 hour run time on a full charge and is perfect for applications which require continuous heat. Unit comes ready to use with a full tank of butane. Runs on Master Ultratane butane.

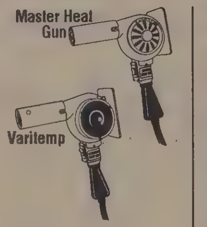
Master Heat Gun® and Varitemp®



Both Master Heat Gun and Varitemp heat guns provide the following features:

- **Double Protected Element Housing**
- **Reinforced, Mica-Insulated Ceramic Heating Elements**
- **Sturdy Die-Cast Aluminum Housing Is Rugged and Light Weight**
- **Adjustable Air Intake Controls Air Volume And Temperature Range**
- **Powerful High Speed Universal Motor**
- **Externally Accessible Brush Holders**
- **Three Position ("Off-On-Hot") Rocker Switch**
- **Non-Slip Rubber Backed Base Which Permits Full 90° Rotation**
- **Contoured, Well-Balanced Handle**
- **Oil Resistant Neoprene 3-Wire Cord Set**

Master Heat Guns®

The number one choice of industry. Has a rugged aluminum die-cast construction for heavy duty use. Four models provide temperatures up to 300°F, 500°F, 750°F and 1,000°F. "Wherever fast, portable flameless heat is the need."

Varitemp®

- **The Varitemp Provides A Safe Way To Heat Sensitive Materials Such As Thermoset Resins and Potting Compounds, When Exact Temperatures Are Needed**
- **The Dial-In Temperature Control Can Be "Locked-In" To The Required Temperature For Each Individual Job. This Feature Is Unique In That Once It Is Locked, It Cannot Be Accidentally Changed To An Incorrect Temperature**

The Variable temperature version of the Master Heat Gun. One model provides temperatures from ambient to 1000°F. It also has identical air flow characteristics to the Master Heat Gun. We recommend using the Varitemp in the laboratory where specific temperatures are required. It is also recommended for spot drying, defrosting and softening thermoplastic sheet, rod and tubing. All Master Heat Gun® attachments are interchangeable with the Varitemp® heat gun.

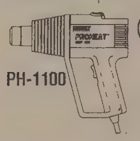
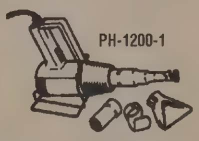
Proheat® Heat Gun and Proheat Varitemp® Heat Guns





Proheat® Heat Gun

This heat gun with temperature settings of 570° and 1050°F (299 and 565°C); and airflow of 15 CFM at 3650 FPM meets the requirements of most materials. The variety of attachments available makes the Proheat heat gun adaptable for a wide variety of uses including aircraft and marine applications.

The Proheat Features a DC permanent magnet motor that is compatible with all electrical frequencies. The compact, ergonomically-designed *Lexan® housing, enclosed ceramic heating element and wrap-around air intake assure you of a lightweight (1 lb. 10 oz.), easy-to-use source of flameless heat whether you're working with shrinkable packaging materials, spot-drying paint, bending plastics/laminates or activating adhesives.

*Registered Trademark of General Electric.

Proheat Varitemp® Heat Gun

This easy-to-use heat gun offers all the features of the Proheat heat gun, plus variable temperature control that allows the user to dial in any temperature from ambient to 1050°F (565°C). The airflow rating is 15 CFM at 3650 FPM. Its thermostatic control maintains the pre-selected temperature and prevents heat back-up or overheating when airflow is restricted. The Supervisor Temperature Lock-in feature allows pre-setting or temperature and sealing of access opening to assure compliance with pre-set temperature.

The Proheat Varitemp is suited to applications such as activating adhesives and potting compounds, curing and setting adhesives and epoxy resins. It is ideal for use in confined spaces or for applications where its lightweight construction can prevent operator fatigue.

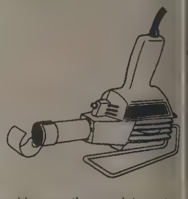
The Master-Mite® Heat Gun



The Master-Mite is a lightweight complete bench-top heating system, equipped to perform jobs without the excess air flow. It comes standard with and adjustable stand, a standard 650°F (343°C) heating element and a heat shrink attachment. The air flow rating is 3.8 CFM 700 FPM.

Weighing only 28 ounces, the Master-Mite can be hand-held for jobs such as vinyl repair or drying film without causing operator fatigue. The adjustable stand allows the operator to work with both hands free. The quiet operation and low power draw (4.5 amps, maximum) of the brushless continuous-duty motor, assures you of a quiet work environment. **Size:** 8.875" L × 3.375" W × 7" H. **Nozzle Opening Dia.:** 1". **Heating Element:** 3.875" long. **Net Weight:** 1.75 lbs. **Shipping Weight:** 3 lbs. **Cord Length:** 7 ft.

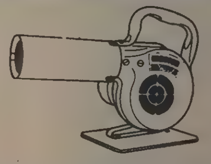
The Masterflow® Heat Blower



The Masterflow heat blower is the perfect answer wherever a continuous high volume of dry hot air is needed. It is ideal for installation on machinery and equipment for localized heating applications. The non-slip rubber-backed base permits a full 90° rotation of the blower for use in any position on workbench or assembly line. Three models offer temperatures of 300°, 500° and 750°F (150°, 260°, 400°C). The Masterflow features a quiet, oversize squirrel-cage blower which delivers up to 47 CFM 2,200 FPM through a 1.875" diameter nozzle and a brushless shaded-pole motor for continuous 24-hour operation. The hot/cold/off toggle switch permits blowing cool air which cools down the heating element after use and eliminates residual heat. **Overall Dimensions:** 12" L × 6" W × 9" H, 6" × 6" base (except AH-301 and AH-302, 9" L × 6" W × 9" H. **Nozzle Diameter:** 2.625" O.D., 1.875 air opening. **Net Weight:** 6 lbs. **Shipping Weight:** 8 lbs. **Cord Length:** 6 ft.

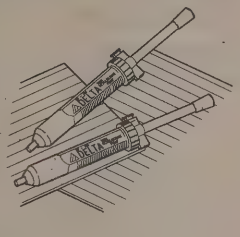
Desoldering Pump



- ► Durable Corrosion Resistant Plastic Construction
- ► Precision Metal Plunger
- ► Corrosion Treated Springs
- ► Regulated Return (1 Millisecond ±30%)
- ► Insulated Vacuum Pulse
- ► Uniform Reset Pressure (11 in./lbs. ±20%)
- ► Cushioned Shock Reduction (Pulse Release to Minimize Board Damage)

A specially engineered desolder pump made to high specifications and providing precise repeatable operation. Fitted with a Teflon Tip.

SA-500 Series Soldering Stations

- ► High Power Soldering with No Trade-Offs
- ► 600°F to 800°F Operating Range for Multi-Application Use
- ► Precise RTD Temperature Control for Excellent Stability and Repeatability
- ► Powerful 70W Heating Element for Quick Recovery on Heavy Joints
- ► Six Extra-Fine, Fine and Heavy Duty Tips Listed Below, More Available as Special Order
- ► Directly Grounded Tip to Meet MIL-STD-2000 Resistance and Voltage Requirements
- ► Light-Weight, ESD-Safe Handle for Maximum Operator Comfort, Component Safety
- ► Low Profile, Small Foot-Print Housing Uses Minimum Bench Space
- ► Low Cost, High Reliability with 12 Month Station Warranty

Hand soldering in the 1990s will require a highly flexible station; one with high power for boards with exceptional thermal demands, a wide range of tips for standard and micro components and consistent performance for cost-effective and reliable results. OK Industries SA-570 Series is a part of a new generation of soldering products with no trade-offs; designed for quick recovery, durability and low cost.

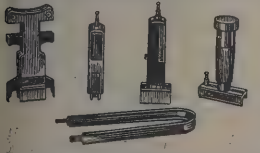
IC Insertion/Extraction Kits, Tools and Accessories



Insertion/Extraction Kit

WK-7, a kit of DIP IC extractors and inserters to accommodate all ICs from 8 to 40 pins. All tools that engage conductive surfaces are CMOS safe and include grounding lugs where appropriate. The kit consists of extractors EX-1 to 14-16 pin devices, and EX-2 for 24-40 pin chips, plus inserters MOS-1416, MOS 2428 and MOS-40 for 14-16, 24-28 and 36-40 pin ICs respectively.

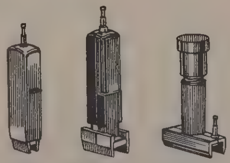
827-4007. Model WK-7 Kit ....EACH 75.96

DIP Extraction Tool

Narrow profile permits tool to work on densely spaced patterns while unique extraction mechanism, assures accuracy as well as excellent "feel". Additionally, the tool includes a unique pin straightener built into handle. Patented.

827-4015. Model EX-2 ....EACH 21.22

Insertion/Extraction Tools

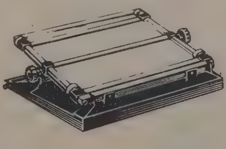


For highly sensitive MOS and CMOS ICs. Ground strap may be easily attached. Durable chrome ABS construction features precision parts for long life and easy on-hand operation. For use with DIP sockets.
827-1417. MOS-1416......EACH 19.27

For easy insertion of 24-28 pin ICs, same features as MOS-1416. For use with DIP sockets.
827-1420. MOS-2428......EACH 19.83

This insertion tool also aligns bent-out pins. A twist of the handle compresses the pins to proper .600 inch spacing and locks the IC into the tool. Then simply place the tool on the socket and depress the plunger for instant and accurate insertion. Features heavy chrome plating throughout for reliable static dissipation. Includes terminal lug for attachment to ground strap. For use with DIP sockets.
827-1418. MOS-40 ....EACH 21.18

Circuit Troubleshooting Kit



- ► Spring Loaded Guides to Accommodate Different Board Sizes
- ► Angled Board Position for Ease of Use
- ► Adjustable Foam-Lines Retaining Cover
- ► Removable Center Bar
- ► Replaceable Foam and Conductive Foam Available

These four printed circuit board holders are constructed of rugged steel components for durability as well as stability in use. The frame rotates a full 360° and steel backed foam cover opens (from either end) to expose component side of PC board for stuffing components, testing, or assembly work. Close and lock cover to hold components in place then flip over frame on pivot to allow for final work on PCB.

Stock No.	Mfr.'s Type	Maximum Board Size Without Center Bar	Outside Dimensions	EACH
827-7500	PCBH-60	10.6" × 8.6" (270 mm × 220 mm)	15½" × 11" (341 mm × 242 mm)	193.80

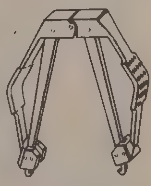
827-7515	PCBH-90	19.6" × 13.8" (500 mm × 350 mm)	25" × 17" (550 mm × 374 mm)	307.04

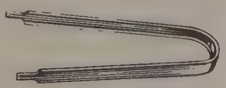
Extractor Tools

Universal PLCC Extractor Tools



- ► Extracts PLCCs from 20 Pins through 84 Pins from Any Socket without Damage to Chip
- ► Spring Loaded One-Hand Design Requires No Pulling, Just Squeeze Handles and Chip Is Lifted from the Socket
- ► ESD Safe Handles for Use on all Static Safe Components (EX-5)
- ► Machined Stainless Steel for Long Life (EX-5)
- ► EX-6 -ABS Handles and Stamped Steel

827-4011. Model EX-5. ESD safe ....EACH 21.46
827-4012. Model EX-6. Low cost..EACH 7.82

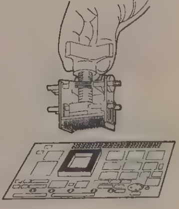


Extractor Tool

The EX-1 Extractor is ideally suited for hobbyist or lab engineer. Featuring one piece spring steel construction. It will extract all LSI, MSI and SSI devices from 8-to-24 pin.

827-4010. Model EX-1 ....EACH 3.25

PGA-X Insertion Extraction Tool

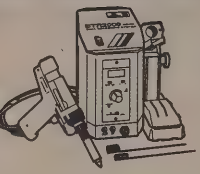


Pin Grid Array inserter and extractor easily adjusts to fit all sizes of PGA's from 12 × 12 to 26 × 26 pins. One hand operation lifts PGA's evenly without damage to devices, board or socket. Includes molded carrying case.

827-4013. Model PGA-X ....EACH 224.25

BTR-1201-V Desoldering System

— NEW —



System Includes
- **BTR-1000 Desoldering System Base**
- **DG28110A Desolder Gun**
- **Temperature Control Module**
- **BTR-D-039 Nozzle**

The BTR-1000 modular desoldering system provides maximum application flexibility for soldering and desoldering of both conventional and SMT components. The BTR-1000 stands out as the highest power, closed-loop system available. A unique combination of RTD sensor feedback, 110 W power and high mass desoldering nozzle provide the most efficient and consistent desoldering system in the industry. By using one of the 3 optional handpieces the BTR-1200 can solder or desolder any through-hole or SMT component.

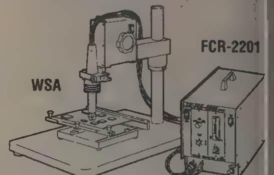
Focused Convection Rework with Vacuum



System Includes
- **Handpiece Holder**
- **Multiple Nozzle Holder**
- **N-D25 Nozzle**
- **Nozzle Removal Tool**
- **Vacuum Pad Removal Tool**
- **Instruction Manual**
- **Base Controller with Pump, Temperature, Time and Air Flow Controller**
- **Mode Selection/Heater Timer Module**
- **Handpiece with Vacuum, Cord and Connector (FCT-2228)**
- **Dual Footswitch for Vacuum and Heater Activation**
- **10 Piece High Temperature Silicone Rubber Vacuum Pads**
- **RTS-A Adjustable Handpiece Stand with Z Axis Control and Stainless Steel Base Plate (WSA Systems)**
- **RBH-A Adjustable Board Holder (WSA Systems)**

The all new FCR-2200 Series is a focused convection SMT rework system with vacuum pick-up. Utilizing a self-contained air source, the FCR-2200 regulates air flow and temperature to rework a wide range of components from discretes to PLCC and QFP. Its unique three-mode operation provides manual or semi-automatic control for component removal or replacement.

- **Manual Mode: Continuous Hot Air Flow or On-Demand Air Flow (Via Footswitch); On-Demand Vacuum (Via Footswitch)**
- **Auto Remove Mode: Sequenced and Timed — Hot Air > Hot Air with Vacuum > Hot Air Shut Off > Vacuum Release**
- **Auto Replace Mode: Sequenced and Timed — Vacuum > Hot Air > Hot Air Shut Off**

The FCR-2200 handpiece has a spring loaded vacuum tube which virtually eliminates mechanical stress when contacting the component. Additionally, the vacuum tube length is adjustable: the operator may extend it for better viewing during placement, retract it to allow the nozzle to "encapsulate" the component during reflow. The nozzles are designed to focus heated air on the component leads while impeding heat flow to adjacent areas. **Specifications. Input Voltage:** FCR-2201 — 115 VAC, 50/60 Hz; FCR-2202 — 230 VAC, 50/60 Hz. **Heater:** Resistive, 300 W, 28 VAC. **Heater Control:** Closed loop, thermocouple sensor feedback. **Air Source:** High efficiency diaphragm pump. **Air Flow:** Variable, 3 to 20 l/min. **Output Temperature Range:** 392° to 932°F (200° to 500°C). **Modes:** Manual/auto place/auto remove. **Heater Timer:** 0-180 seconds, utilized with auto place or auto remove modes.

Model FCR-2201. Forced convection SMT rework system with vacuum and heater timer, 115 VAC.

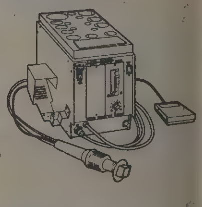
Focused Convection Rework



- **Removes and Replaces Discrete, SOIC, PLCC and QFP Components**
- **Closed-Loop, Variable Temperature Control**
- **Variable Air Flow Adjusts to Thermal Demands of the Board**
- **Self-Contained Air Source Provides Easy Set Up**
- **Fully Grounded and Static-Safe System**
- **Over 40 Nozzles Available**

System Includes
- **Air Flow Meter/Temp. Control Module**
- **Handpiece, Cord, Connector (FCT-2128)**
- **Footswitch for Hot Air Activation**
- **Power Base with Pump**
- **Handpiece Holder**
- **Multiple Nozzle Holder**
- **N-D25 Nozzle**
- **Nozzle Removal Tool**
- **Instruction Manual**

The FCR-2100 Series is a low-cost hot air rework system with closed loop temperature control and air flow control. Unlike the FCR-2200 Series it does not have vacuum or timer. **Specifications. Input Voltage:** FCR-2101 — 115 VAC, 50/60 Hz; FCR-2102 — 230 VAC, 50/60 Hz. **Heater:** Resistive, 300 W, 28 VAC. **Heater Control:** Closed loop, thermocouple sensor feedback. **Air Source:** High efficiency diaphragm pump. **Air Flow:** Variable, 3 to 20 l/min. **Temperature Range:** 392° to 932°F (200° to 500°C). **Modes:** Continuous hot air or on-demand hot air via footswitch.

Model FCR-2101. Forced air convection SMT rework system, 115 VAC.

OK Industries SE Series Dispensing Tips

— NEW —

These stainless steel blunt tips are the finest general purpose dispensing tips available. Stainless steel tubing is precision cut to precise lengths and ground to be burr free. Cut tubing is epoxy bonded into polyethylene hubs molded on colors that correspond to gauge size. All OK Industries tips secure to OK Industries syringe barrels, correspond to the luer lock specification, and are produced in a silicone free environment.

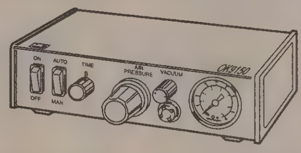
OK9150 Series Dispenser

— NEW —

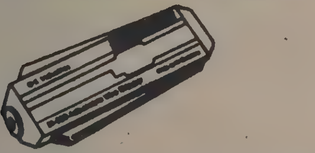
- ► 10-Year Warranty

The OK9150 is a precision fluid dispensing system with vacuum control of all viscosities of fluids using air powered disposable syringes. Solid state digital integrated circuitry timer, lighted function switches, adjustable vacuum feature for controlling drip, micro action foot switch. **Input Voltage:** 115 V AC, 60 Hz (OK19151). **Operating Pressure:** 1 to 100 psi (0.1-7 bar). **Timer:** Programmable from .01 to 30 sec. ±.5%. **Cycle Actuation:** Manual or timer mode. **Minimum Deposit Size:** .01 ml.

827-6200. OK9151. Precision Dispensing System. 115 V AC, 60 Hz ....**EACH 495.00**
827-6210. OKD-KT. Dispensing Starter Kit ....**EACH 105.00**



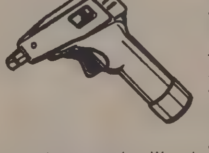
Adjustable Precision Wire Strippers



Feature adjustment dial for six settings. Calibrated wire stop adjustable for desired insulation strip length. Operator squeezes tool and pulls in one motion, allowing 4 hardened steel blades to cleanly cut wire insulation. Pocket-size and lightweight, less than 1 oz. Calibrated strip length is 2". ABS housing.

Stock No.	Mfr.'s Type	Strips	EACH
825-0500	ST-500	20-30 AWG Wire	**50.60**
825-0550	ST-550	18-28 AWG Wire	**50.60**

Battery Powered Wire Wrapping Tools



The BW-928 battery-powered unit accepts standard bits and sleeves for 24-30 AWG wire. Feature positive indexing, LEXAN® housing, 8-ounce weight. Reversible for unwrapping by turning batteries over. Available with or without backforce to prevent overwrapping. Wrapping speed 3000 RPM. Uses 2 standard "C" rechargeable NiCad batteries, ordered separately. BW-520 industrial duty battery powered tool accommodates 22-30 AWG wire. Wrapping speed 3000 RPM. Rechargeable NiCad batteries included.

825-7030	BW-520-BF-U	Battery Unwrap Tool — Back Force	**319.70**

Chuck Type Manual Wire-Wrapping Tool

The SPEED-WRAP tool is designed to produce wire-wrapped connections by merely squeezing the trigger. This model makes full use of bits and sleeves made for use in electric or air driven wire-wrapping tools, both regular and modified. It will accommodate wire from AWG 22 through AWG 32. For production line and field service use in the electronic, telecommunications and appliance industries.

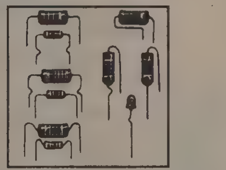
Lead Bender Crimper



LB-100. Unique lead bender and crimper handles all common axial components and can be used on many radial and "TO" packages as well. The lead bending section enables simple right-angle layover of leads on any centers from 0.375 to 1.500" (9.5-38.1 mm) while an additional feature enables "vertical" bends. For applications requiring "stand-off" or "snap-in" lead forms, just use the built-in crimper. This device is easily adjusted for both lead diameter and crimp size and requires no additional tooling or die changes. Simply set the adjusting screw, insert the lead, and crimp. May be hand-held or mounted in a vise.

827-1100. Model LB-100 ....**EACH 31.49**

Portable Wire Wrapping Tool (Model BW-2630)

Quick on the draw, on performance and durability. The pistol grip design Model BW-2630 is a revolutionary, rugged ABS construction wire-wrapping tool that operates on 2 standard "C" Nicad batteries (not included) and accepts either of two specially designed bits. Bit Model BT-30 is for wrapping 30 AWG wire onto .025" square pins; BT-2628 wraps 26-28 AWG wire. Also includes both positive indexing and anti-overwrapping mechanisms — features usually found on models of this type costing much more.

Track Repair Kits

► **Archer® Printed Circuit Kit has Everything You Need**

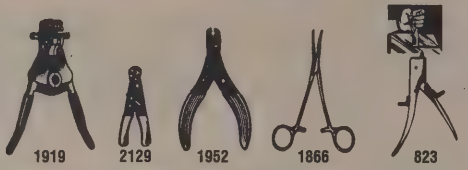
This kit contains everything you need to design and make printed circuit boards. Two printed circuit boards, resist ink pen, 6-oz. bottle of etchant, 2-oz. bottle of resist ink solvent, $\frac{1}{8}$" drill bit, $7\frac{1}{8}$" × $5\frac{1}{8}$" × 2" plastic box. **Shipping Weight:** 2 lbs.
910-6726. Model 276-1576....................**EACH 13.99**

Printed Circuit Etchant Solution

- **Takes Copper Off Perfboard**
- **Safe, Easy And Fast To Use**
- **16 Fluid Ounces**

A PC 'must' for hobbyists, builders, experimenters! A special ferric chloride solution removes copper completely without damage to board material. **Shipping Weight:** $1\frac{1}{2}$ lbs.
910-6715. Model 276-1535....................**EACH 3.49**

Cutting Tools and Strippers



Model 64-1919 Automatic Wire Stripper. Strips wire from #8 to #22 gauge in seconds. Removes insulation cleanly without nicking or breaking wire for smooth, professional quality work. Lightweight, yet extremely durable. 7".
910-1919. Model 64-1919....................**EACH 12.99**

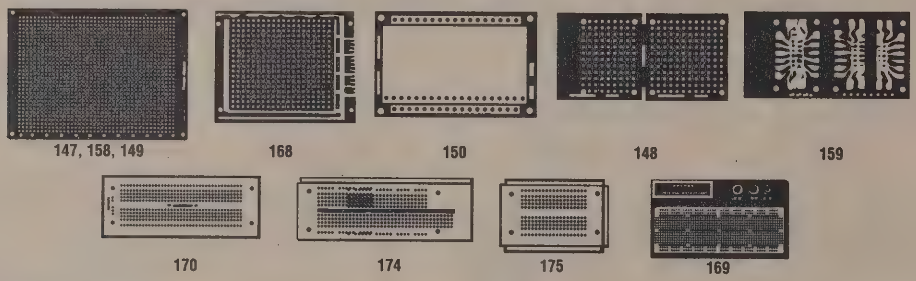
Model 64-2129 Wire Stripper/Cutter. Spring-loaded tool strips #12 to #24 wires. Handy tool has easy-grip handle. **Shipping Weight:** $\frac{1}{2}$ lb.
910-5931. Model 64-2129....................**EACH 2.99**

Dial Type 64-1952 Stripper/Cutter. Versatile spring-loaded stripper and cutter adjusts to any gauge wire from #12 to #24. Flush cutting action. Plastic cushioned grips.
910-5803. Model 64-1952....................**EACH 4.59**

Model 64-1866. Perfect for temporary heat sink and picking up parts. Three-position lock, curved serrated tip. Box joint construction. Stainless steel.
910-2144. Model 64-1866....................**EACH 4.99**

Model 64-823. Easy-to-use hand-held sheet metal cutter. Cuts up to 18-gauge steel, $\frac{1}{16}$" copper, aluminum and plastic.
910-2142. Model 64-823....................**EACH 10.99**

Breadboards and PC Boards



Predrilled PC Boards

Grid Boards
.100" × .100" centers for DIP ICs, sockets and headers. Solder-ringed holes. Indexed columns and rows to help you identify component pin outs.
910-2203. Model 276-147. $4\frac{1}{2}$" × $6\frac{5}{8}$". 2200 holes....................**EACH 3.99**
910-2204. Model 276-158. $2\frac{3}{4}$" × $3\frac{3}{4}$". 750 holes....................**EACH 2.39**
910-2205. Model 276-149. $1\frac{27}{32}$" × $2\frac{27}{32}$". 356 holes....................**EACH 1.19**

Universal PC Board
Accepts ICs up to 40 pins. Total of 750 indexed, solder-ringed holes. Two busses, one grounding strip. Mounting holes at corners. $2\frac{13}{16}$" × $3\frac{3}{4}$".
910-2194. Type 276-168....................**EACH 2.49**

Multi-Purpose Bus Board
Two bus strips at the center. PC pattern traced on component side speeds building. 417 solder points. $1\frac{7}{8}$" × $2\frac{7}{8}$".
910-2188. Type 276-150....................**EACH 1.19**

Dual Mini General-Purpose Board
213 holes. $1\frac{3}{4}$" × $3\frac{5}{8}$". Can be snapped in half.
910-2187. Model 276-148....................**EACH 1.49**

Dual IC Board
Accepts two 6 to 20-pin DIPs. Four connecting points for each IC pin. $1\frac{3}{4}$" × $3\frac{3}{8}$".
910-2191. Model 276-159....................**EACH 1.69**

Experimenter's Solderless Boards

The fast efficient way to design your own solid-state circuits. The modular breadboards are reusable and accept a wide variety of components. When you have your circuit working properly, it's easy to transfer it to the matching PC board for a soldered, permanent version.

Experimenter's PC Board
Layout matches modular breadboard. 550 pre-drilled connection points. $2\frac{1}{16}$" × $5\frac{7}{16}$" × $\frac{1}{16}$".
910-2197. Model 276-170....................**EACH 2.99**

Modular IC Breadboard Socket
Snaps together horizontally or vertically for more complex designs. Silver-nickel contacts accepts 30 to 22 gauge solid wire. Features two bus strips and 550 indexed connection points. $2\frac{1}{8}$" × 6".
910-6707. Model 276-174....................**EACH 12.49**

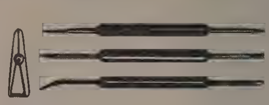
Modular IC Breadboard Socket
Smaller version of 276-174 with 270 indexed connection points. $2\frac{1}{8}$" × $3\frac{5}{8}$" × $\frac{1}{16}$".
910-6708. Model 276-175....................**EACH 7.99**

Universal Breadboard
Our Finest! The $2\frac{1}{4}$" × $6\frac{1}{2}$" breadboard is mounted on a 7" × 4" 'stay put' steel base with rubber feet. Accepts DIPs, discrete components and up to 22 gauge wire. Total of 640 plug-in tie points. 3 binding posts for power hookup, etc.
910-2196. Model 276-169....................**EACH 21.99**

Soldering Equipment

Soldering Aids

Solder Ease Kit — 2227

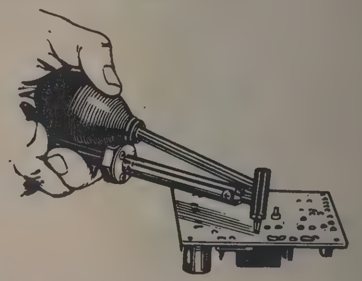


Model 64-2098 Vacuum Desoldering Tool
Aluminum. Sturdy aluminum housing with nonstick tip and side-mounted trigger button. Disassembles easily for cleaning. $7\frac{3}{4}$" long.
910-2154. Model 64-2098........**EACH 6.99**

Model 64-2227 "Solder Ease" Kit
Special kit containing four tools for improved soldering. Aluminum heat sink protects transistors and diodes when soldering, gives a firm grip. Fine-point probe aids soldering on printed circuits. Stainless steel hardened probe, steel brush and scraper helps keep circuit clean as you solder. Also with heat sink. **Shipping Weight:** $\frac{1}{2}$ lb.
910-5937. Model 64-2227....................**EACH 4.19**

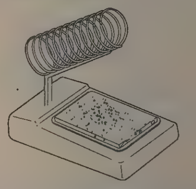
Model 64-2086 Vacu-Bulb
Takes up solder safely, easily with vacuum action. No spattering. Teflon tip.
910-2155. Model 64-2086....................**EACH 2.79**

"One-Hand" Electric Desoldering Iron



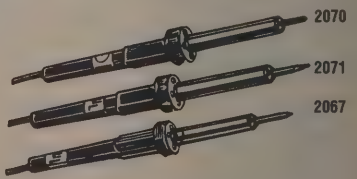
Model 64-2060. Makes repairs quickly and cleanly. The easy way to remove or replace old electronic parts from circuit boards. With handle, bulb, desoldering unit and tip, 5-foot cord. Rated 45 watts. U.L. listed.
910-2145. Model 64-2060....................**EACH 8.99**
910-2146. Model 64-2061. Replacement Tip....................**EACH 1.29**

Soldering Iron Holder and Cleaner



Model 64-2078. All-in-one solder station helps keep your workbench free from solder splatters and burn marks. Coil holder protects you and your work while the convenient sponge pad cleans soldering tip.
910-2078. Model 64-2078....................**EACH 6.49**

Soldering Irons



Model 64-2070B 25-Watt Pencil Iron
Insulated. $\frac{5}{32}$" screw in tip. 600-640°F. With stand.
910-6420. Model 64-2070B....................**EACH 6.99**
910-2148. Model 64-2073. Replacement Tip....................**EACH 1.29**

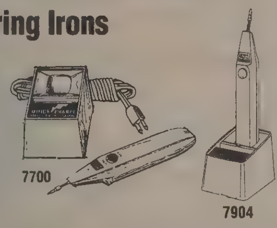
Cordless Soldering Irons



Cordless convenience, lightweight and 25 W performance. Tip temperature reaches 900°F in 5 sec. Up to 125 soldered connections per battery charge.* Nickel cadmium batteries feature long service life. Isolated-tip design eliminates electrical leakage and the need for grounding when soldering in delicate solid-state equipment. Designed for good "feel" and balance — only 8" long. **Weight:** 8 oz. Built-in light. Safety lock switch prevents accidental heating. Standard batteries recharge from charging stand or from 12 V automotive battery. Full line of accessories and several complete kits provide variety of selections. Batteries included.

"Quick Charge" Iso-Tip

Recharges in 3 to 4½ hours from complete discharge. Nickel cadmium battery can withstand high-rate charging without damage (cannot overcharge).

Model 7700. Iso-Tip soldering iron with recharging stand and no. 7545, 7546 tips.

991-7700. 7700	EACH 54.09

Model 7733. Replacement battery for gray, black or orange iron.

991-7733. 7733	EACH 12.16

Iso-Tip "60"

Allows 20% continuous soldering when kept in charger between uses. Recharges fully in one hour and automatically switches to energy-saving charge rate when battery is full (cannot overcharge). LED shows when battery is charged.*

Model 7800. Iso-Tip soldering iron with recharging stand, and no. 7577, 7545 tips.

991-7800. 7800	EACH 67.08

*Replacement batteries available by special order.

Power Pro Soldering Iron

High Capacity cordless iron with high efficiency soldering tips. The Power Pro includes a recharging stand and hi-efficiency tip #7545-100 fine tip and #7577-100 chisel tip. Complete recharge in four hours.* LED in recharge stand to indicate charging status. Isolated tip design to eliminate electrical leaks and damage. Tip performance up to 900°F.

WAHL® SOLMAX 7485 *— NEW —*

Temperature Controlled Soldering Station with Fume Extractor

- Increase Productivity and Improve the Work Environment by Removing Noxious Fumes
- Reduce the Chances of Headaches, Nausea and Eye Irritations That Are Often Associated with the Exposure to Solder Fumes
- Electronic Temperature Controlled, Continuously Adjustable
- Fast Heat Up and Instant Heat Recovery
- Built In High Efficiency, Low Noise, Brushless Mini Fan

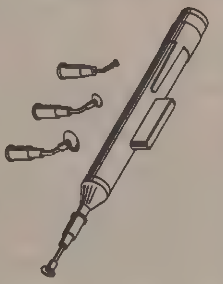
WAHL® Pen-Vac



- Self-Contained Vacuum
- No Hoses or Batteries Required
- Lifts Over 500 Grams
- Weighs Less Than 21 Grams
- Brushed Aluminum Body
- ESD Safe
- Quick Change Luer-lock Vacuum Tips
- Includes 6 Vacuum Cups and Probes
- Made in the USA

Now any items with a flat surface can easily be picked up with the Pen-Vac tool. This self-contained tool eliminates problems associated with handling parts using fingers or tweezers. Ideal for handling and manipulating various objects during assembly or placement operations. The ergonomically designed Pen-Vac tool is a low cost alternative to other vacuum handling systems.

Weller® WP Series Professional Soldering Irons

- Quick Change Knurled Collar Makes Changing Heaters Simple
- Small, Lightweight Handle Now With Cushioned Grip
- Iron-Plated Tips For Long Life and Greater Soldering Efficiency
- Ideal For A Wide Variety Of Electronic and Electrical Work
- Three Wattages Available: 25, 30 and 35 W

Weller introduces a new line of professional soldering irons with interchangeable heating elements. Just a twist of the knurled collar and the element can be unplugged and changed for the required wattage. Now a single handle plus three different elements effectively gives you a trio of irons to handle different jobs. For additional safety, all irons come with a three-wire cord. Heaters are available in 25, 30 and 35 watts plus 8 interchangeable, iron plated tips that make the WP Series suitable for a wide variety of electrical and electronic work.

Add the comfort of the new cushion grip handle, and you'll see why the Weller WP Series Soldering Irons are taking a turn for the better.

Stock No.	Mfr.'s Type	Description	EACH

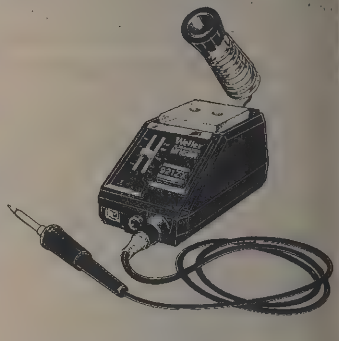
921ZX Soldering Station

Introducing Our Most Affordable Temperature-Controlled Station Ever



- Electronically Controlled-Zero Cross Circuitry
- Spike Free — ESD Safe
- Ceramic Heater Rated For Exceptionally Long Life
- Variable Control — Fully Adjustable 550°-850°
- Over 19 Tips Available Including SMT Tips
- External Fuse and Calibration Access
- Cool, Lightweight Handpiece

Now you can get the quality, dependability, and reputation of a Weller soldering station at a price that's very competitive. The ceramic heating element is exceptionally reliable and long lasting. Should it ever need replacing, the new element just plugs in. There are no tools required. The 24 V handle is not only safe, it is cool and comfortable. The 921ZX is electronically controlled and fully adjustable. It is ESD safe/MIL compliant. The 921ZX carries a full one year warranty, and you have the Weller/Ungar technical service department available to help you with any questions or problems.

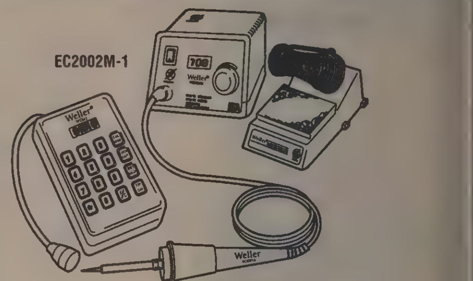
Weller® EC Series Soldering Stations



EC2002M-1

EC2002M Series

The EC2002M Series has a three digit LED read out displaying temperature settings and tip temperature with resolution of ±1°F. Tip temperature "set" mode included in the dial control. With the addition of the WCM1-Calibrator the station has the following features; user calibration, lockout, f/c read out, temperature set-back and automatic shut off. Continuously variable tip temperature from 350-850°F. Positive temperature coefficient sensor deep inside tip provides temperature feedback to maintain tip temperature at set point. Zero crossing control of heater current to eliminate RFI/EMI and accurate time proportioning to reduce tip temperature hysteresis are features of the control circuit and ensure against any high voltage spikes or magnetic fields on the soldering tip. A transformer isolates the EC power unit from the AC line. External fuse allows easy maintenance by user. 24 VAC isolated voltage drives the heating element. The irons are interchangeable on all EC units and do not require recalibration. Power unit provided with extra large sponge and iron holder. All EC stations meet the following Mil Specs DOD STD 2000-1A, DOD STD 1686, Mil-S-45743, W-S-6356 and W-S-570.

Stock No.	Mfr.'s Type	Description	EACH

EC1002 Series

The EC1002 Series is a dial controlled electronic soldering station. The dial is calibrated in 10°F (6°C) steps and provides accurate temperature control at all times. The control of the station ensures maintenance of the temperature selected (±10°F). The unit is fully calibratable by the user and has an external fuse for ease of maintenance. The irons are interchangeable on all EC units and do not require recalibration. Power unit provided with extra large sponge and iron holder. All EC stations meet the following Mil Specs DOD STD 2000-1A, DOD STD 1686, Mil-S-45743, W-S-6356 and W-S-570.

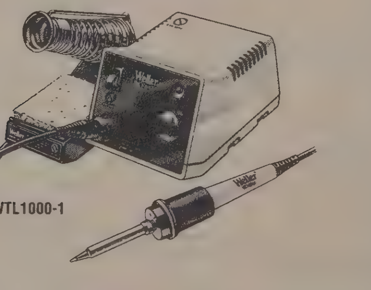
WTL1000 Soldering Stations



WTL1000-1

Tip temperature controlled by Thermolock® "keys" — provides operator lockout. Tip temperature automatically set to within ±10°F with insertion of different Thermolock® "key". Safety features powers iron down to 350°F if "key" is removed while unit is on. Electrostatic dissipative (ESD Safe), UL listed. For use with 40, 20, and 42 watt irons. Iron stand, with tip storage, positions left, right or remotely off main unit. **Spec. Compliance:** DOD-STD-2000, Mil-S-45743, W-S-6536, W-S-570 and DOD-STD-1686.

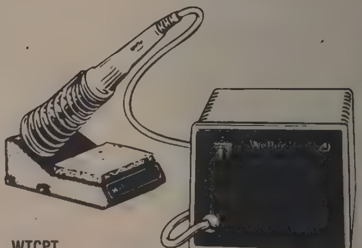
Controlled Output Station

- Automatic Output and Temperature Control
- Lightweight Iron
- UL Listed
- Impact-Resistant Case



WTCPT

Model WTCPT. This closed-loop, low-voltage circuit automatically controls output and temperature in three ranges: 600°F (315°C), 700°F (371°C), and 800°F (427°C). The operator selects temperatures by changing grounded, heat-sensing tip with the knurled thumbscrew. This unit's lightweight iron has locking designs for interchangeability and a nonburnable silicone rubber cord. The power unit is in an impact-resistant case and has a unitized on/off rocker switch with indicator light, nonheat-sinking iron holder, storage tray for extra tips, and tip cleaning sponge. **Cord:** 3-wire 4.5' (1.4 m) long. **Tip:** 1/16" (1.58 mm) screwdriver tip 700°F (371°C) PTA7 furnished. UL Listed. Features the TC201P iron and is safe for IC soldering.

Weller Thermal Tweezer and Tips — *NEW* —

The new Weller WT50 Thermal Tweezers are designed for quick and easy removal of small two-sided SMT components. Tips ranging in size from 1 mm (.040") to 18.5 mm (.728") are available. These tweezers provide 50 watts of power (25 W per leg) and can be used with any Weller EC station as well as the new WRS1000 and WRS3000 rework stations.

Weller® Ungar 2024 Series

The 2024 service center is a shop air tool used for electronic repair and rework. Increased production is made possible by rapid heat up and vacuum response, with temperature variation from 500°F-850°F. Tiplet clogging is decreased with the built-in trigger time delay circuit. This feature insures complete flow of solder into the collector tube. The unit operates with either inline or pistol-grip style handles. Other features include the iron holder, which may be customized for the operator by allowing for adjustment of the angle. The 2024 is totally ESD safe.

984Q9700.	2024P. Desolder system with 5098AS desolder pistol	EACH	706.86
984Q9702.	2024IL. Desolder system with 5088AS inline desolder iron	EACH	706.86

Weller® Ungar 4024 Series

This self-contained, electronically controlled desoldering system has an internal vacuum pump, which provides flexibility for the user, but has been made quieter than older stations. Tiplet clogging is decreased with the built-in trigger time delay circuit. This feature insures complete flow of solder into the collector tube. Other features include the adjustable iron holder. The 4024 is totally ESD safe and operates with either inline or pistol-grip style handles.

984Q9703.	4024P. Desolder system with 5098AS desolder pistol	EACH	755.50

Desoldering Irons — *NEW* —

High-Performance Inline Desoldering Iron

60-watt inline-style desoldering tool comes complete with 4006 tiplet. ESD safe with non-burning silicon rubber cord and vacuum line.

984-5088.	5088AS	EACH	251.30

Pistol Style Desoldering Iron

Smallest, lightest desoldering pistol is the toughest when it comes to solder removal. Operates with a lower temperature setting which reduces damage to temperature sensitive components. Delivers quick, clean solder removal from multilayered PCB or heavy ground planes.

984-5098.	5098AS	EACH	251.30

Weller® Ungar 4624 Series

The 4624 is a self-contained soldering and desoldering system for rework and repair. Increased production is made possible by rapid heat up and vacuum response, with temperature variation from 500°F-850°F. Tiplet clogging is decreased with the built-in trigger time delay circuit. This feature insures complete flow of solder into the collector tube. It operates with the 9931AS 24 VAC soldering irons (listed below) and either the inline or pistol-grip desoldering tools. Features include quiet pump operation and adjustable, non-slip iron holders for maximum operator flexibility. The 4624 is UL listed, CUL listed and ESD safe.

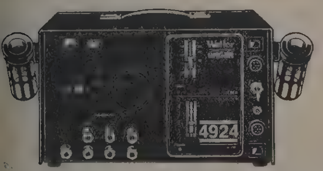
Type 4624P. Solder/Desolder system with 5098AS desolder pistol and 9931AS soldering iron.

984Q9705.	4624P	EACH	987.56

Type 46241L. Solder/Desolder system with 5088AS inline desolder iron and 9931AS soldering iron.

984Q9706.	46241L	EACH	987.56

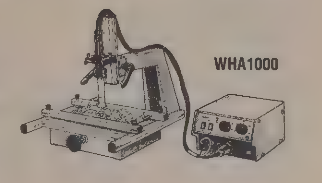
Weller® Ungar 4924 Series



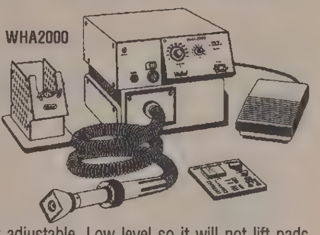
The new 4924 service center is designed to handle virtually all repair and rework applications. Totally ESD safe, it can be powered continuously or by means of a foot pedal, and has three voltage ranges for use with a broad range of tools. The 4924 has its own internal pump — eliminating the need for shop air — and is substantially quieter than older stations. Desoldering or heat shrinking is made possible by means of an air reversal switch, which changes from vacuum to hot air flow. Tiplet clogging is decreased with the built-in trigger time delay circuit. This feature insures complete flow of solder into the collector tube. Temperature can be controlled from 500°F-850°F. System includes pistol or inline desoldering iron, micro and macro soldering irons, machine center motor and extra stand.

984Q9708.	4924P. Service center with 5098AS desolder pistol	EACH	2032.74
984Q9710.	4924IL. Service center with 5088AS inline desolder iron	EACH	2032.74

Weller® WHA 2000 and WHA 1000 Hot Air SMD Rework Systems — *NEW* —



WHA1000



WHA2000

- **Nozzle Design Promotes Preheating of Component, Can Be Used With Other Manufacturer's Nozzles by Using Adapters**
- **Micrometer Adjustment Precisely Replaces Chips as Small as 25 Mil**
- **Unique Vacuum Pickup Eliminates Need For Additional Tools To Remove Chips; Precise Temperature Control Reduces Thermal Stress**
- **Available With Heated or Nonheated Rework Tables**
- **Also WHA 2000 Is Available as a Self Contained Unit**

Fully self contained unit has an air turbine and a separate vacuum pump. Comes standard with one foot pedal to control both air and vacuum. A second foot pedal and a wired remote are optional. Hand control operates both air and vacuum and can be used simultaneously with the foot pedals. 300°F-1000°F. 10-50 liters per minute air. 0.6 bar vacuum (7" Hg.) not adjustable. Low level so it will not lift pads, damage components, etc. 820 watts total. 730 watts handpiece. ESD Safe (has an ionizing circuit).

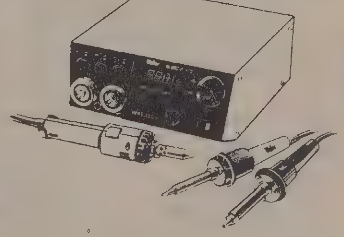
Weller® WRS 3000



- **ESD Safe, UL Listed**
- **Operator Lock-Out**
- **Completely Self-Contained**
- **Digital Readout**
- **Dimensions: 9.6" (W) × 4.1" (H) × 10.6" (L)**
- **Power Input: 300 W**
- **Meets MIL-SPECS**
- **Maximum Air Flow For The Hot-Air Pencil Is 10/L Min.; For Desoldering Vacuum Is 20.7 Hg**
- **Temperature Range For Hot Air Is 300°F-980°F; For Solder/Desolder It's 300°F-850°F**

The Weller WRS 3000 is designed to handle all rework and repair of mixed technology boards. It has a built-in microprocessor that provides simultaneous controlled desoldering, soldering and hot air functions with complete accuracy and reliability. Temperature, hot air time and automatic temperature set-back can be programmed. An operator lock-out feature prevents any unauthorized changes. The WRS 3000 has its own internal pump — eliminating the need for shop air — and is compatible with both Weller and Ungar products and is totally ESD safe. *Blades sold separately.

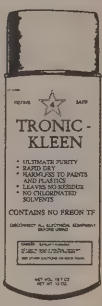
Tronic Kleen™



- ► Ozone Safe Formula
- ► Leaves No Residue
- ► Ultimate Purity
- ► Safe on Paint, Plastics and Insulations
- ► Rapid Dry

Contact Cleaner is a special solvent recently developed for use in white rooms for cleaning of sophisticated spacecraft instruments, controls and computers. An extremely high-purity solvent cleaner for cleaning critical metallic and non-metallic surfaces. Removes grease or dirt from sensitive electronic, television or telephone contacts. Does not attack plastics or wire insulations.

Tronic Kleen™ of Lube

- ► Ozone Safe Formula
- ► Ultimate Purity
- ► Rapid Dry
- ► Safe on Paint, Plastics and Insulations
- ► Second Spraying Leaves a Lubricated Surface

Contact Cleaner and Lube is a special solvent recently developed for use in white rooms for cleaning of sophisticated spacecraft instruments, controls and computers. An extremely high-purity solvent cleaner for cleaning critical metallic and non-metallic surfaces. Removes grease or dirt from sensitive electronic, television or telephone contacts. Does not attack plastics or wire insulations. A light spray after cleaning will leave a lubricated surface.

596-1001. 4035. Aerosol. 19.7 Fl. oz. **1-11** .... EACH 5.04

SS-500

- ► Electronic, Electrical, Industrial
- ► Non-Flammable Safety Solvent
- ► Cleaner-Degreaser
- ► High Di-Electric Strength Low Toxicity

The high solvent power of SS-500 quickly dissolves oils, fats and resins without attacking many plastics, coatings, varnishes or maskings. These solvent properties are particularly important where such items as electronic components, electrical insulation and metals are being cleaned.

596-4635. 4650. Aerosol. 20 Fl. oz. **1-11** .... EACH 4.95

421 Silicone Spray

- ► Industrial Commercial Machine Shop Transportation
- ► Stops Sticking and Squeaking
- ► Retards Corrosion
- ► Unaffected by Temperature Ranging from –40°F to 400°F

421 Silicone stops squeaking, sticking, binding and retards corrosion. Makes cleaning easier and quicker. Saves valuable time, protects and preserves equipment. Use on any surface — metal, glass, rubber, plastic, painted finishes and fabrics. It is odorless, colorless, non-staining and heat stable — unaffected by temperature ranging from –40° to 400°F. It has unusually low surface-tension properties.

Dio-Tronic Electronic Component Cleaner

- ► Non-Polar Solvent HCFC Replacement for Freon TF
- ► No 1,1,1-Trichloroethane
- ► No TF Solvent
- ► No Citrus Oil
- ► No Petroleum Distillates
- ► 26,000 Volt Dielectric Strength
- ► Non-Flammable
- ► Dries Fast — Residue Free

A high purity, high di-electric, non-flammable spray specially formulated for removing oil, grease, condensation and other contaminants from sophisticated electronic parts. Quick drying formula will not harm Neoprene W, Buna N, Buna S, Silicone Rubber, Butyl, Natural Rubber, Thiokol FA, Hypalon 40, Viton A, Adiprene L, Nordel, Delrin, Zytel, Nylon, Teflon, PVC and Polyurethane. **Note:** Do not use on Styrene or Polystyrene. For other plastics, test on inconspicuous area first. Use on circuit boards, terminals, relays, switches, contacts, circuit breakers, tuners, control panels, motors and other electronic equipment.

SprēZ ANTI STATIC

- ► End Static Shocks
- ► Neutralize Static Electricity
- ► Minimize Danger of Fire or Explosion
- ► Reduce Product Loss
- ► Decrease Downtime
- ► Stop All Carpet Shocks
- ► Non-Staining
- ► Non-Corrosive
- ► Non-Oily
- ► Non-Greasy
- ► Will Not Discolor or Ring

ANTI STATIC is the answer to all of your static electricity problems — just spray on as needed. ANTI STATIC's modern chemical action reduces static charges generated by friction or atmospheric conditions. Continued use actually builds immunity against future static build up.

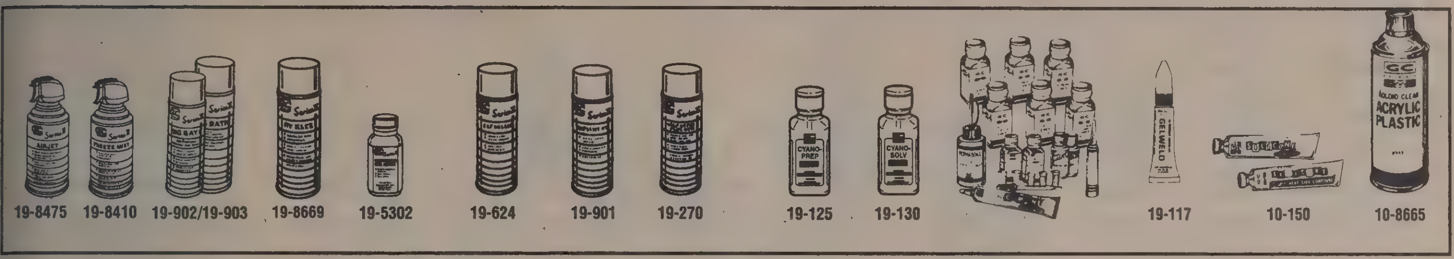
Chemicals, Adhesives, Cleaners and Lubricants



All GC Aerosols, except as noted, contain no ecology-damaging fluorocarbons.

Anti Static Products

► **Anti Static Formulations Minimize the Risk of Electrostatic Damage to Sensitive Components**

Static Null
Neutralizes and prevents static electricity from reforming. May be used on circuit boards, printers, paper, carpeting, clothing etc. Non-greasy formula.
796-9899. 19-1004. 9.75 Avdp. Oz. Aerosol .... **EACH 4.61**

Optical Cleaner
Contains silicone-glycol polymers which provide a high luster and minimize or eliminate dust attracting static. Cleans dust, dirt and grime without leaving streaks or dulling residue.
796-9897. 19-1710. 16 Fl. Oz. Trigger Sprayer .... **EACH 3.86**

Static Free Big Bath
An excellent cleaner, degreaser for removing dirt, oil, grease and fluxes from electronic and electrical equipment. Effective on switches, motors, PC boards, etc. Displaces moisture. Check for compatibility on sensitive plastics.
796-9847. 19-903-SF. 22 Avdp. Oz. Aerosol .... **EACH 13.25**

Static Free Air Jet
For dusting and cleaning of components and equipment especially in hard to reach places. Nonflammable.
796-9827. 19-8475-SF. 12 Avdp. Oz. Aerosol .... **EACH 7.31**

Static Free Freeze Mist
A refrigerant spray used to locate thermal intermittents in electronic equipment and for thermal fitting. Nonflammable.
796-9824. 19-8410-SF. 12 Avdp. Oz. Aerosol .... **EACH 8.01**

High Strength Flux Remover
796-4280. 10-7517. 12 Avdp. Oz. Aerosol .... **EACH 7.55**
796-4285. 10-7521. 18 Avdp Oz. Aerosol .... **EACH 10.60**

Series II Aerosol Chemicals

Airjet
Airjet contains no CFCs, VOCs or HCFCs. Formulated for dusting and cleaning of components and equipment. Contains 100% of 1,1,1,2 — tetrafluoroethane. Used for blowing dust and residue out of hard to reach places without scratching.
796-1910. 19-8475. 12 Oz. (340 gms.). Aerosol .... **EACH 6.38**
796-5311. 19-8475-10. 10 Oz. (284 gms.). Aerosol .... **EACH 6.78**

Freeze Mist
Freeze Mist contains no CFCs, VOCs or HCFCs. A refrigerant spray, Freeze Mist is used to locate thermal intermittents in electronic components and thermal fitting metal parts. Cools to –60°F.
796-1911. 19-8410. 12 Oz. (340 gms.). Aerosol .... **EACH 7.28**
796-5313. 19-8410-10. 10 Oz. (284 gms.). Aerosol .... **EACH 6.54**

Big Bath (Cleaner/Degreaser)
Excellent cleaner and degreaser for removing dirt, oil, grease, and fluxes from electronic and electrical components including switches, meters, PC boards, etc. Contains an HCFC blend with no Class I CFCs. This high pressure spray dissolves and flushes away all contaminants. **Note:** All plastic surfaces should be checked for compatibility. **Environmental Data. CFC:** 0%. **HCFC:** 92%. **Cl. Solvent:** 0%. **ODP:** .10. **VOC:** 5%.
796-5314. 19-903-6. 6 Oz. (170 gms.). Aerosol .... **EACH 3.15**
796-1912. 19-902. 12 Oz. (340 gms.). Aerosol .... **EACH 6.57**
796-1913. 19-903. 22 Oz. (624 gms.). Aerosol .... **EACH 11.55**

Dry Kleen
Dry Kleen is formulated to clean all electrical controls, contacts, relays, and other components where oil and grease is not desired. It will not damage electrical parts when used properly. **Note:** All plastic surfaces should be check for compatibility. **Environmental Data. CFC:** 0%. **HCFC:** 50%. **Cl. Solvent:** 26%. **ODP:** .10. **VOC:** 47%.
796-1914. 19-8669. 16 Oz. (454 gms.). Aerosol .... **EACH 6.33**

VCR Magnetic Head Cleaner
Removes dust, dirt and oxide from heads on VCRs, cassette recorders, and computer drives. Evaporates quickly and leaves no residue. **Note:** Plastic safe.
796-1915. 19-5302. 2 Oz. (59 ml). Bottle .... **EACH 3.41**

Component Bath
Excellent general use cleaner/degreaser for removing dirt, oil, grease and fluxes for electronic and electrical contacts in switches, motors, PC boards, etc. This product is formulated to dissolve and flush away all contaminants. **Note:** All plastic surfaces should be checked for compatibility. **Environmental Data. CFC:** 0%. **HCFC:** 97%. **Cl. Solvent:** 0%. **ODP:** .10. **VOC:** 0%.
796-1918. 19-901. 16 Oz. (454 gms.). Aerosol .... **EACH 13.00**
796-1917. 19-624. 22 Oz. (624 gms.). Aerosol .... **EACH 10.46**

General Use Flux Solv
General Use Flux Solv evaporates quickly and is excellent for the removal of most ionic and rosin fluxes from electronic components, PC boards or other surfaces requiring a general flux remover. **Contains:** HCFC and alcohol. **Applications:** PC boards, electronic components, electrical components.
796-2430. 19-328-12. 12 Oz. Aerosol .... **EACH 7,50**
796-2432. 19-328-22. 22 Oz. Aerosol .... **EACH 11.00**

Extra Strength Flux Solv
Extra Strength Flux Solv is excellent for the removal of most ionic and non ionic fluxes from electronic components, PC boards or any other surface requiring an extra strength flux remover. **Note:** All plastic surfaces should be checked for compatibility. **Environmental Data. CFC:** 0%. **HCFC:** 85%. **Cl. Solvent:** 6%. **ODP:** .10. **VOC:** 12%.
796-1920. 19-270. 16 Oz. (454 gms.). Aerosol .... **EACH 8.95**

Glass and Plastic Cleaner
Wipes dirt, dust and grime from all glass and plastic surfaces without leaving streaks or dulling residue. Contains grease-cutting ammonia. Convenient aerosol packaging. Economical for home or industry.
796-9895. 10-9082. 14 Oz. (397 gms.). Aerosol .... **EACH 3.18**

Adhesives

Cyano-Prep/Accelerator
Surface activator and cleaner for all cyanoacrylate adhesives. Provide better, faster curing bonds on materials generally difficult to bond.
796-9833. 19-125. 1 Fl. Oz. (29 ml). Bottle .... **EACH 4.29**

Cyano-Solv
Solvent for cyanoacrylate adhesives including GR-R-RIP. Releases cyanoacrylate adhesive bonds. Used to clean clothes, tools, spills, etc.
796-9834. 19-130. 1 Fl. Oz. (29 ml). Bottle .... **EACH 3.09**

Cyano Accessory Kit
Kit contains Cyano-Prep for surface preparation before using adhesive, Cyano-Solv for releasing bonds or clean-up.
Model 19-135. 1 fl. oz (29 ml) each. Cyano-Prep bottle and Cyano-Solv bottle.
796-2434. 19-135 .... **EACH 5.98**

GC Epoxy Putty
A two part epoxy in a single tube. Amount needed is cut off and kneaded together. Two minute work life. **Applications Include:** Plumbing repairs, works under water. Electrical, use in place of tape. **Dielectric Strength:** 400 volts/mil. Sets hard in 20 minutes, may be drilled and tapped. **Maximum Useful Temperature:** 300°F.
796-9831. 19-348. 4 Oz. (113.4 gms.). Tube .... **EACH 7.50**

GC Potting Epoxy
Black opaque highly filled epoxy used for potting and encapsulating electronic circuits. Use to environmentally protect or conceal circuits. This product is excellent when used with GC Chassis Boxes. **Working Time (Pott Life):** 1 hour. **Mix Ratio:** 1 to 1. **Temperature Range:** –40° to 180°F. **Electrical Properties. Volume Resistivity:** 10^{12} at 300°F. **Dielectric Constant:** 4.2 (10^4 CPS at 77°F). **Dissipation Factor:** .014 (10^4 CPS at 77°F).
796-9828. 19-823. 9 Oz. Kit .... **EACH 10.83**

Conductive Epoxy
Electrically conductive two part for attaching electrical components. **Mix Ratio:** 1 to 3. **Pot Life:** 40 minutes. Cure 24 hours. **Volume Resistivity:** 5.0×10^{-3} ohm-cm max.
796-9850. 19-2092. 5 gms. Kit .... **EACH 17.90**

5-Minute Epoxy Cement
Clear, fast-curing two-part epoxy. Handle in 8-12 minutes.
796-4290. 10-114. 2 Fl. Oz. Tubes .... **EACH 5.40**

GR-R-RIP
World famous ethyl cyanoacrylate rapid bonding adhesive. Bond strength not affected by temperatures from –112°F to +212°F (–80°C to +100°C).
796-4216. 19-115. 0.075 Fl. Oz. (3 gms.). Bottle .... **EACH 4.49**

Gelweld — Gel Cyanoacrylate Adhesive
Ethyl cyanoacrylate super strength adhesive in a "gel" form — will not drip or run. Fills gaps well.
796-4218. 19-117. 0.101 Fl. Oz. (3 ml). Tube .... **EACH 3.87**

Electronic Grade Silicone Sealant/Adhesive
One part non-corrosive, neutral cure electronic grade silicone sealant. Will remain flexible from –60°C to +200°C (–70°F to +390°F). An excellent adhesive for many electrical and electronic applications where corrosion to metals is a problem. Good dielectric properties, high surface resistivity and resists electrical tracking. Meets the requirements of Mil-A-46146a-Type 1; meets the requirements of FDA status, FDA Regulation #177.260.
796-9845. 19-155. 3 Fl. Oz. (90 ml). Tube .... **EACH 5.50**

Silicone Rubber Adhesive Sealant
Excellent elastomer cures to a tough rubbery solid. Resists weathering, vibration and exposure to oil, moisture, ozone and temperatures from sub-zero to 450°F. Tack free 20 min./cures 24 hrs.
796-4305. 10-150. 3 Fl. Oz. Tube. Clear .... **EACH 6.99**

Epoxy Glue — 5 Hour Set
Provides an exceptionally hard and strong bond. Good dielectric properties. Gray-white in color with fillers added to increase the viscosity and make it thixotropic (non-running). May be used to fill gaps or to replace broken sections. Bonds may be over-filled and filed or sanded after curing.
796-2446. 10-347. 2 Fl. Oz. (59 ml). Tubes .... **PER PKG./2 12.98**

Coatings

Koloid-Clear Acrylic Plastic
Acrylic, ester resin base.
796-8665. 10-8665. 15 Oz. (422 gms.). Aerosol .... **EACH 6.31**

Q-Dope
Polystyrene, fast-drying. Leaves a clear protective coating.
796-4335. 10-3702. 2 Fl. Oz. Bottle .... **EACH 5.11**
796-4340. 10-3704. 4 Fl. Oz. Bottle .... **EACH 8.57**

Corona Dope
Quick-drying black lacquer of cellulosic resin. Excellent dielectric, arc and corona resisting properties and protects against moisture, atmospheric effects.
796-4345. 10-4702. 2 Fl. Oz. Bottle .... **EACH 6.34**

Red X Corona Dope
Thixotropic polyester base red enamel. Excellent adhesion. Is oil and waterproof. Insulation of high voltage components especially in high humidity areas.
796-2068. 10-5002. 2 Fl. Oz. Bottle .... **EACH 7.39**

Red Glpt. Insulating Varnish
Alkyd based resistant to environmental extremes, including oils, water, acids and alkalis. Retains high dielectric strength even if wet.
796-3670. 10-9002. 2 Fl. Oz. Bottle .... **EACH 6.26**

Printed Circuit Soldering Chemicals
Silver Print. Draw or repair printed circuits. Made of pure silver. Air drying.
796-2035. 22-201. 1/2 Troy Oz. Bottle .... **EACH 52.99**

Nickel Print (Conductive Paint)
A quick drying lacquer-based coating, pigmented with powdered nickel. For repair and modification of printed circuits. Conductivity is 5 to 6 ohms per square.
796-2436. 22-207. 2 Fl. Oz. (59 ml). Bottle .... **EACH 7.34**

Print Kote Conformal Coating
The ultimate coating for PC boards provides a protective shield to resist environmental contaminants. Prevents arcing and shorting. Air dry 15 to 30 minutes. May be baked at 200°C for 30-60 minutes for extreme high temperature applications.
796-2438. 22-203. 2 Fl. Oz. (59 ml). Bottle .... **EACH 6.34**

Acid Brushes

All GC Aerosols, except as noted, contain no ecology-damaging fluorocarbons.

Cleaning Compound — *NEW* —

Pull-Ar Blue Hand Cleaner
Pull-Ar Blue hand cleaner with pumice cuts the most difficult grime with ease. Aloe vera is added to help soften rough skin. Packaged in a convenient squeeze bottle.
796-2456. EL-612-2. 2 Fl. Oz. (59.1 ml). Squeeze Bottle ....**EACH 1.98**
796-2458. EL-612. 12 Fl. Oz. (354.8 ml). Squeeze Bottle ....**EACH 5.90**

Contact/Tuner Cleaners

Jiffy Bath
Consists of solvents, safe for use on most materials. It possesses a balanced ratio of cleaning solvents to lubricating and protecting ingredients. Contains silicone oils which will not oxidize and will remain active as protective coating and lubricating agent for years, even under adverse environmental conditions such as high humidity and contaminated atmosphere. One of the most universal and safe contact cleaners and may be used on all rotating and sliding contacts in any types of switches or controls.
796-1963. 19-638. 4 Oz. Aerosol..........**EACH 3.85**
796-9815. 19-640. 10 Oz. Aerosol..........**EACH 5.50**

DE-OX-ID
Light, oil based contact treatment compound with active ingredients to counteract oxidation. Lowers contact resistance, inhibits arcing, lubricates and protects against corrosion. For use on connectors, sockets, potentiometers, switch contacts, battery connections, telescoping antennas, relay and thermostat contacts. Should be applied sparingly (e.g. with a toothpick or a hypodermic needle injector) on dirty, dusty and heavily oxidized contacts. Precleaning with a solvent type cleaner is recommended. Best results are obtained with small amounts.
796-9839. 19-1906. 4 Oz. (113.4 gms.). Aerosol ....**EACH 6.50**

GC Bath Contact Cleaner/Degreaser for De-Energized Equipment
GC Bath is formulated as a heavy duty cleaner/degreaser. Exceptional performance can be expected where heavy buildups of grease, oil, dirt, grime, adhesive, and other unwanted substances are encountered. This strong action product can be sprayed on the surface to break down, wash away, and clean grease from equipment, floors, work areas, engines, metal parts, and any area needed to be cleaned. GC Bath has been found to be effective to remove adhesive and adhesive overspray from surfaces. Test for compatibility with sensitive plastics. GC Bath is formulated with no chlorinated solvents and thus has no ozone depleting chemicals. No CFCs. No HCFCs.
796-9848. 19-725. 10 Oz. Aerosol..........**EACH 5.72**

Lubricants

Lubriplate
Grease type super lubricant reduces friction loss, prevents rust and corrosion.
796-2040. 10-2302. 1¾ Oz. (50 gms.). Tube ....**EACH 5.04**

GC TFE Coat
GC TFE Coat is all purpose dry film coating that contains minutes Teflon particles in tough, durable, long lasting binder (paint). Resistant to friction, chemical corrosion, rust and weathering. **Temperature Range:** –100°F to 120°F.
796-9817. 19-800. 14.5 Oz. (411 gms.). Aerosol ....**EACH 6.25**

GC Dry TFE
GC Dry TFE is an all purpose dry film lubricant and release agent that contains minute Teflon particles to lubricate where a dry lubricant is needed. Excellent as a mold release and for potting compounds. **Temperature Range:** –300°F to +500°F.
796-9818. 19-810. 4 Oz. (113.4 gms.). Aerosol ....**EACH 3.85**

GC Compu-Lube Moly/PTFE Lubricant
Super low friction, low wear, low viscosity lubricant for the micro computer age. Effective from –60 to +500°F. **Applications:** Computers, CD and VCR units, printers and all high speed mechanisms.
796-9819. 19-832. 0.5 Fl. Oz. (14 ml). Squeeze Tube..........**EACH 3.92**

Special Chemicals

EMI-RFI Shield
An extremely conductive graphite coating. Adheres to glass, plastics for protecting circuitry from external interference or containing low level signals. 7.5 ohms/square at 1 mil.
796-4375. 10-4807. 12 Avdp. Oz. Aerosol ....**EACH 21.29**

Silicone Compound
Soft inert Silicone Grease for moisture proofing connections with excellent dielectric properties. Also lubricant for rubber and plastics.

HTC (High Thermal Conductivity) Heat Sink Compound
Higher thermal conductivity formula has all the same benefits of conventional heat sink greases, plus is exceptionally stable in high humidity applications. Available in silicone and non-silicone versions.
Model 10-8135. Silicone based, 1 oz. avdp. (28.4 gms.), syringe.
796-2460. 10-8135..........**EACH 12.50**
Model 10-8130. Non-silicone based, 1 oz. avdp. (28.4 gms.), syringe.
796-2462. 10-8130..........**EACH 12.50**

Water Soluble Heat Sink Compound
Easy clean-up, non migrating. Eliminates use of solvents, is non-reactive, exhibits excellent dielectric properties.
796-2464. 10-8132. 1 Oz. Avdp. (28.4 gms.). Syringe ....**EACH 12.50**

Type 22-270 Solder Flux Remover and Cleaner
Convenient, fast and easy to use. Removes all types of organic flux. Use within one hour of soldering. Simply spray and wash from top to bottom. No CFCs. No HCFCs.
796-2037. 22-270. 16 Avdp. Oz. Aerosol ....**EACH 10.19**

Flux Solv™ (Contains No CFCs) Solder Flux Remover
A strong flux remover that will dissolve and remove all flux types. Far more practical than an aerosol for spot cleaning of rework or repaired boards. May be used with brushes, cotton tipped swabs or cloth. Contains no chlorofluorocarbons. Very safe for PC boards and components but can discolor or distort some plastics, particularly polystyrene.
796-2466. 10-220. 2 Fl. Oz. (59 ml). Flux Solv..........**EACH 3.18**
796-2468. 10-228. 16 Fl. Oz. (473 ml). Can ....**EACH 7.40**

Liquid Solder Flux
Completely non-corrosive liquid solder flux consisting of a solution of special rosin in alcohol. Contains no traces of acids or chlorides and is completely safe to use on even the most delicate electronic equipment.
796-4202. 10-4202. 2 Fl. Oz. (59 ml). Bottle..........**EACH 5.23**

Non-Aerosol Cleaner

Isopropyl Alcohol (Anhydrous). This extremely pure alcohol is frequently the recommended cleaner by manufacturers of tape heads, disc drives, etc. Does an excellent job of dissolving and removing oxides from recording heads, also an excellent degreaser. This pure alcohol contains no water, usually a problem with alcohols, and leaves no residue. Suggested for use with swabs, clean cloth, or by immersion.

796-1507. 10-1507. One Pint (16 Fl. Oz.). Can ....**EACH 6.40**

Cements

Service Cement
Quick drying and waterproof clear cement. Use on porous or semi-porous materials such as metals, plastics, etc.
796-4320. 10-302. Btl. 2 Fl. Oz. Bottle..........**EACH 5.70**
796-4325. 10-304. Btl. 4 Fl. Oz. Bottle..........**EACH 7.43**

Rubber to Metal Cement
Bonds synthetic rubber, metal, wood, and plastic. Dries quickly and produces a lasting bond.
796-4330. 10-352. 2 Fl. Oz. Bottle..........**EACH 4.73**

GC Bond Nitrile Cement
Produces a waterproof, resilient, and long-lasting flexible bond on metals and glass. Dries 15 to 30 minutes.
796-3640. 10-4302. 2 Fl. Oz. Bottle..........**EACH 6.63**

Epoxy Glue
Specified by N.A.S.A. for use in its space program. Super grip, slow set. A drop holds tons. Two 2 oz. (57 gms.) tubes of resin and hardener.
796-2098. 10-347. 2 Oz. (57 gms.). Tube ....**PER PKG./2 12.04**

Acrylic Cement
Specially formulated to mend acrylic materials such as lucite and plexiglass. Forms an inseparable, usually invisible joint.
796-2060. 10-4002. 2 Oz. (57 gms.). Bottle..........**EACH 5.11**

Acid Brushes

Brushes for cleaning with solvents, applying coatings and a host of other uses. These brushes are economical enough to use as throw-aways in many applications. Or may be used repeatedly with cleaners such as Freon TF, Chlorothene, Flux Solv, etc. Handles are of tin plated steel and bristles a medium-fine horse hair. Also fine for dusting keyboards, optics, etc. All 6" long, width below refers to width at base of bristles.

Stock No.	Mfr.'s Type	Width (Bristle)	Qty. Per Pkg.	Description	PER PKG.*

***Note:** Bulk pricing can be obtained if you have bulk requirements of 1000+.

Cleaning Swabs — *NEW* —

Double Headed Cleaning Swabs
Cotton tipped swabs for general cleaning with alcohol, Freon TF, 1,1,1 Trichloroethane, etc. **Length:** 6". Package of 50 swabs.
796-2450. 10-270..........**PER PKG./50 2.22**

Poly and Cotton Lint Free Swabs
A special absorbent polyurethane swab with a fine texture that is gentle enough for cleaning delicate surfaces. Particularly good for delicate tape heads and similar usage. Reusable if used with solvents such as TF solvent, alcohol, etc.
796-2452. 10-277..........**PER PKG./30 2.95**

Standard Fluxes, Thinners, and Cleaners

Chemicals

#5768 Bio-Clean Saponifier
Saponifiers turn rosin residue into a water soluble soap. #5768 is used as an alternative to ozone depleting chemicals used to remove rosin flux residues. A 4% to 10% solution is made with water and then followed by a water rinse. Available in quart and 1 gallon units.
833-6214. 63-0000-5768. 1 gallon .... **EACH 47.20**
833-6215. 62-0000-5768. 1 quart .... **EACH 20.60**

Residue Remover

Formula 5315 Residue Remover
Kester No. 5315 is a solvent blend designed for use as a cleaner for automated conveyor fingers in soldering machines. It is specifically developed for removal of built up residues from low solids "No-Clean" fluxes. Continuous use of 5315 prevents excessive flux residues from contaminating the conveyor and transferring to the circuit board assembly. The solvent cleaner is more effective than isopropyl alcohol and other commonly used solvents.
833-1135. 63-0000-5315. 1 gallon .... **EACH 33.74**
833-1136. 62-0000-5315. 1 quart .... **EACH 10.62**

RMA Fluxes

186 RMA Mildly Activated Rosin Flux
Kester's standard mil-approved rosin flux for electronics. It can be applied by dip, wave, foam, and other methods. Available in quart and 1 gallon units.
833-6300. 63-0000-0186. 1 gallon .... **EACH 42.80**
833-6200. 62-0000-0186. 1 quart .... **EACH 19.20**

Water Soluble Fluxes

1429 Water Soluble All Purpose Flux
Has been one of Kester's standard water washable materials for a long time. It is capable of soldering to most metals including some mild steels, but is not generally used for wave soldering. Available in quart and 1 gallon units.
833-6304. 63-0000-1429. 1 gallon .... **EACH 32.40**
833-6305. 62-0000-1429. 1 quart .... **EACH 13.00**

2224-25 Organic Acid Water Soluble Flux
Kester's strongest flux for wave soldering. It is recommended where component and board quality are difficult to control. Available in quart and 1 gallon units.
833-6306. 63-0025-2224. 1 gallon .... **EACH 30.96**
833-6307. 62-0025-2224. 1 quart .... **EACH 13.80**

2331-ZX Neutral pH Water Soluble Flux
Relatively mild and safe water soluble flux used for electronic assembly. The residues left after soldering are still conductive, however, and must be removed in most applications. Available in quart and 1 gallon units.
833-1225. 63-0097-2331. 1 gallon .... **EACH 36.36**
833-1220. 62-0097-2331. 1 quart .... **EACH 14.58**

HF-1189 VOC (Volatile Organic Compound) Free Water Soluble Flux
A water based, halide (chloride) free liquid flux that combines moderate activity with environmental friendliness. It contains no alcohols which are photochemically reactive and been linked to global warming. The residue left after soldering must be cleaned with water. Available in quart and 1 gallon units.
833-6308. 63-0086-1189. 1 gallon .... **EACH 80.40**
833-6309. 62-0086-1189. 1 quart .... **EACH 30.40**

120 Thinner
A mixture of alcohols used to replace lost solvent in 186 liquid flux. Solvent is commonly lost when liquid flux is applied by foaming or waving. Available in quart and one gallon units.
833-6201. 62-0000-0120. 1 quart .... **EACH 9.60**

Low Solids, No Clean Fluxes

951, 2% Low Solids No-Clean Flux
Kester's best selling Low solids flux. It combines good activity with no visible residue after wave soldering. The low solids content helps to eliminate defects when soldering bottom side surface mount components, but overall board and component solderability must be good for best results. #951 can be foamed, waved or sprayed and also comes in a flux pen. Available in quart and one gallon units.
833-6202. 63-0000-0951. 1 gallon .... **EACH 34.00**
833-6203. 62-0000-0951. 1 quart .... **EACH 14.00**

110 Thinner
Contains a mixture of alcohols used to replace solvents lost when using #951 liquid flux. Available in quart and one gallon units.
833-6205. 62-0000-0110. 1 quart .... **EACH 9.18**

#961, 3% Low Solids No-Clean Flux
A higher activity version of Kester #951 which has better solderability, but leaves behind a little more residue. It is recommended when component solderability or boards design require a flux which is slightly more active than #951. Available in quart and 1 gallon units.
833-6207. 62-0000-0961. 1 quart .... **EACH 14.40**

#111-B Thinner
Contains a mixture of alcohols which are used to replace solvents lost when using Kester #961 liquid flux. Available in quart and 1 gallon units.
833-6209. 62-0002-0111. 1 quart .... **EACH 9.18**

#970 VOC (Volatile Organic Compound) Free No-Clean Flux
The way that all liquid fluxes will eventually evolve. It combines environmental friendliness with cost effective no-clean technology. It is a water based, halide free liquid flux that can be applied by dip, spray, wave or foam. Although thinning is not normally required, ordinary deionized water can be used. Kester has applied for a patent to protect the technology. Available in quart and 1 gallon units.
833-6211. 62-0000-0970. 1 quart .... **EACH 22.80**

RA Fluxes

1515 RA 15% Solids Activated Rosin Flux
Developed for wave soldering of consumer or non-critical electronic assemblies. It can also be used for other general applications. Even though 1515 is a fully activated flux many customers do remove the residue after cleaning. Available in quart and 1 gallon units.
833-6303. 62-0000-1515. 1 quart .... **EACH 12.40**

Formula 4662 Thinner
A mixture of alcohols used to replace lost solvent in Kester formulas 1515, 2224-25, and 2331-ZX. Available in quart and 1 gallon units.
833-1231. 62-0000-4662. 1 quart .... **EACH 9.20**

1544 RA 50% Solids Activated Rosin Flux
The liquid version of Kester 44 resin. The high solids content gives it good heat stability for dipping and hand applications. Available in quart and 1 gallon units.

Rubber Rejuvenator Platen Cleaner

Rubber Rejuvenator/Platen Cleaner is a specially designed, hydrocarbon cleaner that cleans and revitalizes rubber rollers and platens. Use on rollers in office paper handling equipment such as copiers, FAX machines, postage machines, laser printers and others. Improves rubber grip and reduces misfeeds and jams. Also cleans typewriter and printer platens removing dirt and inks for cleaner printing.

Production Chemicals

TECH SPRAY
WONDERMASK P
TEMPORARY PEELABLE SOLDER MASK
TECH SPRAY
WONDERMASK W
TEMPORARY WATER SOLUBLE SOLDER MASK

Wondermask™ P 2211
Peelable temp. solder mask for any wave solder system. Non-contaminating. Excellent resistance to polar and non-polar solvent systems. Can be used as a spot mask, mask prior to conformal coating, or as a protective storage or shipping shield. Self-leveling; quick film formation. Non-ammoniated.
907-0165. 2211-8SQ. 8 oz. Air/Therm. Cure .... EACH 7.06

Wondermask W 2205
A temporary protective water soluble masking agent. Easily and completely removed in normal hot water washing cycle. Leaves no residue. Non Flammable – Non Corrosive – Non Contaminating – Non Dripping.
907-1697. 2205-8SQ. 8 oz. Air/Therm. Cure .... EACH 6.72

Wondermask® PL Latex 2218 ***— NEW —***
A temporary, peelable solder mask comprised of a thixotropic, natural acrylic latex designed to withstand fluxing, wave soldering, and cleaning operations. Wondermask® PL Latex is rapid drying and has excellent peel strength. Cured mask can be used in water or solvent systems and in masking for conformal coatings. Excellent heat stability allows for prolonged exposure to high temperatures, without product degradation. May be used in most common forms of mask applications such as robotic, pneumatic, hand applied, or template screening (not recommended for silk screening).
907-1698. 2218-8SQ. 8 oz. .... EACH 8.09

1978 Silicone Free Heat Sink Compound

Features exceptionally low bleed and evaporation characteristics. Will not harden, dry out, or melt; will not contaminate wave and solder baths. Meets or exceeds KS 21343 and MIL-C-47113. Use with both metal and plastic.

907-0190. 1978-DP. 2 oz. tube	EACH 8.42
907-0191. 1978-1. 1 lb. jar	EACH 27.63

1977 Transistor Silicone Grease
A heat conductive material used to coat the bases of power transistors as they are connected to heat sinks. The grease is heat conductive and will draw the heat away from the transistor allowing it to run cooler.
907-1977. 1977-DP. 1 oz. Squeeze Tube .... EACH 5.27

Envi-Ro-Tech Fine-L-Kote® Remover*

No Methylene Chloride. Effectively and safely removes most conformal coatings, including acrylic, epoxy, urethane, and some silicones. Can also be used to remove enamels, paints, varnishes and lacquers. This product quickly removes tar, adhesives, crayon, rubber, and carbon.
907-0195. 1618-P. 1 Pint in Metal .... EACH 15.22

*This product is not recommended for acrylic, polystyrene, or polycarbonate materials. Always test in an inconspicuous area before use.

1-800-858-4043 TECH Line

No-Clean Wick Desoldering Braid

- ► Removes Up to Four Times More Solder
- ► Residue Halide Free and Non-Conductive
- ► Does Not Have to Be Cleaned Off the Board
- ► Designed to Improve Reworking Efficiency in Both Conventional and No-Clean Operations

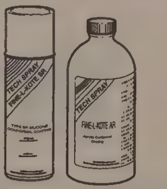
Fine-L-Kote



Tough conformal coatings for PC boards, components, and electrical equipment. Protects against corrosive atmosphere, salt, water, dilute acids, and alkali solutions. Prevents formation of conducting films or moisture. Formulated with OPTI/SCAN, an ultraviolet material for conformity checks under a black light.

HFE Flux Remover — *NEW* —

- Ozone Safe
- Safe On Plastics
- General Purpose Defluxer

Excellent Cleaner for hand and batch bench-top cleaning applications. Solvent readily removes type R, RMA, RA and synthetic fluxes from printed circuit assemblies.

907-4007. 1686-8S. 8 Oz. Aerosol .... **EACH 20.51**
907-4008. 1686-P. 1 Pt. in Metal .... **EACH 62.87**

AK225 Cleaners (Commercial Use Only) — *NEW* —

Asahiklin AK225 1663 (Cleaner/Degreaser)

AK225 Neat is 100% HCFC-225. Completely non-flammable and safe on metals and plastics, the straight AK225 is an excellent solvent for metal degreasing. Vapor degreasing with AK225 offers superior cleaning on video heads, reflector glasses for laser printers, scanners and other equipment that requires optimal cleanliness.

907-1663. 1663-8S .... **EACH 18.45**
907-1669. 1663-18S .... **EACH 35.14**

Kleen ATMS 1664 (Heavy Duty Cleaner/Degreaser)

Kleen ATMS is an azeotropic blend of AK225, trans-dichloroethylene and methanol. An ideal 1,1,1-trichoroethane (methyl chloroform) replacement, it is designed to be a general cleaner/degreaser and defluxer. Having excellent solvency, Kleen ATMS is aggressive towards greases, oils and similar soils.

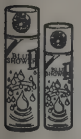
907-1664. 1664-8S .... **EACH 17.53**
907-1670. 1664-18S .... **EACH 29.39**

Flux Remover AMS 1665 (Defluxer)

Specifically designed for defluxing in vapor degreasing and cold-batch cleaning, AMS offers superior flux removal for type R, RMA, RA and synthetic fluxes. Non-flammable and safe on plastics and elastomers, AMS is the perfect choice for all defluxing applications.

907-1665. 1665-8S .... **EACH 17.53**
907-1671. 1665-18S .... **EACH 32.97**

Blue Shower® II 1667 (Universal Cleaner/Degreaser)



Developed for general cleaning and degreasing. Non-flammable and safe on plastics, Blue Shower® II is the standard for precision cleaning including hand oils, solder oils, greases, silicone, fluxes, and similar soils. Excellent for tape head cleaning and general degreasing.

907-1667. 1667-8S .... **EACH 16.65**
907-1672. 1667-18S .... **EACH 31.25**

Contact Cleaner II 1668 (Contact Cleaner)

Designed for either batch cleaning or hand operations, Contact Cleaner II removes oil, greases, silicones, dirt and grime from contacts and pads. Non-flammable and safe on plastics, Contact Cleaner II is the optimum solvent for contacts.

907-1668. 1668-8S .... **EACH 17.95**
907-1673. 1668-18S .... **EACH 33.29**

Duster Directional Attachment 1990 and 1991

Allows directional control of spray for dusters 1671-10RS, 1668-12ROFS while maintaining upright can position.

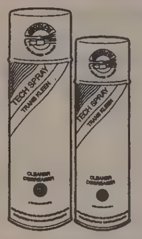
907-1990. 1990 .... **EACH 8.93**

Brush Attachment for Solvents with 3 Brushes

907-1991. 1991 .... **EACH 14.93**

1-800-858-4043 Techline

Trans Kleen — *NEW* —

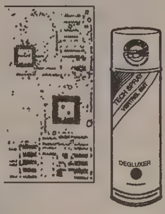


- Non-Corrosive
- Pure Solvent
- Heavy Duty Cleaner

Trans Kleen is used to penetrate and dissolve non-polar soils such as oil, grease, wax, tar, adhesive, and rosins. An excellent product for electronic and electrical equipment, machinery, and metal parts.

907-4003. 1684-8S. 8 Oz. Aerosol .... **EACH 12.25**
907-4004. 1684-18S. 18 Oz. Aerosol .... **EACH 21.78**

Vertrel® SMT — *NEW* —



- Ozone Safe
- Rapid Evaporation
- Safe On Plastic
- Non-Flammable

Vertrel®. SMT is a non-flammable, rapidly evaporating, safe on plastics, cleaner/degreaser and flux remover that is non-ozone depleting.

907-4001. 1689-8S. 8 Oz. Aerosol .... **EACH 20.57**
907-4002. 1689-P. 1 Pt. in Metal .... **EACH 62.87**

Eco Line

Cleaner/Degreaser

A blend of isopropanol and ethanol, this product is designed for cleaning electronic and electrical equipment, machinery and metal parts. Rapid evaporation and complete compatibility with plastics makes it the perfect choice for general cleaning.

907-1621. 1620-10S .... **EACH 7.04**
907-1622. 1620-P .... **EACH 7.76**

Flux Remover

A unique combination of hydrocarbon solvents and alcohols making it an excellent defluxer. Safe on plastics and rapid evaporation, it dissolves type R, RMA, RA, SA and most no-clean fluxes. Can also be used as an all-purpose cleaner for removal of light oils, silicones, waxes, greases and similar contaminants found in electronics manufacturing.

907-1623. 1621-10S .... **EACH 7.19**
907-1624. 1621-P .... **EACH 7.60**

Contact Cleaner

Contains a hexamine mixture which cleans electrical contacts and connections. Ideal for switches, relays, contact pads and other places of electrical connections. Safe on plastics, the solvent will not damage switch housings.

907-1627. 1622-10S .... **EACH 6.76**
907-1628. 1622-P .... **EACH 6.69**

Dust Remover

Unique hydrocarbon based dusting gas removes dust and other particles. The exceptionally pure, moisture free gas does not harm the earth's ozone layer and thus has zero ozone depletion. Removes microscopic contaminants, lint, dust metallic oxide deposits, and other soils without the use of solvents. For added control, use the Tech Spray Multi-Directional Spray Attachment (1990).

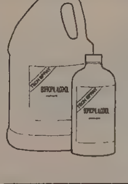
907-1631. 1623-8S .... **EACH 6.48**

Tape Head Cleaner

Formulated to remove harmful contaminants including dirt, nicotine, metallic oxides, tape residues and other interfering soils from magnetic and optical read/write heads. Cleans and restores head surfaces for better response and improved performance. Continued use produces better recording and clearer play back.

907-1632. 1624-10S .... **EACH 6.72**
907-1633. 1624-P .... **EACH 7.68**

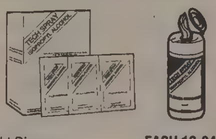
Isopropyl Alcohol



99% pure, anhydrous isopropanol for all purpose cleaning. Excellent for tape head cleaning, removal of fluxes, light oils, polar soils, and white mineral residue. Can be used as a thinner for most fluxes. 1610-GS is a plastic bladder in a box for easy pouring and economical shipping.

907-1645. 1610-P. 1 Pt. in Shatterproof Glass .... **EACH 6.58**
907-1650. 1610-G. 1 Gallon in Metal .... **EACH 31.92**
907-1654. 1610-GS. 1 Gallon Plastic in Box .... **EACH 15.21**
907-1655. 1610-5G. 5 Gallon in Plastic .... **EACH 47.92**

Isopropyl Alcohol Presaturated Pads



- Tape Head Cleaning
- Photocopying Equipment
- Connectors
- Medical Equipment
- Microwave and Telephone Circuitry
- Relays
- Data Processing Equipment

907-1738. 1610-DSP. 48 Wipes in Up-Right Dispenser .... **EACH 12.84**
907-1739. 1610-50PK. 50 Pre-Saturated Packets Per Carton **PK./50 15.00**

VTR/VCR Kit/Cleaner

VTR/VCR Kit/Cleaner

A complete maintenance kit to keep your VTR/VCR operating at the peak of efficiency. Contains six Techclean Swabs and one 6-dram bottle of VTR/VCR cleaner. An excellent cleaner for magnetic tape heads, video tape heads, video cassette recorder and computer tape heads. Safe on plastics, tape and rubber. Non-conductive, leaves no residue. Removes dirt — nicotine — film and oxides. Leaves no Newton Rings.

907-1684. 1690-DPK. Kit .... **EACH 5.07**
907-1683. 1690-DP. 2 Oz. Btl. Cleaner .... **EACH 4.81**

Professional Tape Head Cleaner* — *NEW* —

- Moisture Free
- Mild Solvent
- Rapid Evaporation
- Non-Flammable

Head Cleaner removes dirt, metallic oxides, tape residues and other interfering soils from magnetic and optical read/write heads.

907-4005. 1673-DP. Carded, 2 Oz. Glass .... **EACH 7.15**
907-4006. 1673-P. 1 Pt. in Glass .... **EACH 50.64**

*For Commercial Use.

Envi-Ro-Tech™ Freezers and Dusters

Envi-Ro-Tech™ Anti-Static Freezer 1747

100% HFCs, no CFCs, no HCFCs. A rapidly evaporating HFC-134a product that contains an anti-static agent. Because HFCs do not harm the ozone, this product has a zero ozone depletion factor. This product is used as a trouble shooting aid in static sensitive areas for intermittently faulting capacitors, resistors, semiconductors, and other defective components. Also detects cold solder joints and oxidized junctions.

907-1747. 1747-10S. 10 Oz. Aerosol .... **EACH 7.35**

Envi-Ro-Tech™ Freezer 1672

100% HFCs, no CFCs, no HCFCs. An HFC-134a based, rapidly evaporating liquid that chills to minus 62°F. Because HFCs do not harm the ozone, this product has a zero ozone depletion factor. Used as a trouble shooting aid for intermittently faulting capacitors, resistors, semiconductors, and other defective components this tool speeds up the rework process. Also detects cold solder joints, cracks in printed circuit boards, and oxidized junctions.

907-0027. 1672-10S. 10 Oz. Aerosol .... **EACH 6.91**

Envi-Ro-Tech™ Duster 1671

100% HFCs, no CFCs, no HCFCs. Formulated with HFC-134a, this exceptionally pure, moisture free, inert gas removes particles without the use of harmful solvents. Because HFCs do not harm the ozone, this product has a zero ozone depletion factor. This product removes microscopic contaminates, lint, dust, metallic oxide deposits, and other soils.

907-1630. 1671-10S. 10 Oz. Aerosol .... **EACH 5.69**
907-1634. 1671-15S. 15 Oz. Aerosol .... **EACH 9.16**
907-1640. 1671-10RS. 10 Oz. Aeosol. Ref* .... **EACH 6.58**

*For use with 1990 attachment.

Envi-Ro-Tech™ For Commercial Use Only

Envi-Ro-Tech™ 1677*
General Purpose Cleaner-Degreaser

No CFCs and No 1,1,1-Trichloroethane. Contains HCFCs. Fast acting and highly effective cleaner containing a proprietary blend of HCFC. Safe for cleaning most electronic equipment. Used to remove oils, greases, dirt, silicone, fluxes and similar soils.

907-1676. 1677-12S. 12 Oz. Aerosol .... **EACH 8.22**
907-1677. 1677-22S. 22 Oz. Aerosol .... **EACH 11.64**

Envi-Ro-Tech™ 1675* Heavy Duty Cleaner-Degreaser

No CFCs and No 1,1,1-Trichloroethane. Contains HCFCs. Fast acting and highly effective cleaner containing a proprietary blend of HCFCs. Used to penetrate and dissolve non-polar soils such as oil, grease, wax, tar, adhesive, and rosin. Also an excellent cleaning product for electronic and electrical equipment, machinery, and metal parts.

907-1649. 1675-12S. 12 Oz. Aerosol .... **EACH 9.09**
907-1651. 1675-22S. 22 Oz. Aerosol .... **EACH 13.12**

Envi-Ro-Tech™ 1676* General Purpose Defluxer

No CFCs and No 1,1,1-Trichloroethane. Contains HCFCs. General duty defluxer for RA, RMA, and SA type fluxes. Can be used as an all purpose cleaner to remove light oils, silicones, waxes, greases, and similar contaminants often found in electronics manufacturing.

907-1600. 1676-12S. 12 Oz. Aerosol .... **EACH 8.42**
907-1605. 1676-22S. 22 Oz. Aerosol .... **EACH 12.30**

Envi-Ro-Tech™ 1678* Light Duty Defluxer

No CFCs and No 1,1,1-Trichloroethane. Contains HCFCs. Light duty defluxer for Type R and water soluble fluxes. Can be used as cleaner to remove light oils, polar soils, and white residue. Drying agent for water and removes water stains and mineral traces.

907-1615. 1678-12S. 12 Oz. Aerosol .... **EACH 8.22**
907-1620. 1678-22S. 22 Oz. Aerosol .... **EACH 12.91**

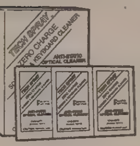
*This product is not recommended for acrylic, polystyrene, or polycarbonate materials. Always test in an inconspicuous area before use. Also available in bulk for bench top cleaning.

Anti-Static Products

1726 Zero Charge Anti-Stat

Zero Charge Anti-Stat is a Chloride-Free Industrial Grade topical Anti-Stat with no free amines. The extremely low surface tension provides excellent wetting to eliminate hot spots or voids. Safe on plastic. Will not attract dust or particulate contamination. Designed for use on any area or material where static buildup causes problems. **Meets or Exceeds:** MIL-B-81705B and NFPA 56A.

907-1686. 1726-QT*. 1 Qt. With Sprayer .... **EACH 11.82**
*Ready to use.



1743 Zero Charge Anti-Static Screen and Keyboard Cleaner

For optical clarity and distortion free reading. Removes grease, dust, salts, grime, inks, fingerprints, nicotine, syrups, soot, and carbon paper residue. Safe on ceramics, plastic, glass, metal, and elastomers. Use with Zero Charge Anti-Static Techclean Swabs to clean hard to reach areas.

907-1687. 1743-QT. 1 Qt. .... **EACH 12.15**
907-2687. 1743-50 PK. 50 Packet Box .... **EACH 14.11**
907-2688. 1743-65. 6 oz. Aerosol .... **EACH 3.96**

1742 ETC

An anti-static cleaner for computer enclosures, plastic, glass and metal. Effectively removes dirt, nicotine, grease, oil, inks, dust, fingerprints and grime. Non-Streaking, Non-Abrasive, Non-Flammable, Non-Scratching.

907-1653. 1742-Qt. 1 Qt. .... **EACH 11.47**

1733 Zero Charge Anti-Static Mat and Table Top Cleaner

Anti-static, non-abrasive cleaner for general use in all areas. Leaves no film, non-streaking, non-flammable and non-scratching. Contains no alkali or ammonia. Will not leave a soap scum or hard water buildup that can cause an insulation barrier on static-sensitive areas. Can be used in conjunction with Techclean Wipers (No. 2350) or standard paper towels.

907-1733. 1733-Qt. 1 Qt. .... **EACH 9.27**
907-2733. 1733-G. 1 Gal. .... **EACH 22.24**
907-1735. 1733-PT .... **EACH 7.65**

1702 Zero Charge Anti-Static Hand Lotion

Specifically formulated to dissipate static charge from operators' hands and helps to eliminate electrostatic discharge on electric components and equipment. Formulated with Aloe Vera for a deep, penetrating, soothing action. Contains no silicone or lanolin. Non-greasy, non-sticky, odorless and fast absorbing.

907-2702. 1702-8FP. 8Fl.oz .... **EACH 4.14**

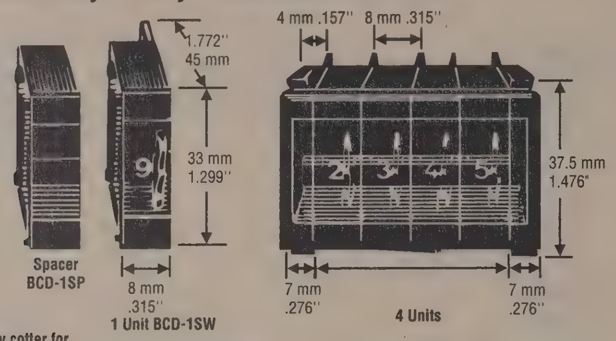
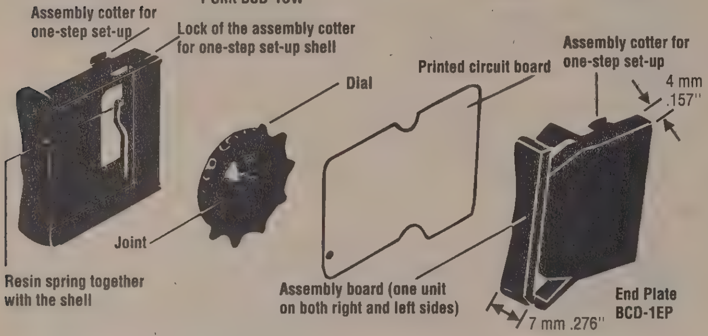
Snap Assembly Binary Thumbwheel Switches





► **Similar to Interswitch and Intermarket Series Thumbwheel Products**

All parts of the thumbwheel switches are assembled by a lock one step only without use of screw. The resin springs are made for the joint cotter on basis of human mechanics providing soft and comfort push for assembly. Complete assembly can be achieved on lock only by pushing the spring of the shell into the cotter hole from the front. Useful as a controller of sheets for copiers, temperature and numerical quality or as a timer. End plate is fitted on both ends of the switch set. The resin spring, together with the shell easily locks the parts on the cotter hole.

High reliability and longterm stability — quick, easy installation no additional screws required for mounting — ideal for preset counters, temperature controller, timer and automatic central equipments use where presetting is required.

Specifications. Operating Temperature: –40°C - +85°C. **Switching Load (Resistance):** AC50V/DC28V, 10μA-0.15A. **Continuous Load:** 1A max. **Contact Resistance:** 100 milliohms (initial), 200 milliohms max. (after life test). **Insulation Resistance (terminal to case):** 1000 megohms min. **Insulation Resistance (terminal to terminal):** 100 megohms min. **Electrical Life:** Over more than 20 × 10^4 time switching between any two adjacent positions.

Materials. Body and Wheel: Acetal resin. **Printed Circuit Boards:** Hard gold plated copper on epoxy fiberglass. **Contacts:** Gold plated Be-Cu alloy.

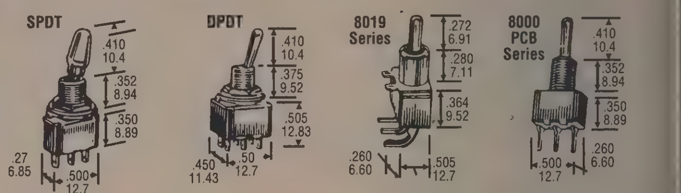
Subminiature Toggle Switches



For manual control, solid-state devices and miniature circuits. Single pole types are 1/4" thin, double poles less than 1/2" square. Single hold mounting. 1/4" threaded bushing. **Nominal Rating:** 5 amps. 125 VAC or 24VDC. **Initial Contact Resistance:** 5 milliohms. **Insulation Resistance:** 10,000 megohms. **Life under load:** 50,000 make/break cycles. Bat handles have 30° throw. Silver contact. Solder terminals. **PCB Series.** Subminiature for direct insertion in PC boards. Terminals are silver plated.

Ensto ORIGIN Rotary and Toggle Disconnect Switches

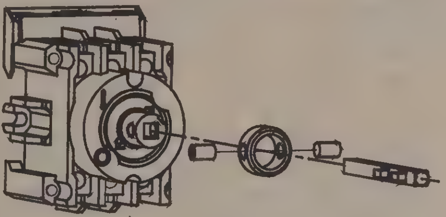
- World-Class, Industrial Grade Listed Device, UL508, CSA14, IEC947, CE
- Rugged, Reliable, Versatile, Economical
- Mount on Back Panel or DIN Rail
- Extended, Through-Door Rotary Actuation Kits Available
- Front Panel/Door Mount Kits for Rotary Switch Available
- Tested and Rated to Make and Break High Overload Currents, Typically Associated with AC Motor Starting and Stalling (Locked Rotor)
- General Use AC and DC, Motor Circuits AC Single and Polyphase
- Non-Fused Switch, Intended for Use with Separately Provided Branch-Circuit Fuses

Applications Guide and ORIGIN Catalog

Scannable drawing, installation options and instructions, sizing guidelines for National Electrical Code® applications, Canadian Electrical Code® applications, NFPA® 79 equipment applications, IEC switch disconnector terminology, detailed ratings and testing requirements for UL, CSA and IEC, copies of Declaration of Conformity and ENSTO ISO9001 Certification for CE Technical Construction File, and more.

767-2100. 45.000. Altech ORIGIN Applications Guide No. 2500.OP............................**EACH 5.00**

Rotary Actuation Switch



The Ensto ORIGIN rotary switch is used world wide for industrial through-door disconnect applications. From a back-panel or DIN rail mount rotary switch, extend actuation up to 12 inches with extension shaft, which on one end fits into the switch actuator and on the other end fits into the door-mounted and sealed actuation handle. Extension shaft collar fixes the extension shaft to the rotary switch. Extension shaft and handle are keyed so only in the closed position will the shaft slip out of the handle when the door starts to open. Extended shaft handles have lock-out provisions built-in (accept up to 3 padlocks). They are available with black handle and bezel for standard disconnect applications, or with red handle and yellow bezel for combination function of main disconnect and emergency stop (where emergency stop "pushbutton" is not considered necessary). Bezels are marked with molded and painted international standard "1/0" or molded "1/0" with printed USA standard "ON/OFF."

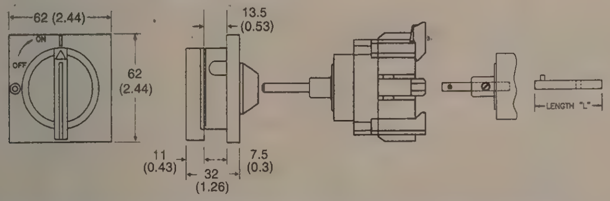
767-2108	KK20/U	45.299	Shaft retention collar	**1.30**

Order rotary switch, extended actuation handle, shaft collar, and extension shaft separately. Direct actuation handles available.

Rotary Switch Actuation Extension Shafts



Needed with extended actuation handle. Minimum shaft-length calculation as follows.

1. To the inside depth of the enclosure (face of mounting panel to inside face of front panel or door) add the front-panel/door thickness.
2. Subtract 1.5 mm if 7.5 mm DIN rail is used. Subtract 9 mm if 15 mm DIN rail is used. Subtract nothing if switch is direct back-panel mounted.
3. Subtract 30 mm for 40 A switches and 34 mm for 80 A switch. If minimum shaft-length is not a whole multiple of 10, use the shorter standard shaft length. When mounting the shaft in the switch, tighten the collar screws and position the shaft so that the exposed length is 20 mm less than the calculated minimum length.

UL File 164205, NLRV, OY Ensto Control Ab.

Switch numbers for UL File are KK16, KK17, KK18, KK19, KK36 and KK37 respectively for type numbers KST3.40/U, KST3.80/U, KSR3.40/U, KSR3.80/U, KST4.40/U and KSR4.40/U.

Standard Short-Circuit Withstand

10 kArms symmetrical, when 40 A switches protected by max. 80 A RK5 or lower let-through fuses, and when 80 A switches protected by max. 150 A RK5 or lower let-through fuses.

Wiring Terminals

Copper conductors only, 60°/75°C, field and factory wiring rated. All 40 A switches rated with 14 AWG solid and stranded through 8 AWG stranded wire (accept at least next size larger). Tightening torque 35 lb./in. Stripping length 3/8 in. All 80 A switches rated with 14 AWG solid and stranded through 3 AWG stranded (accept at least next size larger). Tightening torque 50 lb./in. Stripping length 1/2 inch.

General Use Ratings

AC to 600Y/347 VAC at rated current (either 40 A or 80 A) polyphase and two-pole-break single phase, all switches. DC to 110 VDC at rated current (either 40 A or 80 A) two-pole break, three pole switches only (four pole switches not DC rated).

AC Motor-Circuit Ratings

Reference table for horsepower ratings, B, C and D motors. Specific applications to be per National Electrical Code® (herein Code), other appropriate authoritative documents (e.g. NFPA-79 and/or Canadian Electrical Code®) and local requirements, as necessary.

KSR3.40/U and KST3.40/U Motor Loading

Polyphase and two-pole-break single phase to 600Y/347 VAC, load to maximum 32.2 A with single or multiple motor total full-load-amperes from Code tables. Covers × 115% for disconnect. Locked-rotor-current from Code tables not to exceed 194 A.

KSR3.80/U and KST3.80/U Motor Loading

Polyphase to 600Y/347 VAC and two-pole-break single phase to 480Y/277 VAC, load to maximum 68 A with single or multiple motor total full-load-amperes from Code® tables. Covers × 115% for disconnect. Locked-rotor-current from Code tables not to exceed 408 A.

KSR4.40/U and KST4.40/U Motor Loading

Polyphase to 600Y/347 VAC, load to maximum 32 A, two-pole-break single phase to 600Y/347 VAC, load to maximum 28 A, single or multiple motor total full-load-amperes from Code tables not to exceed 192 A polyphase or 168 A single phase.

TSP Series — Tiny Sealed Pushbutton Switch

- **Rating: 0.4VA Max. at 20 VAC/DC**
- **High Temperature Plastics — Liquid Crystal Polymer (LCP)**
- **Specifically Designed for Thru-Hole and Surface Mount Applications — Tin/Lead Plated Terminals**
- **Washable Process Sealed Construction — Internal Actuator O-Ring**

Material Specifications: Contacts: Copper alloy with gold over nickel plating. **Case Material:** Thermoplastic (LCP). **Actuator Material:** Thermoplastic (Nylon). **Terminals:** Tin/Lead plated. **Typical Performance Characteristics: Contact Rating:** 0.4VA max. at 20VDC or peak AC. **Life Expectancy:** 80000 cycles. **Operating Temperature:** -30°C to +85°C.

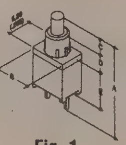

Fig. 1

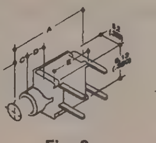

Fig. 2

Pushbutton Switch MPA/MPE/MPG Series

Molded-in heat terminals eliminate switch mechanism contamination. Gold flash contacts and terminals inhibit oxidation and extend shelf life. Diallyl phthalate cases permit these switches to withstand wide temperature ranges. Each switch has one-piece bushing to reduce the possibility of tear-off damage when mounting. All hardware is supplied unmounted. **Contact Rating:** 6 amps at 125VAC; 3 amps at 250VAC; 4 amps at 28VDC. Solid silver contacts. **Operating Force:** 2.5 to 4.4 lbs. **Plunger Travel:** 125" avg. **Insulation Resistance:** 1000 ohms. **Dielectric Strength:** 1500V rms at sea level. **Life Expectancy:** 50K operations. Terminal seal included at no extra charge. Order cap separately.

MSS Series Slide Switch

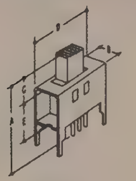

Fig. 1

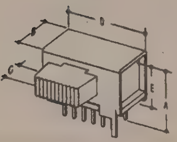

Fig. 2

Designed for PC applications. These slide switches save installation time and eliminate wiring errors. Available in vertical or right angle mount with mounting tabs on the perimeter of the frames for added stability. All switches in this series feature a positive wiping action to assure low contact resistance and make-before-break action. **Contact Rating:** Silver, 300 mA at 125 VAC. **Contact Resistance:** 30 milliohms max. **Insulation Resistance:** 1000 megohms min. **Dielectric Strength:** 500 V rms at sea level.

PC Mount Slide Switch — TSS Tiny Series

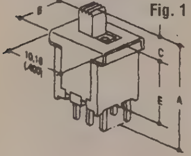

Fig. 1

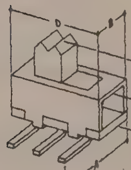

Fig. 2

These compact pushbutton switches are used in a variety of applications such as: instrumentation, telecom systems, computers, etc. Contacts and terminals are fully gold plated for dependability in frequent switching and gold solderability. Right angle models are ideal for PC board edge mounting. Contacts and terminals are fully gold plated for dependability in frequent switching and gold solderability. Right angle models are ideal for PC board edge mounting. **Contact Rating:** 0.4 VA max. at 20 VDC or peak AC. **Contact Resistance:** 20 milliohms max. **Insulation Resistance:** 1000 megohms min. at 500 VDC. **Dielectric Strength:** 1000 V rms at sea level. Thermoset plastic case material. Gold over nickel barrier plating. **Plunger Travel:** Approximately .030".

Reliant '22 Series Oil Tight Industrial Controls

- ► **Fits 7/8" (22 mm) Diameter Holes**
- ► **Protection Level: 1 P 65**
- ► **Buttons Are Full Size**
- ► **Meets NEMA 1, 12, 13**
- ► **Finish: Matte Black Bezel**
- ► **Simple "No-Tool" Mounting**
- ► **Fully Insulated — Thermoplastic or Heavy-Duty Metal Bushings**
- ► **Contacts: Double-Break Silver Snap-Block, 6 A @ 600 VAC**
- ► **Stackable**

These controls utilize a snap-on contact block system with pushbuttons for a variety of switching configurations — momentary and maintained, lighted and unlighted, round and square keylocks and selectors. Suited for direct and pilot duty. Maximum contact rating of 6 A at 600 VAC. Contemporary front panel design. Order contact blocks separately.

MT Green Series

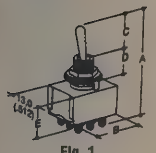

Fig. 1

These switches are best known for their ease of mounting and actuation as well as for long term reliability. Variety and quality are designed in, not added on. The miniature "Green Series" features the following: molded-in terminals, anti-push-in toggle, hi-torque bushing, gold flash terminals, UL Listed (File No. E46765). **Contact Rating:** 6 amps at 125 VAC, 3 amps at 250 VAC, 4 amps at 28 VDC. **Contact Resistance:** Below 10 milliohms. **Insulation Resistance:** 1000 megohms min. Solid silver contacts. Green diallyl phthalate case. () denotes momentary.

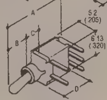

Fig. 2

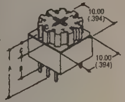

Fig. 3

DR Series Features highest contact reliability with a pin-point high contact pressure mechanism providing longer life expectancy by penetrating oxides and sulfurized film allowing more than 10000 rotations. Insert molded terminals and internal "O" ring allow wave soldering and immersion cleaning. **32 styles to choose from:** screwdriver, knob and shaft types are available in both upright and right angle versions. Plus your choice of 4 standard output codes. **Specifications. Contact Rating:** 0.4 VA @ 20 VDC (max.). **Initial Contact Resistance:** 50 milliohms max. @ 2 VDC. **Insulation Resistance:** 1000 milliohms min. @ 100 VDC. **Dielectric Strength:** 300 VAC 1 minute. **Operating Temperature Range:** -10°C to +85°C. **Life Expectancy:** 10000 rotations. Surface mount types available on special order.

AD Series Auto Insertable DIP Switch

Unique ceramic substrate allows soldering temperature of 245°C ±5% for up to 30 seconds. Auto-insertable using standard insertion equipment. Gas tight contacts (280000 PSI). Allows wave soldering and aqueous or solvent cleaning without the use of tape seals. **Base:** PBT encapsulated ceramic. **Cover and Actuation:** PBT 94V-O. Gold flash beryllium copper moving contacts. Solder coated brass fixed contact and terminal. **Operating Force:** Less than 800 grams. **Contact Rating:** 4VA at 20VDC max. **Operating Temperature:** -30°C to +86°C. **Dielectric Strength:** 500VAC rms at sea level. **Life Expectancy:** 5000 operations.

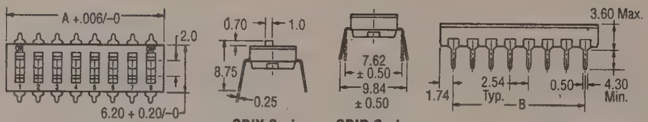
SDI Series DIP Switch



SDIX Series SDIR Series

— NEW —

These single pole single throw switches are black high temperature thermoplastic with white actuators. Contact material is copper alloy with gold plating over nickel plating, and the terminals are brass with gold plating. Double contacts offer high reliability and low contact resistance. The contact area is self cleaning. Splay terminals allow for automatic insertion by IC insertion machines. Straight terminals for manual insertion. Insert molding of terminals and ultrasonic welding improve flux proofness and enable flux washing in whole by top tape sealing. 2000 operations minimum per switch. Switching rating is 25 mA @ 24 VDC.

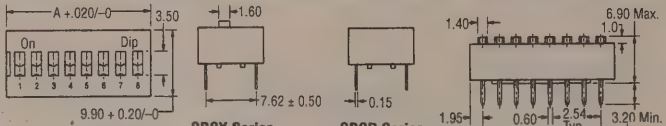
SDS Series
Slide DIP Switch



SDSX Series SDSR Series

— NEW —

These normally open single pole single throw switches have a black base and red cover made of glass fiber reinforced plastic with white actuators. The top is sealed with polyester film and epoxy is used for potting. Contact material is phosphor bronze with gold plating over nickel. The contacts use self-cleaning. High reliability offers 2000 operations per switch minimum and low contact resistance. Switch rating is 25 mA @ 24 VDC.

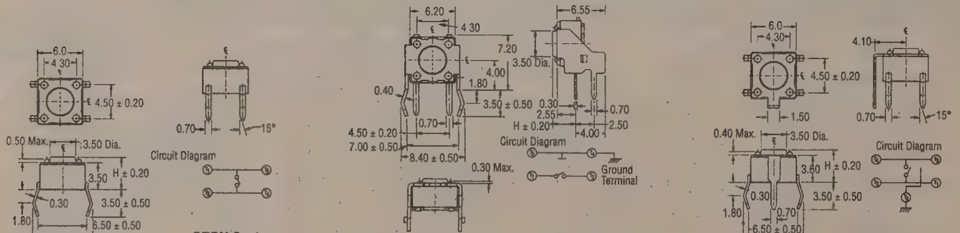
SDT Series Tact Switch

— NEW —



STDX Series STDA Series SDTG Series

The SDT series provides a sharp click feel with a positive tactile feedback switch in an ultra-miniature and light weight structure suitable for high density mounting. They offer economy with high reliability giving 100,000 operations minimum. Insert molding in the contact with special treatment prevents flux buildup during soldering and permits autodipping. Actuator and base are glass reinforced black plastic. Cover is tin-plated steel. Silver cladding covers the phosphor bronze contacts and the brass terminals. Switch rating is 50 mA @ 12 VDC.

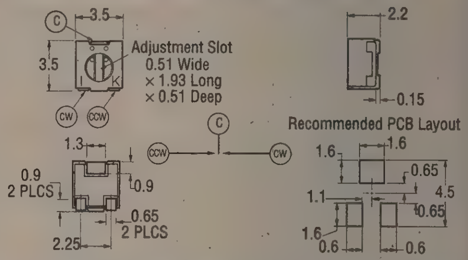
3 mm Square SPDT Rotary Switch



This low level signal switch is compatible with all surface mount soldering processes. Withstands 260° soldering heat. **Rotational Life:** Type 7813J-1-051E — 50; Type 7813J-1-023E — 2000 cycles. **Max. Current Contact Rating:** 100 mA. **Max. Voltage:** 24 V. Non-shorting contact timing. Switch is single pole double throw type. **Operating Temperature Range:** –55°C to +125°C.

754-0260. 7813J-1-051E........................**PER PK./100 160.00**

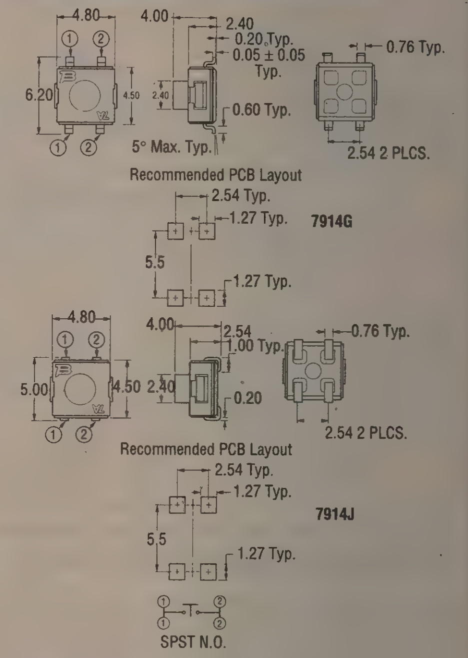
4 mm Square and Sealed Switch



Compatible with all surface mount soldering processes and all popular vacuum pick-and-place equipment. Meets EIA/EIAJ/IPC/VRCI SMD standard outline dimensions. Top or side actuated. **Current Contact Rating:** 100 mZ max. **Max. Voltage:** 24 V. Switch is normally open type. **Operating Temperature Range:** –55°C to +125°C.

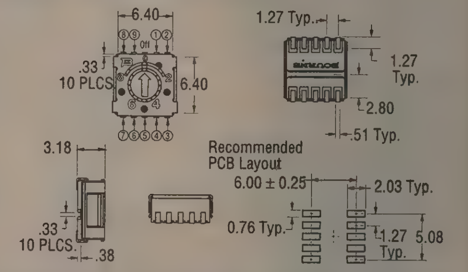
6 mm Square Sealed 10-Position Rotary Selector Switch



Miniature industrial rotary selector switch. Vertical adjust. Rugged surface mount design. Switch is SP9T, break-before-make timing. "0" position is off with no contact made. Withstands 260° soldering heat for five seconds. **Max. Current Contact Rating:** 100 mA. **Max. Voltage:** 24 V. **Operating Temperature Range:** –55°C to +125°C.

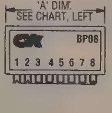
DIP, Rotary and Switchlock Switches

C&K COMPONENTS, INC.

BP Series Side Actuated DIP Switches



High temperature materials (UL 94V-0)— withstands soldering temperatures. SPST switch function–1,2,3,4, 5,6,7,8,10, and 12 position models. Reverse throw models available. Side actuators with positive detent. Reliable wiping contact mechanism-self cleaning. Gold and tin plated contacts available. All terminals tin plated for solderability. Epoxy terminal seal standard. Tape seal available. Splash resistant.

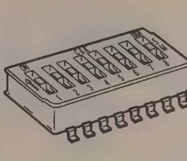
TD Series Sealed .050" Pitch Surface Mount DIP Switches



Surface mountable, low profile SPST DIP switch with spacing of 0.050" between terminals. Body height of 0.098". Gull wing terminals are tin-lead plated. Taped sealed switch is vacuum pick and place compatible, and will withstand machine soldering and cleaning. Can withstand vapor phase and IR soldering up to 260°C. **Contact Rating:** 0.4 VA @ 20 VDC. **Contacts:** Gold plated. **Life Expectancy:** 1,000 cycles min. **Initial Contact Resistance:** 50 milliohms max.

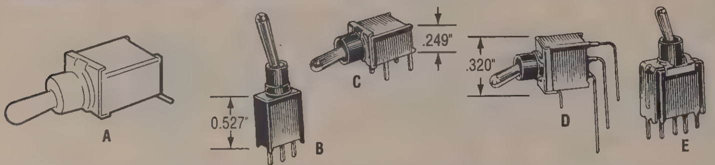
Sealed Tiny Toggle Switches, ET Series



Mechanical and Electrical Life: 60,000 make-and-break cycles at full load on ET01 model. All other models, 30,000 cycles. **Contact Resistance:** Below 20 milliohms typ. initial @ 2-4 V DC, 100 mA. **Insulation Resistance:** 10^9 ohms min. **Static Resistance (M3 Actuator Only):** 9000 V DC min. **Dielectric Strength:** 1000 V RMS min. @ sea level. **Operating Temperature:** –30°C to +85°C. **Solderability:** Per MIL-STD-202F method 208D, or EIA RS-186E method 9; 1 hour steam aging. **Case and Bushing:** UL 94V-0. **Actuator:** M3 antistatic actuator — Nylon 4/6, black standard, UL 94 V-0; M Actuator — Brass, chrome. plated. Internal o-ring seal standard with all actuators. **Switch Support:** Brass, tin plated. **Contacts:** Gold plate over nickel plate. **Terminal Seal:** Epoxy, 0.1" terminal thru hole spacing.

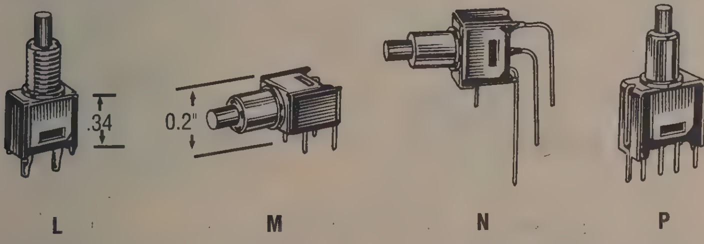
Tiny Pushbutton Switches



Plunger: Thermoplastic polyester. **Bushings:** Brass, nickel plated. **Included Hardware:** Nut, locking ring, and lockwasher.

Switches with Solder Terminals. Contact Rating: 1 Amp at 120 VAC or 28 VDC (UL listed). **Contacts:** Coin silver, silver plated. **Terminals:** Brass, silver plated, .01" terminal spacing.

Switches with PC Terminals. Contact Rating: 0.4 VA max. at 20 VAC or DC max. **Contacts and Terminals:** Brass, with gold plate over nickel plate.

Switches

Multisection switches can be made by ordering number of sections desired and accessories such as end plates and blank sections. **Description. Thumbwheel:** matte black with unsealed switch contacts. **Operating Voltage:** 50 mV to 28 VDC or 120 VAC. **Operating temperature:** –10°C to 65°C. **Body and Wheel:** ABS plastic. **Rotor contacts:** precious metal on copper alloy. **Stator contacts:** hard gold over nickel over 2 oz. copper on epoxy fiberglass. **Contact rating:** 1 Amp continuous carry, 100 mA max. switched current. **Insulation resistance:** 10^9 ohms min. **Dielectric strength:** 500 V RMS min. at sea level between common terminal and any output.

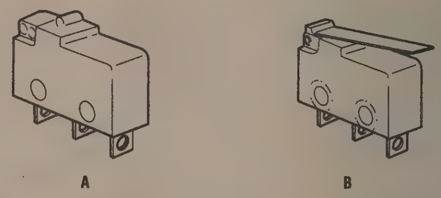
LC Series Subminiature Precision Snap Switches

— NEW —



The LC Series of SPDT snap-acting switches afford small size, long life and high electrical capacity. Rated from low level to 1 amp at 125 VAC, 30 VDC, the switches provide a snap-acting mechanism that is positive and reliable, with a rolling and wiping contact action that assures good electrical life.

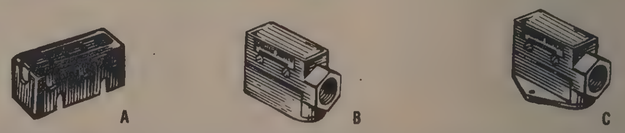
*Operates under direct pressure on rod end or by 15° max. lateral movement.

Terminal and Switch Enclosures



Terminal and switch enclosures, used to install HB and HL type switches with electric conduit, electrical tubing, or armored cable. The switch is inserted through the open top of the enclosure where it is secured by two screws that are supplied with the unit. The lower section is removable for easy access to terminals. TC-1, a molded phenolic cover for terminals only, has knock-outs for convenient positioning of wire.

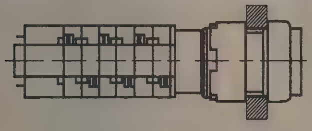
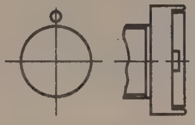
Series 75 Lighted Pushbutton Switches



Round

Square



Rectangular

The RAFI Series 75 panel-mounted switches include momentary and alternate action lighted pushbuttons and keylocks. Each is designed to mount in a 16.2 mm diameter panel cutout. Units are rated at 4 A at 120/240 VAC, and are available in one, two, three, and four pole models. Standard soldering terminals are silver (gold contacts available on request). The series 75 are recognized by UL, CSA, and VDE. Operating life at 250 VAC/2 A exceeds 200,000 operations. Cataloged units feature a black collar.

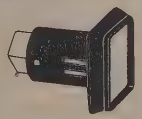
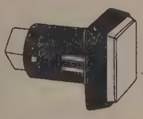
Series 25 Snap-In Mount, Lighted Pushbuttons

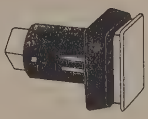
Flush



Recessed



Protruding



Stop

The RAFI Series 25 momentary action, lighted pushbuttons are designed to mount in the popular 16.2 mm diameter panel cutout...without the need for any installation tools. Simply insert into the drilled panel cutout, press the pushbutton once, and the snap-in locking mechanism secures the assembly to the front panel. Each unit features SPST gold-plated contacts designed for a maximum load of 100 mA at 24 V. The Series 25 pushbuttons feature black bezels and a 25 mm square operator button designed to meet industrial-grade "water-tight" sealing requirements (IP65). Electrical connections are made via a 4-pole flat cable insulation displacement connector (IDC) — thus eliminating the need for soldering or stripping insulation.

Ordering Details: A Series 75 lighted pushbutton assembly consists of the basic switch, colored lens cap, legend insert/diffuser and lamp. For example, to order a 24 mm square red latching lighted pushbutton with two poles and 12 V lamp one would order Mfr.'s Type 1.15108.352, 5.49275.036/1303, 5.73013.000/0202, and 1.90100.022. Color blue also available on special order.

MPS Series — NEW —
Magnetic Proximity Sensors

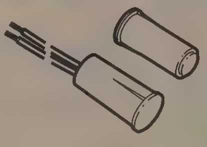

Fig. 1

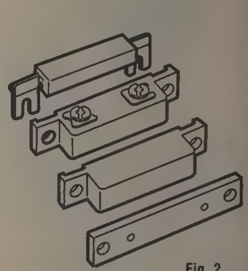

Fig. 2

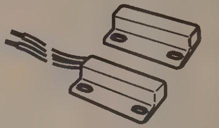

Fig. 3

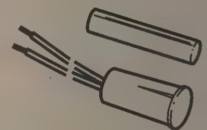

Fig. 4

SPST normally open reed switch, contacts are hermetically sealed within a glass capsule. Reed switch opens when separately encased magnet is removed from proximity. Contacts are held closed when magnet is within actuation range. Wide gap contacts speeds installation, making magnet and switch alignment easier. **Contact Rating:** 0.3 amps @ 100 VAC; 100 VA max. @ 100 VDC; max. carry current 1.0 amp. **Max. Operating Time:** 1 msec, including bounce. **Life Expectancy:** 10 million operations. **Housing:** UL 94V-0, impact resistant ABS plastic (white), with patented o-ring protecting the reed switch. Potted 12 inch wire leads, 22 AWG.

Nylon Insulated Toggle Switches

Series D switches have self-cleaning wiping action contacts suitable for both power and low-level switching nylon flat or bat lever actuators and bushing/frame super structure for double insulated requirements. UL listed, CSA certified. Series rated at 10 AMP 125 VAC, 5 AMP 250 VAC, 1/2 H.P. 125-250 VAC, 10 AMP 28 VDC.

Heavy Duty Rocker Switches

These full-size rocker switches are designed for AC and low voltage DC applications. They include a slow make, slow break contact mechanism, nylon snap-in brackets and are available to resolve most insulation requirements. They are rated at 15 amps 125 VAC, 28 VDC, 10 amps 250 VAC 3/4 H.P. CSA certified.

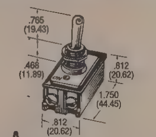
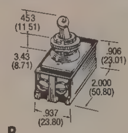
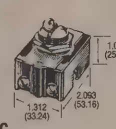
Medium and Heavy Duty Toggle Switches (AC/DC)



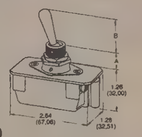
A



B



C



D

These switches have contacts with a quick-make/quick-break wiping action. The three-position switches offer a unique positive center stop feature, which assures that the lever cannot be thrown from one side through the center "Off" position without stopping. This design feature is a major factor in the widespread acceptance of these switches for motor reversing and speed control applications. Copper and bronze contacts are standard, as well as brass screw terminals.

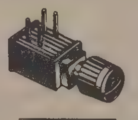
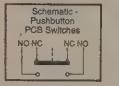
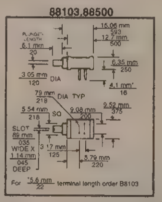
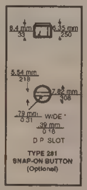
PCB Subminiature Pushbutton Switch









"Crossed Wire" contact system eliminates bounce. High contact pressure gives low contact resistance. Drain holes permit complete flux washdown. Solid silver contacts with gold over nickel plate. Momentary or Latch-Down (depress plunger and rotate 30° clockwise) operation. **Current Ratings:** 1 A at 6 VDC and 12 VDC; 0.5 A at 28 VAC and 125 VAC. 2 circuit poles and throw. Right Angle PC mounting. **Note:** Optional snap-on buttons should be ordered separately.

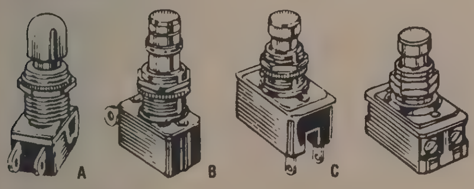
Switches



Cutler Hammer

Cutler Hammer has been a leading manufacturer of standard and custom-designed UL recognized power switches for more than fifty years. Many of our products have international approvals, reflecting our commitment to the world market. Cutler Hammer switches are specified wherever highest quality standards are a requirement. We are proud that our switches, which range from heavy duty 60-ampere power toggles to miniature pushbuttons, are represented in every major electronic and electrical industry.

The switches listed in this catalog are typical of the products currently being used by original equipment manufacturers. Special switches not shown in this catalog are available upon request. Please contact the factory for details. Cutler Hammer welcomes inquiries to meet your specific requirements.

General Purpose Momentary AC Switches

Push switches with slow-make/slow-break butt type contacts. 7836K11A/7835K11A Series rated at 3 A, 120 VAC; 1 A, 250 VAC; 1/10 HP, 120 VAC. Solder lug terminations. Bushing .562" (14.27 mm) long. 7836K11A/7835K11A Series UL recognized, CSA Listed.

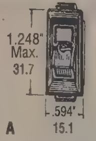
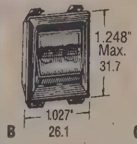
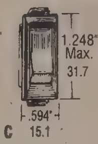
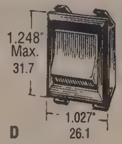
Miniature Snap-In AC Rocker Switches









These switches come in lighted and non-lighted versions in a variety of standard or custom colors. They are UL, CSA and VDE approved. Ideal applications include appliances, electronic instrumentation, data processing, communications, medical and office equipment and many others in both domestic and foreign markets. Options available are legend stamping, solder lugs, independent lamp circuits, special and matched colors, high inrush capabilities. Aesthetically pleasing yet ruggedly functional with traditional Cutler Hammer quality, these switches are ideal for up-front applications where both appearance and reliability are required. The smoothly rounded bezel and gently contoured rocker have a soft matte finish that blends in with the most sophisticated product designs. When a switch has to be more than just a switch, Cutler Hammer's rocker switch offers that designer touch that will enhance any product line.

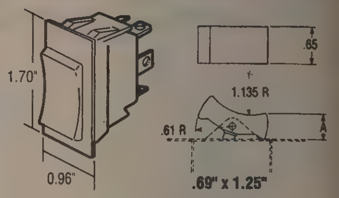
Lighted or non-lighted versions available in standard black gloss or optional matte finish. Hap to 100 A Peak for 10 milliseconds @ 250 VAC, Electrical life rated at 10,000 cycles minimum. **Operating Temperature:** 0°C to + 85°C.
*Momentary.

Snap-In Mount Rockette Switches



The rocker switches offer a remarkable silicone rubber seal that protects contacts and mechanisms better than conventional seal and boot combinations. The switches resist contaminants such as sand, dust and moisture with both base to frame seal and an actuator seal. Available in one and two-pole. Rated 15 A, 125 VAC; 10 A, 250 VAC. Spade terminals (brass).

Switch and Panel Seals

Military types perform three functions; provide vibration resistance for mounting nut; seal mounting hole; seal switch lever to 15 psi. Made of gray silicon rubber. Commercial type 80151 is black neoprene, comes in two parts, boot and nut which together form a switch seal. All others come molded as a complete switch seal. **Shipping Weight:** 1 oz.

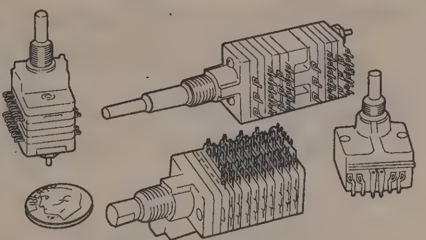
Series C1



Standards
- Diallyl Phthalate Material
- 30° Index (2-12 Pos.)
- .250" Shaft Length
- Solder Lug Terminals
- Adjustable Stops

Options
- Right Angle and Rear PC Terminal
- Dual Concentric Designs
- Watertight Seals
- Keylocks

Series C1 is the ideal rotary switch to specify when space is at a premium and dependable switching is a priority. The subminiature, rectangular design is a fully enclosed, environment-proof package that helps keep dirt and moisture out of the contact area, while keeping the lubricant sealed in for long life and high reliability. Its modular design allows for a wide variety of switching configurations to suit your needs. **Electrical Ratings (Resistive):** Silver plated brass contacts — .10 A at 125 VAC, .25 A at 28 VDC. **Contact Resistance (Ohms — Initial):** Silver plated brass — .005 or less. **Current Carrying Capacity:** 6 A. **Maximum Temperature Rise:** 30°C. **Voltage Breakdown (Sea Level):** 600 VAC. **Rotational Torque (Variable):** 5 to 30 in. oz. **Stop Strength:** Acetal housing material — 5 in. lbs. **Minimum Mechanical Life:** 25,000 cycles. **Available Index Angles:** 30°, 60°, 90°.

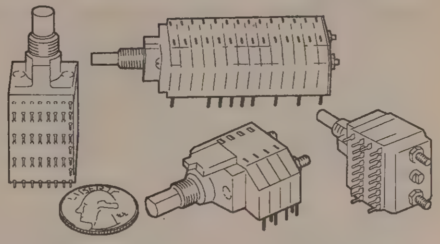
Series C3



Standards
- Polyester Material
- 30° Index (2-12 Pos.)
- .250" Shaft Length
- Right Angle PC Mount
- Adjustable Stops

Options
- 8 Pin Model
- Watertight Seals
- Keylocks

An ideal solution to high density, printed circuit mount switching requirements is the Series C2 switch. Either the 12-pin or the 8-pin version can do the job well. These switches feature fully enclosed, environment-proof bodies with in-line PC terminals, a proven 25,000+ cycle detent mechanism, and the ability to provide complicated switching patterns in a minimum of space. The Series 400 is the preferred device by those in the data transfer, instrumentation, and stereo markets. **Electrical Ratings (Resistive):** Silver plated brass contacts — .10 A at 125 VAC, .25 A at 28 VDC. **Contact Resistance (Ohms — Initial):** Silver plated brass — .030 max. **Current Carrying Capacity:** 6 A. **Maximum Temperature Rise:** 30°C. **Voltage Breakdown (Sea Level):** 750 VAC. **Rotational Torque (Variable):** 5 to 30 in. oz. **Stop Strength:** Die cast housing material — 8 in. lbs. **Minimum Mechanical Life:** 25,000 cycles. **Available Index Angles:** 30°, 60°, 90°.

Series C4

Standards
- Diallyl Phthalate Material
- 30° Index (2-16 Pos.)
- .375" Shaft Length
- Solder Lug Terminals
- Adjustable Stops

Options
- Right Angle, Rear Mount Ventrical Mount, and Front Mount PC Terminal
- Keylocks
- Spring Return
- UL Listing
- BCD Output

The most versatile of all the enclosed rotary switches, the Series C4 provides a fully enclosed, modular, environment-proof package that helps keep dirt and moisture out of the contact area, while locking in lifetime lubricants. The modular design allows for a wide range of switching configurations, while the rugged, wear-compensating detent and thermoset modules provide a powerful construction to satisfy the most demanding industrial, computer or other commercial application. **Electrical Ratings (Resistive):** Silver plated brass contacts — .3 A at 125 VAC; .5 A at 28 VDC. **Contact Resistance (Ohms — Initial):** Silver plated brass (standard material) — .003 or less; Silver alloy — .002 or less. **Current Carrying Capacity:** 15 A. **Maximum Temperature Rise:** 30°C. **Voltage Breakdown (Sea Level):** 1000 VAC. **Rotational Torque (Variable):** 12 to 96 in. oz. **Stop Strength:** Acetal housing material (standard material) — 10 in. lbs.; Die cast housing material — 25 in. lbs. **Minimum Mechanical Life:** 25,000 cycles. **Available Index Angles:** 22.5°, 30°, 36°, 45°, 60°, 90°, 180°.

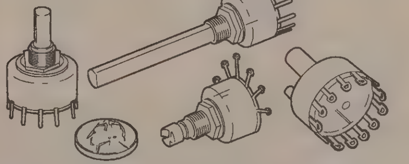
Series C6

Standards
- Polyester Material
- 30° Index (2-12 Pos.)
- .312" Shaft Length
- Solder Lug Terminals
- Adjustable Stops

Options
- Rear PC Terminals
- Flag Terminals
- Watertight Seals



The Series C6 is an economical, one deck, washable switch with a minimum mechanical life of 25,000 cycles. This unique design features a 360° housing-to-deck snap fit, insert molded terminals, and O-ring sealing options (both internal shaft and external panel). It is ideal for applications where process or environmental moisture or contamination concerns must be solved. **Electrical Ratings (Resistive):** Silver plated brass contacts — 1.0 A at 125 VAC. **Contact Resistance (Ohms — Initial):** Silver plated brass less than .020 ohms. **Current Carrying Capacity:** 5 A. **Maximum Temperature Rise:** 30°C. **Voltage Breakdown (Sea Level):** 1000 VAC. **Rotational Torque (Variable):** 15 in. oz. nominal. **Stop Strength:** Adjustable stop housing — 5 in. lbs. minimum; Fixed stop housing — 12 in. lbs. nominal. **Minimum Mechanical Life:** 25,000 cycles. **Available Index Angles:** 30°.

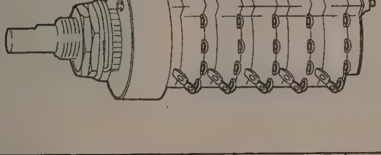
Series M5



Standards
- Diallyl Phthalate Material
- 30° Index (2-12 Pos.)
- .437" Shaft Length
- Solder Lug Terminals
- Adjustable Stops
- UL Listed

Options
- Keylocks
- Spring Return
- Waterproof Mount

Series M6 switches utilize a technologically advanced, versatile design that enables standard modular units to be combined in a myriad of complex switching applications. They are meticulously hand assembled and tested for the ultimate reliability/quality necessary for exacting applications. All modules are rigidly stacked together into a rugged, vibration-proof unit designed to meet MIL-S-3786, Style SR04 requirements for materials, life, shock, vibration, salt spray, explosion, thermal shock, high altitude, sand, dust, fungus, moisture resistance, etc. **Electrical Specifications. Interrupting Ratings:** 2.5 amps resistive at 120 VAC (UL1054), 2.0 amps resistive at 30 VDC (UL 1054). **Continuous Rating:** 12 amps for 20°C max. temperature rise. **Contact Resistance:** .005 ohms (maximum). **Insulation Resistance:** 10^5 megohms (min.) **Dielectric:** 1500 VRMS initial, minimum (1000 VRMS — UL1054). **Thermal EMF:** Less than .5 microvolts per degree. **Mechanical Specifications. Size:** 1.0" diameter, enclosed construction. **Decks:** 1-20. **Poles:** 1-48. **Positions:** 2-12. **Indexing:** 30°, 36°, 45°, 60°, 90°. **Mounting:** Single hole 3/8"-32 NEF-2A bushing with non-turn washer. **Panel:** 1/4" maximum thickness. **Rotational Torque:** 10-60 oz.-in. **Stop Strength:** 15 in. lbs. (min.). **Temperature Range:** –65°C to 125°C. **Life:** 50,000 cycles (min.) per MIL-S-3786. **Shock:** High-impact per MIL-S-3786. **Vibration:** 10-2000 Hz per MIL-S-3786. **Altitude:** High-altitude to 70,000 ft.

Series 84LS 12 and 16 Button Environmentally Sealed Keypads

Series 84LS 12 and 16 button keypads have matrix circuitry output and are completely sealed by a silicon rubber boot. Legends are epoxy printed on the top surface of the boot. 3 × 4 legend is numeric telephone and 4 × 4 is hexadecimal notation as shown in the figure. 3 × 4 is 2.35" × 3.1"; 4 × 4 is 3.1" × 3.1". Termination accommodates standard connector. Integral studs mount to panel. Rated for 3,000,000 operations per button; 10 mA at 24 VDC.

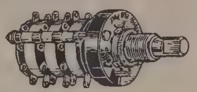
How To Select

42D, 44D, 71D and 56D Series are adjustable stop rotary switches. As listed, they are available with one or two poles per deck. Stop pins or washers can be removed from the front of the switch and replaced to set the number of positions per pole from two to the maximum number noted. Selections of the switch series depends upon the switching current requirements and the size restrictions of the application. The Series 56D is a single deck design with the lowest switching current rating, 200 mA, but requiring the least amount of space. The Series 42D and 44D switch up to 1 ampere of current, but are the largest in diameter at one inch. The Series 71D is GRAYHILL's most popular multi-deck switch providing a mid range 250 mA switching in an approximate one-half inch diameter. These switches are form, fit and function equivalent to their fixed stop counterparts, which can also be ordered from Allied Electronics.

42D and 44D Series 1 Amp Adjustable Stop Rotary



Fully enclosed switches interchange with fixed stop models. **Electrical Ratings:** Make/break 1 amp, carry 10 amps at 115 VAC, resistive. **Insulation Resistance:** 50,000 megohms initial, 10,000 megohms minimum. Non-shorting contacts. 3/8-32NEF bushing. **Behind-Panel Depth:** 1-deck — 1.025"; 2-deck — 1.371"; 3-deck — 1.717"; 4-deck — 2.063". **42D Series.** 10-position switch. 36° indexing. 1" diameter. **44D Series.** 12-position switch. 30° indexing. 1.162" diameter.

Series 95 Surface Mount Tactile Switches

Excellent tactile feedback in these miniature switches offered in perpendicular and flush or offset right angle mounts. 95B04 part numbers are .14" × .275". Mounting terminals add .0825" length to each side for right angle types, .0205" for perpendicular mount types. 95B12 part numbers are .450" × .450". Switches are rated for 10,000 operations at 100 mA resistive, 5 VDC. All types offered are in tape and reel packaging only, with 2000 switches per reel. 95B12 part numbers are 750 per reel.

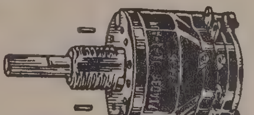
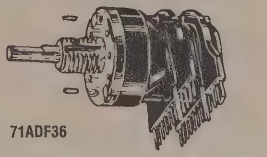
71 Series 1/4 Amp, 1/2" Diameter Adjustable Stop Rotary Switches



71AD36



71ADF36

71 Series. Multi-deck, single shaft switches are adjustable stop. **Insulation Resistance:** 10,000 megohms minimum. **Voltage Breakdown:** 500 VAC minimum. Meet moisture, shock, salt spray, explosion and stop strength requirements of MIL-S-3786. 71BD are standard style with solder lug terminals and 0.250" diameter shaft. 71ADF are PC mount with 0.125" diameter shaft; 71BDF are PC Mount with 0.250" diameter shaft. All are either 30° or 36° angle of throw. **Behind-Panel Depth:** 1-deck —3/4"; 2-deck — 1".

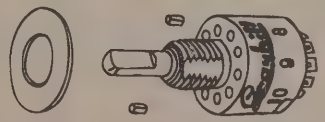
56 Series 1/2" Diameter Single Rotary Switches



Economically priced, high quality, single deck rotary switches from GRAYHILL require a minimum of space. Rated to make and break 200 mA of current at 115 VAC or 30 VDC, resistive load for 10,000 cycles of operation. **Maximum Contact Resistance:** 100 milliohms, minimum of 10,000 megohms, insulation resistance. **Voltage Breakdown:** 600 VAC. The Series 56 switches that are listed below are adjustable stop to allow you to set and reset the number of positions per pole to suit the application's need. These switches have non-shorting contacts, please contact Allied Electronics for shorting contact types.

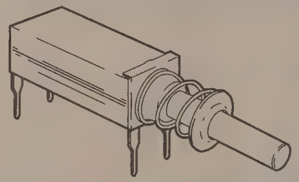
Series 38 Miniature Alternate Action Pushbutton Switches



Alternate Action Pushbutton Switch can be used as ON/OFF switch with silver plated contacts. Mounted on PC board, dimensions are 1.25" D × .35" H × .32" W. Rated for 25,000 operations. Silver-Plated contacts rated 1.0 A at 28 VDC. Gold-plated contacts rated .2 A at 30 VDC. O-ring sealed switches are process compatible.

Hermetic Switch, Inc.

Reed Switches

Highest quality reed switches feature contacts hermetically sealed in a protective atmosphere. Protected contacts mean reliable operation in wet, oily, dirty — even explosive —environments.

Glass capsule size ranges from a compact 2-inch glass length down to under 1/4-inch long! Ideal for use in proximity switches, flow meters, counting devices, limit switches, reed relays and precision instrumentation.

Actuate Time: 3 millisecond or less on 2-inch capsules; 1 millisecond or less on capsules under 1-inch in length.

Typical life expectancy 50 million operations. **Contacts:** Form A (SPST-N.O.) or Form C (SPDT), may be actuated by permanent magnet or coil. Magnets and coils sold below.

Average Shipping Weight: 1 ounce each.

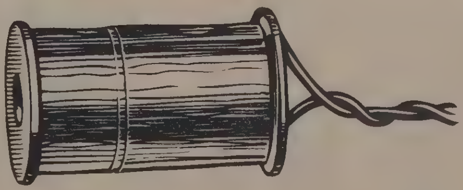
Reed Switch Test Coils

The coils described below are used for testing magnetic characteristics of reed switches. Pull-In, Drop-Out, Operate Time, Bounce Time, and Release Time are typical parameters measured using one of these coils. Coil specifications reference EIA/NARM RS 421-A for dry reed switches. MIL Spec MIL-S-55433.



Stock No.	Mfr.'s Type	NARM RS-421 Coil #	MIL-S-55433 Coil #	Number of Turns	Approx. Coil Ohms	Bobbin Dimensions Length × I.D. × O.D.	Recommended		EACH

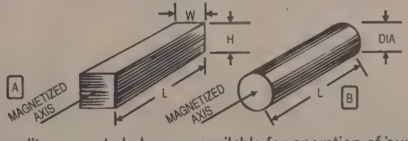
Actuating Magnets



The quality magnets below are available for operation of our dry reed switches. They feature temperature stable Alnico V material magnetized lengthwise for strong consistent operation. The variety of sizes enables you to match your proximity or motion application to our switch and magnet with ease and satisfaction.

Q

Hermetic Switch, Inc. manufactures a variety of two part magnetic proximity sensors (sensor and actuator). All sensors feature hermetically sealed reed switch contacts that can survive harsh environments. Specially selected epoxy potting materials and rugged plastic cases withstand the impacts and forces of the real world. Many models are listed with Underwriters Laboratories, verifying that they have passed rigorous testing. The sensors listed in this catalog are designed for use in alarm systems, automotive, consumer products, industrial controls, safety interlock, and many other applications. Leaded units have color coded leads for easy identification.

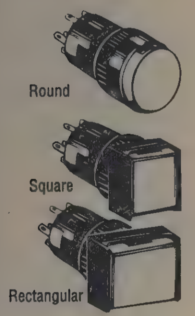
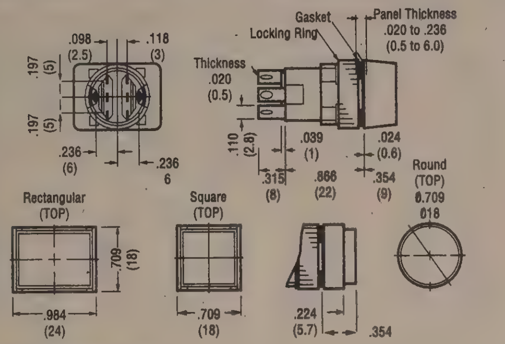
*Brown. †White. ‡Black. Notes: **1.** Parts #8500 and #8510 are for AC loads only. Sensor will latch on with DC loads and will remain on until voltage is removed. **2.** 8000 series sensors — .125 wide × .281 long horizontal slot to .656 centers. **3.** 8100 actuator: .125 wide × .350 long vertical slot on .625 centers. **6.** A = SPST N.O.; B = SPST N.C.; C=SPDT.

Miniature Pushbutton Switches and Pilot Lights

A Series 16 mm Miniature Pushbutton Switches





Rating: 3 A 250 V AC/DC. **Contact Configuration:** SPDT, DPDT. **Contact Resistance:** 50 mΩ max. **Insulation Resistance:** 100 MΩ min. (500 VDC megger). **Dielectric Strength:** Switch unit — 2000 VAC, 1 min. between live/dead part and terminal of different poles; 1000 VAC, 1 min. between terminal of same pole; 1500 VAC between contact and lamp terminals. Illumination unit — 2000 VAC, 1 min. between live part/ground. **Operating Temperature:** –25°C to +55°C (no freezing); incandescent type –25°C to +40°C. **Maximum Voltage:** 250 V AC/DC. **Operating Voltage:** 24 V, 120 V, 240 V. **Contact Material:** Gold-clad silver . **Terminals:** Solder tab. **LED Lamp Ratings. Operating Voltage:** 12 VDC ±10%; 24 VDC ±10%. **Rated Voltage:** 12 VDC; 24 VDC. **Rated Current:** 20 mA; 10 mA. UL Approved, CSA Certified.

Oiltight Control Units

UL Listed and CSA Approved

The majority of IDEC assembled control units are UL Listed and CSA Certified. Contact IDEC for details.

General Specifications

Dielectric Strength:	2,500 V AC, 1 minute, Between live and dead parts (Full voltage units: 1,000 V Ac, 1 minute)
Mechanical Life (Minimum (Operations):	Pushbuttons and Illuminated Pushbuttons. Momentary: 5,000,000 oper. Others: 500,000 Selector Switches Non-Illuminated and Illuminated: 500,000
Electrical Life (Minimum Operations):	500,000 (Except pilot lights) Operating Frequency: 30 oper./mln. Duty Rate 40%

FILE NO.
E70646

FILE NO.

Thumbwheel and Rotary DIP Switches

Rotary DIP Code Switches

- **Kinked terminals to hold switches in PC board to prevent lift off in wave soldering. Switches are still socket pluggable.**
- **Knob and wheel type switches may be hand adjusted.**
- **The wheel type RDS switch is designed so that it may be mounted on the end or side of a PCB and adjusted from the side without pulling the board out of the cage.**
- **Detent action is positive and firm assuring reliable settings.**
- **These switches may be interchanged with EECO and others.**
- **Optional red or green, screen indicator or knob color available.**
- **New right angle socket for mounting standard rotary switches provides possible 4-point contact.**

The new RDS rotary DIP switches embody many new improved features and at a reduced cost! This new model features molded-in contacts, ultrasonic welded body to base and an "O" ring around the rotor shaft. These features insure an absolute seal to fluxes, flux gasses and cleaners. (Acceptable solvents are isopropyl alcohol, ethyl alcohol, toluene, benzine, tricylene, clorocene, freon; acetone and methanol solvents are not acceptable.)

Current rating and voltage: Non switching 125 mA at 30 VDC; Switching 125 mA at 30 VDC. **Contact resistance:** 100 milliohms maximum. **Insulation resistance:** 1000 megohms at 250 VDC for 1 minute minimum. **Durability:** 20,000 actuations. **Positions:** 10 and 16. **Temperature rating:** –25°C (–13°F) to 85°C (185°F). **Body:** Glass-filled polyamide. (UL94V-0). **Contacts:** Copper alloy, selective gold plating over nickel. **Rotor control:** Polyacetal. **Rotor switch element:** Glass epoxy, gold over nickel plated circuits.

Thumbwheel Switches

Type "H"

These switches are relatively small in size and are used extensively in instrumentation and test equipment. They are mounted through the panel from the front and snapped into place and held firm by a pair of springs attached to each end plate. **Contact rating:** 100 milliamps. **Max. Current:** 1 amp. **Working voltage:** 50V AC or DC. **Dielectric strength:** 500V. **Insulation resist. at 20°C:** 10^5 megohms. **Temperature range:** –55°C to +85°C. **Character height:** 4mm.

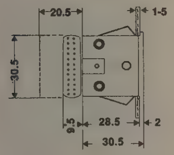
Type "M"



The type "M" thumbwheel switch is of relatively small size and is designed for use in computers, machine tool controls, data handling equipment and test equipment. This series is designed for front panel insertions into a panel cutout and requires no separate mounting hardware. **Contact rating:** 100 milliamps. **Max. Current:** 1 amp. **Working voltage:** 50V AC or DC. **Dielectric strength:** 500V. **Insulation resistance at 20°C:** 10^5 megohms. **Temperature range:** –25°C to +70°C. **Height:**

Type "U"

This series is front panel mounted for insertion into a rectangular panel cutout. They are designed for use in computers, machine tool controls, data handling equipment and test equipment. **Contact rating:** 100 milliamps. **Max. Current:** 1 amp. **Working voltage:** 50V AC or DC. **Dielectric strength:** 500V. **Insulation resistance at 20°C:** 10^3 megohms. **Temperature range:** –25°C to +70°C. **Character Height:** 5mm.

Type "L"

This series is designed for rear panel insertion into a rectangular panel cutout. They are designed for use in computers, machine tool controls, data handling equipment and test equipment. Their small size gives you the most switch with the least panel space. **Working voltage:** 50V AC or DC. **Contact rating:** 75 milliamps. **Max. current:** 1 amp. **Insulation resistance at 20°C:** 10^3 megohms. **Operating temperature:** –25°C to +70°C. **Character height:** 4mm.

632 Clipper Series

The rugged, long life "Clipper" models have a patented molded nylon actuating cam that ensures long trouble-free performance. All models rated 20 Amps 1 Hp at 125-250VAC. **Models 632-D** and **632-S** consists of a cast-iron housing with skidproof base pads, black finish and strain relief connector. **Model 632-S Twin** consists of two SPDT switches, on a heavy steel base. **Dimensions:** 632-D and 632-S, $4\frac{1}{2} \times 3\frac{1}{2} \times 1\frac{1}{2}$". 632-S Twin, $8\frac{3}{8} \times 4\frac{1}{2} \times 1\frac{1}{2}$". **Weight:** 632-D and 632-S – $2\frac{1}{4}$ lbs.; 632-S Twin – 5 lbs.

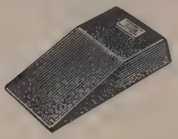
Junior Foot Switches



The low, smooth style plus its ease of operation make these models an ideal switch for both office or shop use. **Model 121-S** rated 20 Amps, 1 Hp at 125-250VAC. **Model 124-S** rated 15 Amp $\frac{1}{2}$ Hp at 125-250VAC. Both feature aluminum cast housings with a black finish and a skidproof base. Supplied with strain relief clamps and bushings for a wide variety of cord sizes. **Dimensions:** $5\frac{1}{2} \times 3\frac{1}{4} \times 1\frac{1}{4}$". **Weight:** 1 lb.

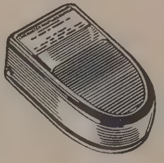
Nautilus Foot Switches



Rugged aluminum casting for a long life. Piston type actuator sealed with "O" rings. Electrical Contacts sealed in a "Well." Dust tight, watertight, oiltight, and rust resistant. Grey enamel finish. **Model WP-541-D** rated 12 Amp at 125VAC, 6 Amp at 250VAC. **Model WP-541-S** rated 20 Amp at 125-250VAC. **Dimensions:** $8 \times 4 \times 2\frac{1}{2}$". **Weight:** $2\frac{1}{2}$ lbs.

*Wired N.O. and supplied with an 8' 16/3 cord with a 3 prong series plug. Green lead grounded.

**Wired N.O. and supplied with a 6' 16/3 cord without plug. Green lead grounded.

Lektro-Lok Foot Switches

The Lektro-Lok operates on the teeter-totter principle. Pressure on one side opens or closes circuits, release and switch returns to normal off position. Mechanical interlock prevents operation of both circuits at the same time. Second position operates independent of first. Both sides can be wired N.O. or N.C. All connections made internally with only one cord coming out. Rugged stamped metal housing has a black finish and a skidproof base. Both type rated 10 Amps at 125VAC. **Dimensions:** $5 \times 2\frac{1}{2} \times 1\frac{1}{4}$". **Weight:** 10 oz.

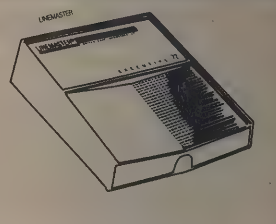
			1-9	10-Up
842-6634	L-2-S	SPDT Momentary*	42.67	39.38

*Both sides.

Executive Foot Switches



Uses same operating principle as "Lektro-Lok" series with internal wiring and one cord coming out. Also incorporates mechanical interlock to prevent accidental operation of both circuits at the same time. Both types rated 10 Amps at 125-250VAC. Modern style die cast cover is medium grey with skidproof back. **Dimensions:** $4\frac{5}{8} \times 4 \times 1\frac{1}{8}$". **Weight:** $1\frac{1}{4}$ lbs.

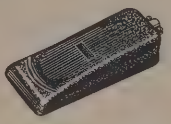
*Both sides.

Duplex Foot Switches



This neat cast aluminum housing is pivoted in the center for easy heel-toe operation. Uses same mechanical interlock system as the Executive and Lektro-Lok switches. Comes with an adjustable strain relief connector for most cord sizes. Smooth black finish with a skidproof base. Rated 15 Amps $\frac{1}{2}$ Hp at 125-250VAC. **Dimensions:** $8\frac{1}{2} \times 3\frac{1}{2} \times 2$". **Weight:** $1\frac{3}{4}$ lbs.

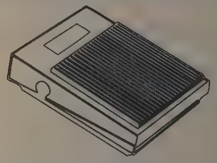
*Both sides.

Treadlite II Foot Switches



Operating efficiency and handsome appearance go hand-in-hand with this compact, versatile foot-switch. Each model has a nonskid pad on the actuating treadle and a skidproof base. Formed steel casings with a black finish. 10 and 15 amps. ½ HP at 125 VAC. **Dimensions:** $3\frac{1}{2} \times 2\frac{5}{8} \times 1$". **Weight:** 7 oz.

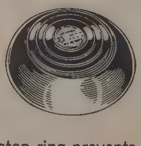
*Supplied with 6' 18.3 SJT cable with 3 prong series plug, green lead grounded.

**Supplied with 6' 18.3 SJT cable without plug.

Gem Foot Switches



These switches feature a round, black actuating cap in a chrome plated heavy die-cast housing with a full non-skid base pad. Moderate pressure from any direction operates the switch. Internal over travel stop ring prevents damage to switch when excessive force is applied. The **GEM-3** is suppled with a 6' 18/3 cord and 3 prong plug, green lead grounded. The **GEM-36** is supplied with a 6' 18/3 cord without plug. Both type rated 10 amps, 1/2 Hp at 125 VAC. **Dimensions:** $3\frac{13}{16} \times 1\frac{7}{32}$". **Weight:** 1 lb., without cord set.

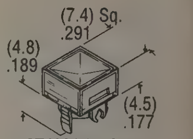
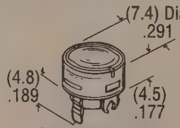
HB15CKW01 with AT4032C

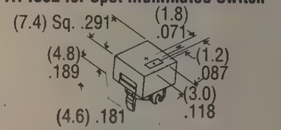


AT4031 for Switch

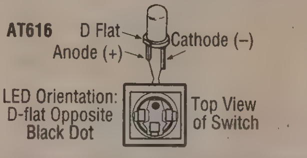


AT4032 for Switch

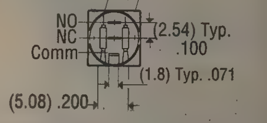
AT4052 for Spot Illuminated Switch



AT616



Terminals L (+) L (–)



Super-subminiature with LED full or spot illumination. Front panel relamp. Front panel threaded mount. Dual, sliding silver contacts. Momentary and alternate with latchdown. **Resistive Load:** 0.1 A max. @ 30 V AC/DC. **Electrical Life:** 50,000 operations minimum. **Travel:** .118". **Operating Force:** 350 g.

Switches and Snap-on Caps

Match switch and cap shapes; order lamps separately.

G Series Toggles and Pushbuttons

Micro-subminiature, PCB mountable, antistatic, washable, patented Sliding Twin Crossbar (STC) contact mechanism, plus molded-in, epoxy sealed terminals with .100" × .100" spacing. **Electrical Capacity:** 0.4 VA maximum @ 28 V AC/DC maximum. **Electrical Life:** 100,000 operations minimum for on-none-on and on-off-on toggles; 50,000 operations minimum for other toggle circuits as well as for pushbutton circuits.

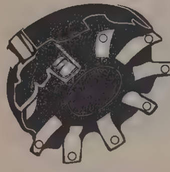
Power Tap Switches and Knobs

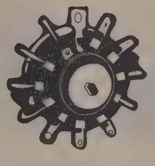
OHMITE®

Switches

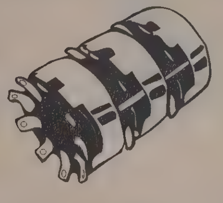
- ► Slow-Break, Quick-Make
- ► Non-Shorting Type
- ► Single and Tandem Models



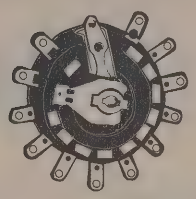
212, 312, 412, 608



Model 711



Typical Tandem Model



T505, T507

Ohmite power tap switches (high power rotary switches) are constructed to provide dependable, convenient operation. All switches have ceramic arc-proof bodies (except 711), metal alloy contacts, and are of an all-soldered and all-riveted construction which assures mechanical and operational integrity. The 711 Tap Switch has a reinforced non-metal body and solid metal alloy contacts; a very small unit with high current handling capability. These Tap Switches have a wide range of applications such as as arcwelders, battery chargers, motor controls, X-ray equipment, etc. Additional number of taps, configurations, assemblies, and arrangements are available as special order items. Call for pricing and delivery info.

Ceramic High-Current Rotary Switches
Models 111, 212, 312, 412, 608.
Non-shorting, single pole, rotary, multi-position unit with single, dual and triple tandem units. Bodies are high grade, arc proof ceramic bodies. Large, solid, silver alloy contacts. Positive cam and roller mechanism provides slow-break, quick-make action. Shaft is insulated by strong ceramic hubs. Enclosed mechanism. Contacts and mechanism are entirely enclosed and protected.

Model 711 Miniature Switch
Single pole, non-shorting selector switch with stationary and movable solid silver alloy contacts. Common contact is rounded for assured seating. Self-cleaning with built in wiping action. Slow-break, quick-make action achieved with cam and cam follower. Breaks 7 amps at 125 VAC (for 20 VDC); carries 15 amps at 125 VAC/DC. Molded melamine phenolic body $1\frac{1}{8}$" dia. × $\frac{13}{16}$" depth behind panel; $\frac{1}{4}$" flatted shaft. Mounts by $\frac{3}{8}$-32 bushings and hex nut. Model number suffix indicates taps (711-3 = 3 taps). Use 5103 knob.

Light Current Rotary Switches
Models T505 and T507.
Rated at 7 amps max, but only 3 amps at 120 VAC should be interrupted. Current ratings are less for inductive circuits, high voltages and all direct current circuits above 20 volts. Porcelain base and porcelain ring carrying the fixed contacts are vitreous coated. Metal tap contacts. Brush is silver graphite for very low resistance. Body dia. is $2\frac{5}{16}$". Behind panel depth is $1\frac{3}{8}$". **Weight:** .28 lb. Knob 5150 is recommended.

D4BS Series

The D4BS Safety-door Switch uses a special operation key to assure a positive break in contacts, increasing safety and reducing liability. Mounting pitch and shape of the switch box conforms to CENELEC EN50041. **Enclosure Rating:** IP67(IEC529). **Approved Standards:** UL, CSA, BIA, SUVA and TUV.

Snap Action and Mechanical Keyswitches

OMRON

SS Economical Subminiature Snap Action Switches

Three load switching capacities to choose from in a compact snap action switch. Long service life, high vibration and shock resistance, and easy installation. Solder terminals. **Body Size:** 19.7 × 9.4 × 6.4 mm (0.77 × 0.37 × 0.25). (9.5 mm). **Heavy Duty Load:** rivet contacts (non-inductive, resistive) 10.1 A @ 125 VAC/250 VAC, 10.1 A @ 8 VDC/14 VDC, 4 A @ 30 VDC; 20 A max. inrush current NC, 15 A max. inrush current NO. **Standard Load:** rivet contacts (non-inductive, resistive); 5 A @ 125 VAC/250 VAC, 5 A @ 8 VDC/14 VDC, 4 A 30 VDC; 20 A max. inrush current NC, 10 A max. inrush current NO. **Microvoltage/Current Load:** bifurcated crossbar contacts (non-inductive, resistive); 0.1 A @ 125 VAC/30 VDC; 1 A max. inrush current.

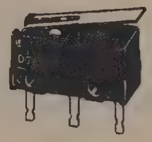
D2F-F

D2F-L



D2F Subminiature Snap Action Switch

Permits direct soldering to PC board. Quick reverse-action mechanism with 2 leaf springs assures long life. Construction resistant to flux wicking. PCB termination. **Standard:** (non-inductive, resistive); 3 A @ 125 VAC, 2 A @ 30 VDC with 5.3 oz. operating force model; 1 A @ 125 VAC, 0.5 A @ 30 VDC with 3 oz. operating force. **Micro Load:** (non-inductive, resistive); 0.1 A @ 30 VDC. **Body Size:** 6 × 12.8 × 5.8 mm (0.24 × 0.50 × 0.23 inch).

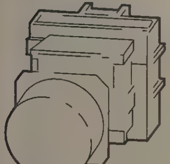
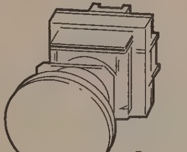
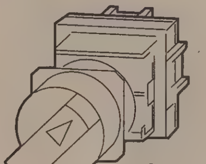
Knob and Keyswitches



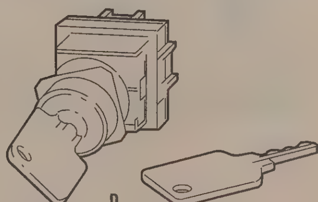
A



B



C



D

All versions are fully assembled. Contact blocks have screw terminals. Compact style requires only 16 mm dia. mounting holes. Comply with IP65 seal requirements (oil resistant). Snap flange design on contact block for ease of wiring and assembly. Accommodates panel thicknesses of 0.5 to 5 mm. **Contact Rating:** 5 A @ 120 VAC 3 A @ 250 VAC resistive 3 A @ 30 VDC resistive.

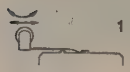
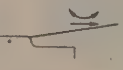
BZ and BA Series Standard Basic Switches



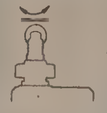
1

Roller Leaf; Low force large movement actuation



2

Lever; Very low force, slow cams and slides



3

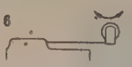
Panel-mount roller plunger; Actuation by cams

4

Pin plunger; in-line motion

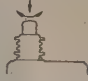
5

Leaf; Low-force, slow moving cams or slides



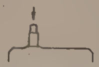
6

Roller lever; Very low force, fast moving cams



7

Panel-mount plunger; heavy duty in-line applications or slow cams. Cam rise should not exceed 30°



8

Overtravel plunger; in-line applications requiring additional overtravel

These standard basic switches are precision snap-action mechanisms enclosed in accurately molded plastic cases. Switches are UL recognized and CSA certified.

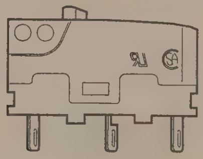
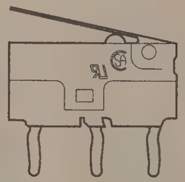
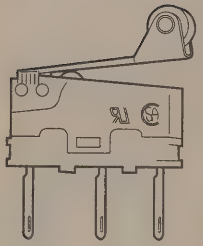
UM/UX Series Subminiature Basic Switches



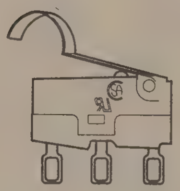
1



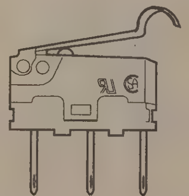
2



3



4



5

UM Series Snap Action Switches can fit a broad range of applications, and can handle loads from milliamps up to 5 A. UX Series Snap Action Switches are ideal for compact application. With dimensions of .197" H × .236" W × .504" L these switches can be used where space is a factor. 125-250 VAC, 30 VDC.

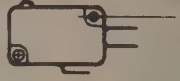
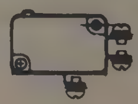
V3 Series Miniature Precision Switches



1



2

V3 Series miniature basic switches feature high electrical capacity and long life. Their size and shape meet design requirements in all types of applications. All are single-pole double throw. Switches are UL recognized and CSA certified. D8 suffix offers quick connect terminals .188 × .020 thick. D9 suffix has quick connect terminals .250 × .032. All others have screw terminals.

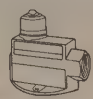
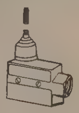
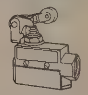
E6-V6 Compact Enclosed Switches



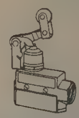
1



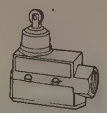
2



3



4



5

These enclosed switches contain a precision snap-action basic switch inside a rugged cast zinc housing. Lead washers are used to seal the mounting holes on side mount switches. Removal of the bottom enclosure exposes the terminals for easy wiring.

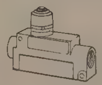
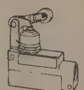
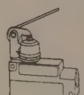
BZG1 and BAF1 Series Sealed Enclosed Switches



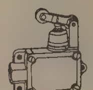
1



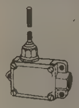
2



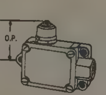
3



4



5



6

Switches have a neoprene seal gasket between the housing halves, elastomer boot actuators, sealed conduits connectors and die cast aluminum housing. Mounting holes are for #10 screws and are located outside the switch cavity. Each has a single conduit opening. Rating is a 15 amps for sealed enclosed switches and 20 amps for high capacity switches.

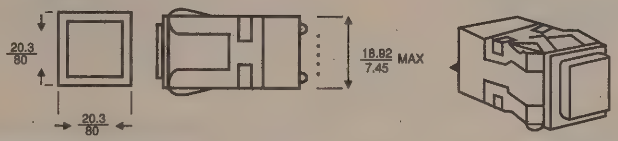
AML21 Series Incandescent and Non-Lighted Electronic Control Pushbutton Switches



AML21 switches with black bezels are designed to meet CEE requirements. Type numbers 13th digit "A" have silver contacts rated 2A, 250VAC and 24VDC resistive; 3A, 125 VAC. 13th digit "B" have gold contacts rated 100mA, 125VAC/DC resistive. Terminals are solder or quick-connect. **Panel cutout:** 0.75" square. Lighted units use incandescent T-1¾ wedge base industry lamp nos. 73, 85, 86, which are ordered separately. Order **AML51** switch buttons separately on this page.

Miniature Pre-Wired Enclosed Switches

Factory pre-wired with SJTO industrial cable. Cable electrical connection and basic switch terminals are encapsulated in epoxy compound. Elastomer seal between plunger and switch housing. Plus mounting screw holes with continuous walls keep liquids from entering switch cavity. SPDT. **UL rating:** 5 amps. 1/10 HP, 125 or 250VAC. Zinc die-cast housing. Last digit in type number indicates cable length in inches. **Minimum overtravel is:** 0.118". **Differential travel:** 0.004. UL listed, CSA certified.

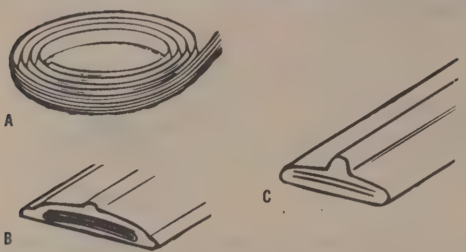
Controflex Ribbon Switches



Type 131-A. 3/4" wide, 3/16" thick. Light grey, 40 oz., nominal finger pressure. Lead wires 18" long. 18/2 wire. Fasten with vinyl adhesive #105 or mount with Contamold Channel #106. Heat-sealed sleeve terminals. **(Fig.B)**

Type 121-BP. 9/16" wide, 5/32" thick. Light green, 8 oz., nominal finger pressure. Jacket-seal terminations. Lead wires 18" long. 22/2 wire. For indoor and outdoor use. Fasten with vinyl adhesive #105 or use Contamold Channel #104. **(Fig. C)**

Type 141-BPH. 9/16" wide, 9/32" thick. White, 8 oz., nominal finger pressure. Same as Type 121-BP except with 1/8" high bead for actuation. Fasten with #105 vinyl adhesive/sealant or mount with Contamold Channel #104. **(Fig. C)**

Do-It-Yourself Switch Material. Supplied in 50' lengths. Can be cut to any length desired. Terminated with the use of #103 terminals and sealed with vinyl adhesive #105 or use #104/106 mounting channels.

Type 102-A. Grey, 40 oz. 3/4" wide, 3/16" thick. Uses #106 mounting channel. **(Fig.'s A, B)**

Type 102-B. Yellow or black, 12 oz. 3/4" wide, 3/16" thick. Uses #106 mounting channel. **(Fig.'s A, B)**

Type 102-BP. Light green, 8 oz. 9/16" wide, 5/32" thick. Uses #104 mounting channel. **(Fig.'s A, C)**

Type 102-BHP. White, 8 oz. 9/16" wide, 5/32" thick. Uses #104 mounting channel. **(Fig.'s A, C)**

Controlmat Industrial Switching Mat

Designed for heavy moving loads, indoor or outdoor use. Top and bottom surfaces fully ribbed to prevent trapping moisture — no partial ribbing. Industrial grade surface is superior to soft cast or molded vinyl products. DRI-RUN cable is standard. Flexible mat is easy to install — ideal for door opening/closing, robotic installations, passenger sensing, machine tool protection. Nominal foot pressure anywhere on active area will be sensed. Write for installation notes. **Color:** Charcoal (or chrome yellow, special order only) available 16" long by 4' wide. Leads 6' long. No special handling. Lie flat on floor, and can be lifted for cleaning. **Weight:** 3.5 lbs. per ft.² (17 Kg/m²).

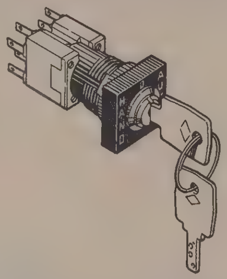
TH25 Series 3 Position Key-Switches



Tschudin & Heid offers you the greatest amount of flexibility in selecting a key switch. You can select the key removable position and the bezel style. Switches are rated 5 amps and up to 250 VAC with a lifetime of 50,000 operations. They fit a 16.2 mm panel cutout with a 22.5 mm cutout version available. It is also available in a two position version and an IP65 rated version. **Switch Positions:** Position 1 on left, position 0 center, and position on right. See "How to Order Your tschudin & heid Switch" on the next page.

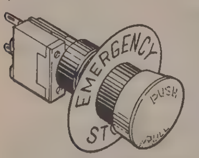
TH25 Series Emergency Stop Switch



The TH25 Series Emergency Stop Switch offers the Push-Pull version with a forced unlatching contact block. Panel cutout is 16,2 mm. **Life Expectancy:** 10,000 operations. Meets SUVA certification. It is splash proof and oil tight in accordance with IP65 ratings. See "How to Order Your tschudin & heid Switch" on the next page.

TH8 Emergency Stop Switch

The New TH8 Series Emergency Stop Switch is a push/twist release monoblock switch which mounts in a 16.2 mm round panel cutout. It meets DIN VDE 0660 200/207, IEC 947-5-1 and CE specifications. It is a forced break contact emergency switch. **Switching Capacity:** 5 amp/250 VAC. It conforms to IP67 standards.

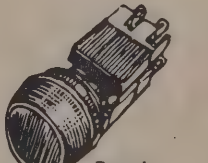
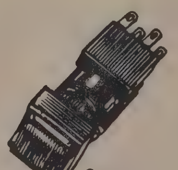
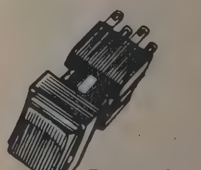
TH25 Series Pre-Wireable Lighted Pushbutton Switch



Round



Square



Rectangular

TH25 series is rated 5 amp, 250 VAC. The TH25 series patented contact block system allows the switch to be mounted to the panel while the wire harnessing is mounted to the contact block away from the switch panel. After harnessing, the contact block can be mounted to the switch. The switch is available in square, round and rectangle styles. The contact blocks are either solder or quick connect. See "How to Order Your tschudin & heid Switch" on the next page.

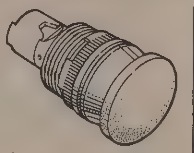
TH4 Series 30 mm IP65 Splashproof and Oil-Tight Mushroom Switches



The TH4 series mushroom cap switch fits a 22.5 mm panel cutout. Rated at 5 amps and 250 VAC, it is splashproof and oil tight to IP65 specifications. Mushroom cap switches are also available upon request in 16.2 panel cutout versions rated at IP40 specifications. See "How to Order Your tschudin & heid switch".

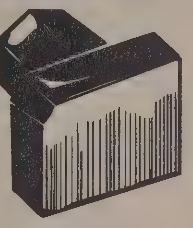
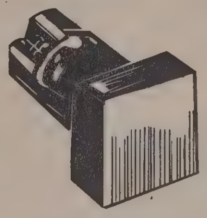
Covered Bezel Pushbutton Switches

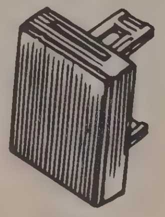


500/510 Series

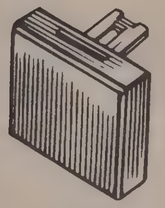


502/512 Series

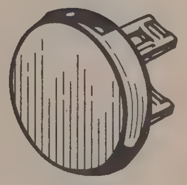
Lenses



Rectangular A



Square B



Round C

The TH5 series is rated up to 5 amps, 250 VAC. The compact size is perfect for applications where back panel depth is a problem. As with all T&H switches, the TH5 offers front panel access for bulb replacement. It also offers a bifunctional mechanism where the maintained version can be changed to momentary and back again to maintained. Switches can accommodate from 1 to 4 contact blocks stacked one on top of the other. See "How to Order Your tschudin & heid switch".

Tapered Bezel Pushbutton Switches

The TH5 tapered bezel comes in either square or rectangular shapes for a European front panel styling. See "How to Order Your tschudin & heid switch".

Stock No.	Mfr.'s Type	Description	EACH 1-24	EACH 25-49	EACH 50-99

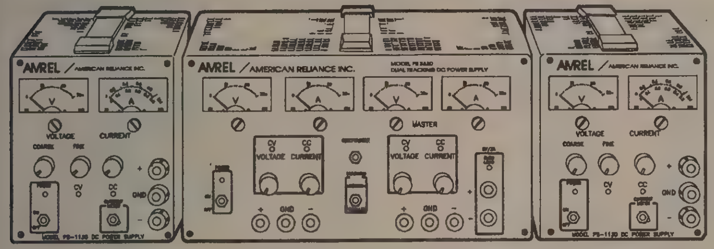
LPS-100 Series Programmable Power Supplies



PS-100 series is the newest addition to AMREL's family of high quality power supplies. This series features the tightest line/load regulation in its class, a mere 0.01% +1 mV. The very low 0.3 mVrms in our LPS means your circuit is well protected from unwanted overshoot and noise. Furthermore, our LPS-100 series is the best in its class with a temperature coefficient of 200 ppm.

Specifications

Configuration: LPS-101, LPS-102, LPS-103, LPS-106 — Single Output; LPS-104, LPS-105 — Triple Output. **Output Power:** LPS-101 — 30 W; LPS-102 — 60 W; LPS-103 — 90 W; LPS-104 — 80 W; LPS-105 — 200 W; LPS-106 — 60 W. **Voltage. Output Voltage:** LPS-101, LPS-102, LPS-103, LPS-104, LPS-105 — 30 V; LPS-106 — 60 V. **Setting Resolution:** 2.5%. **Line/Load Regulation:** 0.01% +1 mV. **Noise (RMS):** 0.3 mV; Ripple (Peak) (B.W. — 10 Hz - 20 MHz): 5 mV. **Transient Response:** 50 µs/<100 mV. **Temperature Coefficient:** 200 ppm. **Current. Output Current:** LPS-101, LPS-104, LPS-106 — 1 A; LPS-102 — 2 A; LPS-103, LPS-105 — 3 A. **Setting Resolution:** 2.5%. **Line/Load Regulation:** 0.1% +2 mA. **Noise (RMS):** 2 mA. **Ripple (Peak):** 5 mA. **Temperature Coefficient:** 0.1%. **Fixed Output Voltage (Partial Adjustment):** LPS-101, LPS-102, LPS-103 — N/A; LPS-104, LPS-105, LPS-106 — 3 V - 6.5 V. **Fixed Output Current:** LPS-101, LPS-102, LPS-103 — N/A; LPS-104, LPS-105, LPS-106 — 3 A. **Transient Response:** LPS-101, LPS-102, LPS-103 — N/A; LPS-104, LPS-105, LPS-106 — 50 µs. **Display:** Analog. **Common Mode Voltage:** +240 Vdc. **Temperature Rating:** 0-40°C. **Relative Humidity:** 29%-90% max. **Dimensions (H × W × D):** LPS-101, LPS-102, LPS-103, LPS-106 — 6½" × 5⅛" × 13"; LPS-104, LPS-105 — 6½" × 10¼" × 13". **Weight:** LPS-101 — 7.5 lbs.; LPS-102, LPS-106 — 8.5 lbs.; LPS-103 — 9 lbs.; LPS-104 — 15 lbs.; LPS-105 — 19 lbs. **Cooling Fan:** Convention. **Warranty:** 3 Years.

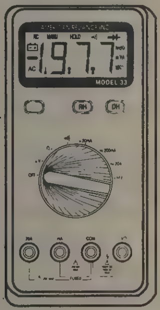
Model 33 3½ Digit Auto-Ranging DMM



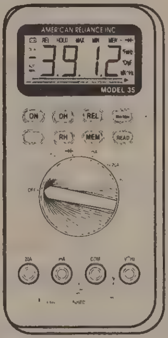
- Basic Accuracy 0.5%
- 20 A Fused
- Data Hold
- Auto Ranging
- High LCD Display

The model 33 has 3½ digit; 0.5% accuracy. The LCD display is 0.75" high and has data-hold function. The ranges are 200 mV to 1000 V DC, 2 V to 750 V AC, 20 mA to 20 A AC/DC, 200 to 20 M ohms resistance. It also has a diode and audible continuity check.

952-0033. Model 33. 3½	EACH 59.95

Model 35/37 4000 Count, Auto-Ranging DMM

- Basic Accuracy 0.3%
- 20 A Fused
- Auto Data Hold
- Auto Ranging
- High LCD Display
- Min./Max. Memories
- Relative Mode
- Frequency Counter
- Capacitance Measurement
- Memory and Read Function
- 2-Year Warranty
- True RMS Measurement (37 only)



The models 35 and 37 are 3¾ digit meters with 0.3% basic accuracy. They have a 0.67" high display with bargraph. The ranges are 4 nf to 40 µf capacitance measurement, 100 Hz to 600 KHz frequency measurement, 400 mV to 1000 V DC, 400 mV to 750 V AC, 40 mA to 20 A AC/DC and 400 to 40 M ohms resistance. They also have relative mode, data-hold, min./max. memory and read function and true RMS (model 37).

952-0037. Model 37	EACH 99.95

Model 120

This handy DMM offers maximum convenience of multiple functions in one package. 3½ digit with 0.5% basic accuracy. Used in radio and TV repair, quality control, HVAC repair and maintenance, electronic design, schools, and field service.

Specifications. DCV Range: 200 mV, 2 V, 20 V, 200 V, 1000 V. **ACV Range:** 200 mV, 2 V, 20 V, 200 V, 750 V. **Input Impedance:** 10 MΩ. **Resistance Range:** 200 Ω, 2 KΩ, 20 KΩ, 200 KΩ, 2 MΩ, 20 MΩ. **ACA and DCA Range:** 200 µA, 2 mA, 20 mA, 200 mA, 2 A, 10 A (10 A not fused). **Audible Continuity Check:** Buzzes if conductance is less than 30 Ω. **Diode Check:** Displays approximate forward voltage of diode. **Temperature:** Uses one 12 CF (optional — not supplied) or any converter giving 1 mV per °C output. **Display:** 3½ digit LCD 0.4" high with "LOBAT". **Power:** Single 9 V battery (800 hours typical). 1 pair test probes, 1 spare fuse, manual. **Dimensions:** 5.9" L × 3.2" W × 1.2" H. **Weight:** 7.1 ozs.

952-0120. Model 120. .5% Accuracy	EACH 49.95

Model 140/140K

Covers all standard DMM functions. 3½ digit with 1% basic accuracy. Gold plated circuit board. Comprehensive assembly instructions provided for the kit version.

Specifications. DCV Range: 200 mV, 2 V, 20 V, 200 V, 1000 V, **ACV Range:** 200 V, 750 V. **Input Impedance:** 10 MΩ. **DCA Range:** 200 µA, 2 mA, 20 mA, 200 mA, 2 A, 10 A (10 A not fused). **Resistance Range:** 200 Ω, 2 KΩ, 20 KΩ, 200 KΩ, 2 MΩ, 20 MΩ. **Diode Check:** Display reads approximate forward voltage of diode. **Display:** 3½ digit LCD 0.4" high with "LOBAT". **Power:** Single 9 V battery (1000 hours typical). 1 pair test probes, 1 spare fuse, manual. **Dimensions:** 5.9" L × 3.2" W × 1.2" H. **Weight:** 7.1 ozs.

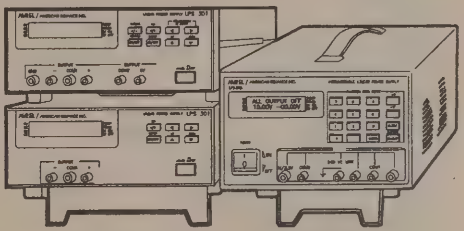
Ultra-Low Cost Linear Programmable Power Supplies

User-Friendly with LCD Readouts at Analog Prices



- Microprocessor Controlled
- Digital Programming and Readback
- Keypad Data Entry
- Power-off Memory
- Voltage and Current Slew Function
- Low PARD/Noise and Ripple
- Superior Line and Load Regulation
- Output Enable/Disable
- Three Year Warranty

Each LPS includes many user-friendly features to simplify operations. Power-off memory retains both voltage and current settings and an output enable/disable function allows the user to safely disable the output without changing the voltage or current settings. Status annunciators on the LCD panel are updated continuously to inform the user of the power supply's status at all times. Today's testing demands the latest technology and the highest accuracy. The AMREL LPS series DC power supplies offer the ease of keypad data entry and four digit LCD readout accuracy. Far outclassing analog power supplies and other units in its class, AMREL DC power supplies have no equal for accuracy and ease. All this at analog prices.

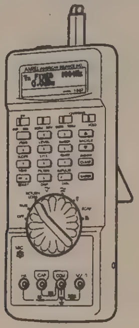
Handheld Transmission Impairment Measuring Sets

— NEW —

The 186T or 188T are intended for evaluation, installation, or troubleshooting leased lines and dial-up circuits. Universal and compact, the instruments can test telecommunication circuits with an extended frequency range of 20 Hz to 50 KHz. Ideal for field service applications, these test sets will expedite your tests and measurements. They incorporate the latest technology and design standards the 186T and 188T meet or exceed IEEE743, BELL pub41009 and CCITT Standards, providing exceptional performance and reliability.

Model 186T



- **Sinewave Generator**
- **Frequency Counter**
- **TIMS**
- **DMM**
- **Telephone Headset**
- **Tx Range: 20 to 50 KHz**
- **Rx Range: 20 to 50 KHz**
- **4 Wire Test Mode**
- **2 Wire Test Mode**
- **Noise Measurement**
- **Noise with Tone Measurement**
- **Noise to Ground Measurement**
- **Signal to Noise Measurement**
- **Impulse Measurement**
- **Return Loss Measurement**
- **Dial Capability with DTMF, Dial Pulse, and MF**
- **RS-232C Capability**
- **Printing Capability**
- **Termination Available in 135 Ohm/600 Ohm/Bridge or 600 Ohm/900 Ohm/Bridge**

2090W Current Power Clamp Meter

- **Measure Power, Current, Voltage, Frequency and Resistance**
- **Read True Power (VacosØ), Apparent Power (VA), Reactive Power (VAsinØ), and Power Factor (cos Ø).**
- **Read the Value of AC, DC, and AC + DC in the Signal**
- **Selectable True RMS or Average Scale to RMS Measurement**
- **Surge Mode for Inrush Current Measurement**
- **Data Hold, Maximum, Minimum, and Crest Factor Reading**
- **Autorange and Manual Operation Selectable**
- **0.8" Digital Height Display, 3500 Counts with Annunciators**
- **Optional Computer Interface for Remote Operation**
- **Frequency Range: 10 Hz to 1 KHz; Accuracy — 0.5%; Resolution — 1 Hz**
- **Resistance Range: 0 to 3.5 KΩ; Accuracy — ±1%; Resolution — 1 Ω**
- **Audible Continuity Check**

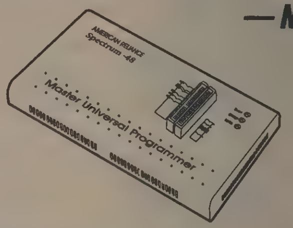
Fastest Universal Programmer

— NEW —



- **Parallel Printer-Port Interface**
- **On-Board Processor and Built-In Power Supply**
- **Fastest Programming Speed on the Market: Less Than 20 Seconds to Program a 1 Mbit EPROM and Less Than 100 Seconds to Program an 8 Mbit EPROM (with 486DX2-66 Processor)**
- **48-Pin Universal Pin Driver and Current Limit**
- **Checks for Incorrect Device Insertion (Backward, Incorrect Position) and Poor Pin Contact**
- **Optional ROM Emulator for Up to 4 Mbit Chips**
- **Automatic EPROM ID Search**
- **User-Selectable Verify Voltage with One or Two Passes**
- **Function Lets You Compare the Device with the Memory Buffer and List the Differences**
- **MS-Windows Like Pop-Up Menus with Mouse Support**
- **Free DOS and Windows Software**
- **Automatic File Format Conversion**
- **High-Speed Device Function Tests and User-Creatable Test Library**
- **"Mass Production Mode" Allows Users To Program Multiple Devices Without Touching the Keyboard**
- **User Changeable Programming Parameters**
- **Lifetime Free Software Updates**

AMREL introduces technological innovation with the release of the Spectrum-48. AMREL has designed the Spectrum-48 for laboratory as well as mass-production applications. The Spectrum-48 is a universal device programmer which works through the parallel port of your desktop PC or notebook computer. It features a 48-pin universal pin drive and an expandable TTL pin driver. The onboard processor and FPGA allows it to handle the most complicated DIP-type silicon PLDs, microprocessors and high density memory chips without adapters.

The Spectrum-48 can support over 1200 different devices! This would include the PAL, GAL, CPAL, EPLD, PEEL, MAX, MACH, PLSI, microprocessors, EPROM, series EPROM, PROM and Flash memory. The optional ROM emulator modules support devices up to 16-bits.

The Spectrum-48 MOSFET logic controls the programmer's pin switches. Each pin can supply Vcc, Vpp or ground. The pins can also be configured for TTL high/low levels and pull-high/pull-low, high-speed clock and tri-state. The Spectrum-48 is so advanced in pin design, it lets you program any DIP device up to 48 pins without an adapter. It also ensures support for the full range of silicon technologies on the market.

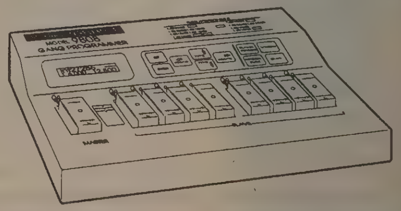
The Spectrum-48 has on-board intelligence. SRAM and FPGA which reduces system overhead to a minimum. The Spectrum-48 can program an 8 Mbit EPROM in less than 100 seconds! This feature alone surpasses all other competitors, which makes the Spectrum-48 much more productive with today's high-density, multi-megabit memory devices.

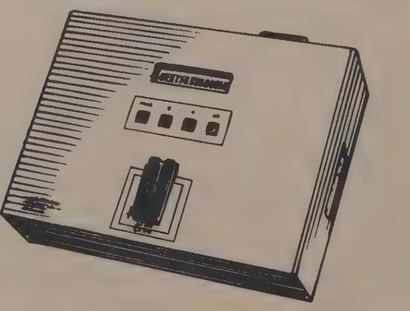
952-0048. Spectrum-48 .... **EACH 1495.00**

Model 9808/High-Speed Gang Programmer with User Replaceable ZIP Sockets

The 9808 is a stand-alone, high speed EPROM gang programmer designed for mass programming applications. The programmer is equipped with nine 32-pin ZIP (zero insertion force) sockets with the master device occupying the first socket. The 9808 programs up to eight 8M-bit EPROMs or 2M-bit flash EEPROMs from one master device with a single keystroke. In order to provide years of reliable service, all ZIP sockets on the 9808 programmer are removable. Worn-out or damaged ZIP sockets can be easily and economically replaced by the user which eliminates programmer down-time and improves productivity. **Specifications. Power Supply:** 90 to 260 VAC; 47 to 63 Hz auto-switching. **Power Consumption:** 60 W maximum. **Dimensions:** 31.6 cm × 26.6 cm × 7.1 cm (12.4" × 10.5" × 2.8"). **Net Weight:** 3.2 kgs (7 lbs.). **Operating Temperature:** 5° to 45°C. **Humidity:** 90% non-condensing.

952-9808 .... **EACH 1495.00**





Model 9850UV Personal E/EEPROM Programmer

- **Simple Function Key Operations**
- **Programs 2716 to 27513 EPROMs and 2804 to 28286 EPROMs**
- **Built-in UV Eraser**
- **Stand-Alone or PC Remote Operation with Auto Detection**
- **Programming Algorithms: STANDARD, INTELLIGENT, INTERACTIVE AND QUICK PULSE**

Specifications. EPROMs: 2716, 2716B, 2732, 2732A, 2732B, 2764, 2764A, 27128, 27128A, 27256, 27256D, 27512, 27513. **EEPROMs:** 2804A, 2816A, 2817A, 2864, 28256. **Programming Functions:** Read, Program, Auto, Verify, Blank Check. **Data Formats:** Intel Hex, Binary, Motorola S, Tektronix Hex. **Device Check:** Blank, Verify, Over Current, Checksum. **Programming Algorithms:** Standard, Intelligent, Interactive, Quick Pulse. **Serial Interface:** RS-232, DB-25F. **Data Rates:** 150-19200 baud. **Data Socket:** (1) 28 pin ZIF. **UV Erase (9850UV):** 6 devices. **Display:** 16 × 1 Dot Matrix LCD. **Protection:** Reverse Insertion. **Data RAM:** 64KB. **Power:** 110/220 VAC, 50/60 Hz.

6000 Series Ruggedized Digital Multimeters

DM-6100

DM-6200

DM-6300

These exceptional 3½ Digit Heavy Duty Drop Proof Digital Multimeters have the capacity of reading up to 10 functions on 33 ranges. This new series of ruggedized digital multimeters have features such as drop proof to five feet, 6KV transient voltage protection, audible continuity, diode test, overload protection on all ranges, meets IEC-348 Class II and UL-1244 standards, employs a combination tilt stand/hanger and have a one year limited warranty. Many other features in this new family are: large LCD displays, data hold, low ohm range, capacitance, transistor HFE, and direct temperature measurement.

DM-6100 3½ Digit Heavy Duty Drop-Proof Digital Multimeter. Ranges: 200 mV/2/20/200/1000 Vdc, 200 mV/2/20/200/750 Vac, 20 µ/200 µA/2 m/20 m/200 mA/20 ADC, 20 µ/200 µA/2 m/ 20 m/200 mA/20 AAC, 20/200/2 K/20 K/200 K/2 M/20 M ohm, Continuity and Diode Test.

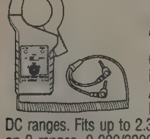
947-6200. Model DM-6200 .... **EACH 104.95**

DM-6300 3½ Digit Heavy Duty Drop-Proof Digital Multimeter with Capacitance Ranges. Ranges: 200 mV/2/20/200/1000 Vdc, 200 mV/2/20/200/750 Vac, 200 µA/2 m/20 m/200 mA/20 ADC, 200 µA/2 m/20 m/200 mA/20 AAC, 200/2 K/20 K/200 K/2 M/20 M ohm, 20 µ/200 µF. Continuity, Transistor HFE, Diode and Microwave Diode Test.
947-6300. Model DM-6300 .... **EACH 104.95**

Model CA-250 AC/DC AMP Adapter for DMMs



CA-250 works with all DMMs with 10 Mohm input impedance and 0-200 mV/2 volt or greater ranges AC/DC. Rugged ABS plastic, 40" leads with shielded banana plug. "Low Battery" indicator and zero adjust for DC ranges. Fits up to 2.31" conductors. Rated for continuous duty at 50-60 Hz on 2 ranges. 0-200/2000 Amps AC/DC on circuits to 750 volts AC. Gives true RMS readings when used with True RMS DMM. 7.75" × 2.5" × 1.5", 18 oz.

947-0685. Model CA-250 .... **EACH 104.95**

Model DM-2A Pocket Pro DMM

UL listed 3.5 digit pocket size DMM has auto/manual range selection, built in test leads, electronic burn out protection to 400 volts on ohm/audible continuity and diode test ranges. Ranges are 0-20-/20/200/400 VAC/DC. 0-200/2 K/20 K/200 K/2 M ohms resistance. Audible continuity. 4.2" × 2.0" × .4", 3.5 oz. Comes with (2) B-6 1.5 V batteries, C-70 case, operating instructions #219.

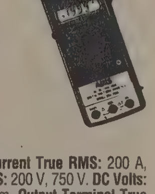
947-6205. Model DM-2A .... **EACH 32.95**

Model DM-6953A "Pen-Style" DMM

5 functions, 15 ranges, 3.5 digit autoranging DMM has interchangeable probe tip, data hold, audible continuity, overload protection on all ranges. Ohms and Diode ranges are protected to 250 volts electronically. **Ranges:** 0-200 mV (DC only) 2/20/200/500 Volts AC/DC. 0-200/2 K/20 K/200 K/2 M/20 M ohm resistance. 6.3" × 1.2" × .8", 2.3 oz. Comes with (2) B-6 "button" batteries, TL-49 test leads, AG-940 alligator slip-on alligator clip, 1 long, 1 short probe tip C-49 Case, instructions #167-2.

947-6593. Model DM-2A .... **EACH 62.95**

DSA-2009 True RMS/ DSA-2003 Avg. AC/DC Digital Snap Around



Reads true RMS AC Amps, volts AC on DC signals, and DC amps, volts. Electronic burn out protection to 500 volts. Accurate Amp/Volt measurements on non-sine wave power circuits such as SCR drivers. Triac circuits, variable speed/frequency drives, HID lighting, UPS systems, and other non-linear loads, as well as DC drives, cranes, DE powered vehicles, and battery power systems. Tear drop jaws allow easy access to tight places. Output jack for recording or oscilloscope viewing. **Specifications. Ranges. AC Current True RMS:** 200 A, 2000 A. **DC Current:** 200 A, 2000 A. **AC Volts True RMS:** 200 V, 750 V. **DC Volts:** 20 V, 200 V, 1000 V. **Resistance:** 200 ohm, 1500 ohm. **Output Terminal True RMS:** 200 AAC, 200 ADC, 2000 AAC, 2000 ADC. **Overload Protection:** Up to 500 V AC/DC on resistance range. Diode test range. **Data Hold Switch:** Freezes readings. **Display:** 3.5 digit LCD, Max reading 1999. **Max. Conductor Size:** 2.16 Dia. **Power:** One 9 V battery (NEDA Type 1604). 16 hours typical with carbon zinc cell. **Dimensions:** 9.7"H × 2.8"W × 1.4"D. **Weight:** 17.7 oz. **Supplied Accessories:** TL-48 test leads, B-4 battery, C-50 carrying case, form #171-1 operating instructions, millivolt output jack, and warranty card.

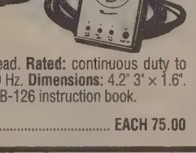
947-2009. Model DSA-2009. True RMS .... **EACH 514.95**
947-2003. Model DSA-2003. Avg. sensing .... **EACH 409.95**

DT-35A Dual Input Temp Differential Thermometer

Rugged Ergonomically designed dual input thermometer features instantaneous two zone capability using dual K type thermo couple probes. Reads in ½F or ½C, with temp differential (T-1/T-2). Offset adjust accommodates different style/length probes, data hold, max record, 200 hr. battery life. 5.8" × 2.8" × 1.75", 13 oz. Comes with two TP-800K K type probes, b-4 (9 V) battery, instructions. **Ranges:** –58 ½-2000 ½C. **Resolution:** 1½. **Optional:** Rubberized "Holster" C-72, TP-750K 8" rigid probe, TP-850K surface probe.

947-0035. Model DT-35A .... **EACH 94.95**
947-0045. Model C-72 .... **EACH 17.45**

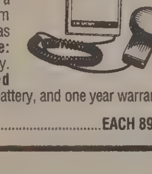
Phase Sequence and Open Phase Indicator



Indicates phase sequence and open phase on 3 phase power circuits up to 600 volts. Easy to use, no exposed metal parts, rugged ABS Housing, color coded 60" Test lead. **Rated:** continuous duty to 500 Volts, 5 minutes max. 500-600 VAC, 50-60 Hz. **Dimensions:** 4.2" 3" × 1.6". **Weight:** 12.5 oz. Comes with C-31 case and SPB-126 instruction book.

947-8031. PSI-8031 .... **EACH 75.00**

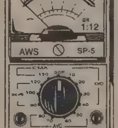
Digital Light Meter



The SLM-110 is a digital light meter which combines a 5% basic accuracy with the capability of reading up to 10,000 footcandles. This unit is compact, light weight and easy to operate. It has a separate light sensor to allow optimum measurements on its large LCD display. It also has a data hold switch to freeze readings. **Range:** 0-200/2,000/10,000 fc. **Power:** Single 9-V battery. **Battery Life:** 150 hours typical. **Supplied Accessories:** C-57 carry case, one 9 V transistor battery, and one year warranty.

947-0110. SLM-110 .... **EACH 89.95**

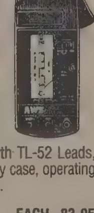
Pocket-Size Multimeter



Features 4 functions, 12 ranges, mirrored scale plate, diode protected meter movement and more. **Specifications. DC/AC Voltage. Ranges:** 0-10/50/250/500 VDC and VAC. **DC Current:** 0-0.5/50/250 mAdc. **Resistance:** 0-1 MΩ (mid-scale). **Decibels:** –20 to +56 db on VAC ranges. **Sensitivity:** 2KΩ/V AC/DC. **Accuracy:** ±4% FS (DCV, DCA); ±4% Arc length (Ω); + 5% FS (ACV). **Power Source:** One 1.5 V AA size battery AWS B-1. **Size:** 3.5 × 2.4 × 1.3"; 3.7 oz. SP-5A package includes TL-34 test leads, 1 B-1 battery, operating instructions, and 1-year warranty.

947-0005. Model SP-5A .... **EACH 10.95**

Snap 8 Series Rotary Scale Volt-Ohm-Ammeter



Specifications. Range. AC Voltage: 150/300/600 VAC. **AC Current:** SPR-300 PLUS — 0-6/20/60/200/600 AAC; SPR-311 PLUS — 0-1.5/5/15/50/150 AAC. **Resistance. Frequency:** SPR-300 PLUS — 50-400 Hz; SPR-311 PLUS — 60 Hz. **Jaws:** Takes up to 1.2" (30 mm) conductors. **Weight:** 13.8 ounces (with batteries). **Dimensions:** 8.7L × 3.3W × 1.6H inches. **Fuse Protection:** One fast acting, high interrupting capacity ½ A 250 V ¼ × 1¼" fuse, AWS Part #F-1. **Note:** The instrument is designed for ampere readings on circuits with maximum of 600 Volts A.C. **Packaging:** The SPR-300 PLUS and SPR-311 PLUS come with TL-52 Leads, 1 F-1 fuse installed/1-spare, B-1 battery AA Type 1.5 V, C-53 carry case, operating instructions and warranty card, all ready for use. Limited warranty.

TACH-1 Digital Photo/Contact Tachometer

The TACH-1 is a digital photo/contact tachometer. This multifunction instrument combines 0.05% basic accuracy with the capability of RPM and surface speed measurements. **Specifications.** Has both photo tachometer (RPM) and contact tachometer (RPM, M/Min., Ft/Min.). **Measuring Range:** 0.5 to 100,000 RPM, 0.05 to 2,000 M/Min., 0.2 to 6560 Ft/Min. **Memory Recall:** Automatically displays last value, max. value and min. value. **Display:** 5-digit LCD with insignificant zero suppression. **Housing:** ABS Plastic. **Range Selection:** Autoranging. **Power:** Four 'AA' batteries (Part #B-1). **Dimensions:** 8.5" x 2.6" x 1.5". Wt.: .66 lb. including batteries. Supplied Accessories: C-55 carrying case, four 'AA' batteries, T-1 reflective tape, 2 W-1 RPM adapters (cone), W-2 adapter (funnel), W-3 surface speed test wheel and form #189 operating instructions.

947-0010. Model TACH-1 .... **EACH 239.95**

Test Bench® Multimeters

Model 388A

Model 389

Model 390

Model 391

- 3 Year Warranty
- High Quality, Ruggedized, Multifunction

BK's Test Bench® models are packed with useful functions. Model 391 is a 4½ digit True RMS DMM with 0.05% DCV accuracy. Models 390 and 389 are 3¾ digit, auto/manual ranging DMMs with analog bargraph, capacitance measurement, temperature probe (390), and 0.1% DCV accuracy (390) or 0.25% DCV accuracy (389). Model 388A is a 3¾ digit, manual ranging DMM with 0.5% DCV accuracy. All models measure frequency and include probes and rubber protective boot.

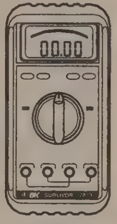
The Survivor® Series

Model 2870 — Ruggedized 3¾ Digit True RMS DMM

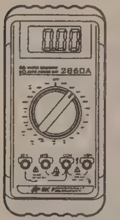


— NEW —

- Ruggedized Construction
- 5 Year Warranty
- 0.25% DCV Accuracy
- True RMS 750 VAC
- 20 A Range
- Heavy Duty 1500 VDC Rating
- Autoranging, Analog Bargraph
- Includes Test Leads, Rubber Holster

731-2870. Model 2870 .... EACH 149.00

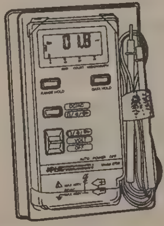
Model 2860A — 3½ Digit Ruggedized DMM



- Ruggedized Construction
- 5 Year Warranty
- Now Includes Rubber Boot
- 1500 V Overload
- Auto Power Off Saves Batteries
- 20 A Range
- Audible Continuity
- Large 0.8" LCD Display

731-2861. Model 2860A .... EACH 99.00

Model 2700 — 3½ Digit Pocket DMM with Bargraph



- Analog Bargraph
- 3200 Count Display
- Auto Power Off
- Low Battery Indicator
- Range Hold
- Data Hold

731-2700. Model 2700 .... EACH 33.00

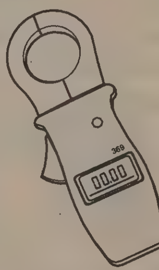
Model 114A — 20,000 Ohms/Volt Multimeter

- 20,000 Ohms/Volt DC
- 28 Ranges
- 3½" Mirrored Scale
- Tests Batteries Under Load
- Tests Transistors
- Includes Batteries and Test Leads

731-0115. Model 114A .... EACH 42.38

Model 369 — True RMS 1000 A AC/DC Clamp Meter

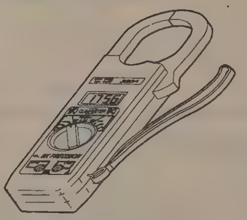
— NEW —



- Measures AC/DC V to 750 V, AC/DC A to 1000 A, Frequency to 10 KHz, Resistance to 4 KΩ
- True RMS
- 3¾ Digit, 4000 Count LCD Display
- Auto/Manual Ranging
- Bargraph
- Crest Mode Measures Peak Current
- Soft Mode Averages Over 3 Seconds
- Includes Test Leads, Holster

731-0369. Model 369 .... EACH 199.00

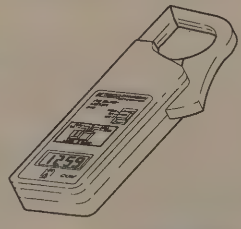
Model 350A — 1000 A AC Multifunction Clamp Meter



- Measures ACA to 1000 A, DCV to 1000 V, ACV to 750 V, Resistance to 2 KΩ
- Peak Hold, Data Hold
- Audible Continuity, Diode Check
- 2" Clamp Opening
- Includes Test Leads, Carrying Case

731-0350. Model 350A .... EACH 149.00

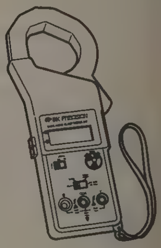
Model 340A — 300 A AC Multifunction Clamp Meter



- Measures ACV to 750 V, ACA to 300 A, and Ohms to 2 KΩ
- Data Hold
- 1⅛" Clamp Opening
- Includes Battery, Test Leads, Carrying Case

731-0340. Model 340A .... EACH 109.00

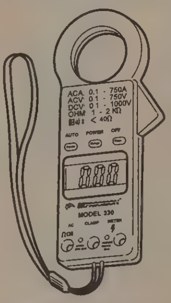
Model 367 — 2000 A AC/DC Multifunction Clamp Meter



- Measures AC/DC Current to 2000 A, DC Voltage to 200 V, AC Voltage to 750 V, Resistance to 2 KΩ
- Peak Hold, Data Hold
- 1¾" Clamp Opening
- Includes Test Leads, Manual, Carrying Case

731-0406. Model 367 .... EACH 169.00

Model 330 — 750 A AC Clamp Meter

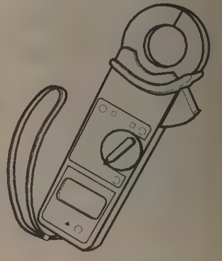


- Measures ACA to 750 A, DCV to 1000 V, ACV to 750 V and Resistance to 2 kΩ
- LEDs Show Which Test Jack to Use
- 1.6" Clamp Opening
- Includes Battery, Test Leads, Carrying Case

731-0410. Model 330 .... EACH 89.00

Model 320 — 600 A AC Clamp Meter

— NEW —



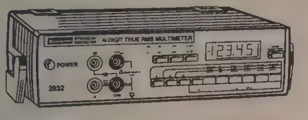
- Measures ACA to 600 A, ACV to 750 V, Ohms to 2 KΩ, and Frequency to 5 MHz
- Max. Hold, Data Hold
- 1⅜" Clamp Opening
- Includes Battery, Test Leads, Carrying Case

731-0320. Model 320 .... EACH 79.00

Handheld, Bench and Ruggedized DMMs, Parts Testers, and Accessories

"Over 30 Years of Servicing the Electronic Industry Together."

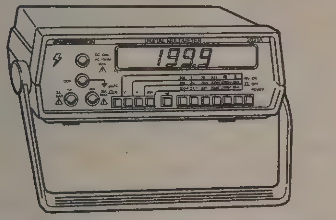
Model 2833 4½ Digit Multimeter



- Basic Accuracy: 0.05% VDC
- True RMS Reading
- Data Hold Feature
- Measures dBm from –48 dB to 62.21 dB
- Measures Volts to 1000 VDC and 1000 VAC
- Measures Frequency to 200 kHz
- Audible Continuity Check, Diode Test

731-2833. Model 2833 .... EACH 400.00

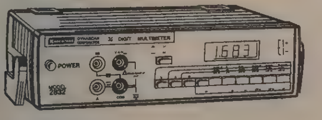
Model 2831A 3½ Digit Bench DMM



- Bright, 0.5" LED Display
- 0.1% Accuracy (DCV)
- Measures Current to 20 A
- Measures Voltage to 1200 VDC or 1000 VAC
- Audible Continuity Check
- Diode Test
- Overload Protection
- Measures AC Voltage to 40 kHz

731-2831. Model 2831A .... EACH 299.00

Model 2832 3½ Digit Multimeter



- AC or Battery Operation
- Measures Voltage, Resistance, Current and Capacitance
- 0.5% Basic DC Accuracy
- Includes Audible Continuity Check and Diode Test

731-2832. Model 2832 .... EACH 209.00

Model 815 Hand-Held Parts Tester

- Large 0.8" Digit, High Contrast LCD Readout
- Tilt Stand for Benchtop Use
- 25 User Ranges for Versatile Test Selection
- Tests Resistance from 0.1 Ohm through 20 M Ohm
- Tests Transistors, SCRs, Diodes and LEDs
- Tests Batteries Under Actual Loaded Conditions
- 5 Foot Drop-Proof, Heavy Duty Case

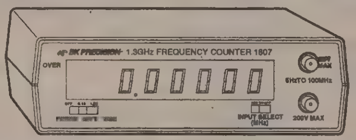
MADE IN U. S. A.

731-1810. Model 1803C	EACH 210.00
731-9998. Model PR37A. Probe	EACH 57.23

Model 1807 1.3 GHz Battery/AC Powered Counter

MADE IN U. S. A.

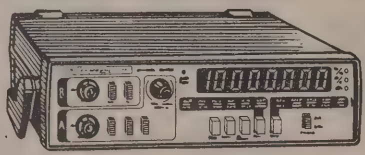


- ► 5 Hz to 1.3 GHz Range
- ► 0.5 PPM TCXO Time Base, 20° to 30°C
- ► Low Pass Filter
- ► 1 Sec. and 0.1 Sec. Gates
- ► 8 Digit LED Display

731-1807. Model 1807	EACH 299.00
731-9998. Model PR37A. Probe	EACH 57.23
731-0018. Model AN18. Antenna	EACH 30.00

Model 1823 175 MHz Universal Counter

MADE IN U. S. A.



- ► 5 Hz to 175 MHz Range
- ► 8 Digit LED Display
- ► Display Hold and Reset Feature
- ► 10 PPM Time Base

731-1823. Model 1823	EACH 399.00

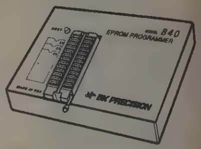
Device Programmers

— NEW —

Model 840

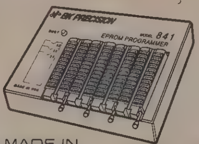
MADE IN U. S. A.

- ► Program EPROMs (NMOS and CMOS), Page Mode EPROMs, EEPROMs, and Flash EEPROMs
- ► Library Contains Over 500 Devices
- ► 32 Pin ZIF Socket
- ► Works With IBM PC/XT/AT 386/486 Host Computer
- ► Includes Software Diskette, 8 Bit ISA Bus Adapter Interface Card, 40 Pin Ribbon Cable, Programming Module, Instruction Manual



731-0840. Model 840	EACH 229.00

Model 841



MADE IN U. S. A.

- ► Program EPROMs, (NMOS and CMOS), Page Mode EPROMs, EEPROMs, and Flash EEPROMs
- ► Library Contains Over 500 Devices
- ► 32 Pin ZIF Socket
- ► 4 Sockets: Program 4 Devices at Once
- ► Works With IBM PC/XT/AT 386/486 Host Computer
- ► Includes Software Diskette, 8 Bit ISA Bus Adapter Interface Card, 40 Pin Ribbon Cable, Programming Module, Instruction Manual

731-0841. Model 841	EACH 299.00

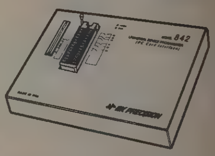
Universal Device Programmer/Tester

— NEW —

Model 842

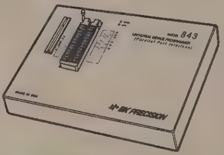
MADE IN U. S. A.

- ► Programs PALs, PROMs, EPROMs, EEPROMs, Flash EEPROMs, MICROs, Serial (E)PROMs, EPLDs, GALs, PEELs
- ► Tests TTL, CMOS, Logic ICs
- ► Library Contains Over 1800 ICs
- ► 48 Pin ZIF Socket
- ► Tests Chips Up to 256 MB
- ► Works With IBM PC/XT/AT 386/486 Host Computer
- ► Includes Software Diskette, 8 Bit ISA Bus Adapter Interface Card, 40 Pin Ribbon Cable, Programming Module, Instruction Manual



731-0842. Model 842	EACH 849.00

Model 843

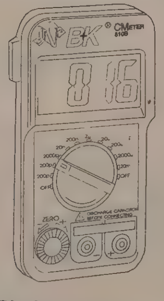


MADE IN U. S. A.

- ► Programs PALs, PROMs, EPROMs, EEPROMs, Flash EEPROMs, MICROs, Serial (E)PROMs, EPLDs, GALs, PEELs
- ► Tests TTL, CMOS, Logic ICs
- ► Library Contains Over 1800 ICs
- ► 48 Pin ZIF Socket
- ► Tests Chips Up to 256 MB
- ► Plugs Into Standard Parallel Port (LPT 1, LPT 2) of IBM PC/XT/AT 386/486 Host Computer
- ► Includes Software Diskette, Universal Power Transformer, Printer Cable (6 Ft.), Instruction Manual

731-0843. Model 843	EACH 995.00

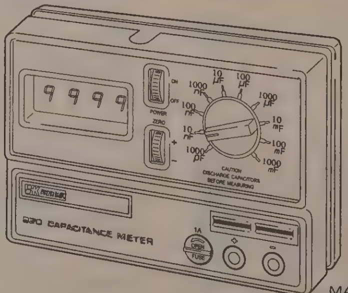
Model 810 B Capacitance Meter



- ► 3½ Digit LCD Display
- ► Measures Capacitance to 20 mF
- ► Nine Ranges from 200 pF to 20 mF
- ► 0.1 pF Resolution
- ► Low Battery and Overload Indicator

731-0811. Model 810B	EACH 99.00

Model 820 Manual Ranging Capacitance Meter

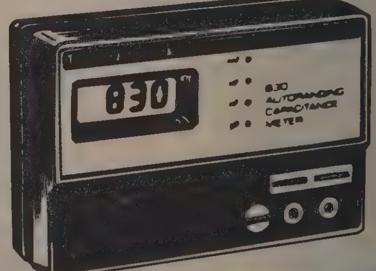


MADE IN U. S. A.

- ► 4 Digit LED Display
- ► Measures Capacitance to 999.9 mF
- ► 10 Ranges from 999.9 pF to 999.9 mF

731-0820. Model 820	EACH 279.00

Model 830 Auto Ranging Capacitance Meter



MADE IN U. S. A.

- ► 3½ Digit LED Display
- ► Measures Capacitance to 199.9 mF
- ► 10 Ranges from 199.9 pF to 199.9 mF

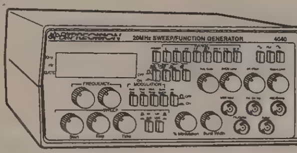
731-0830. Model 830	EACH 325.00

"Over 30 Years of Servicing the Electronic Industry Together."

Model 4040 — 20 MHz Sweep/Function Generator with Frequency Counter

BK REBORN IN THE USA

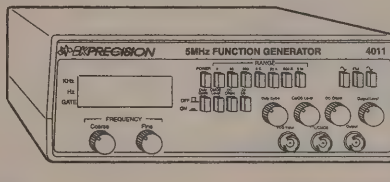
- 20 MHz Bandwidth
- Amplitude or Frequency Modulation
- Burst Operation
- External Frequency Counter to 30 MHz
- 5-Digit LED Display
- Linear and Log Sweep
- Sine, Square, Triangle Wave Outputs
- TTL and CMOS Outputs
- Variable Symmetry
- Variable DC Offset
- Two Year Warranty



731-4040. Model 4040 .... **EACH 499.00**

Model 4011 — 5 MHz Function Generator with Digital Display

BK REBORN IN THE USA

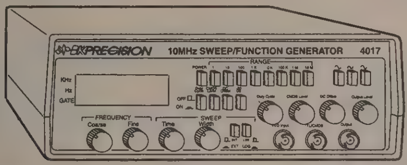


- 5 MHz Bandwidth
- 4-Digit Counter
- Sine, Square, Triangle Wave Outputs
- TTL and CMOS Outputs
- Variable Symmetry
- Variable DC Offset
- Two Year Warranty

731-4011. Model 4011 .... **EACH 289.00**

Model 4017 — 10 MHz Sweep/Function Generator

BK REBORN IN THE USA

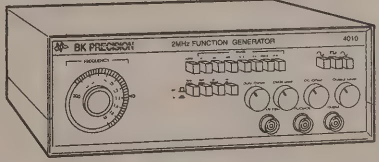


- 10 MHz Bandwidth
- 5-Digit LED Display
- Linear and Log Sweep
- Sine, Square, Triangle Wave Outputs
- TTL and CMOS Outputs
- Variable Symmetry
- Variable DC Offset
- Two Year Warranty

731-4017. Model 4017 .... **EACH 369.00**

Model 4010 — 2 MHz Bandwidth Function Generator

BK REBORN IN THE USA



- 2 MHz Bandwidth
- Sine, Square, Triangle Wave Outputs
- TTL and CMOS Outputs
- Variable Symmetry
- Variable DC Offset
- Two Year Warranty

731-4010. Model 4010 .... **EACH 229.00**

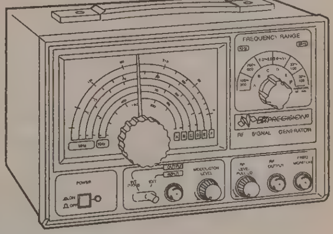
Model 3001 — Sine/Square Wave Audio Generator

- Sine and Square Wave Generator
- 20 Hz to 150 KHz in 46 Steps
- Low Distortion R-C Oscillator
- Variable Output Control
- Compact, Fully Portable, Light Weight
- Low Battery Indicator

731-3001. Model 3001 .... **EACH 79.00**

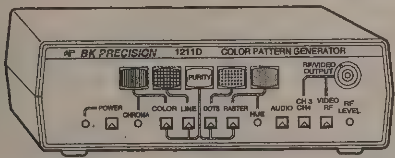
Model 2005A — 150 MHz RF Signal Generator

- 100 KHz to 150 MHz on Six Bands
- Output to 450 MHz on Harmonics
- AM Modulation, Internal or External, 0% to 100%
- Frequency Monitor Output for External Frequency Counter
- Step and Variable Attenuation to –40 dB



731-2005. Model 2005A .... **EACH 275.00**

Model 1211D — Hand Held Color Pattern Generator



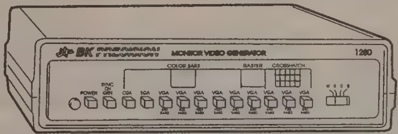
MADE IN U. S. A.

- Compact, Battery Operated
- 5 Patterns Including Full Field Raster
- Composite Video Output to 1 V p-p
- Progressive Scan
- CH 3 and CH 4 Crystal Controlled RF Outputs
- Chroma Can Be Switched Off

731-1213. Model 1211D .... **EACH 235.00**

Model 1280 — Computer Monitor Pattern Generator

— NEW —



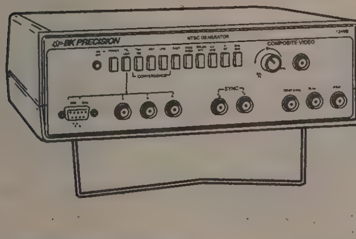
MADE IN U. S. A.

- Generates Seven Color Bar Patterns — CGA, EGA, VGA 640 × 480/60 Hz, SVGA 800 × 600/56 Hz, SVGA 1024 × 768/87 Hz, SVGA 1024 × 768/60 Hz Non-Interlaced, and Mac II 640 × 480/67 Hz
- Full Compliment of Jacks on Rear Panel — DB9, DB15, HD15, and 5 BNCs
- Includes AC Adapter, Instruction Manual

731-1280. Model 1280 .... **EACH 429.00**

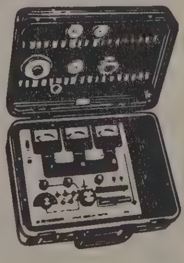
Model 1249B — NTSC Generator with RGB

MADE IN U. S. A.



- NTSC Color Bar Pattern, ±5° and ±5 IEEE Units
- CH 3, CH 4 and IF Outputs Crystal Controlled
- Calibrated 1 Vp-p or Variable Composite Video Output
- RGB Outputs on BNC or 9-Pin D Connector
- Composite Sync, Vertical Sync, and Horizontal Sync Outputs
- Chroma Can Be Switched Off

731-1250. Model 1249B .... **EACH 569.00**



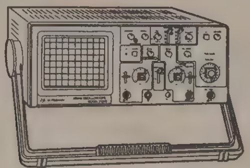
Model 480 and 490 — CRT Testers/Rejuvenators

MADE IN U. S. A.

- Test and Restore Color or Monochrome CRTs
- Test and Restore Most Computer Monitor CRTs
- Test and Restore Most Projection TV CRTs
- Test Emission, Tracking, Leakage, Shorts, Life
- Remove Shorts, Clean and Balance Guns, Rejuvenate Cathodes
- Continual Set-Up Chart Updates and New Adapter Development
- Extra Rugged Polyethylene Case

731-0480. Model 480 .... **EACH 739.00**
731-0490. Model 490 .... **EACH 1049.00**

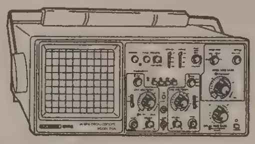
Model 2120B — 20 MHz Dual Trace Oscilloscope



- Dual or Single Trace Operation
- 1 mV/div Sensitivity
- AUTO/NORM Triggered Sweep Operation with AC, TVH, TVV and Line Coupling
- Calibrated 20 Step Timebase with X10 Magnifier
- Compact Low-Profile Design
- Two Year Warranty

731-2111. Model 2120B ....EACH 549.00

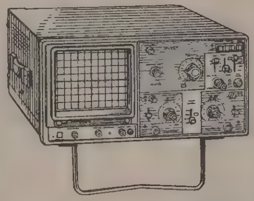
Model 2125 — 20 MHz Dual Trace Oscilloscope with Delayed Sweep



- Dual or Single Trace Operation
- 1 mV/div Sensitivity
- Built-In Component Tester for Capacitors, Inductors, Diodes, Transistors, Zener Diodes
- Delayed Sweep in 18 Ranges
- AUTO/NORM Triggered Sweep Operation with AC, TVH, TVV and Line Coupling
- Calibrated 20 Step Timebase with X10 Magnifier
- Compact Low-Profile Design
- Three Year Warranty

731-2125. Model 2125 ....EACH 646.00

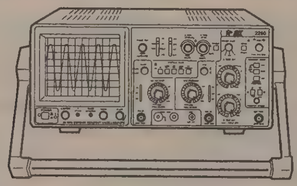
Model 1541C — 40 MHz Dual-Channel Oscilloscope



- 1 mV/div Sensitivity
- 19 Calibrated Sweeps
- Video Sync Separators
- X10 Sweep Mag. Single Sweep
- V Mode-Displays Two Signals Unrelated in Frequency
- Three Year Warranty

731-1445. Model 1541C ....EACH 799.00

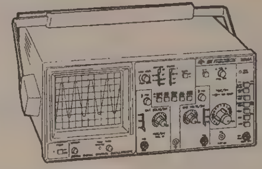
Model 2260 — 60 MHz Cursors and Readouts, Dual Time Base Oscilloscope



- Cursors and Readouts
- 1 mV/div Sensitivity
- Signal Delay Time
- Z Axis Input
- Single Sweep
- 23 Calibrated Ranges — Main Time Base
- 19 Calibrated Ranges — Delayed Time Base
- V Mode — Displays Two Signals Unrelated in Frequency
- Component Tester
- Three Year Warranty

731-2260. Model 2260 ....EACH 1399.00

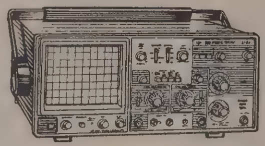
Model 2522A — 20 MHz Digital Storage/Analog Oscilloscope



- 20 MHz Analog Bandwidth
- 20 MS/s Sampling Rate Each Channel
- 2 K Memory Per Channel
- 400 MHz Equivalent Time Sampling
- Pre-Trigger Capture
- Three Year Warranty

731-2522. Model 2522A ....EACH 1099.00

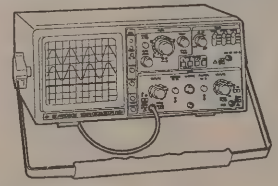
Model 2160A — 60 MHz Dual Trace Dual Time Base Oscilloscope



- 1 mV/div Sensitivity
- Sweep to 10 ns/div
- Component Tester
- Z Axis Input
- 23 Calibrated Ranges — Main Time Base
- 23 Calibrated Ranges — Delayed Time Base
- Three Year Warranty

731Q2160. Model 2160A ....EACH 1099.00

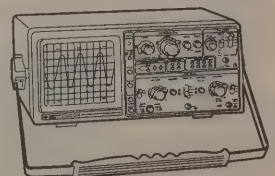
Model 2190A — 100 MHz Three Trace Dual Time Base Oscilloscope



- 1 mV/div Sensitivity
- Sweep to 5 ns/div
- Signal Delay Time
- Channel 1 Output
- 22 Calibrated Ranges — Main Time Base
- 19 Calibrated Ranges — Delayed Time Base
- Calibrated Delay Time Multiplier
- 15 kV Accelerating Voltage
- Three Year Warranty

731Q2195. Model 2190A ....EACH 1599.00

Model 2560 — 60 MHz Digital Storage Oscilloscope

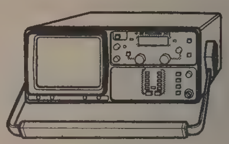


- Cursors and Readouts
- RS-232 Port
- 20 MS/s Real Time Sampling
- 1 GHz Equivalent Time Sampling (at 0.1 µs/div.)
- Prints Via RS-232 Port to Any HP-GL Plotter
- Three Year Warranty

731-2560. Model 2560 ....EACH 2395.00

Spectrum Analyzers — NEW —

Model 2615

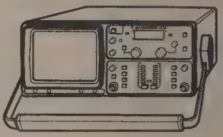


MADE IN U. S. A.

- 500 MHz Range
- 150 KHz to 500 MHz Frequency Range
- Dynamic Range 80 dB (113 dB with Attenuation)
- +20 dBm Maximum Input
- 12.5 KHz and 250 KHz Resolution Bandwidth
- 150 KHz/Hour Stability
- See Page 847 for Accessories

731-2615. Model 2615 ....EACH 1795.00

Model 2620

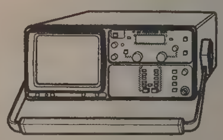


MADE IN U. S. A.

- 500 MHz Range
- 150 KHz to 500 MHz Frequency Range
- Dynamic Range 80 dB (113 dB with Attenuation)
- +20 dBm Maximum Input
- 12.5 KHz and 250 KHz Resolution Bandwidth
- 150 KHz/Hour Stability
- Built-In Tracking Generator
- –50 dBm to +1 dBm Output Level Range 50 Ω
- See Page 847 for Accessories

731-2620. Model 2620 ....EACH 2195.00

Model 2625

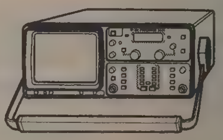


MADE IN U. S. A.

- 1.05 GHz Range
- 0.15 MHz to 1050 MHz Frequency Range
- Dynamic Range 80 dB (113 dB with Attenuation)
- 20 KHz and 400 KHz Resolution Bandwidth
- 150 KHz/Hour Stability
- AM and FM Demod Included
- See Page 847 for Accessories

731-2625. Model 2625 ....EACH 2595.00

Model 2630



MADE IN U. S. A.

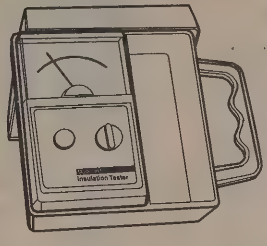
- 1.05 GHz Range
- 0.15 MHz to 1050 MHz Frequency Range
- Dynamic Range 80 dB (113 dB with Attenuation)
- 20 KHz and 400 KHz Resolution Bandwidth
- 150 KHz/Hour Stability
- AM and FM Demod Included
- Built-In Tracking Generator
- –50 dBm to +1 dBm Output Level Range 50 Ω
- See Page 847 for Accessories

731-2630. Model 2630 ....EACH 3395.00

"Over 30 Years of Servicing the Electronic Industry Together."

Model 307 Multi-Range Analog Insulation Tester

— NEW —

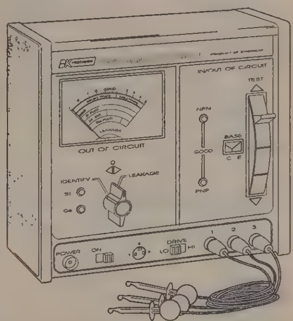


- ► Selectable 250 V, 500 V, or 1000 V Insulation Test
- ► Low Resistance Test
- ► Economical Analog Meter Version
- ► Measures to 200 MΩ
- ► Extra Rugged Integral Carrying Case
- ► Live Circuit Indicator Warns of Safety Hazard
- ► Push to Test

731-0307. Model 307 .... **EACH 189.00**

Model 520B Industrial Tester

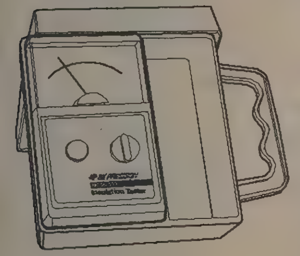
MADE IN U.S.A.



- ► HI/LO Drive
- ► Works In-Circuit
- ► Identifies All Three Transistor Leads
- ► Random Lead Connection
- ► Automatic NPN/PNP Determination
- ► Audibly and Visually Indicates Good Transistor
- ► Positive Si/Ge Identification
- ► Tests Diodes, SCRs, FETs and Darlingtons

731-0520. Model 520B .... **EACH 399.00**

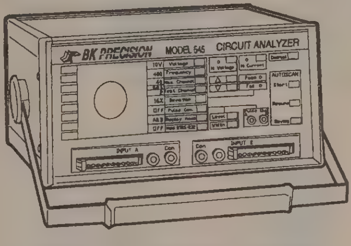
— NEW —



Model 308 Multi-Range Digital Insulation Tester

- ► Selectable 250 V, 500 V, or 1000 V Insulation Test
- ► Low Resistance Test
- ► $3^1/_2$ Digit LCD Display
- ► Measures to 2000 MΩ
- ► Extra Rugged Integral Carrying Case
- ► Live Circuit Indicator Warns of Safety Hazard
- ► Push to Test

731-0308. Model 308 .... **EACH 259.00**



BK PRECISION MODEL 545 CIRCUIT ANALYZER

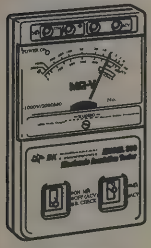
Model 545 PC Board Circuit Analyzer

MADE IN U.S.A.

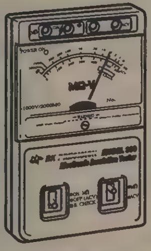
- ► Simple to Use
- ► Tests All Active and Passive Components
- ► Tests Digital and Analog ICs Up to 40 Pins
- ► Autoscan Mode Gives a Positive Pass/Fail Indication
- ► Built-In Switcher Automatically Tests IC Pins Sequentially
- ► Built-In Pulse Generator Tests SCRs
- ► Signature Storage on Computer Using Supplied Software

731-0545. Model 545 .... **EACH 2950.00**

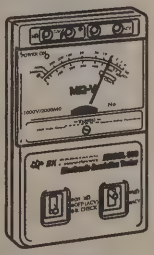
Insulation Testers



Model 300
1000 V, 2000 MΩ



Model 305
500 V, 1000 MΩ



Model 306
500 V, 100 MΩ

Model 300

- ► Tests Insulation Resistance
- ► Test Voltage: 1000 VDC
- ► Resistance Range 2000 MΩ Center Scale 50 MΩ
- ► Measures AC Voltage to 600 V
- ► Includes Batteries, Carrying Case, Test Leads, Manual

731-0400. Model 300 .... **EACH 129.00**

Model 305 **— NEW —**

- ► Tests Insulation Resistance
- ► Test Voltage: 500 VDC
- ► Resistance Range 1000 MΩ Center Scale 20 MΩ
- ► Measures AC Voltage to 600 V
- ► Includes Batteries, Carrying Case, Test Leads, Manual

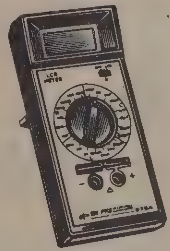
731-0305. Model 305 .... **EACH 129.00**

Model 306 **— NEW —**

- ► Tests Insulation Resistance
- ► Test Voltage: 500 VDC
- ► Resistance Range 100 MΩ Center Scale 2 MΩ
- ► Measures AC Voltage to 600 V
- ► Includes Batteries, Carrying Case, Test Leads, Manual

731-0306. Model 306 .... **EACH 129.00**

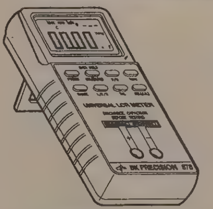
Model 875A LCR Meter



- ► Measures Capacitance, Resistance and Inductance
- ► Measures Dissipation Factor of Capacitors and 1/Q of Inductors
- ► $3^1/_2$ Digit LCD Display

731-0875. Model 875A .... **EACH 199.00**

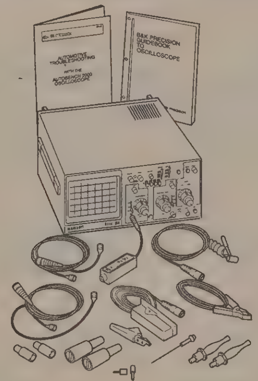
Model 878 Dual-Display Hand-Held LCR Bridge with Statistical Functions



- ► Measures Capacitance, Resistance and Inductance
- ► Accuracy Compares to More Costly Bench Bridges
- ► Measures Dissipation Factor of Capacitors and Q of Inductors
- ► Excellent for Sorting Parts in Engineering, QC, or Production
- ► Simultaneously Displays Measured Value and Q or Dissipation Factor
- ► Remembers Minimum and Maximum Values
- ► Keeps a Running Average of Tested Component Values
- ► Relative Mode Displays the Difference Between the Measured and Reference Component Values
- ► Tolerance Mode "Beeps" to Indicate Measured Components Outside a 1%, 5%, or 10% Tolerance Around a Reference Value
- ► Two Selectable Test Frequencies (120 Hz, 1 kHz)
- ► Auto or Manual Ranging

731-0878. Model 878 .... **EACH 275.00**

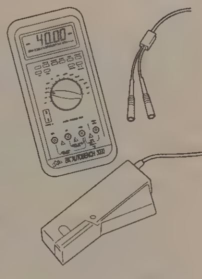
Model 2000 Automotive Oscilloscope



- ► 20 MHz, Dual Trace Scope
- ► Automotive Probe and Lead Set
- ► Comprehensive, Easy to Understand Training Manual with Typical Waveforms and Test Data

731-2000. Model 2000 .... **EACH 795.00**

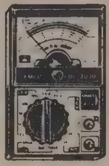
Model 3000 Automotive Digital Multimeter



- ► $3^3/_4$ Digit, 4000 Count Display
- ► Diode and Continuity Test
- ► Reads RPM
- ► Frequency and Capacitance
- ► Automatic Power Down
- ► Shielded for EMI
- ► Reads Pulse Duty Cycle and Dwell
- ► Full Autoranging on DC/AC Volts, Capacitance and Frequency
- ► Comprehensive, Easy to Understand Users Manual

731-3000. Model 3000 .... **EACH 270.00**
731-0002. LC-29A. Carry/Storage Case .... **EACH 10.00**
731-0009. CP-3. DC/AC Current Clamp, 400 A.. **EACH 86.00**

BL-10 K Multitester



- 18 Ranges
- 6 Function
- Battery Test
- Fully Protected

Specifications. 3-color mirrored scale 180 µA movement. **Ranges:** DC Voltage — 0 to 2.5, 10, 50, 500, 1000 V; AC Voltage — 0 to 10, 50, 250, 1000 V. **DC Current:** 0, 10 M, 250 mA. **Resistance:** 0-5 k, 5000 k, (R × 10/R × 1 K). **Battery Test:** 1.5 V (125 mA); 9 V (10 mA). 10,000 ohms/volt. Uses "AA" battery (UM-3). Supplied with test leads, manual, and battery.

776-1000. Model BL-10K..**EACH 16.86**

Model DMR-35A 3½ Digit Economy LCD Digital Multitester

- 3½ Digit 0.5" Height LCD Reading to 1999
- Auto-Polarity Display for Negative Input
- 27 Ranges
- High Overload Protection for all Ranges
- Power Consumption 20 mW Approx.
- 6 Functions

10 megohm input on DC volt. **Power Consumption:** 20 mW. Includes diode check. Supplied with batteries, test leads, and case. **Specifications. DC Volts:** 5 ranges, 200 mV to 1000 V, 0.8% +1 digit. **AC Volts:** 2 ranges, 200 V to 750 V, 1.2 +3 digits. **DC Current:** 5 ranges, 200 microamps to 10 amps, 0.8% +2 digits. **Resistance:** 6 ranges, 200 ohms to 20 Megohms, 1% +2 digits.

776-0351. Model DMR-35..**EACH 50.51**

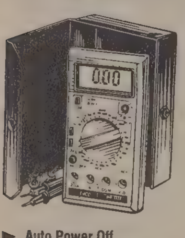
Model DMR-2012A

- 9 Functions, 35 Ranges
- Capacitor, Transistor, Diode Test
- Audible Continuity
- .5% Accuracy
- 20 Amp AC/DC Ranges
- Drop Proof Case

9 function, 35 range LCD multimeter with 20 amp AC/DC ranges. Housed in drop proof case. **Specifications. Ranges:** Volts — 200 mV, 2 V, 20 V, 200 V, 1000 V (750 V AC); Current (AC/DC) — 200 µA, 2 mA, 20 mA, 200 mA, 20 A; Resistance — 200, 2 K, 20 K, 200 K, 2 M, 20 M; Capacitance — 2000 pF, 20 nF, 200 nF, 2 µF, 20 µF. **Transistor Check:** NPN, PNP, hFE. **Protection:** Fuse and diode overload protected. **Size:** 6¼"H × 2⅞"W × 1¼"D. **Supplied With:** Battery, test leads and case.

776-2012. Model DMR-2012A..**EACH 63.51**

Model DMR-2322A

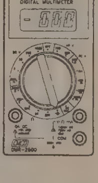


- 10 M Ohm/Volt Large Oversize Display
- 3½ Digit LCD Multimeter
- Fuse and Diode Overload Protected
- High Visibility Yellow Housing
- 11 Functions
- 45 Ranges
- Audible Continuity
- Test Capacitors, Transistors, Diodes
- 20 Amp AC/DC Ranges
- Shockproof Case
- 7½"H × 3½"W × 1½"D
- Auto Power Off
- Probes Slot Onto Case
- Display Boxed
- Complete with Battery, Test Leads and Case
- Logic Test, Transistor Test, Capacitor Test, Frequency Measurement

Specifications. DC Volt Range: 200 mV, 2 V, 20 V, 200 V, 1000 V. **AC Volt Range:** 200 mV, 2 V, 20 V, 200 V, 750 V. **DC Amps:** 200 mA, 2 mA, 20 mA, 200 mA, 20 A. **AC Amps:** 200 mA, 2 mA, 20 mA, 200 mA, 20 A. **Resistance:** 200, 2 K, 20 K, 200 K, 2 M, 20 M. **Capacitance:** 2000 pF, 20 nF, 200 nF, 2 µF, 20 µF. **Freq.:** 20 KHZ, 200 KHZ. Supplied with ruggedized case and test leads.

776-2322. Model DMR-2322A..**EACH 86.56**

DMR-2500 Multitester



- DC Volts: 200 mV, 2 V, 20 V, 200 V, 1000 V
- AC Volts: 200 V, 750 V
- DC Current: 200 µA, 2 mA, 20 mA, 200 mA, 2000 mA, 10 A
- Resistance: 200, 2 K, 20 K, 200 K, 2000 K

Specifications. 6 Functions. 19 Ranges. 10 Amp DC range. Diode test. Shockproof case. Low battery indication. Fuse and diode overload protected. High surge voltage protection. 5½"H × 2¾"W × 1"D. Complete with battery, instruction manual and probes. Display boxed.

776-2500. Model DMR-2500..**EACH 41.00**

RES-5A Resistance Decade Box

Display Boxed

- Universal Binding Posts
- Easy to Read Slide Switch Operation

Range: From 1 Ohm to 11,111,110 Ohms in 1 Ohm increments. **Accuracy:** ±1% Tolerance Minimum. **Power Capacity:** ½ Watt.

776-1175. RES-5A..**EACH 33.86**

SLM-120 Sound Pressure Level Meter

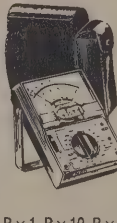
— NEW —

- Easy to Operate
- Accurate Readout
- High Reliability Circuitry for Durability
- Battery Check
- Calibration Adjustment for Accurate Readings
- Designed to JIS dBA Specification (ANSI)
- Range: 40-80 dB, 80-120 dB
- Microphone: Condenser Type Element
- Battery: Single 9 V
- Dimensions: 6¼" × 2½" × 1½"
- Includes Instruction Manual and Carrying Case

Ambient noise measurement — adapted to dBA readings, and suitable fore measurement of work environment, traffic noise conditions, PA trumpet horns, alarms, sirens, etc.

776-0120. SLM-120..**EACH 79.99**

F-72 Multitester

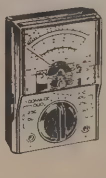


- Better Overload Protection
- Battery Tester
- With Carrying Case and Buzzer
- Includes Test Leads and Batteries
- Adjustable Handle
- Mirror-Back Scale
- 23 Ranges

Specifications. 20 k ohms/vdc. **DC V:** 0, 2.5, 10, 50, 250, 1000 V. **AC V:** 0, 10, 50, 250, 1000 V. **DC Current:** 0, 5, 50, 500 mA, 10 A on separate jack. **Resistance:** R × 1, R × 10, R × 1K (Center 50 ohm). **Decibel:** –8 dB to +62 dB on all AC V range. **Battery Test:** 1.5 V size AA; internal loading resistance and current 75 ohm/20 mA; 9 V Std.; internal loading resistance and current 450 ohm/20 mA. **Audio Power Level:** –8 dB to +22 dB on a 600 3° arc of scale length. **Batteries:** 1.5 V AA × 2 pcs. **Protection:** 1 A/250 V fuse and silicon double diode. MT-20-BC made of high impact plastic and phenolic PCB. 5¼"H × 3½"W × 1½"D. **Weight:** 1.2 lbs.

776-0020. Model F-72..**EACH 29.50**

MT-2 12-Range VOM

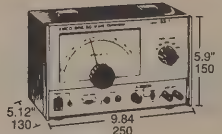


- 16 Ranges — 5 Function
- Mirror-Back Scale
- Meter Overload Protection
- Includes Test Leads and Battery
- Excellent for Security or Home Use
- Used in Engineering and Field Service

Specifications. DC Volts: 0-10, 50, 250, 500 V. **AC Volts:** 0-10, 50, 250, 500 V. **DC Current:** 250 mA. **Resistance:** 10 K Ohm, 1 Meg Ohm. **Decibels:** –20 to +56 dB. **Accuracy:** DC +3% (of full scale). **Sensitivity:** 2000 Ohm/Volt DC and AC. **Battery:** 1.5 V (UM-3/AA size). **Size (H × W × D):** 3⅝" × 2⅜" × 1⅛". **Weight.:** 3 oz.

776-0200. Model MT-2..**EACH 12.65**

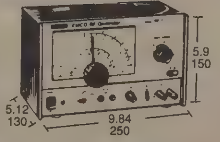
GEN-SS-1 Solid State Sine/Square Wave Generator



Provides sine and square wave outputs simultaneously while covering 20 Hz to 2 MHz in 5 bands. **Specifications. Square Wave:** 20 Hz-200 KHz. **Sine Wave:** 20 Hz to 2 MHz. **Output Voltage:** sine wave 0-7.5 volts rms into high impedance output, 0-6.5 volts into 600 ohms. **Square Wave:** 0-10 volts p-p into high impedance, positive direction with ground zero. **Calibration Accuracy:** 3% except for 5%, 20 Hz to 100 Hz and 1 MHz to 2 MHz. **Maximum Distortion Across Audio Range:** 0.25% rise time at 20 KHz, less than 0.1 microseconds. **Power Requirements:** 105-132 volts. 50/60 Hz, 10 VA.

776-0379. Model GEN-SS-1..**EACH 200.00**

RF-1 Generator



RF Signal Generator is invaluable for aligning TV sets, AM-FM radios and other communication equipment. The vernier control allows you to set RF frequencies accurately, ranging from 100 KHz to 150 MHz in 6 bands. **Specifications. Frequency Range:** A — 100 KHz to 300 KHz, B — 300 KHz to 1000 KHz; C — 1 MHz to 3.2 MHz; D — 3 MHz to 10 MHz; E — 10 MHz to 35 MHz; F — 32 MHz to 150 MHz; (Up to 450 MHz on third harmonic). **Frequency Accuracy:** ±3%. **RF Output:** 100 mV. **Modulation:** Internal — 1 KHz; External — 50 Hz to 20 KHZ, at less than 1 volt RMS. **Audio Output:** 1 KHz, Max. 1 V RMS. **Power Requirement:** 100 V or 220 AC; 50/60 Hz. **Weight:** 2.5kg. **Dim.:** 150H × 250W × 130D mm.

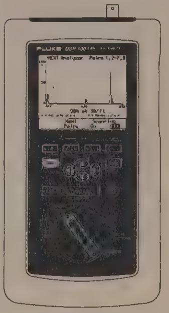
DSP-100 Cable Meter

— NEW —

The First Digital Cat 5 Tester with Unique Diagnostic Capabilities



Certify your category 5 UTP cabling installation with confidence. The Fluke DSP-100 is a rugged, handheld field tester that uses a revolutionary digital technology to give you a powerful combination of capabilities. Designed to meet the most stringent TIA Accuracy Level II specifications for all link types (Basic Link and Channel). This performance has been independently verified. Only Fluke's patented Time Domain Crosstalk (TDX™) Analyzer instantly pinpoints NEXT faults due to bad connectors, poor workmanship, or improper cable. The DSP-100 tests a 4-pair UTP cable from both ends in less than 17 seconds — faster and more completely than any other tester.

The Fluke DSP-100 uses a truly revolutionary test technique. To measure the critical parameter of Near-End Crosstalk (NEXT) between two pairs, the DSP-100 sends a pulse — a pulse that very closely resembles the signals transmitted on 100 Mbps local area networks — into one pair and captures the signal induced by this pulse on the other pairs. The captured signal is analyzed using the Digital Signal Processing algorithms to provide a very accurate picture of NEXT in both the frequency domain as well as the time domain. And since one pulse replaces hundreds of test frequencies, the DSP-100 is extremely fast without compromising accuracy!

Specifications. DC Loop Resistance: Verifies good ohmic connections. **Range:** 0 to 400 Ω. **Accuracy:** ±(0.5 Ω + 1% of reading). **Resolution:** 0.1 Ω. **Attenuation. Frequency Range:** 100 kHz to 105 MHz in 100 kHz steps size (range of test is determined by network and cable type). **Measurement Accuracy (Calculated Per TSB-67):** Better than ±1 dB over a range of 0 dB to 25 dB from 1 MHz to 100 MHz; Typically better than ±0.3 dB at 30 dB of attenuation from 1 MHz to 100 MHz. **Near End Crosstalk (NEXT). Frequency Range:** 100 kHz to 105 MHz in 100 kHz step size (range of test is determined by network and cable type). **Resolution:** 0.1 dB. **Range:** 0 to 30 dB. **Accuracy:** ±3 dB over the following ranges as defined by ISO Class D — 0 to 18 dB from 1 to 10 MHz, 0 to 15 dB from 10.1 to 20 MHz, 0 to 10 dB from 20.1 to 100 MHz. **Case:** High impact plastic with shock absorbing "Fluke Yellow" overmold. **Dimensions:** 9¼"L × 5" W × 3"D. **Weight:** 3 lbs., 1 oz. **Display:** Graphic LCD, 240 × 200 bit mapped, with back light. **Test Connections:** Shielded 8-pin modular connector (RJ45) and BNC. **Input Protection:** Protected against continuous telco voltages and 100 mA overcurrent. **Characteristic Impedance. Range:** Twisted pair cable — 70-180 Ω; Coax — 35-100 Ω. **Accuracy:** ±(5 Ω +5% Nom.-Measured.); ±(5 Ω +5% Nom.-Measured.). The accuracy of impedance measurements decreases as the difference between the expected value (nominal) and the measured value increases. **Length.** Link length and/or distance to a fault detected by Time Domain Reflectometry (TDR) pulse. The DSP-100 has a zero "dead zone". **Resolution:** Twisted pair cable — 0.1 m (1 ft.); Coax — 0.1 m (1 ft.). **Range:** Twisted pair cable — 0 to 100 m (328 ft.); Coax — 0 to 100 m (328 ft.). **Accuracy:** Twisted pair cable — ±(0.3 m (1 ft.) +2% of reading); Coax — ±(0.3 m (1 ft.) +2% of reading). **Range:** Twisted pair cable — 100 m to 760 m (2500 ft.); Coax — 100 to 1200 m (4000 ft.). **Accuracy:** Twisted pair cable — ±(0.3 m (1 ft.) +4% of reading); Coax — ±(0.3 m (1 ft.) +4% of reading). Accuracy specification excludes error in Nominal Velocity of Propagation (NVP). The DSP-100 offers the mode to "calibrate" the NVP of the cable under test.

652 LAN CableMeter

The 652 is the most comprehensive LAN cable testing, verification and certification tool on the market today. Now, with a single instrument, installers can test Ethernet, Token Ring, and ARCnet cabling in every nook and cranny of a network. Nothing stops the 652 because it uses traditional AA batteries. So you never have to wait for recharging.

The 652 is the only CableMeter designed to meet all the challenges of an installer's full day of work.

It provides a complete suite of tests; from wire mapping to noise and traffic measurements; from Near-End Crosstalk (NEXT) to identifying split pairs. It also offers full cable verification, certification, and documentation features. Results are compared to IEEE-802 and EIA/TIA 568 Commercial Building Telecommunications Wiring Standards and may be printed out for future reference. There's even an O'SCOPE mode that lets you view TDR pulses and reflections on an oscilloscope such as a Fluke ScopeMeter, for detailed analysis of cables having multiple faults.

Specifications. Cable Types. Unshielded Twisted Pair (UTP) — 10BaseT Level 3, 4, 5; and IBM Type 3 Level 3, 4, 5; IBM Type 1; Coaxial — 10Base2, RG58, RG58 Foam, RG59, RG59 Foam, RG62, 10Base5. Also allows two custom cable types with selection of characteristic impedance, nominal velocity of propagation (NVP), and BNC or RJ-45 (Ethernet or Token-Ring wired) connectors. **Display.** 64 character, four line LCD with backlight. **Measurements.** Length, wire map, attenuation, near-end crosstalk (NEXT), characteristic and termination impedance, noise and Ethernet traffic. **Autotest.** Automatically sequences through a series of cable measurements, compares results to both the IEEE-802 specifications and EIA/TIA 568 specifications, displays a Pass/Fail message along with audible tone and summarizes key cable parameters. Up to 400 autotest measurements can be saved in non-volatile memory and printed via the serial printer port. **Wire Map.** Detects correct and faulty pair wiring in cables with RJ-45 connectors. Indicates the following faults: opens, shorts, reversed paris, and crossed pairs. **Length.** A built-in TDR is used to make the measurement. **Range:** 6 m to 600 m (20 ft. to 2000 ft.) for UTP Cable; 6 m to 1200 m (20 ft. to 4000 ft.) for Coaxial Cable. **Accuracy:** ±1% + 0.6 m (2 ft.). **Resolution:** 1 m or 1 ft. **Display Units:** Meters or feet.

730-0652. Model 652	**EACH 2395.00**

650 LAN CableMeter

Have you been looking for a better way to troubleshoot LAN cable? The grab Fluke's compact, new 650 CableMeter. This easy-to-use handheld tool takes you directly to the source of network cabling problems so you can pinpoint and repair problems fast. In seconds, you can perform a simple pass/fail test to verify cable performance, or identify a particular cable as the culprit. The high-performance 650 is indispensable for anyone responsible for cable installation or on-going maintenance of a network. It tests standard or custom unshielded twisted pair (UTP) and coaxial wiring in both Ethernet and 4 Mbps Token-Ring LANs. Fluke's 650 CableMeter is as easy to learn as it is to use. All functions are selected with a rotary knob on the clean, simple face. With a twist of the knob you can test for faults, with another twist you can do wire mapping. You can also monitor Ethernet traffic and noise over time to locate intermittent problems. Don't let the 650's size and uncomplicated design fool you. This is one powerful instrument. It provides very specific diagnostic information, together with detailed cable performance analysis and certification of standard or custom cable types. It also features a replaceable battery so recharging doesn't keep you waiting. Feature for feature, you won't find a better way to locate network cabling problems than with Fluke's new 650 CableMeter.

Specifications. Measurements. Length, wire map, attenuation, near-end crosstalk (NEXT), characteristic and termination impedance, noise and Ethernet traffic. **Autotest.** Automatically sequences through a series of cable measurements, compares results to industry cable standards, displays a Pass/Fail message along with audible tone and summarizes key cable parameters. Up to 50 autotest measurements can be saved in non-volatile memory and printed via the serial printer port. **UTP Measurements:** Wire map, length, background noise, near-end crosstalk, attenuation, characteristic impedance and impedance anomalies. **Coaxial Measurements:** Length; background noise, characteristic impedance, termination resistance and impedance anomalies. **Length.** A built-in TDR is used to make this measurement. **Range:** 20 ft. to 2000 ft. or 6 m to 600 m for UTP Cable; 20 ft. to 4000 ft. or 6 m to 1200 m for Coaxial Cable. **Accuracy:** ±1% + 0.6 m (2 ft.). **Resolution:** 1 m or 1 ft. **Display Units:** Meters or feet. **Wire Map.** Detects correct and faulty pair wiring in Ethernet or Token-Ring cables with RJ-45 connectors. Indicates the following faults: opens, shorts, reversed pairs, and crossed pairs. **Near-End Crosstalk (NEXT).** Measures crosstalk between cable pairs in unshielded twisted pair cables. Near-end crosstalk of less than 20 dB is used to warn user of a possible split pair. **Range:** 0 dB to 40 dB, 5 MHz to 10 MHz in 100 kHz steps. **Accuracy:** ±2 dB. **Attenuation.** Measures attenuation of unshielded twisted pair cables. **Range:** 0 dB to 40 dB, 5 MHz to 10 MHz in 100 kHz steps. **Accuracy:** ±2 dB.

730-0650. Model 650	**EACH 1795.00**

Fluke 620 CableMeter

- **One Person Verifies Each Connection As He Goes**
- **Versatility to Test All LAN Cable Types**
  - **UTP, STP, FTP¹, Coax**
  - **Test Two, Three, or Four Wire Pairs in Twisted Pair Cables**
- **Detect Wiring Problems: Open, Short, Crossed-, Reversed-, Split Pair**
- **Locate Wiring/Connection Errors (Distance to the Open or Short)**
- **Measure Cable Length**
- **Ease-of-Use: Single Rotary Knob to Select the Test**
- **Portable, Long Battery Life (50 Hours)**
- **Best Price-Performance Ratio**

Included with the 620 CableMeter
- **A Carrying Case**
- **One UTP Category 5 Patch Cable, RJ45-RJ45 Straight Through, 4 Ft. in Length (EIA/TIA 4 Pair Cat 5)**
- **One RJ45F-RJ45F In-Line Coupler (Barrel Connector)**
- **One Cable Identifier for the Verification of the Wire Map and the Cable Routing (Cable Identifier #1)**
- **A Quick Reference Card (Explains Display Symbols and Menu Selections)**
- **An Operator Manual**
- **A Warranty Card (Registration Card)**

Physical Characteristics. Dimensions: 7.25" × 3.875" × 1.8" (18.4 cm × 9.8 cm × 4.6 cm). **Weight:** 12.5 oz. (354 g). **Batteries:** 1.5 V alkaline size AA.

610 LAN CableMapper

- **The One-Button Answer to Wire Mapping**
- **610 CableMapper, Determines UTP Termination Faults Per LAN Cabling Standard EIA/TIA 568 for Ethernet and Token Ring LANs**
- **Measures Near-End Crosstalk (NEXT) for Split Pair Identification**
- **Lightweight, Handheld Design for Portability**
- **Fault Codes and Cable Identifier Number Indicated Directly on Front Panel**
- **Bright LEDs Signify Pass (Green) or Fail (Red) for Each Pair**
- **Handy Carrying Case Organizes 610, Cable Identifiers and Manual**
- **Protective Holster**

The Fluke 610 LAN CableMapper is a low cost solution to LAN cable testing. It will find the most common problems such as opens, shorts, reverses, crossed pairs, and split pairs. The Cable Identifiers have a unique ID number which is displayed on the 610. This enables the 610 to distinguish one cable run from another. The 610 comes with Cable Identifier number 1. Optional Cable Identifiers are numbered 2-8 allowing the user to easily test and identify multiple cables.

Specifications. Cable Length: 0 to 122 m (0 to 400 ft.). Identifies opens, shorts, reversed pairs or crossed pairs, and other miswires. Split pair detection. Pairs are checked at 10 MHz and reported if Crosstalk exceeds 21 db ±3 dB. **Input Connector:** RJ-45. **Input Protection:** Inputs withstand telco ringing and loop voltages. Display alarms on overvoltage faults.

11=Fit will be loose.

80i-110s AC/DC Current Probe

The 80i-110s accurately reproduces current waveforms as they occur. Connect the clamp to a Fluke ScopeMeter® Test Tool or other waveform recording device like a Fluke CombiScope™ or Power Harmonics Analyzer, to clearly see distorted waveforms that result from non-linear loads such as computers, adjustable speed motor drive, and electronic ballasts for fluorescent lighting.

Electrical Specifications. Current Ranges: 0 to 10 A DC or AC Peak; 0 to 100 A DC or AC Peak. **Output Signals:** 10 A Range — 100 mV/A; 100 A Range — 10 mV/A. **Working Voltage (Clamp Jaws To Ground):** 600 V AC RMS On Installation Category II per IEC 1010-1 Circuits; 300 V AC RMS On Installation Category III per IEC 1010-1 Circuits. **Floating Voltage (Output Cable and Connector To Ground):** 600 V AC RMS On Installation Category II per IEC 1010 1 Circuits; 300 V AC RMS On Installation Category III per IEC 1010-1 Circuits.

Basic Accuracy (DC to 1 kHz)

Input Current DC Or AC Peak	Error (After Zero Check)	
	100 mV/A	10 mV/A
50 mA to 10 A	<3% of reading +50 mA	—
50 mA to 40 A	—	<4% of reading +50 mA
40 to 80 A	—	<12% of reading +50 mA
80 to 100 A	—	<15% of reading

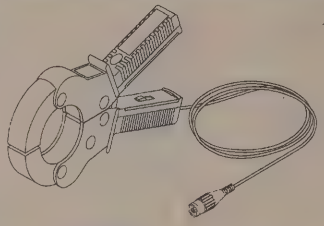
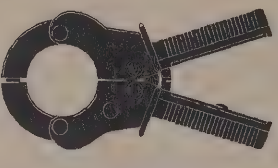
80i-500s and 80i-1000s Clamp-On AC Current Probes



80i-500S



80i-1000S

Precision Designed to Increase AC Current Accuracy in Oscilloscopes and Power Meters

- **AC Current Ranges: 80i-500s — 1 to 500 A AC RMS; 80i-1000s — 100 mA to 1000 A RMS Continuous**
- **Best Accuracy 2% Of Reading**
- **Usable Frequency Range (With Current Derating): 80i-500s — 5 Hz to 10 kHz; 80i-1000s — 5 Hz to 100 kHz**
- **Built-In Low Pass Filter (Eliminates High Frequency Noise)**
- **Minimal Amplitude And Phase Distortion**
- **Built-In Safety Features: 600 V RMS Rating At Input Jaws Output Cable and BNC Connector**

Specifications

Function	80i-500s	80i-1000s
AC Current Ranges	1 A to 500 A AC RMS (to 700 A RMS for max. of 10 minutes)	0.1 A to 1000 A, continuous (2000 A instantaneous peak)
Accuracy	100 A to 500 A, ±2% of reading; 20 A to 100 A, ±5% of reading; 1 A to 20 A, ±(5% of reading +0.3 A)	0.5 A to 1000 A, 2% of reading; 0.1 A to 10 A; 3% of reading ±100 mA
Usable Frequency Range (With Current Derating)	5 Hz to 10 kHz	5 Hz to 100 kHz
Working Voltage	600 V AC RMS clamp jaws to ground	600 V AC RMS clamp jaws to ground
Common Mode Voltage	600 V AC RMS at output cable and connector to ground	600 V DC or AC RMS at output cable and connector to ground
Maximum Conductor Diameter	1.18" (30 mm) (2 × 500 MCM THHN)	2.13" (54 mm) (2 × 500 MCM THHN)
Output Cable	63" (1.6 m) BNC termination; Cable and BNC rated to 600 V AC RMS for enhanced safety	63" (1.6 m) BNC termination; Cable and BNC rated to 600 V AC RMS for enhanced safety

Accurate current measurements are critical to resolving power quality problems in commercial and industrial power distribution systems. Fluke now offers two clamp-on AC current probes that boost the performance of any oscilloscope or voltage input device capable of millivolt measurements. When connected to an oscilloscope or other waveform recording tool, the 80i-1000s and new 80i-500s eliminate distortion and accurately reproduce current waveforms as they occur. Clearly see distorted waveforms that result from non-linear loads. Other current clamps, not designed for oscilloscopes, may add their own distortion over and above the actual distortion present in your power distribution system.

105B

The ScopeMeter® B test tool is the best handheld scope for rugged on-the-go applications. You can count on its 100 MHz and 5 GS/s sampling rate that insures excellent signal fidelity on repetitive signals. The new B version offers a 10X brighter display with an unequaled 4 hour battery life. The ScopeMeter® B test tool adds full video triggering for NTSC, PAL, SECAM, PAP/M and Non Interlaced standards. With the built-in line and frame selector and trigger delay you can now see it all. ScopeRecord™ is a new feature providing 30 K deep memory for extended waveform recording, and a time of day (real time) clock to pinpoint events. Characterize complete events like long machine cycles or complex pulse train activity. TrendPlot™ meter logging now has a time of day and date stamp. This versatile electronic chart recorder now helps to better identify measurement peaks and valleys for up to 40 days.

The ScopeMeter test tool at its best. Simultaneously take meter and scope readings with a single probe. Measures AC, AC+DC (to 5 MHz) and DC voltages in eight ranges to 600 Vrms (1700 V peak to peak). Measure resistance to 30 MΩ in seven ranges. With optional accessories measure current and temperature; TrendPlot™ to record intermittents and changes.

With the Measure Menu, one button access lets you select a set-up from 40 commonly-used measurements. Simply select a measurement and the automatic set-up does the rest. Continuous Autoset assures a stable, usable measurement on virtually any signal. It permits signal probing of a sequence of test points without touching the controls.

730-6020. Model 92B .... **EACH 1495.00**
730-6021. Model 96B .... **EACH 1795.00**

When you take the ScopeMeter® B from the box there is nothing extra to buy to get going. The scope and meter probe accessories you need, the battery charger and battery are in there too. The Fluke-105B includes FlukeView software, an interface cable and a carrying case. Store and recall up to 40 set-ups for quick configuration. Store and recall 20 waveforms for quick, accurate signal comparison. Store and recall 10 screens for a quick snapshot of exactly how that signal looked. All 70 storage locations can be loaded to a PC with the PM9080 interface cable and FlukeView software.

The ScopeMeter test tools are famous for versatility and the B version is no exception. Amps, Watts, Power, Temperature, RPM, % Duty Cycle, Phase and Pulse Width are just a few of the scaled measurements available.

Add PC power to the ScopeMeter test tool with FlukeView™. FlukeView™ ScopeMeter software runs on a PC and communicates with the ScopeMeter via the optional RS-232 serial interface. Versions for DOS and Windows, supports all models (screen capture only for the model 92B). Print out complete screens directly or store graphical data for use in word processors or for spreadsheets. Create a library of waveforms for reference and comparison. Suited for making floating measurements on 600 Vrms industrial power lines. EN61010-1 CAT III compliant and UL listed for 600 V Cat. III measurement. **Size:** 65 × 140 × 275 mm (2.5 × 5.5 × 10.8 inches). **Weight:** 1.5 kg (3.3 lbs.). 3 year warranty.

80 Series Analog/Digital Multimeters

Model 83

Model 85

Model 87

High Performance Meters with 11 Functions and 40 Ranges for a Wide Variety of Electronic and Industrial Applications

- ► **MIN MAX AVERAGE Recording Mode with Min Max Alert™**
- ► **Frequency, Duty Cycle and Capacitance Measurements**
- ► **1000 V Input Protection; Input Alert™ Detects Wrong Input Jack Connections**
- ► **3³/₄ Digit, 4000 Count Display Updates 4 Times Per Second, Analog Display Updates 40 Times Per Second**
- ► **4¹/₂ Digit Mode, 1 ms Peak Hold, Back Lit Display and True RMS Measurements (87 Only)**
- ► **Touch Hold® and Relative Modes**
- ► **Splash Proof and Dust Proof Case; EMI Shielded**
- ► **Protective Holster with Flex-Stand™**
- ► **Safety-Designed Test Lead Set**

The Fluke 80 Series (83, 85, and 87) is a family of versatile analog/digital multimeters with an impressive range of capabilities, including frequency, duty cycle and capacitance measurement. Designed for electronic as well as industrial applications, the 80 Series features durable construction and several unique safety features.

MIN MAX AVERAGE Recording Mode With Min Max Alert™
Stores the highest, lowest, and average of all readings, allowing you to monitor a signal for seconds or days. Selectable response times allow you to specify the time required to sense changes. Min Max Alert gives an audible tone for readings above or below previous minimums or maximums.

Touch Hold® and Relative Modes
Touch Hold captures the measurement, beeps and locks it on the digital display until you're ready to view it. It automatically updates with each new measurement. The Relative Mode remembers a reading and shows the change (difference) between it and any readings that follow.

Frequency, Duty Cycle and Capacitance Measurements
Fluke 80 Series meters have a counter for frequency measurements from 0.5 Hz to 200 kHz, and duty cycle measurements from 0.1% to 99.9% of cycle. All three meters measure capacitance from 10 pF to 5 µF. Larger value capacitors may be measured using the analog display in the resistance mode.

Input Alert and Overload Protection
Input Alert™ provides an audible warning if the input jack connections are not correct for the measurement selected. This reduces the risk of damage to the equipment being tested and to the meter. Fluke 80 Series meters also provide 1,000 volt input protection in both ohms and diode test.

Fast 3³/₄-digit, 4000 Count Digital Display, High Resolution Analog Display
Digital display updates 4 times/second. For changing or unstable signals, the 87 features a high-resolution analog pointer; the 83 and 85 use an analog bargraph. The 83 and 85 also feature Zoom Mode for higher resolution analog readings. Analog displays update 40 times per second.

4¹/₂ Digit Mode, 1 ms Peak Hold, True RMS, Back-Lit Display (87 Only)
The Fluke 87 is a true-rms meter, and offers a 4¹/₂ digit, 19,999 count high resolution mode, plus 1 ms Peak Min Max hold. The back lit display assures readability in poorly lit settings. Light shuts off automatically after 68 seconds, prolonging battery life.

Specifications. Rugged, Sealed Construction. Splash proof and dust proof case and a specially designed protective holster protect the meter even under harsh operating conditions. All units are sealed and EMI shielded. **Standard Equipment.** Every meter comes packaged with a yellow protective holster complete with Flex-Stand™ safety-designed test leads, 9 V battery (installed), manual and operator guide. **Options/Accessories.** A dark grey holster with Flex-Stand™ is available. The full line of Fluke measurement accessories is compatible with the 80 Series. **Battery Life:** 500 hours typical (alkaline). **Three Year Warranty:** One year calibration interval. **Size:** 1.25"H × 3.41"W × 7.35"L (32 mmH × 87 mmW × 187 mmL). **Weight:** 12.5 oz. (0.36 kg).

4¹/₂ Digit Handheld DMMs

- ► **True-RMS AC Voltage and Current Measurement**
- ► **Audible/Visual Continuity Tests**
- ► **Relative Reference (Offset)**
- ► **Low-Power Ohms on all Resistance Ranges**
- ► **Constant-Current Diode Test Mode**
- ► **Measures Resistance to 300 M**
- ► **Model 8060A — Frequency and dB Measurements**
- ► **UL 1244 Listed**

Model 8060A. The 8060A 4¹/₂ digit handheld DMM offers more measurement capabilities than most bench or portable models. This microcomputer-based unit provides unique features never before available in a small low-cost DMM, features like: dB and Frequency. Accuracy measurement of the dB gain or loss of amplifiers, filters, or attenuators in a direct dB readout. Rel dB measurement when used with the relative function. Precision frequency measurement. **Relative Reference.** The microcomputer allows user to automatically subtract lead resistance when measuring ohms, and this displays only the difference between a stored reference value and a measured value — even if rate was changed between reading. Works in all functions and ranges. Ideal for use in dB and frequency measurements. **Automatic MΩ Range Selection.** Front panel offers one manually-selectable position above 200 KΩ. In that position, the appropriate range — 2 MΩ, 20 MΩ, or 300 MΩ — is automatically selected. **True-RMS AC.** Provides accurate true-RMS AC measurements on non-sinusoidal waveforms and sine waves. **Special Annunciators.** Annunciator symbols appear in the display to remind user which measurement function has been selected. These symbols indicate relative, continuity/diode, dB, and frequency functions as well as low battery and overload conditions. In addition to these features, the 8060A is designed with overload protection and a rugged case with safety-engineered components for excellent precision performance. **Basic DC Accuracy:** 0.04% rdg + 2 digit. **Dimensions:** 1.8 × 3.4 × 7.1" (45 × 86 × 180 mm). **Weight:** 0.90 lbs. (0.41 kg). Comes with Y8132 test leads, 9 V battery, spare fuse, and operator's manual. One year warranty with guaranteed calibration.

730-8060.	Model 8060A	**EACH 459.00**

Model 8062A. The 8062A 4¹/₂ digit handheld DMM offers more measurement capabilities than most bench or portable models. This microcomputer-based unit provides unique features never before available in a small low-cost DMM, features like: Relative Reference. The microcomputer allows user to automatically subtract lead resistance when measuring ohms and then displays only the difference between a stored reference value and a measured value — even if rate was changed between reading. Works in all functions and ranges. Ideal for use in dB and frequency measurements. **Automatic MΩ Range Selection.** Front panel offers one manually-selectable position above 200 k. In that position, the appropriate range — 2 MΩ, 20 MΩ, or 300 MΩ — is automatically selected. **True-RMS AC.** Provides accurate true-RMS AC measurements on non-sinusoidal waveforms and sine waves. **Special Annunciators.** Annunciator symbols appear in the display to remind user which measurement function has been selected. These symbols indicate relative and continuity/diode functions, as well as low battery and overload conditions. In addition to these features, the 8062A is designed with overload protection and a rugged case with safety-engineered components for excellent precision performance. **Basic DC Accuracy:** 0.05% rdg + 2 digits. **Dimensions:** 1.8 × 3.4 × 7.1" (45 × 86 × 180 mm). **Weight:** 0.90 lbs (0.41 kg). Comes with Y8132 test leads, 9V battery, spare fuse and operator's manual. 1-yr. warranty and guaranteed calibration.

25/27 Analog/Digital Multimeters

- ► **Survives 6 kV Transients on 660V Major AC Feeders**
- ► **High Performance**
- ► **Superior Shielding Against EMI**
- ► **Operates from–15° to +55°C, 95% Relative Humidity**
- ► **UL 1244 Listed**

The Fluke 25 and 27 3¹/₂ digit handheld multimeters combine precision digital and analog measurement capabilities with ruggedness and durability. O-ring sealed case withstands water, contaminants, and chemicals under the harshest conditions. A separate sealed battery/fuse door allows access without interrupting the primary case seal. **Other Features Include:** 3200-Count Digital Display: Better accuracy and resolution than a conventional 3¹/₂ digit DMM. The high contrast LCD with wide viewing angle updates twice every second. **31-Segment Analog Bar Graph:** Makes measurements such as peaking, nulling, zero adjustments, and capacitor checking. Updates ten times faster than digital readout. Touch Hold™. Allows automatic measurements while watching probes and circuit. Meter captures the measurement, beeps, and locks it in display until user is ready to view it. Will automatically update each new measurement. **Min-Max and Resistive Modes (Model 27 only):** Min-Max stores the highest and lowest digital readings to allow user to monitor a signal for a few seconds or days. Relative remembers a reading and displays the difference between it and any following readings. **Autoranging:** instantly selects the proper range. Optional manual ranging included. **Audible Continuity/Diode Test:** Quickly check wiring, diode, and transistor without looking at display. Low frequency (1500Hz) beeper. **Safety-Designed:** Overload protection, high-energy fuses, fused 10 A range, non-metallic case and bail. All voltage inputs meet the power line surge tests for major feeders as defined in IEEE-587-1980, Category B. Offered in a choice of dark charcoal grey or safety yellow. Operates on a standard 9 V battery which yields a life of over 1000 hours. Meets military stock, vibration, and water-resistance requirements. Each meter includes a pair of safety-designed TL70 right-angle test leads, 2 insulated alligator clips, spare fuse, 9 V battery, and operator's manual. **Optional Accessories.** Type C20 heavy-duty hard plastic case features a carrying handle, operating guide decal, and test lead storage. Type C25 padded soft case has 2 storage pockets and a water-resistant zipper. **Specifications. Basic Accuracy (% of reading + number of digits):** DCV — 0.1% + 1; ACV — 0.5% + 3; OHMs — 0.2% + 1; DC Current — 0.75% + 2%; AC Current — 1.5% + 2. **AC/DC Volt:** 100 µV to 1000 V. **AC Response:** 30 kHz. **AC/DC Current:** 0.1 µA. **Resistance:** 0.1 to 32 M; up to 10,000 M with conductance. **Dimensions:** 2 × 3.75 × 8" (56 × 95 × 203 mm). **Weight:** 1.6 lbs. (0.75 kg). Two-year warranty; one-year calibration.

Listed

Economical, Easy-To-Use DMM; Ideal for Basic Electronic Testing.

- ► 4000 Count Digital Display
- ► V-Chek™
- ► Automatic Readings of Volts AC and DC
- ► Ohms
- ► Continuity Beeper
- ► Sleep Mode to Conserve Battery
- ► Min./Max. with Time Stamp
- ► Continuity Capture™
- ► 4 Ranges of Capacitance
- ► TL75 Test Leads Included with Meter
- ► Battery Life: Alkaline, 650 Hours Continuous, Sleep Mode
- ► Two Year Warranty

The same great functionality of Fluke's economical Model 12, now with an easy-to-use rotary dial for first level electronic and electrical troubleshooting. The compact design and rotary dial offers one-handed operation. **Specifications. DC Volts:** Range and resolution — 4.000 V, 40.00 V, 400.0 V, 600 V; Best accuracy — 0.9 +1. **AC Volts:** Range and resolution — 4.000 V, 40.00 V, 400.0 V, 600 V; Best accuracy — 1.9 +3. **Ohms:** Range and resolution — 400.0 Ω, 4.000 kΩ, 40.00 kΩ, 4.000 MΩ; Best accuracy — 0.9 +1. **Capacitance:** Range and resolution — 1.00 mF, 10.00 mF, 100.0, mF, 1000 mF, 10000 mF; Best accuracy — 1.9 +2.

Fiber Optic — NEW — Test Equipment

CLASS I LED PRODUCT

Test Fiber Optic Cable with Your Digital Multimeter.

FOM

FOS 850/1300

- ► The Small FOM Plugs into Your DMM and Makes Testing in Tight Spaces Easy
- ► A Variety of Light Sources (FOS 850, FOS 1300, and FOS 850/1300) and Patch Cords (ST to ST, ST to FC, ST to SC, ST to SMA) Let You Get Just What You Need for Testing Different Cable Types and Lengths
- ► Highly Accurate Readings Mean Less Work, Less Repeated Testing
- ► Input Connector: Fixed ST
- ► Battery Life: 16 Hours Minimum, 9 V Alkaline
- ► LED Low Battery Indicator
- ► Operating Temperature: 0°C to +40°C (32°F to +104°F)
- ► Storage Temperature: –20°C to +70°C (–4°F to +158°F)

Model FOM

Specifications. Output: 1 mV per 1 dB. **Application Range:** 800-1600 nm. **Acceptable Fiber Types:** 9/125 to 100/140 µm. **Operating Range:** +3 to –50 dBm. **Absolute Accuracy:** ±0.25 dB. **Relative Accuracy:** ±0.15 dB. **Repeatability:** ±0.04 dB. **Operating Temperature/RH:** 0°C to 40°C (32°F to 104°F) up to 75% RH.

Models FOS 850, FOS 1300, FOS 850/1300

Specifications. Wavelength: FOS 850 — 850 nm ±30 nm; FOS 1300 — 1300 nm –40/+50 nm; FOS 850/1300 — 850 nm/1300 nm ±30 nm/–40/+50 nm. **Output Power:** –20 dBm. **Connector:** ST. **Stability:** ±0.2 dB per 8 hours. **Battery Type:** 9 V alkaline NEDA 1604A or IEC 6LR61. **Battery Life:** 24 hours typical. **Operating Temperature/RH:** 0°C to 40°C (32°F to 104°F) up to 75% RH.

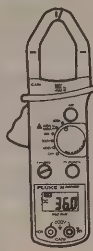
Fluke 36 Clamp Meter — NEW —



The Model 36 is similar in form factor to the Models 30 and 32, however it is about 20% longer and has a DC current zero adjust knob and an AC/DC selector button. It also has a slightly larger jaw to accommodate larger DC conductors. The Model 36 is a simple-to-use, rugged, safe, true-rms sensing AC/DC clamp meter. It is manual ranging and capable of measuring true-rms AC to 600 A with a crest factor of 3, and true-rms AC to 600 V. It measures up to 1000 ADC and 600 VDC, and measures up to 200 ohms with a continuity beeper. The Model 36 is shipped with test leads, soft carrying case, 9 V battery and manual.

The major benefits the Model 36 provides to the customer is its ability to service both AC and DC power systems with one tool, true-rms sensing, ruggedness, reliability, and safety. The Model 36 conforms to the IEC 1010 standard and has UL, CSA, and TUV certification and CE approval. The Model 36 will survive a 2 meter drop.

Specifications. Maximum Voltage Between Any Terminal and Earth Ground: 600 Vrms. **Battery Type:** 9 V, NEDA 1604 or IEC 6F22. **Battery Life:** 60 hours, alkaline — has sleep mode to conserve battery. **Size:** 9.8" × 3.75" × 1.77" (H × W × L). **Safety/Approvals:** Submitted for approval to UL1244, CSA C22.2 #231, VDE 0411, and the EMC directive.

Measurement Specifications. 45 Hz-400 Hz bandwidth. **AC Current. Range:** 600 A and 200 A. **Accuracy:** At 600 A — 10-600 A, 2% Rdg + 3 dgts; At 200 A — .5-200 A, 2% Rdg + 3 dgts. **Crest Factor:** ≤3. **DC Current. Range:** 1000 A and 200 A. **Accuracy:** At 1000 A — 0-1000 A, 1.5% Rdg + 3 dgts; At 200 A — 0-200 A, 1.5% Rdg + 3 dgts. **Overload Protection:** AC — 600 A, 1800 A peak; DC — 1000 A; ≤3 crest factor. **AC Volts. Range:** 200 V and 600 V. **Accuracy:** At 200 V — 1-200 V, 1.5% + 3 dgts; At 600 V — 10-600 V, 1.5% + dgts. **Crest Factor:** At 200 V — ≤3; At 600 V — <3,933 V pk. **DC Volts. Range:** 200 V and 600 V. **Accuracy:** At 200 V — 1.0% + 3 dgts; At 600 V — 1.0% + 3 dgts. **Overload Protection:** AC — 1200 Vrms, sine; DC — 1200 V. **Ohms. Range:** 200 Ω. **Accuracy:** 1.2% + 3 dgts. **Continuity Beeper. Overload Protection:** 660 Vrms continuous. Features Maximum Hold for measuring motor inrush current or maximum load on a circuit. Has DC current zero control for nulling out jaw/sensor offset.

30 Series-Current Master™

Rugged, Easy-to-Use, True-RMS Current Master — "For the True Measure of Your Current Problems".

33

31

C30 Holster Included

Models 31 and 33

- ► True-RMS Current Measurement for Testing Non-Linear and Traditional Loads
- ► Frequency Measurement (Hz)
- ► Hand Guard — For Prevention of Accidental Contact with Conductors
- ► Display Hold
- ► Combination Digital/Analog Display
- ► Power-Up Self Test — Verifies Proper Functioning and Estimates Battery Life
- ► Beeper Provides Audible Feedback
- ► Clip On Holster
- ► Auto and Manual Ranging

33 Only

- ► Crest — Instantaneous Peak Current Readings
- ► Smooth™: 3 Second Running Average of RMS Current or Frequency
- ► Min/Max — Records Maximum, Minimum, and Average Frequency or RMS Current

Both the Fluke 31 and 33 offer a comprehensive set of features for troubleshooting current problems including manual and autorange, display hold, sleep mode (for battery conservation) and a power-up self test. A combination analog/digital display includes real-time current, even while reading frequency or in the hold mode. All of these functions are self-contained in these easy-to-use, handheld Current Masters. A protective holster then can be quickly attached to a work belt included with each unit.

Models 30 and 32 Clamp Meters

Model 30

Model 32

- ► True-RMS Measurement for Accurate Readings of Non-Linear Loads (Model 32)
- ► Average AC Responding Measurements (Model 30)
- ► Measures up to 400 A AC, 600 V AC, 200 Ω
- ► Meets UL, CSA and TÜV Certification Standards (Pending for Model 32) and Conforms to the IEC 1010 Safety Standard
- ► Rugged Enough to Take a Drop from a Six-Foot Ladder
- ► Display Hold Captures Readings in Difficult to Reach Areas for Later Viewing
- ► Easy-to-Read 31/2 Digit 2000 Count Digital Display
- ► Manual Ranging for Repetitive Measurements
- ► Continuity Beeper
- ► Protective Soft Carrying Case and Fluke Hard Point™ TL 75 Test Leads Included

The Fluke Models 30 and 32 Clamp Meters are rugged, self contained, general purpose clamp meters that measure up to your tough standards at a basic price. Use the Models 30 and 32 to measure AC current, AC volts, ohms, and continuity for troubleshooting commercial and residential electrical and HVAC systems. You can view the results instantly on the easy-to-read digital display.

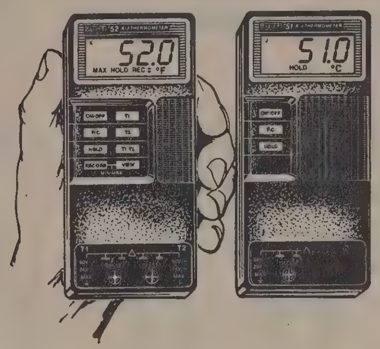
- ► 2.9% Basic AC Volts Accuracy
- ► 1.5% Basic Ohms Accuracy
- ► Fast Continuity Beeper
- ► Diode Test
- ► Sleep Mode
- ► Two-Year Warranty

Model 10. The Model 10 is the simplest and lowest cost model. It has the core set of features to locate the vast majority of hard faults and do first-round checks. The Model 10 will appeal to the first time user, corporate equipment specifier and the price-sensitive buyer.

739-0010. Model 10 .... **EACH 69.95**

Accessories. Accessories planned for the Series 10 product consist of a holster with tilt-stand and padded soft case. A wide range of Fluke test leads and temperature measurement devices are compatible with the new family.

50 Series Thermometers



FLUKE 51 Single Point Thermometer

Offers high accuracy. 0.1°C resolution, high repeatability, and low thermal "lurch." Features include digital noise filter, automatic 2-second diagnostic self-test, Fahrenheit/Celsius conversion, and display freeze function. All functions are pushbutton activated. Operates on a standard 9 V battery (included) — 1200 hours of life. Accepts any K-Type or J-Type thermocouple with a standard mini-connector plug. **Accuracy:** K-Type — +(0.1% rdg. + 0.7°C or 1.3°F); J-Type — (0.1% rdg. + 0.8°C or 1.4°F). **Reading Rate:** 1 second. Comes with a Type 80PK-1 bead probe.

730-0051. Model 51 .... **EACH 149.00**

FLUKE 52 Dual Point Thermometer

Offers the same great performance and features as the Model 51 plus dual-point or differential measurements, scanning and Min./Max. storage capabilities, and selectable high or low resolution readouts. **Accuracy:** K-Type — + (0.1% T1-T2 rdg. + 1.0°C or 1.8°F); J-Type — + (0.1% T1-T2 rdg. + 1.2°C or 2.2°F). **Max. DCMV:** 1 V. **Reading Rate:** 2 thermocouples — 1.7 seconds. Comes with 2 Type 80PK-1 bead probes.

80PK-5A Stainless Steel Piercing Probe. FDA Approved. Similar to 80PK-2A.

730-8005. Type 80PK-5A .... **EACH 58.00**

80PK-6A Exposed Probe. Exposed bead attached to 6-inch sheath, designed for general purpose, air, and gas measurements. **Restrictions:** The 304 stainless steel shaft cannot be exposed to halides or sulfides, or reducing to atmospheres or a vacuum. **Measurement Range:** –196°C to 816°C (–320°F to 1500°F). **Maximum Temperature:** Cable — 105°C (220°F); Handle — 125°C (257°F).

730-8006. Type 80PK-6A .... **EACH 65.00**

80PK-7 Industrial Surface Probe. Performs surface measurements in rugged environments over a wide temperature range. **Measurement Range:** –196°C to 600°C (–320°F to 1112°F). Made of 303 stainless steel, with a state-of-the-art ribbon sensor for extra durability. **Maximum Temperature:** Cable — 105°C (220°F); Handle — 125°C (275°F).

730-8017. Type 80PK-7 .... **EACH 189.00**

80PK-8 Pipe Clamp Temperature Probe. Produces fast and accurate temperature and super heat measurements of pipe surfaces from 1/4" (6.4mm) to 13/8" (34.9mm) diameter. **Measurement Range:** -29°C to 149°C (-20°F to 300°F). **Basic Accuracy:** ± 1.9°C (±3.4°F). **Maximum Temperature:** Cable — 105°C (220°F); Handle — 149°C (300°F).

730-8018. Type 80PK-8 .... **EACH 99.00**

80T-150U Universal Temperature Probe. Highly accurate P-N junction probe converts any DMM into a thermometer. For air, surface, and non-corrosive liquid measurement applications. **Isolation:** 350 VDC or peak AC. **Basic Accuracy:** +1°C (1.8°F), 0° to 100°C. **Range:** –50° to +150°C (–58° to +320°F).

730-8015. Type 80T-150U .... **EACH 120.00**

80TK Thermocouple Module. Use with a standard banana plug to convert any 10 M DMM into a thermometer. Uses K-type thermocouple with miniconnectors. Switch-selectable °C, °F, use with interchangeable probes described below (Type 80PK-1 Bead Probe included with this module). **Basic Accuracy:** +0.5% + 2°C (3.6°F)

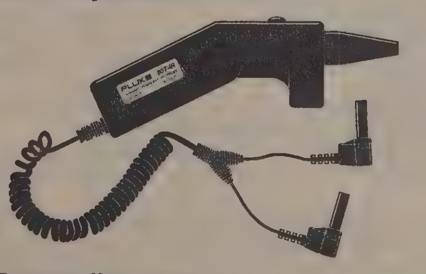
730-8079. Type 80TK .... **EACH 69.00**

Non-Contact Infrared Temperature Probe

Instantly measures temperature from –18°C to 260°C (0 to 500°F) without contact. Ideal for maintenance applications where object to be measured is hazardous to touch, is moving, easily contaminated, or difficult to reach. Highly repeatable readings. Senses and converts infrared energy emitted from an object into a signal readable on a DMM or Digital Thermometer display. Results displayed in °C or °F; 1 mV dc per °C or °F output. Automatic shut-off after 10 minutes of operation saves battery life. **Specifications. Temperature Range:** –18°C to 260°C (0°F to 500°F). **Accuracy:** ±3% of reading or ±3°C (±5°F), whichever is greater, 18°C to 28°C (64°F to 82°F) ambient operating temperature. **Temperature Coefficient:** 0.2% of reading or ±0.2°C (±0.3°F), whichever is greater, change in accuracy per degree change in ambient temperature above 28°C (82°F) or below 18°C (64°F). **Response Time:** 1 second. **Emissivity:** fixed at .95. **Output:** Type-K thermocouple mini-connector. **Operating Temperature:** 0°C to 65°C (32°F to 150°F). **Resolution:** 1°C or °F. **Optical Resolution:** 4:1 distance to target ratio. **Power:** 9 V battery. **Size (L × W × H):** 180 mm × 30 mm × 50 mm (7.1" × 1.2" × 2"). **Weight:** 180 g (6.4 oz.). **Warranty:** 1 year. **Compatibility:** Any Type-K thermometer or other temperature measuring device that accepts Type K mini-connector inputs.

730-8019. Type 80PK-IR .... **EACH 159.00**

80T-IR Infrared Temperature Probe



- **Fast Non-Contact Temperature Measurements**
- **Ideal When Object to Measure is Moving, Hard to Reach, Hazardous to Touch, Or Easily Contaminated**
- **0 to 500°F (–18 to 260°C) Measurement Range**
- **Internal Selection Switch for °F or °C**
- **1 mV dc per °F or °C Output, Compatible With the Most Popular DMMs**

Specifications. Temperature Range: 0 to 500°F (–18 to 260°C). **Accuracy:** ±3% of reading or ±5%°F (±3°C), whichever is greater, at 64° to 82°F (18° to 28°C) ambient operating temperature. **Temperature Coefficient:** 0.2% of reading or ±0.3°F (±0.2°C), whichever is greater, change in accuracy per degree change in ambient temperature above 82°F (28°C) or below 64°F (18°C). **Response Time:** 1 second. **Repeatability:** 1% of reading. **Emissivity:** Fixed at 95%. **Analog Output:** 1 mV per degree F or C (switchable). **Operating Temperature:** 32°F to 150°F (0°C to 260°C). **Optical Resolution:** 4:1 distance to target ratio. **Size:** 1.5" (38 mm) W × 7" (178 mm) L. **Weight:** 10 oz. (286 g). **DMM Compatibility:** Any DMM with 10 MΩ input impedance, accepting .160" (4 mm) diameter safety-shrouded test leads.

730-8410. 80i-410.......................................EACH 179.00

D 80i-600A Clamp-On AC Current Probe
Measures AC current from 1 A to 600 A. Division ratio is 1000 to 1. Clamps on conductors to 5 cm (2") in diameter. **Accuracy:** ±2%, 50 Hz to 1 kHz, ±3% (typical) 30 Hz to 10 kHz.
730-8600. 80i-600A.......................................EACH 119.00

E 80i-1010 AC/DC Clamp-On Current Probe
Battery-powered Hall-effect clamp-on probe measures AC current to 700 A, DC current to 1000 A. Thumbwheel ZERO control compensates for residual core magnetism, improving the accuracy of DC measurements down to 1 A. Output is 1 mV per amp DC or AC. **Accuracy:** ±(2%,+ 1 A), 1 A to 100 A, DC to 62 Hz. Useable to 440 Hz.
730-1010. 80i-1010.......................................EACH 297.00

F 80J-10 Current Shunt
Allows measurement of AC or DC current with precision DMM (such as an 8050A or 8060A). Will pass 10 A continuously, 20 A for one minute. **Accuracy:** ±0.25% from DC to 10 kHz.
730-0810. 80J-10.......................................EACH 65.00

G 85RF High Frequency Probe
Converts 10 MΩ DMM into high frequency AC voltmeter. AC to DC conversion ratio is 1:1 over a range of 0.25 to 30 V rms. The probes DC output is calibrated to the rms value of a sinewave input. **Frequency Range:** 100 kHz to 500 MHz. **Accuracy:** ±0.5 dB above 0.5 V.
730-0085. 85RF.......................................EACH 99.00

H 80K-40 High Voltage Probe
Measures up to 40 kV DC or 28 kV rms AC. Division ratio is 1000 to 1. Has 1000 MΩ input resistance. **DC Accuracy:** ±1% from 20 kV to 30 kV, changes linearly from 1% at 30 kV to 2% at 40 kV, and from 1% at 20 kV to 2% at 1 kV. **AC Accuracy:** ±2.5% at 60 Hz. **WARNING:** To avoid damage or electric shock, use under dry conditions within the following ratings: low energy applications such as CRT supplies, 40 kV DC or AC peak; other applications 40 kV DC or AC peak in circuits where transient overvoltages (micro second transients) are limited to 80 kV peak.
730-8040. 80K-40.......................................EACH 119.00

J 80K-6 High Voltage Probe
Division ratio is 1000 to 1. Extends measurement capabilities to 6000 V DC or peak AC. **Accuracy:** ±1.0% DC; ±1% to 500 Hz AC, ±2% 500 Hz to 1 kHz AC. **WARNING:** To avoid damage or electric shock, use under dry conditions within the following ratings: low energy applications such as CRT supplies, 6 kV DC or AC peak; other applications 6 kV DC or AC peak in circuits where transient overvoltages (micro second transients) are limited to 16 kV peak.
730-8016. 80K-6.......................................EACH 65.00

Model 45

- **True-RMS for Voltage and Current**
- **Touch Hold®, Relative, Min/Max**
- **Compare Function (Hi/Lo/Pass)**
- **dB Function (21 Ref. Impedances)**
- **Diode Test**
- **Multi-Function Dual Display**
- **RS-232 Interface for PC Instrument Applications (Uses DB-9)**
- **1µV and 0.1µA Resolution**
- **Bright Vacuum Fluorescent Primary and Secondary Displays**
- **IEEE-488.2 Option Available for Remote Use and Control of Unit**
- **Autoranging**
- **Frequency Counter to 1 MHz**
- **Audio Power**
- **Continuity**
- **Data Recorded in Lotus 123 Format**

Feature Rich 5-Digit 100,000 count DMM with unique multi-function dual display, allowing measurement of two signal parameters from a single test connection. The standard RS-232 interface allows measurement data to be filed, manipulated, printed or transmitted by modem. The print mode automatically formats measurement data for printing on an RS-232 printer. IEEE-488.2 option available factory installed or as kit for field installation. Does not require removal of RS-232. Calibration performed via either RS-232 or IEEE-488.2 without opening case. Provides digital read-out of decibels using front panel selection of any of twenty-one references from 2 ohms to 8000 ohms. For 2, 4, 8, and 16 ohms, the meter displays audio power in watts. Using front panel entry of upper and lower limits, unit shows both a Hi/Lo/Pass evaluation and measured value. Touch Hold® captures the measurement, beeps, and locks it on the display until you are ready to use it. It automatically updates with each new stable measurement. Relative mode remembers a reading and shows the change (difference) between it and any readings that follow. Min/Max records the highest and lowest values measured. Either can be displayed at any time. Extended three year warranty option available. **Specifications. Display Counts At Full Range:** 2.5 readings/second (slow) 99,999; 5 readings/second (medium) 30,000; 20 readings/second (fast) 3,000. **Resolution:** DC volts — 1 µV; AC volts — 1 µV; Ohms — 1 mOhms; DC Amps — 100 nA; Frequency — 10 MHz. **Basic Accuracy (Given as ±% of Reading + Number of Least Significant Digits):** DC volts — .02% + 2; AC volts — .2% +2; Ohms — .05% + 2; DC Amps — .05% + 10; Frequency — .05% + 1. One Year Warranty. **RS-232 Baud Rate:** 300, 600, 1200, 2400, 4800 and 9600; Odd, even or no parity; one stop bit, 8 data bits. **Size:** 3.67 in. × 8.50 × 11.27 in. **Weight:** 5.2 lb; with battery 7.0 lb. Includes operators manual, quick reference guide, line cord, test leads.

Interchangeable Test Lead Accessories
The best meter in the world is no good if you can't make a proper test connection.

This group of interchangeable test lead accessories allows you to match a wide variety of clips and probes to make the most dependable test connections possible for your application.

TL24 and TL22 Interchangeable Test Leads

- 385 internal strands and superior strain relief provide flexibility to prevent kinks and bends in test leads.
- Silicone-insulated; won't crack from cold or melt from accidental contact with soldering iron.
- Safety-designed with double insulation for added protection.
- All metal on banana plugs is capped and shrouded to prevent accidental contact.
- Compatible with all meters accepting safety-shrouded, standard-sized banana plugs.

Test Probes and Clips

- Made from a combination of high quality steel and Polyamide plastic bodies for exceptional durability.
- Safety grip clips keep your hand a safe distance from test connection and are easy to use even when wearing gloves.

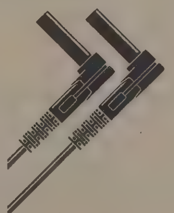
Test Lead Kit

Y8134 Shrouded Test Lead Kit
Interchangeable tips: 2 alligator clips, 2 spade lugs, 1 retractable hook tip, and 2 standard pointed tips. Shrouded banana plugs, C75 carrying case. Y8132 Test Leads included.
730-8134 ....EACH 36.00

Test Leads

TL22 Flexible Test Leads
Silicone-insulated test leads have superior flexibility and cold/heat resistance from –80°C to + 150°C (–112°F to +302°F). Shrouded right-angle connectors on both ends. 63" (1.6m). 1000V†, 10A maximum. One red, one black. Listed to UL Safety Standards UL 1244.
730-9022...............EACH 17.00



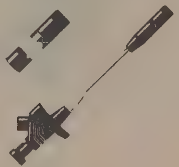
TL24 Flexible Test Leads — Straight
Same as TL22 except that one end has a shrouded, straight connector. One red and one black. Listed to UL Safety Standards UL 1244.
730-9024..............EACH 17.00

Clips

AC20 Industrial Test Clips
Safety-grip, spring-loaded alligator clips with a wide .750" (19 mm) jaw opening. 1000V†, 10A maximum. One red, one black. Recommended for use with TL22 Test Leads. Listed to UL Safety Standards UL 1244.
730-9020 ....EACH 22.00

AC80 Hook-Style Test Clips
Safety-grip, spring-loaded clips with hook grip. Hook size is .400" x .080" (10 mm x 2 mm). 1000V†, 3A maximum. One red, one black. Recommended for use with TL22 Test Leads. Listed to UL Safety Standards UL 1244.
730-9080...............EACH 17.00

AC83 Pin-Grabber Test Clips
Safety-grip, spring-loaded pin-grabber hooks for use with test points in close contact areas. Flexible shaft is 4" (100 mm), grabber extends 375" (9.5 mm). 1000V†, 1A maximum. One red, one black. Recommended for use with TL22 Test Leads. Listed to UL Safety Standards UL1244.
730-9083..............EACH 22.00



AC89 New Insulation Piercing Clip
Clamp-type test probe has spring-loaded stainless steel tip for piercing insulated wires. Pierces insulated wires from 30 AWG (.25 mm²) to 14 AWG (1.5 mm²). 250V, 5A. A single probe per package. Recommended for use with TL24 Test Leads. For use only with shrouded test leads having standard diameter banana plugs.
730-9089..............EACH 22.00

AC85A Large Jaw Alligator Clips
Fully insulated banana-jack alligator clips. All new construction with stronger teeth. Large .750" (19 mm) opening. 600V†, 10A maximum. One red, one black. Recommended for use with TL24 Test Leads. Listed to UL Safety Standards UL 1244.
730-9085..............EACH 11.00

AC70A Alligator Clips
Gold-plated beryllium copper spring contacts accept probe tips from .076" to .084" (1.93 mm to 2.13 mm). Standard jaw opening of .313" (8 mm). 1000V, 10A maximum. One red, one black.
730-0069 ....EACH 7.35

AC75 Banana Jack-Alligator Clips
Insulated alligator clips with banana jacks. Standard .313" (8 mm) jaw opening. Compatible with test leads Y8131 through Y8134 and TL24. 1000V, 10A maximum. Two red, two black.
730-0750 ....EACH 9.00

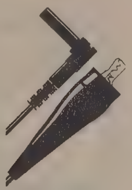
Test Probes

TP 20 Industrial Test Probes
Very sharp, extra-long .750" (19mm) stainless steel tip. For reaching deep test points or recessed components; will pierce insulation. 1000V†, 10A maximum. One red, one black. Recommended for use with TL24Test Leads. Listed to UL Safety Standards UL 1244.
730-9021................EACH 8.00

TP80 Electronic Test Probe
Designed for electronic probing of high density components or boards. IC insulator cap prevents shorting of adjacent IC legs. Probe has tapered .160" (4mm) steel tip. 1000V, 10A maximum. One red, one black. Recommended for use with TL 24 Test Leads.
730-9081..............EACH 13.00

Test Lead Sets

TL26 5-Way Multipoint Test Lead Set
Industry-standard for telecom and automotive applications. 5 ways to connect: 1) U-shaped nose for blade-shaped terminals; 2) Notched jaw for gripping screw heads, bare wire or terminals; 3) Serrated teeth for gripping threaded or wire-wrapped terminals; 4) Cluster of sharp needles for piercing small gauge (#22-#28 AWG) wires; 5) Large piercing needle for penetrating larger gauge wires. 60" (1.5m), silicone-insulated, useable from –80°C to +150°C (–112°F to +302°F). 250V, 10A maximum. One red, one black.
730-9026 ....EACH 35.00



TL28 2-Way Clip Test Lead Set
Solid, spring-loaded copper clips with a wide .50" (12.7mm) jaw opening and serrated teeth. Large piercing needle for penetrating larger gauge wires. 60" (1.5m), silicone-insulated, useable from –80°C to +150°C (–112°F to +302°F). 250V, 10A maximum. One red, one black.
730-9028 ....EACH 25.00

TL20 Industrial Test Lead Set
Suggested for Electrical/HVAC applications. Set consists of silicone-insulated TL22 Test Leads (one red and one black), stainless-steel TP20 Industrial Test Probes (one red, one black), and AC20 Industrial Alligator Clips (one red, one black). 1000V†, 10A maximum. Shrouded right-angle connectors. Listed to UL Safety Standards UL 1244.
730-0200...........EACH 42.00

TL75 Hard Point™ Test Lead Set
Comfort-grip probe with PVC-insulated leads. Super strong tips and new integral strain relief provide extended service life. Safety-shrouded, right-angled inputs. Not recommended for µV measurements. 48" (1.2 m). 1500 V, 10A. Replacement test leads for all Fluke DMMs except 8060A and 8062. Replaces TL70. Listed to UL Safety Standards UL 1244.
730-0701...EACH 9.00

Y8132 Detachable Probe Test Lead Set
Test leads have straight, shrouded banana plugs on both ends. Detachable probes with standard point tips. PVC-insulated, 48" (1.2m), 2000V, 10A maximum. One red, one black. Listed to UL Safety Standards UL 1244.
730-8132..............EACH 15.00

Y8140A Slim-Flex Test Lead Set
Slim, retractable, insulated needle-point test leads adjust to desired length by extending probe up to 2.5" (63.5mm). Needle points will pierce varnish and thin insulation. 48" (1.2m). Shrouded plugs, 1000V, 2A maximum. One red, one black. Factory Mutual Approved.
730-8140..............EACH 26.00

***Factory Mutual Approved †Heavy Industrial Rating, Overvoltage Category III (CAT III) per IEC 1010-1**

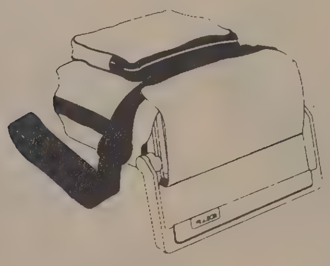
14

Carrying Cases

C12A Soft Case
Soft Sided, zippered, vinyl carrying case for all Series 10 meters. Inside pockets are designed to carry a meter, manual, and test leads. Clear pocket fits international business cards. Convenient hanging loop.
739-0105 .... **EACH 12.00**

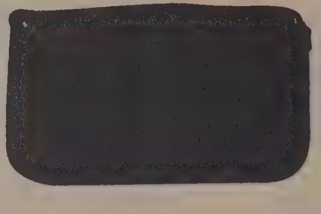
C25 Ruggedized Soft Case
For Fluke 25 or 27 or other Fluke handheld meters including Fluke 21, 23, 29, 50 or 70 Series meters in C70 Holster, or 80 Series meters in C81 Holster. Also for use with PV350 and PV500. Water resistant zipper, two inside pockets for test leads or small accessories.
730-2500 .... **EACH 21.00**

C90 Soft Case (not shown)
Similar to C25, but smaller and without accessory storage space or water resistant zipper. One internal pocket; will hold Fluke 21, 23, 29, 50 or 70 Series meters in a C70 holster. Not for Fluke 25, 27 or 80 Series.
730-0090 .... **EACH 16.00**



C40 Soft Case
For Fluke 45. Test lead storage in removable upper pouch, shoulder strap.
739-0042 .... **EACH 52.50**

C50 Compact Soft Case
Vinyl case with belt loop. For Fluke 21, 23, 29, 50 and 70 Series without holster. Holds meter, manual, and leads ready for testing. Use C25 when using meter with holster.
730-0050 .... **EACH 16.00**



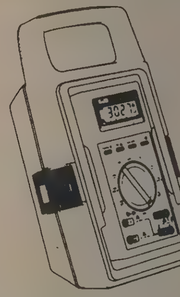
C75 Test Lead Case
Vinyl carrying case with two inside pockets. Designed to carry test leads, test probes or clips. Will not accommodate large probes or AC83 Test Clips. Size: 7.25" x 4.25" x 1.25" (190.5 mm x 108 mm x 31.8 mm).
730-0017 .... **EACH 6.00**

C10 Holster
Yellow, snap-on holster for all Series 10 meters absorbs shocks and protects the meter from rough handling. Built-in stand and hanger-loop allows for positioning meter. Molded hanger-loop can also be used as a stationary probe holder, allowing one hand to hold, operate, and contact test points simultaneously.
739-0103 .... **EACH 12.00**

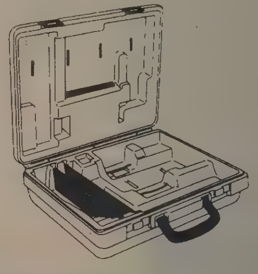
C30 Replacement Holster
For Fluke 31 and 33 clamp-meters. Protects meter display, and has a convenient belt clip for hands free carrying. Rugged velcro closure makes it easy to access meter even when wearing gloves.
739-0110 .... **EACH 15.75**

C70Y/G Series II Holster
For all 70 and 50 Series and 21, 23 and 29 meters. Choice of high-visibility yellow (C70Y) or grey (C70G). Easy-to-clean, vinyl, snap-on holster absorbs shocks and protects meter from rough handling. Unique Flex-Stand™ allows meter to hang, lean or stand for best viewing position. Belt hook and lead/probe storage on back. Replaces C70.
730-7000 .... **EACH 16.00**

C81Y/C81G Holster
For 80 Series DMMs. Yellow version (C81Y) is included with multimeter. Grey version (C81G) is optional. Easy-to-clean, vinyl, snap-on holster absorbs shocks and protects meter from rough handling. Lead and probe storage on back; includes unique Flex-Stand™ so meter can hang, lean or stand in best viewing position.
730-0081.C81G .... **EACH 16.00**
730-0082.C81Y .... **EACH 16.00**



C20 Hard Case
Heavy duty case for Fluke 25 and 27. Top cover snaps on back to serve as tilt stand. Carrying handle and storage compartment for test leads and small accessories are part of case.
730-0020 .... **EACH 30.00**

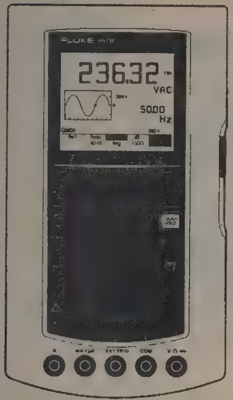


C100 Universal Carrying Case
For any Fluke handheld DMM or Fluke 50 Series thermometers and most Fluke DMM accessories. Tough polypropylene case provides protection against rough handling and bad weather.
730-1000 .... **EACH 31.50**

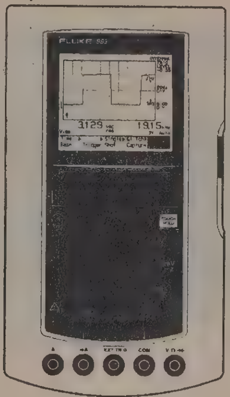
C800 Hard Storage Case (not shown)
Smaller than C100. Will hold 21, 23, 29, 70 Series and 80 Series in holsters. Double seal latches resist popping open if case is dropped. Includes compartments for holding accessories and manuals. Lid is detachable for easy storage.
730-0080 .... **EACH 28.00**

Fluke 23 and Fluke 87 Service Kits
Both of these fully-equipped service kits include all the tools you need to take on just about any job. And they'll save you 10% off the total cost of the separate tools. **Each Kit Includes:** Either the Fluke 23-2 or Fluke 87 digital multimeter. 80i-400 Clamp-on AC Current Probe, to measure current to 400 A. TL22 Flexible Test Leads (resistant to heat and cold). AC20 Industrial Test Clips (spring-loaded with extra wide jaw opening.) TP20 Industrial Test Probes (safety-designed, extra long to reach deep test points). Hard Shell DuraCase™ that holds meters in transit with right-angle test leads connected. Training and application booklets (87 Service Kit only) "Understanding Harmonics" video.
730-0060. Kit 23 .... **EACH 309.00**
730-0087. Kit 87 .... **EACH 469.00**
► **Full One Year Warranty On All Accessories.**

860 Series Graphical Multimeters



Model 867BE



Model 863E

Introducing the 860 Series of Graphical™ Multimeters, a whole new category of innovative handheld instruments. The GMM™ test tool family gives you state-of-the-art multimeter capabilities coupled with the graphical power of wave form display, trend plotting, in-circuit component testing and logic activity. You choose the best format for your application. Four meter display modes show you the measured information in different forms — to help you pinpoint more problems faster with a single handheld tool. You won't have to learn how to use your new GMM instrument — you'll already know. It has the familiar, intuitive feel of a Fluke DMM. Just glance at the simple rotary knob, and you instantly see which function is selected. If you want to see the latest major advance in handheld instruments, you need to look at Fluke's new Graphical Multimeter. **The 867B has a bright new display.**

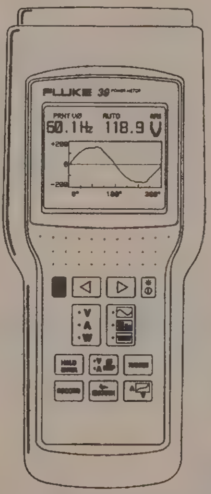
Fluke 39 Power Meter *— NEW —*



The Fluke 39 is designed specifically to meet the day-to-day needs of electricians and facilities maintenance groups. It brings together the relevant features (such as rms voltage and current, and power factor) of much more expensive and training-intensive tools into a handheld power meter that's so easy to use, you'll be up to speed in minutes. No more complex set-ups. With the Fluke 39 in hand, you can quickly zero in on power system problems — minimizing downtime and maximizing your system's efficiency.

For fast, accurate testing of your power distribution system — at a price that won't test your budget — nothing beats the new Fluke 39 Power Meter. At the touch of a key, see volts, amps and watts displayed in your choice of waveforms, bar graphs and numeric values. Count on true-rms readings for accurate measurements on all types of loads. Get a real-time view of changing circuit conditions as your display automatically updates three times per second. If you're testing power on three-phase, three-conductor systems with balanced loads, you can even skip the manual calculations. The Fluke 39 does them for you, displaying three-phase results from a single-phase measurement that's easy to make. And if you need to troubleshoot harmonics on non-linear loads, no test tool makes it easier. the 39 Power Meter comes with Fluke's handheld portability and rugged on-the-job reliability. A full one-year guarantee, and a price that gives you the best value in power meters today. Every day.

Specifications. Frequency Range, Fundamental Individual: 6-65 Hz and dc. **Minimum Input Levels:** 5 Vrms or 1 Arms. **Volts Measurements (True rms). Input Range:** 5.0 V to 600 Vrms (ac+dc). **Basic Accuracy:** rms (ac+dc) — ±(0.5% + 2 digits); peak, dc — ±(2% + 3 digits); crest factor — >3.0 below 300 V, 1.56 at 600 V. **Amps Measurements (True rms) (1 mV/A) Isolated Input. Input Range:** 1.00 mV (A) to 1000 mVrms (A) (ac+dc); 1.0 mV (A) to ±2000 mV (A) peak. **Basic Accuracy:** rms (ac+dc) — ±(0.5% + 3 digits) + probe specs; peak, dc — ±(2% + 4 digits) + probe specs; crest factor — >3.0 below 600 mV, 2.0 at 1000 mV. **Watts Measurements (Volts-Amps) (1 mV/A) Isolated Input. Range:** 0 W (VA) to 600 kW (kVA) average; 0 W (VA) to 2000 kW (kVA) peak. **Accuracy (ac + dc):** active W (VA) — ±(1% + 4 digits) + probe specs single phase. **Harmonics Measurement Accuracy (Harmonic Level >5% Using Smooth √ 20). Volts:** Fundamental to 13th Harmonic — ±(2% + 2 digits); At 31st Harmonic — ±(8% + 2 digits). **Amps or Watts:** Fundamental to 13th Harmonic — ±(3% + 3 digits) + probe specs; At 31st Harmonic: ±(8% + 3 digits) + probe specs. **Phase:** Fundamental — (±2 degrees) + probe specs. **Frequency Measurement Accuracy. Fundamental:** 6.0 Hz-99.9 Hz — ±0.3 Hz. **Other Measurement Features. Input Bandwidth:** DC — 6 Hz to 2.1 kHz (–0.5 dB). **Crest Factor (CF) Range:** 1.00 to 5.00 (±4%). Power Factor (PF): 0.00 to 1.00 (±0.02%). **Displacement Power Factor (DPF):** 0.00 to 1.00 (±0.04 at 0.30). **Phase Measurement Range:** –179 to 180 degrees. **K-Factor (KF) Range:** 1.0 to 30.0 (±10%).

General Specifications. Size: 9.2 × 3.9 × 2.5" (234 × 100 × 64 mm). **Weight:** 2.0 lbs. (1 kg). **Battery:** Type — 4 alkaline "C" cells ANSI/NEDA-144A, IEC-LR14 (supplied); Operating Time — 48 hours, typical (continuous, without backlight). **Temperature:** Operating — 0 to 50°C (32 to 122°F). **Humidity (Non-Condensing):** Operating — 0-30°C - 90%; 30-40°C - 75%; 40-50°C - 45%. **Display:** LCD with LED backlight, adjustable contrast. **Safety. Overload Protection:** Maximum voltage isolation to earth — 600 V from any terminal. **Protection Levels:** IEC 1010-1, Pollution Degree 2, Installation Category III, Material Group II, 600 V. Tested to UL 1244.

Fluke 41B Power Harmonics Analyzer *— NEW —*

Graphical Solutions

Waveform display is ideal for tracking down harmonics problems; waveform distortion indicates the presence of harmonics. No set-up required; a single-cycle waveform appears automatically. Bar graph displays individual harmonics up to the 31st, indicating the percentage of the total signal contributed by each harmonic. The 41Bs new Zoom Mode feature lets you see even small amounts of harmonics. Numeric values display power and true-rms readings of voltage and current; frequency, minimum, maximum and average values; peak, Dc and total harmonic distortion; crest factor and power factor. Volts/Amp Check Screen displays a one-screen summary for all types of loads.

For engineers and power quality consultants who design and upgrade power distribution systems, the Fluke 41B Power Harmonics Analyzer offers advanced capabilities that let you download test data to your printer and PC for detailed system documentation and analysis. You've got the same fast, accurate test and measurement capabilities as the 39, which makes it easy to communicate with your system's field electricians and maintenance people. But it's what you can do with all this data that makes the Fluke 41B such a powerful analytical tool. Store up to eight complete measurement sets for future reference. Print reports, screen and tabular data directly from the Fluke 41B. And use the Fluke 41B's FlukeView® documenting software to view data and generate custom reports. From taking a measurement in the field to downloading the data for analysis and documentation, the Fluke 41B makes it easy to capture and work with power system data in meaningful ways.

Specifications. Frequency Range, Fundamental Individual: 6-65 Hz and dc. **Minimum Input Levels:** 5 Vrms or 1 Arms. **Volts Measurements (True rms). Input Range:** 5.0 V to 600 Vrms (ac+dc). **Basic Accuracy:** rms (ac+dc) — ±(0.5% + 2 digits); peak, dc — ±(2% + 3 digits); crest factor — >3.0 below 300 V, 1.56 at 600 V. Amps Measurements (True rms) (1 mV/A) Isolated Input. **Input Range:** 1.00 mV (A) to 1000 mVrms (A) (ac+dc); 1.0 mV (A) to ±2000 mV (A) peak. **Basic Accuracy:** rms (ac+dc) — ±(0.5% + 3 digits) + probe specs; peak, dc — ±(2% + 4 digits) + probe specs; crest factor — >3.0 below 600 mV, 2.0 at 1000 mV. **Watts Measurements (Volts-Amps) (1 mV/A) Isolated Input. Range:** 0 W (VA) to 600 kW (kVA) average; 0 W (VA) to 2000 kW (kVA) peak. **Accuracy (ac + dc):** active W (VA) — ±(1% + 4 digits) + probe specs single phase. **Harmonics Measurement Accuracy (Harmonic Level >5% Using Smooth √ 20). Volts:** Fundamental to 13th Harmonic — ±(2% + 2 digits); At 31st Harmonic — ±(8% + 2 digits). **Amps or Watts:** Fundamental to 13th Harmonic — ±(3% + 3 digits) + probe specs; At 31st Harmonic: ±(8% + 3 digits) + probe specs. **Phase:** Fundamental — (±2 degrees) + probe specs. **Frequency Measurement Accuracy. Fundamental:** 6.0 Hz-99.9 Hz — ±0.3 Hz. **Other Measurement Features. Input Bandwidth:** DC — 6 Hz to 2.1 kHz (–0.5 dB). **Crest Factor (CF) Range:** 1.00 to 5.00 (±4%). **Power Factor (PF):** 0.00 to 1.00 (±0.02%). **Displacement Power Factor (DPF):** 0.00 to 1.00 (±0.04 at 0.30). **Phase Measurement Range:** –179 to 180 degrees. **K-Factor (KF) Range:** 1.0 to 30.0 (±10%).

General Specifications. Size: 9.2 × 3.9 × 2.5" (234 × 100 × 64 mm). **Weight:** 2.0 lbs. (1 kg). **Battery:** Type — 4 alkaline "C" cells ANSI/NEDA-144A, IEC-LR14 (supplied); Operating Time — 48 hours, typical (continuous, without backlight). **Temperature:** Operating — 0 to 50°C (32 to 122°F). **Humidity (Non-Condensing):** Operating — 0-30°C - 90%; 30-40°C - 75%; 40-50°C - 45%. **Display:** LCD with LED backlight, adjustable contrast. **Safety. Series II Analog/Digital Handheld Multimeters

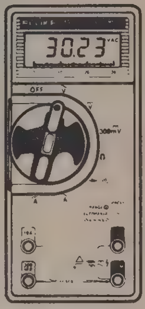
Model 21



Model 23

Model 70

Model 73

Model 75

Model 77

All Models

- **Automatic Touch Hold®**
- **Diode Test**
- **Audible Continuity Beeper**
- **Autoranging with Manual Ranging**
- **TL75 Test Leads with Hard Ponts™**
- **Sleep Mode**
- **3 Year Warranty**
- **79/77/75/73/70 for Measurements to 4800 V-A**
- **29/23/21 for Higher Energy Measurements**

The Fluke 70 Series multimeters were first introduced in 1983 with three models, 73, 75 and 77. The Series was later expanded with the addition of the Industrial Models, 21 and 23. This Series has become a Classic. We have improved on the existing models and added three models, the 70, 29/79. **Autoranging.** With autoranging, you choose the function you want and the meter automatically selects the range with the greatest accuracy and resolution. Symbols on the liquid crystal display remind you what is being measured and the range of measurement.

Model 75 and Model 21

- **3200 Count Digital Display**
- **31 Segment Analog Bar Graph**
- **0.4% Basic DC Volts Accuracy**
- **2.0% Basic AC Volts Accuracy**
- **1.5% Basic DC Current Accuracy (32 mA to10A)**
- **0.5% Basic Resistance Accuracy**
- **2000 Hour Battery Life (Alkaline)**

Model 73

- **3200 Count Digital Display**
- **31 Segment Analog Bar Graph**
- **0.4% Basic DC Volts Accuracy**
- **2.0% Basic AC Volts Accuracy**
- **1.5% Basic DC Current Accuracy (10A Input Only))**
- **0.5% Basic Resistance Accuracy**
- **2000 Hour Battery Life (Alkaline)**

Model 70

- **3200 Count Digital Display**
- **31 Segment Analog Bar Graph**
- **0.5% Basic DC Volts Accuracy**
- **2.0% Basic AC Volts Accuracy**
- **0.5% Basic Resistance Accuracy**
- **2000 Hour Battery Life (Alkaline)**

Model 77 and Model 23

- **3200 Count Digital Display**
- **31 Segment Analog Bar Graph**
- **0.3% Basic DC Volts Accuracy**
- **2.0% Basic AC Volts Accuracy**
- **1.5% Basic DC Current Accuracy (32mA to 10A)**
- **0.5% Basic Resistance Accuracy**
- **2000 Hour Battery Life (Alkaline)**
- **Holster/Flex-Strand™**

Specifications. Specifications apply to all models unless otherwise stated. Accuracy is specified as ±([% of reading + [number of least significant digits]) at 18°C to 28°C (64°F to 82°F) with relative humidity to 90%, for a period of one year after calibration. **Display:** 3200 counts, updates 2.5/sec. **Analog:** 31 segments, update rate 25/sec. **Voltage. DC V - Range. 320 mV:** Model 70 — (0.5% + 1); Model 73/75/21 — ±(0.4% + 1); Model 77/23 — ±(0.3% + 1). **3.200V, 32.00V, 320.0V:** Model 70 — (0.5% + 1); Model 73/75/21 — ±(0.4% + 1); Model 77/23 — ±(0.3% + 1). **1000V:** Model 70 — ±(0.6% + 1); Model 73/75/21 — ±(0.4% + 1); Model 77/23 — ±(0.4% + 1). **AC V - Range. 45-500 Hz, 3.2V:** All Models — ±(2% + 2). **45-1 kHz, 32.00V, 320.0V, 750V:** All Models — ±(2% + 2). **AC Conversion:** AC-coupled, average responding, and calibrated to the rms value of a sine wave input. **Best Resolution:** 0.1 mV in 320 mV range. **Input Impedance:** 10 MΩ nominal, <50 pF. **DC V Normal Mode Rejection:** >60 dB @ 50 Hz or 60 Hz. **DC V Common Mode Rejection Ratio:** >120 dB @ dcm 50 Hz or 60 Hz. **AC V Common Mode Rejection Ratio:** >60 dB, dc to 60 Hz. **Overload Protection:** 1000V dc (500V dc, 500V ac {sine} on mV range), 750V ac rms (sine). **Current*. DC - Range. 32.00 mA, 320.0 mA:** Model 75/77/21/23 — ±(1.5% + 2). **10.00A**:** Model 73 — ±(1.5% + 2); Model 75/77/21/23 — ±(1.5 + 2). **AC - Range. 45 Hz to 1 kHz, 32.00 mA, 320.0 mA:** Model 75/77/21/23 — ±(2.5% + 2). **45Hz to 1 kHz, 10.00A**:** Model 73 — ±(2.5% + 2); Model 75/77/21/23 — ±(2.5% + 2).

*Current function not available on Fluke 70. **10A continuous, 20A for 30 seconds maximum.

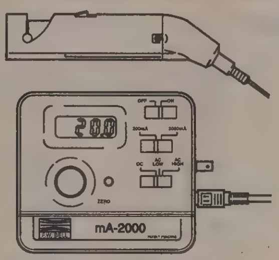
Model mA-2000 Clamp-On mA Current Meter



- ► **Measures DC and AC Currents with 0.1 mA Resolution**
- ► **Simple Clamp-On Operation**
- ► **Frequency Range DC to 100 KHz**
- ► **Built in 3½ Digit Display**
- ► **True RMS Measurement**
- ► **BNC Analog Output for Connection to Oscilloscope or Recorder**
- ► **Supplied with Optional AC Battery Eliminator and Hard Carrying Case**

Measures AC and DC currents on two ranges; 0-200 mA and 0-2000 mA. **Resolution:** 0.1 mA on low range and 1 mA on high range. **Basic Accuracy:** 1%. **Aperture:** 0.21 inches.

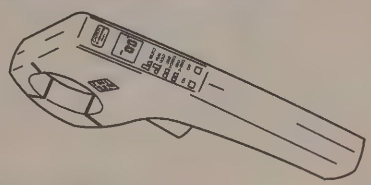
Model UM-7700D Current/Power Meter

— NEW —



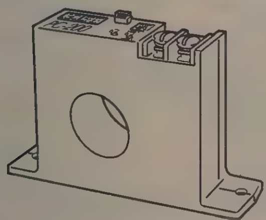
- ► **Measures DC and AC Current from 1 to 1000 A**
- ► **Measures AC Power from 1 to 660 kW**
- ► **Large 2⅞" × 2⅜" Oval Shaped Aperture**
- ► **Built in LCD Display**
- ► **Includes Battery, Instructions and Hard Carrying Case**

Measures DC and AC current up to 1000 A simply by clamping on the current conductor. Large oval shaped aperture for use on big power cables. Measures AC power up to 660 kW. User can easily calculate 3 phase power in 3 wire circuits by measuring two of the phases and summing the total. For 4 wire circuits, 3 phase power can be calculated by measuring all three phases and summing the total. Built in LCD display. Includes 9 volt battery, instructions, hard carrying case and voltage probes necessary for power measurements.

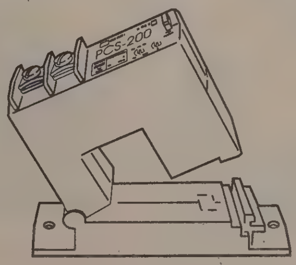
595-0013. Model UM-7700D .... **EACH 625.00**

Models PC-50/PC-200 and PCS-50/PCS-200 AC Current Sensors

— NEW —



PC-50/PC-200



PCS-50/PCS-200

- ► **4-20 mA DC Output**
- ► **Range Selected on Sensor**
- ► **UL Listed**
- ► **Split Core Eases Installation**
- ► **Loop Powered — Only Requires Two Wires**

Loop powered sensors provide 4-20 mA DC output proportional to AC current. **Range Selected By Jumper:** PC-50/PCS-50 Ranges — 10 A, 20 A and 50 A; PC-200/PCS-200 Ranges — 100 A, 150 A and 200 A. The PCS-50 and PCS-200 clamp over existing wiring for easy installation. Simple two wire connection to computers or PLCs.

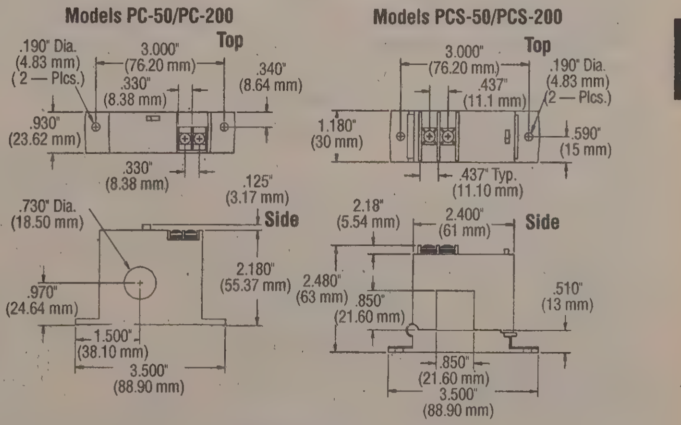
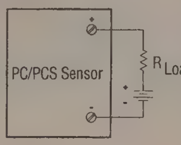
Mechanical Dimensions — All Dimensions are in inches (mm)



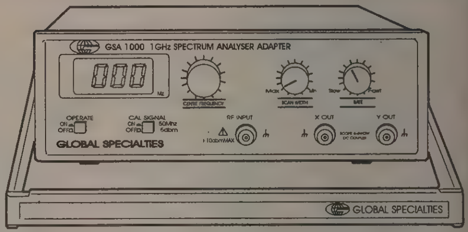
Connection Schematic

Connection to Sensor Is Made Via Two 6-32 Screw Terminals



Model GSA-1000 Spectrum Analyser Adapter

— NEW —



This adapter converts any conventional oscilloscope into a highly cost effective spectrum analyser. Bandwidth is unimportant and the only requirement is for an X-Y mode. Despite the low cost, the adapter offers excellent performance. The frequency range is 400 kHz to 1 GHz and the bandwidth (selectivity) is 250 kHz. The center frequency can be adjusted over the full frequency range with direct frequency readout on a large liquid crystal display. Both scan width and scan rate are fully adjustable. The amplitude range is –70 dBm with good accuracy over the whole amplitude and frequency range. A front panel CAL button allows a calibrated –30 dBm 50 MHz marker signal to be superimposed for precise amplitude and frequency checks.

Frequency. Frequency Range: 400 kHz to 1000 MHz. **Center Frequency Adjust:** 0 MHz to 1000 MHz. **Bandwidth:** 250 kHz (–6 dB typical). **Meter Accuracy:** 1% of reading + 1 MHz. **Calibration Marker:** 50 MHz fundamental, harmonics to 1 GHz. **Frequency Scan Width:** 1 MHz to 100 MHz/div. **Scan Speed:** 0.5 ms to 35 ms/div. **Amplitude. Input Impedance:** 50 Ω. **Amplitude Range:** –70 dBm to 0 dBm nominal. **Amplitude Scale:** Logarithmic, 10 dB/div. **Amplitude Linearity:** Typically ±2 dB. **Amplitude Flatness:** Typically ±1.5 dB, 4 MHz to 1000 MHz. **Max. Input Level:** +10 dBm. **Calibration Marker:** –30 dBm ±1 dB at 50 MHz. **Oscilloscope Requirements. Oscilloscope Mode:** X-Y mode, DC coupling; bandwidth not critical. **X-Input Sensitivity:** 0.5 V/div. **Y-Input Sensitivity:** 0.5 V/div. **Power Requirements. Input Voltage:** 220/240 or 110/120 volts at 50/60 Hz, internally adjustable. **Power Consumption:** 8 VA max. **General and Environmental. Electrical Safety:** Designed and manufactured to IEC1010-1. **Operating Range:** +5°C to +40°C, 20% to 80% RH. **Storage Range:** –10°C to +65°C. **Size:** 10.2 × 3.5 × 9.25" (W × H × D). **Weight:** 3.2 lbs.

761-1011. GSA-1000 .... **EACH 1050.00**

Model 5003 1.3 GHz Hand Held Frequency Counter

— NEW —

- **5 Hz to 1300 MHz Frequency Range**
- **Very High Sensitivity at all Frequencies**
- **Frequency and Period Measurement, 0.0001 MHz Resolution**
- **Reciprocal Counting Technique Gives Superior Accuracy**
- **Push-To-Measure Function with Auto Power-Down**
- **Large 8 Digit Display with Full Range of Annunciators**

The 5003 is a highly compact battery powered frequency counter which offers the convenience of a hand-held multimeter. Surprisingly, however, its performance exceeds that of many bench top counters of much higher cost. Despite its compact dimensions, the 5003 incorporates an 8 digit liquid crystal display of the size you'd expect to find on a bench top instrument. A full range of annunciators provide indication of measurement function, measurement time, overflow, trigger activity, low battery, and the measurement units. Operation is simplicity itself with all functions and ranges being selected using just five large buttons.

761-5003. Model 5003 .... **EACH 250.00**

Protoboard Surface Mount Breadboard Systems

— NEW —

- **Quick and Easy Prototyping with Surface-Mount Carriers**
- **Eliminate Time-Consuming Soldering**
- **Breadboard Strips Accept 20-26 AWG Leads**
- **Accepts JEDEC Type A Plastic Leading Chip Carrier (PLCC)**
- **Header Strips Allow Flexibility**
- **Limited Lifetime Warranty**

The Global Specialties® Surface mount Series of Protoboards® provide the only quick, non-destructive and solderless method of prototyping circuits with surface-mount chip carriers. The series, called SMT Protoboard®, accommodates the PLCC (plastic leaded chip carrier), by far the most widely used surface-mount package for integrated circuits. It allows instant access to surface-mount chips and eliminates the time-consuming and expensive building of permanent connections. Each SMT Protoboard®, in the standard configuration, comprises of a chip carrier socket and two solderless breadboarding ;strips mounted on a PC board. There is a numbered breadboard tie-point joined via the PC board to each contact point on the chip carrier socket. Each contact point corresponds to a particular lead on the PLCC. In the optional configuration, the SMT Protoboard® is supplied with header pins replacing the breadboard sockets. This allows the board to be mounted to a mother pc board, or to be mounted to an array of sockets that allows even more prototype area. By simply placing the PLCC in the socket, the designer can connect other components to pins on the integrated circuit through conventional solderless breadboarding methods. Design changes are quickly and easily performed by moving wires and components on the breadboarding strips, without damage to chip carriers and PC boards. More than one surface-mount chip can be included in a prototype circuit through the use of additional SMT Protoboards® connected through breadboarding.

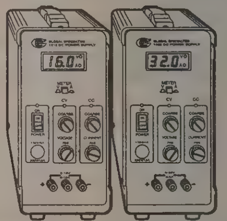
1316/1332 Power Supplies

Laboratory Grade Single Output Supply — Has All the Features of the Competition Except Their High Price



- **Available in 16 VDC at 10 A or 32 VDC at 5 A**
- **Short Circuit Protected**
- **Digital Readout Monitors Current and Voltage**
- **Coarse and Fine Adjustments**
- **Heavy Duty Transformer Isolated Design**
- **Constant Current/Voltage Mode LED Indicators**

761-1316. Model 1316. 0-16 VDC at 0-10 A .... **EACH 410.00**

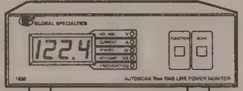
Model 1520

— NEW —

Autoscan True RMS Line Power Monitor



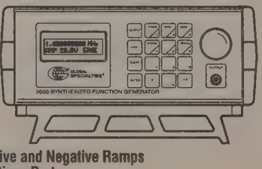
- **True RMS Measurements of Voltage, Current, Power, Volt-Amps and Frequency**
- **Unique Scan Mode Enables Continuous Monitoring of All Functions**
- **Separate Function Switch Allows Individual Monitoring of Each Parameter**
- **Reads Current Up to 20 Amps and Wattage Up to 2,000 Watts**

761-1520. Model 1520 .... **EACH 480.00**

2003 Synthesized Function Generator

— NEW —

With RS232 Communication Port Built In — Direct Digital Synthesis with 11 Digits of Accuracy



- **Program from the Keypad or Interface Directly to Your PC**
- **Fully Synthesized Generator**
- **Wide Frequency Range — DC to 1.6 MHz**
- **Trigger, Sweep, Burst, Hop, Gate Modes**
- **Internal Linear/Log Sweep**
- **External Trigger and Gate**
- **Sine, Square, Triangle, Positive and Negative Ramps**
- **Optional RS-485 Communications Port**

The Model 2003 is a menu driven direct digital synthesis (DDS) programmable function generator whose performance rivals units that cost several thousand dollars. Up to 16 preset waveforms configurations can be stored into memory and recalled automatically. The 32 character Backlit LCD display allows precise setting of the desired frequency to 10 digits of resolution. Applications for the 2003 include repetitive testing, automotive, telecommunications, transmission line, filter response, or wherever you need to select an exact frequency.

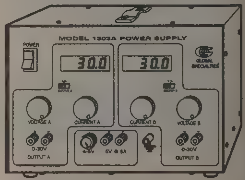
1302A Power Supply

Laboratory Grade Triple Output Supply — High Quality, Economically Priced

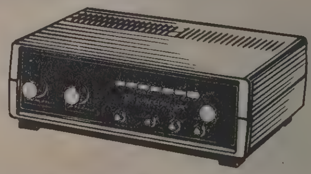


- **Triple Outputs, +5 VDC and Two 0-30 VDC Variable**
- **+5 VDC at 5 A, 0-30 VDC at 1 A**
- **+5 VDC Supply Variable from 4 to 6 VDC**
- **Two Digital Readouts — Monitors Current or Voltage**
- **Constant Current or Constant Voltage Mode**
- **Heavy Duty Transformer Isolated Design**
- **Series and Parallel Operation**

761-0132. Model 1302A .... **EACH 525.00**

4001 Digital Pulse Generator

5 MHz Ultra-Variable Generator



- **Independent Settings of Pulse Width and Pulse Spacing**
- **Outputs from 0.5 to 5 MHz**
- **Four Modes — Run, Triggered, Gated, Single Shot**
- **Symmetrical Square Wave Outputs**
- **Complement Output — Inverts Waveform**
- **Variable Output for CMOS Circuits**

Triggerable dual output precision pulse source.

Quick Test Sockets and Bus Strips

Universal solderless breadboarding system includes Quick-Test sockets and bus strips. Socket terminals are arranged with two rows of five pre-constructed tie points running crosswise. Bus strip terminals are arranged in two rows of five pre-connected tie points running lengthwise. Base is molded of high-temperature plastic. Contacts are pre-stressed, spring loaded, nickel silver alloy. **Wire Sizes:** .015" to .032". Units feature snap-lock mechanism for mating two or more units together.

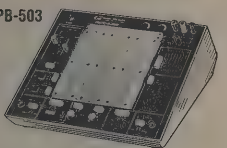
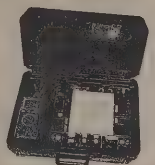
PB-503 or PB-503C Protoboard Trainers Design Workstation

PB-503





PB-503-C

- ► **Also Available in Kit Form**

Global's professional Proto-Board® design station puts a workbench full of circuit design tools on your desktop. The PB-503 offers you .1 to 100 kHz function generator with sine, TTL square and triangle outputs. Triple voltage +5 V, and variable ±5-15 VDC power supplies. Large solderless breadboard areas. Ideal for all types of circuits both analog and digital. 6"H × 13"W × 11.5"D. **Weight:** 7 lbs.

The PB-503-C is a complete design work station, including instrumentation, breadboarding, and a rugged DC regulated triple power supply. The instrumentation features a 100 KHz function generator with sine, square, and triangle waveforms, plus a TTL output for generating clock pulses. Add to this two digital pulsers operated by debounced push-button switches, and eight logic state indicators which operate as individual logic probes. The Breadboarding area has a total of 2520 uncommitted tie points, enough space for circuits containing 24 ICs of 14 pins or equivalent. The Breadboarding sockets have an unlimited lifetime guarantee. The power supply offers three DC regulated supplies, one fixed at +5 VDC and two variable from 5 to 15 VDC. All three supplies are short-circuit protected, automatically current limiting the output to a safe level.

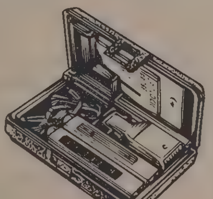
Logic Analysis Test Kits



Three high performance troubleshooting instruments — complete portable test systems including accessories.

LTC-1/Standard Logic Analysis Test Kit

- ► **Includes LP-1 Logic Probe, DP-1 Digital Pulsar, LM-1 Logic Monitor**
- ► **Captures Pulses to 50 ns; Pulse Trains to 10 MHz**
- ► **Excellent for All but Highest Speed Circuitry**
- ► **Our Most Economical Test Kit**

761-1333. Model LTC-1..EACH 159.95

LTC-2/High Speed Logic Analysis Test Kit

- ► **Includes LP-3 Logic Probe, DP-1 Digital Pulsar, LM-1 Logic Monitor**
- ► **Captures Pulses to 15 ns; Pulse Trains to Over 35 MHz**
- ► **High Speed and High Performance**
- ► **For Demanding Troubleshooting**

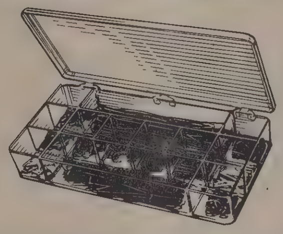
761-1300. Model LTC-2..EACH 199.95

LTC-5/Ultra Speed Logic Analysis Test Kit

- ► **Includes LP-5 Logic Probe, DP-1 Digital Pulsar, LM-1 Logic Monitor**
- ► **Captures Pulsers to 5 ns — Speeds to 100 MHz**
- ► **Ultra-High Speed Performance**
- ► **For the Most Advanced Troubleshooter**

761-1299. Model LTC-5..EACH 254.95

WK-1 Wire Jumper Assortment



WK-1 jumper kit contains 350 pre-cut, pre-stripped and pre-formed #22 gauge solid hook-up wire jumpers in color coded lengths. Thirteen different lengths are supplied to insure the right jumper for every design. Use WK-1 with all of Global's solderless breadboarding products for added simplicity and reduced design time.

761-0002. Model WK-1..EACH 14.95

Deluxe Logic Analysis Test Kits — *NEW* —

Smarter tools for demanding microprocessor circuits. The logical solution for your digital troubleshooting problems.

LTC-6/Deluxe Logic Analysis Test Kit

- ► **Includes LP-1 Logic Probe, DP-1 Digital Pulsar, LM-2A Logic Monitor, SQ-1 Tone-Ohmmeter**
- ► **Captures Pulses to 50 ns**
- ► **SQ-1 Locates Bad ICs without Unsoldering Parts**
- ► **Reduces Troubleshooting Time**

761-1334. Model LTC-6..EACH 299.95

LTC-7/Deluxe High Speed Test Kit

- ► **Includes LP-3 Logic Probe, DP-1 Digital Pulsar, LM-2A Logic Monitor, SQ-1 Tone-Ohmmeter**
- ► **Captures Pulses to 15 ns**
- ► **SQ-1 Locates Bad ICs without Unsoldering Parts**
- ► **For Higher Speed Troubleshooting**

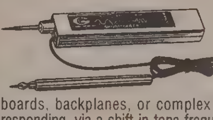
- ► **Captures Pulses to 5 ns**
- ► **SQ-1 Locates Bad ICs without Unsoldering Parts**
- ► **Speeds to 100 MHz**
- ► **For the Professional Troubleshooter**

761-0008. Model LTC-8..EACH 379.95

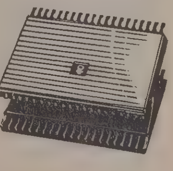


Shortsqueek SQ-1

Shortsqueek is a unique type of "audible" tone ohmmeter that simplifies finding shorts on PC boards, backplanes, or complex hard wire assemblies. It does this by responding, via a shift in tone frequency, to very small changes in resistance that conventional ohmmeters can't cope with. Most important, Shortsqueek significantly reduces the time it takes to locate those hard to find shorts.

761-0003. SQ-1..EACH 49.95

Protoclips



Dual spring clip design provides you with superior contact time after time. The PC-14, PC-16, PC-24, and PC-40 dual spring construction insures you a positive connection to all pin ICs. Its non-corroding nickel-silver contacts and clip notch test pins give you trouble free testing. Quality materials and a short-proof design for "no smoke" testing.

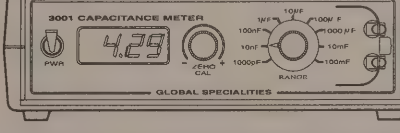
3001 Digital Capacitance Meter



Direct, highly accurate 3½-digit readout of capacitance from 1 pF to 199,900 μF. Unique dual threshold technique delivers 0.1% accuracy on seven of its nine ranges and eliminates errors due to dielectric absorption. Uses DC charging characteristics to determine true capacitance, even in wires, switches and other components. Zero Calibrate knob allows nulling of spurious capacitance up to 100 pF. **Timebase:** 2 MHz crystal oscillator. **Accuracy:** ±0.1% of reading on seven lower ranges (up to 1999 μF), ±0.5% on upper ranges; ±2pF. ±1 count, at 23°C (±5°). **Power Required:** 105-135 VAC, 57-63 Hz, 6 VA, max. **Size:** 3 × 10 × 7" (7.6 × 25.4 × 17.8 cm). **Weight:** 3.0 lbs (1.4 kg).

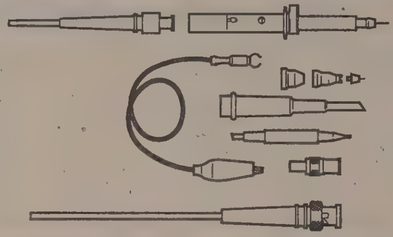
Semi-Modular — *NEW* — Oscilloscope Probes



- Modular Parts for Replacements
- Pomona's Traditional Offering
- Cable Length: 1.2 Meter
- Good General Purpose Probes
- Accessories Included

ITT Pomona continues to offer its highly regarded line of semi-modular passive voltage oscilloscope probes. The design allows component replacement in 100, 200 and 300 MHz bandwidth probes.

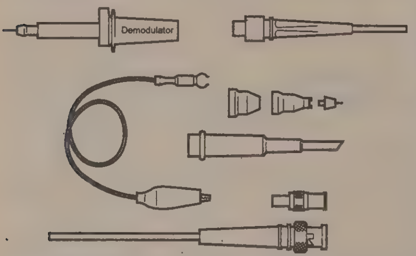
RF Detector — *NEW* — (Demodulator) Probes



Semi-Modular Probe

- Cable Length: 1.2 Meter
- 1 VRMS = 1 VDC
- Accessories Included

Model 5815 is a miniature RF Detector Probe intended for use with a wide range of oscilloscopes. These probes are very useful for measuring RF signals up to 800 MHz. They provide an output of 1 VDC for an input of 1 VRMS sinewave. **Points to Obtain Optimum Performance:** Where possible, the probe should be connected to the test point using the BNC adapter supplied to minimize the VSWR; If the ground connection cannot be made using the BNC adapter, connect the ground lead as close as possible to the test point to minimize stray inductance. Where possible, take measurements from low impedance parts of the circuit to minimize loading effect of the probe.

Stock No.	Mfr.'s Type	Cable Length (M)	Diode Turnon Voltage (mV)	Bandwidth	Input Capacitance (pF)	Peak AC Input (V)	DC Isolation Incl. Peak AC (V)	EACH

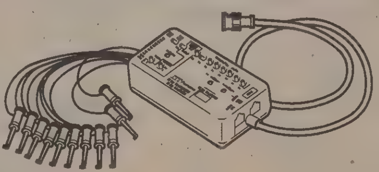
Logic Scope Probe

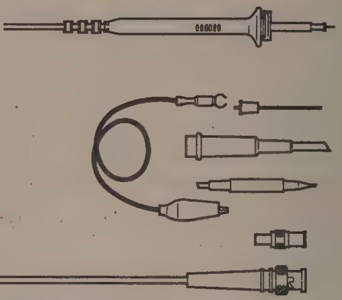


- 3 Mode Operation: Logic Analyzer, Trigger Probe, Multiplexer
- 20 MHz Bandwidth Covers Most Microcontroller Frequencies
- 8 nS Minimum Data Set-Up and Data Hold-Time
- 100 KΩ/5 pF Input Impedance
- 800 KHz Internal Clock Frequency
- Minimum/Maximum Input Levels 0.8-2.4 V (Low/High), –0.5-5.5 V (Low/High)
- 4.75-7 V With 190 mA Maximum Supply Current
- Includes 11 Test Leads With Micrograbber® Test Clip (Eight Gray Signal Leads, One Yellow Clock Lead, One Red Power Lead and A Black Ground Lead)

Turns your analog oscilloscope into a logic analyzer. Ideal as a cost effective solution to examine and analyze single-shot and repetitive digital phenomena. 8 channel reading capability lets you use one unit independently or daisy chain up to three units for 16 or 24 channels.

885-6004. Model 6004 .... **EACH 385.00**

MICRO-LC™ Oscilloscope Probes — *NEW* —



- High Bandwidth; Up to 450 MHz on Some Models
- Fast Risetime and Low Overshot
- Low Capacitance; As Low As 7 pF in a X10 Probe
- High Accuracy with Laser Trimmed Components
- Ergonomic Design; Made Possible with SMD Usage
- Wide Compensation Range: 10-30 pF
- Replaceable Gold Plated Test Tip
- Designed in Accordance with IEC 1010 International Safety Specifications
- Cable Length: 1.2 Meters
- Two Switchable Attenuation Versions
- Accessories Included

ITT Pomona is introducing a new line of monolithic passive voltage oscilloscope probes for your most demanding applications. These probes offer top performance — high bandwidth and low capacitance — in a small, narrow-line body. The small size and improved input impedance is achieved thanks to the use of special, low dielectric constant material and surface mount devices (SMDs). This rugged design, made to IEC 1010 safety standards, assures quality and durability. Three models offer readout actuator capability in popular bandwidths.

Pop Jack DMM Kits

Silicone insulation is a special quality feature on 6 kits. Won't be burned by the bump of a soldering iron. Remains flexible in cold weather. Reliably attach different probes or clips to the same lead because "pop jack" holds tight.

Maxi Kit. Kit features the very best in quality and performance. All silicone insulated leads. Contains 2 each: Extendable Probe Tip Leads, Replaceable Tip Probe Handles, Extended Slide-on Tips, Medium Alligators, Heavy Duty Alligators, Minigrabber Leads, Minipincer Leads, Slide-on IC Tips, Pop Jack Leads and Couplers, one black and one red. Also includes 2 each: Spade Lugs, Dog Leg Micro-Tips, Needle Tips, Shouldered Micro Tips and 4 each: Standard Brass Tips. Supplied with a nylon pouch.
885-5677. Model 5677A ... **EACH 88.00**

Basic Test Lead Kit for Electronics. Contains 2 each: Test Probe leads on PVC insulated 18 AWG wire, one black, one red; slide-on extended tips and alligator clips, one black and one red. Banana plugs on meter end have no sleeve. Comes in a reusable plastic case.
885-5672. Model 5672 ... **EACH 23.30**

Heavy Duty Kit for Electrical Work. This versatile kit provides the right test accessories for demanding electrical tests. Contains 2 each: Probe Handles, Extended Slide-on Tips, Medium Alligators, Heavy Duty Alligators, Pop Jack Leads and Couplers, one black and one red.
885-5673. Model 5673A ... **EACH 44.00**

Standard Replacement Test Lead Kit. Contains 2 Test Probe PVC Leads, one black and one red.
885-5519. Model 5519 ... **EACH 9.90**

Deluxe Kit for Electronics. Kits Contains 2 Each: Probe handles, medium alligator clips, minigrabber leads, minipincer leads, slide-on IC tips, slide-on extended tips, pop jack leads, one black and one red. It also contains 2 spade lugs, and a nylon pouch.
885-6270. 5674A ... **EACH 66.00**

SMD Microtip™ Test Probe. The microtip is specially designed to probe SMD contacts. It features a stainless steel needle tip that is flexible to help prevent damage to the SMD lands. The microtip is curved to aid in probing of hard to reach areas. **1st End:** SMD Microtip™ Test Probe. Chuck — Brass, nickel plated. Replaceable Microtip — Stainless steel. Insulation — Nylon. **Wire:** 20 AWG, 41 × 36 t.c., PVC insulation, 2.2 (.087) O.D. **2nd End:** Stacking banana plug — Brass body, beryllium copper spring, nickel plated; Insulation — polypropylene. **Rating:** 1200 V AC/DC, 5 amps, +55°C (+131°F) max.
885-5320. 5144-48-0. Black ... **EACH 9.65**
885-5325. 5144-48-2. Red ... **EACH 9.65**

Replaceable Tip Probe Kit. Kit Contains 2 Pieces Each: Replaceable tip test probe leads on silicone wire, one black and one red; dog leg micro tips, 2.0 (.080) needle tips, shouldered micro tips. **4 Each:** Standard brass tips.
885-5676. 5676 ... **EACH 26.85**

Extendable Tip Probe to Stacking Banana Plug. Set includes one black and one red 48" long PVC insulated test lead.
885-5952. 5952 ... **EACH 16.50**

Flexible Test Lead Sets

Sets contain one black and one red lead. Plugs fit Wavetek and Fluke Multimeters.

Right Angle to Straight Plug Set. Right Angle Sheathed Banana Plug to Straight Sheathed Banana Plug on 62" long, silicone wire.
885-5907. Model 5907 ... **EACH 13.20**

Straight Sheathed Set. Straight Sheathed Banana Plug on each end of 62" long, silicone wire.
885-5908. Model 5908 ... **EACH 13.20**

Right Angle Sheathed Banana Plug Set. Right Angle Sheathed Banana Plug on each end of 62" long silicone wire.
885-5909. Model 5909 ... **EACH 13.20**

Probe Sets

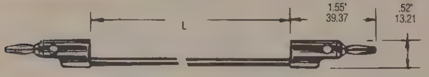
Test Probe with Stainless Steel Tip. Probe to Right Angle Plug on 48" long silicone wire, one black and one red.
885-6116. Model 5898 ... **EACH 8.80**

Test Probe with Caged Banana Plug Tip. Probe to Right Angle Plug on 48" long silicone wire, one black and one red.
885-5897. Model 5897 ... **EACH 9.90**

Test Probe Handle Set. Test Probe with caged banana plug tip and sheathed Banana Jack in handle, one black and one red.
885-5906. Model 5906 ... **EACH 7.70**

Patch Cords

Stacking Banana Plug



Brass body; beryllium copper spring. **Insulation:** Polypropylene. **Wire:** 18 AWG, 65 × 36 t.c., PVC insulated, 3.66 mm (.144) O.D. **Rating:** 45 VAC; 15 amps; +55°C (+131°F) max.

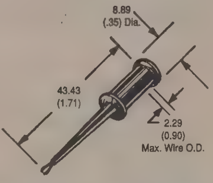
Test Clips

SMD Grabber® Test Clips



Do-It-Yourself SMD Grabber Test Clip. Do-it-yourself test clip especially suited for testing surface mounted packages on centers as small as .030". Pincer-like contact grasps individual legs of SMDs, such as the SOIC, SOJ, PCC, etc. **Material:** Selectively gold plated stainless steel contact. **Insulation:** Glass filled nylon. **Rating:** 45 VAC, 0.5 amps, +102°C max. Access in cap for .090" maximum wire diameter.

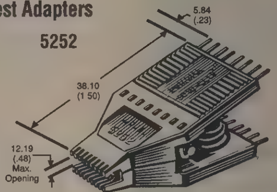
Test Adapters

SOIC Clip® Test Adapters

5252



Test clips have a spring design similar to Pomona's Dip Clip Test Adapter. The clip design allows testing of wide or narrow body chips and smaller size PLCC. **Upper:** .025" square pins, gold plated phosphor bronze. **Lower:** Contacts, gold plated beryllium copper. **Insulation:** Glass filled nylon, blue. **Rating:** 500 Vrms, 1 amp, +102°C max.

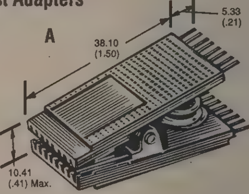
Kit contains 6 sizes of Quad Clips: 20, 28, 32, 44, 52, 68 and 84 pin, housed in a protective case.

885-5515. 5515A	EACH	245.00

DIP Clip® Test Adapters



DIP Clip test adapters are designed especially for testing dual-in-line IC packages on high-density P.C. boards. The DIP Clip test adapter has many built-in features that assure a positive electrical connection and at the same time provide hands-free testing. The high density DIP Clip TEST adapters are used for ultra-dense packaged chips located adjacent to each other on 2.54 mm (.100) spacing. **Material:** Contact, tarnish resistant nickel, silver or gold plated beryllium copper. Stainless steel hinge pin and spring. **Insulation:** Glass filled nylon, blue. **Rating:** 500 VRMS; 1 amp; +102°C (+216°F) max.

Test Companion™ Test Kits Guide

▶ **Each Test Companion™ Kit Is Tailored to Your Instrument**

Simply find the model number of your Fluke, Hewlett-Packard or Tektronix meter to locate the Test Companion™ Test Kit that's been specifically configured to suit your instrument. Then look at the chart below and you'll be able to immediately see the contents of that Test Companion™ Test Kit. Most test leads, probes, grabbers and clips are designed to IEC1010-safe specifications. Each kit is expressly tailored to assure reliable testing and added functionality for your meter.

Model 6161 Electrical/Industrial Kit for Fluke Series 10 DMM

- ▶ **DMM Test Lead Set — St. to St.**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Medium Alligator Clips**
- ▶ **Flexible Maxigrabber with Pincer Tips**

Features medium-size Cordura shoulder pack carrying case with shoulder strap and accessories listed. Meters and scopes not included.

885-6161. Model 6161 .... EACH 79.00

Model 6112 Fluke 80 Series DMM Test Companion™ Test Kit

- ▶ **DMM Test Lead Set**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Flexible Grabber® Test Clips**
- ▶ **Large Safety Alligator Clips**
- ▶ **Medium Alligator Clips**
- ▶ **Minispring Needle Tips**
- ▶ **Splices**

Features large briefcase style Cordura carrying case with shoulder strap and test accessories listed. Holds DMM plus additional test accessories, manuals, references and miscellaneous items. Meters and scopes not included.

885-6251. Model 6112 .... EACH 185.00

Model 6113 Hewlett-Packard HP 970A Series DMM Test Companion™ Test Kit

- ▶ **DMM Test Lead Set**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Flexible Grabber® Test Clips**
- ▶ **Large Safety Alligator Clips**
- ▶ **Medium Alligator Clips**
- ▶ **Minispring Needle Tips**
- ▶ **Splices**

Features large briefcase style Cordura carrying case with shoulder strap and accessories listed. Holds your HP DMM plus additional test accessories, manuals, references and miscellaneous items. Meters and scopes not included.

885-6256. Model 6113 .... EACH 185.00

Model 6118 860 Series Graphical™ Multimeter Test Companion™ Test Kit

- ▶ **Test Lead Set**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Flexible Grabber® Test Clips**
- ▶ **Grip Clips**
- ▶ **Large Safety Alligator Clips**
- ▶ **Medium Alligator Clips**
- ▶ **Extended Probe Bodies**

Features large briefcase style Cordura carrying case with shoulder strap and test accessories listed. Holds your Fluke GMM plus additional test accessories, manuals, references and miscellaneous items. Meters and scopes not included.

885-6250. Model 6118 .... EACH 215.00

Model 6119 Tektronix TEKMETER™ THM 500 Series Test Companion™ Test Kit

- ▶ **Oscilloscope Probes (X1, 30 MHz)**
- ▶ **Test Lead Set**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Flexible Grabber® Test Clips**
- ▶ **Grip Clip**
- ▶ **Large Safety Alligator Clips**
- ▶ **Adapter Banana Plugs to BNC Female**

Features large briefcase style Cordura carrying case with shoulder strap and accessories listed. Holds meter, test accessories, manuals, references and miscellaneous items. Meters and scopes not included.

885-6262. Model 6119 .... EACH 255.00

Model 6120 Fluke Scopemeter® Series I and II Test Companion™ Test Kit

- ▶ **Oscilloscope Probes (X1/X10 Switchable) Fully Insulated**
- ▶ **Test Lead Set**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Flexible Grabber® Test Clips**
- ▶ **Grip Clips**
- ▶ **Large Safety Alligator Clips**
- ▶ **Medium Alligator Clips**

Features large briefcase style Cordura carrying case with shoulder strap and test accessories listed. Holds your ScopeMeter® plus additional test accessories, manuals, references and miscellaneous items. Meters and scopes not included.

885-6252. Model 6120 .... EACH 375.00

Model 6121 Tektronix TDS 300 Series Oscilloscope Tri-Fold Test Companion™ Test Kit

- ▶ **RA Oscilloscope Probes (X10, 250 MHz)**

Features a compact tri-fold pouch for holding test leads, clips and small tools.

885-6263. Model 6121 .... EACH 110.00

Model 6164 Deluxe Electrical/Industrial Test Companion Kit for Fluke 70 Series II DMM

- ▶ **DMM Test Lead Set — St. to RA**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Medium Alligator Clips**
- ▶ **Flexible Maxigrabbers with Pincer Tips and Hook Tips**

Features medium-size Cordura shoulder pack carrying case with shoulder strap and accessories listed. Meters and scopes not included.

885-6164. Model 6164 .... EACH 94.00

Model 6172 Electrical/Industrial Test Companion Kit for Fluke 80 Series DMM

- ▶ **DMM Test Lead Set**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Medium Alligator Clips**
- ▶ **Flexible Maxigrabbers with Pincer Tips and Hook Tips**
- ▶ **Extra Durable Probe Leads**
- ▶ **Insulated Spade Lugs**

Features medium-size Cordura shoulder pack carrying case with shoulder strap and accessories listed. Meters and scopes not included.

885-6172. Model 6172 .... EACH 106.00

Model 6195 Electrical/Industrial Test Companion Kit for HP970 Series DMM

- ▶ **DMM Test Lead Set**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Medium Alligator Clips**
- ▶ **Flexible Maxigrabbers with Pincer Tips and Hook Tips**
- ▶ **Extra Durable Probe Leads**
- ▶ **Insulated Spade Lugs**

Features medium-size Cordura shoulder pack carrying case with shoulder strap and accessories listed. Meters and scopes not included.

885-6195. Model 6195 .... EACH 106.00

Model 6130 Tektronix TEK DMM250 Series and TDS 300 Series Oscilloscope Tri-Fold Test Companion™ Test Kit

- ▶ **RF Detector Probe with Sheathed Banana Plugs**
- ▶ **Sheathed BNC Male to Banana Jacks**

Features a compact tri-fold pouch for holding RF Detector Kit and small tools.

885-6264. Model 6130 .... EACH 100.00

Model 6131 Hewlett-Packard HP 970A Series DMM and HP 54600B Series Oscilloscope Tri-Fold Test Companion™ Test Kit

- ▶ **RF Detector Probe with Sheathed Banana Plugs**
- ▶ **Insulated BNC Male to Banana Jacks**

Features a compact tri-fold pouch for holding RF Detector Kit and small tools.

885-6258. Model 6131 .... EACH 100.00

Model 6132 Hewlett-Packard HP 54600B Series Oscilloscope Tri-Fold Test Companion™ Test Kit

- ▶ **Oscilloscope Probes (X10 Fixed, 150 MHz)**

Features a compact tri-fold pouch for holding test leads, clips and small tools.

885-6259. Model 6132 .... EACH 80.00

Model 6133 Tektronix TEK DMM250 Series Test Companion™ Test Kit

- ▶ **DMM Test Lead Set**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Flexible Grabber® Test Clips**
- ▶ **Large Safety Alligator Clips**
- ▶ **Medium Alligator Clips**
- ▶ **Minispring Needle Tips**
- ▶ **Splices**

Features large briefcase style Cordura carrying case with shoulder strap and accessories listed. Holds DMM plus additional test accessories, manuals, references and miscellaneous items. Meters and scopes not included.

885-6260. Model 6133 .... EACH 185.00

Model 6134 Tektronix TEKSCOPE™ THS 700 Series Test Companion™ Test Kit

- ▶ **Oscilloscope Probes (X10, 150 MHz)**
- ▶ **Test Lead Set**
- ▶ **Probe Bodies with Banana Plug Tip**
- ▶ **Flexible Grabber® Test Clips**
- ▶ **Grip Clips**
- ▶ **Large Safety Alligator Clips**
- ▶ **Minispring Needle Tips**

Features large briefcase style Cordura carrying case with shoulder strap and accessories listed. Holds your scope, test accessories, manuals, references and miscellaneous items. Meters and scopes not included.

885-6261. Model 6134 .... EACH 375.00

Solder-On Test Adapters

► Enabling Advanced Circuit Design and Testing

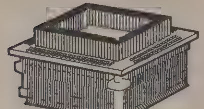

Fig. 1

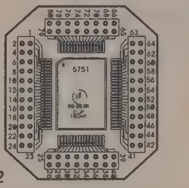

Fig. 2

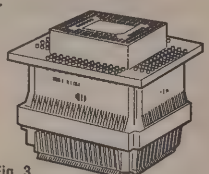

Fig. 3

Pomona's new Solder-On Adapters offer secure, reliable soldered connections to your circuit board in place of the target chip and include a breakout board for connection to logic analyzers and other advanced test instrumentation. Solder-On Adapters provide the crucial interface between circuit boards and test instruments to enable engineers to design and test when the target chip is unavailable or is inappropriate for use in a specific design or test environment. Breakout board included with each base provides test access via .025" square pins.

Pomona Solder-On Adapters are generic test interfaces and work on standard EIAJ (metric) and JEDEC SMT layouts. While only a few typical applications are shown in the table, Solder-On Adapters will work for all chips with the same lead pattern.

Stock No.	Mfr.'s Type	Fig.	No. of Leads	Body Size*	Lead Pitch*	Typical Applications	EACH

JEDEC PQFP Test Clips

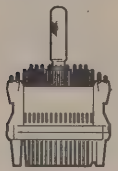

Fig. 1

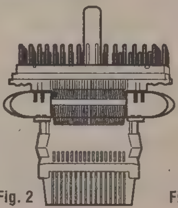

Fig. 2

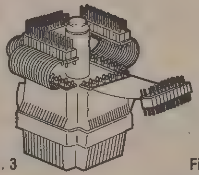

Fig. 3

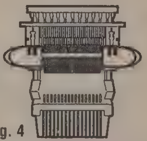

Fig. 4

Pomona's JEDEC QFP test clips are designed to fit on surface-mounted plastic and ceramic JEDEC chips. Choose from four clip types specifically designed to give you optimum functionality and ease of use for testing, troubleshooting and custom-design evaluation with logic analyzers and oscilloscopes. Ceramic adapters are included with each clip.

The basic JEDEC QFP test clip (Fig. 1) is designed for use on densely-populated boards where space is at a minimum. Leads at the top of the clip are .022" × .012" and are spaced .075" apart. Clip leads can be accessed with special flying leads (not included) or with Pomona Micrograbber® clips.

Pomona's most popular JEDEC QFP test clip (Fig. 2) features a large board with .025" pins at .100" × .100" spacing for easy connection to logic analyzers and oscilloscopes. The board is elevated to avoid other board components near the target chip.

The Custom Flexible Interface Network (FIN™) clip (Fig. 3) provides a platform for your own board designs. Attach your custom-designed board to the top of the clip. Flex cables conduct the chip leads to your board using high-density connectors with .018" pins at .050" × .100" spacing. Requirements for board layouts are available from Pomona upon request.

Finally, Pomona's JEDEC QFP test clip (Fig. 4) with generic PGA socket provides a compact, standardized interface for design and testing.

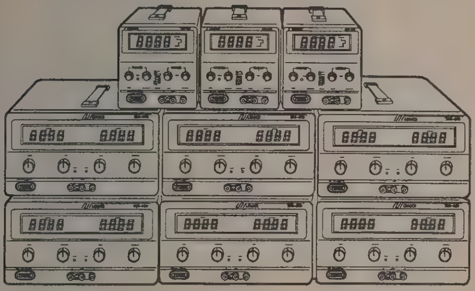
Model 700 Series Power Supplies



All Model 700 Series Single Output Power Supplies feature constant voltage and current modes of operation. Coarse and fine adjust controls for both voltage and current enhance setability and accuracy of the digital meters. The 3½ digit red LED displays are a half inch high and easy to see. All nine models have excellent specifications of ripple and noise including line and load regulation to maintain clean, stable output even under adverse conditions. Standard reverse polarity protection and fast overload recovery protect both the supply and the unit under test. **Specifications. Output Voltage:** 718-3D, 718-5D, 718-10D, 718-20D — 0-18; 730-3D — 0-30; 735-10D — 0-35; 760-3D — 0-0; 775-5D — 0-75; 7110-3D — 0-110. **Output Polarity:** ±. **Output Current:** 718-3D, 730-3D, 760-3D, 7110-3D — 0-3; 718-5D, 775-5D — 0-5; 718-10D, 735-10D — 0-10; 718-20D — 0-20. **Constant Voltage. Ripple Voltage rms:** 718-3D, 730-3D — ≤0.5 mV rms; 718-5D, 718-10D, 718-20D, 735-10D, 760-3D, 775-5D, 7110-3D — ≤1 mV rms. **Regulation Line:** ≤0.01% +3 mV. **Regulation Load:** 718-3D, 718-5D, 730-3D, 760-3D, 775-5D, 7110-3D — ≤0.01% +3 mV; 718-10D, 718-20D, 735-10D — ≤0.02% +5 mV. **Recovery Time:** ≤100 µs. Constant Current. **Ripple Current:** 718-3D718-5D,, 718-10D, 730-3D, 760-3D — ≤3 mA rms; 718-20D, 735-10D, 775-5D, 7110-3D — ≤5 mA rms. **Regulation Line/Load:** ≤0.2% +3 mA. Metering. **Voltmeter/Ammeter:** 3½ digit 0.5" LED ± (0.5% of rdg +2 dgt). Insulation. **Chassis and Terminal:** 718-3D, 718-5D, 718-10D, 730-3D, 760-3D — ≥20 mΩ, 500 Vdc; 718-20D, 735-10D, 775-5D, 7110-3D — ≥100 mΩ, 1 kVdc. **Chassis and AC Cord:** 718-3D, 718-5D, 718-10D, 730-3D, 760-D — ≥30 mΩ, 500 VDC. 718-20D, 735-10D, 775-5D, 7110-3D — ≥100 mΩ, 1 kVdc. Size (H × H × D): 718-3D, 718-5D — 5 × 5.7 × 11.2"; 718-10D, 760-3D — 10 × 5.7 × 13.2"; 718-20D, 735-10D, 775-5D, 7110-3D — 10 × 5.7 × 16.5"; 730-3D — 5 × 5.7 × 11.2". **Weight:** 718-3D — 8.8 lbs.; 718-5D, 730-3D — 11 lbs.; 718-10D, 760-3D — 25.3 lbs.; 718-20D, 735-10D, 775-5D — 40.7 lbs.; 7110-3D — 29.7 lbs. **Power Requirements:** 100 V, 120 V, 220 V, 2140 V ac ±10%, 50/60 Hz User Switchable.

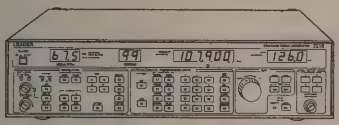
AM/FM Synthesized RF Signal Generators



- 100 kHz to 140 MHz Range
- AM/FM Modulation Int/Ext
- RF Output Level in 0.1 dB Steps
- Storage and Recall of 100 Test Conditions
- Stereo Separation ≥55 dB for Model 3216 Only

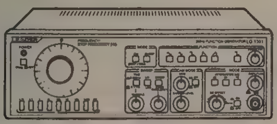
843Q3216. Model 3216	EACH	3467.33
843Q3215. Model 3215	EACH	3157.33

Model LAG-120B Audio Sine/Squarewave Generator

- Low Distortion: <0.05%
- Wideband 10 Hz to 1 MHz
- Frequency Response ± 0.5 dB
- 20 dB Variable, +50 dB Step Attenuators

843-0120. LAG-120B............EACH 445.00

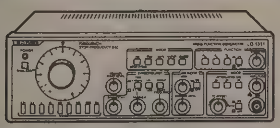
Model LG-1301 — NEW —
2 MHz Sweep/Function Generator



- Sine, Square, Triangle, Ramp and Pulse Outlet
- Adjustable Symmetry
- Sine, Square, Triangle, Ramps and Pulse Outlet
- Changing the Symmetry Does Not Affect Frequency
- Lin/Log Sweep Frequency Outputs

843-1301. Model 1301 ....EACH 495.00

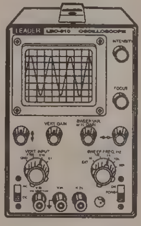
Model LG-1311 — NEW —
10 MHz Sweep/Function Generator



- Sine, Square, Triangle, Ramp and Pulse Outlet
- Adjustable Symmetry for all Waveforms
- CW, Trigger, Gate, Burst Plus Lin/Log Sweep Modes

843-1311. Model 1311 ....EACH 995.00

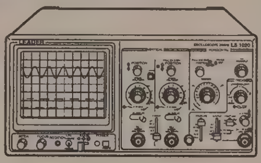
Model LBO-310A 4 MHz Recurrent Sweep Oscilloscope



- Practical for OEM Applications Needing Displays
- Low Cost
- Simple Operation
- Excellent for Continuous Monitoring

843-0310. Model LBO-310A..........................EACH 85.00

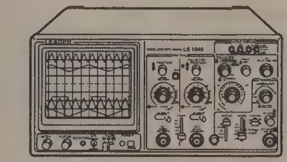
Model LS 1020 — NEW —
20 MHz 2-Channel Oscilloscope



- 20 MHz Bandwidth Referred to 8 Div.
- 500 µV/Div. Sensitivity
- 10 ns./Div. Maximum Sweep Speed
- Alternate Vertical Mode
- Alternate Triggering
- Variable Holdoff
- Channel 1 Monitor Output
- 400 V (dc + ac Peak) Maximum Input

843-1020. Model LS 1020..........................EACH 525.00

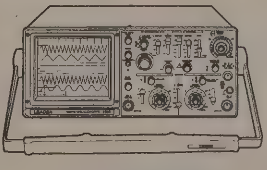
Model LS 1040 — NEW —
40 MHz 3-Channel Oscilloscope



- 0.5 mV Sensitivity
- 3 Channel 6 Trace Capability
- Alternate Vertical and Sweep Modes
- 10 ns./div. Max. Sweep Speed
- 12 kV PDA for Sharp Traces

843-1040. Model LS 1040..........................EACH 995.00

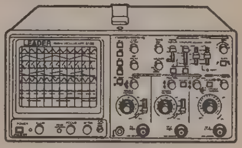
Model 8063 60 MHz 3-Channel Oscilloscope



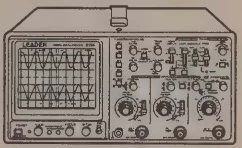
- 1 mV Sensitivity
- Calibrated Delayed Sweep
- 6 Trace Capability
- 5 ns Sweep Speed

843Q8063. Model 8063..........................EACH 1495.00

Model 8104 100-MHz 3 Channel Oscilloscope



8103



8104

- CRT Readout and Cursor Functions on 8104 Only
- 5 ns/div. Max. Sweep Speed
- 3 Channels with 8 Trace Capability
- Video Sync Pulse Sampling Circuit
- Channel 1 Output to 100 MHz
- XY Operation
- Z Axis (Intensity) Modulation

— NEW —

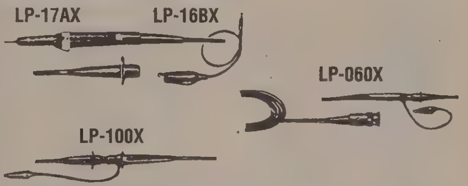
Oscilloscope Probes



LP-16BX (At X1 Position). Specifications. Bandwidth: DC-5 MHz. **Input Resistance:** 1 MΩ. **Input Capacitance:** <250 pF. **Maximum Input:** 600 V (DC + AC peak). **Cable Length:** 50" (125 cm). **LP-16BX (At X10 Position). Specifications. Bandwidth:** DC-40 MHz. **Input Resistance:** 10 MΩ. **Input Capacitance:** 22 pF±10%. **Max. Input:** 600 V (DC+AC peak).
843-9016. LP-16BX..........................EACH 50.00

LP-17AX (At X10 Position). Specifications. Attenuation: $\frac{1}{10}$ ±2%. **Frequency Range:** DC-40 MHz. **Input Resistance:** 10 MΩ. **Input Capacitance:** less than 25 pF. **Compensation Range:** 20-40 pF. **Max. Input:** 600 VDC. **Connector:** BNC.**LP-17AX (X100 Position). Specifications. Attenuation:** $\frac{1}{100}$ ±3%. **Frequency Range:** DC-20 MHz. **Input Capacitance:** less than 8 pF. **Compensation Range:** 20-40 pF. **Max. Input:** 1500 VDC. **Cable Length:** 50" (125 cm).
843-9017. LP-17AX..........................EACH 89.00

LP-100X (X1 Position). Specifications. Bandwidth: DC-100 MHz. **Input Resistance:** 10 MΩ. **Input Capacitance:** 22 pF ±10%. **LP-100X (X10 Position). Specifications. Bandwidth:** DC-6 MHz. **Input Resistance:** 1 MΩ. **Input Capacitance:** <150 pF. **General. Max. Input:** 600 V (DC + AC Peak). **Cable Length:** 59" (150 cm).
843-9011. LP-100X..........................EACH 89.00

LP-060X (X10 Position). Specifications. Bandwidth: DC to 50 MHz. **Attenuation:** $\frac{1}{10}$ ±2% (into 1 MΩ). **Input Resistance:** 10 MΩ (when connected to 1 MΩ input). **Input Capacitance:** 22 pF +10%. **Compensation Range:** 20 to 40 pF. **Maximum Input:** 600 V (DC + AC peak). **LP-060X (X1 Position). Specifications. Bandwidth:** DC to 3 MHz. **Input Resistance:** 1 MΩ (when connected to 1 MΩ input). **Input Capacitance:** <250 pF. **Maximum Input:** 600 V (DC + AC peak). **Cable Length:** 50" (125 cm).
843-9060. LP-060X..........................EACH 75.00

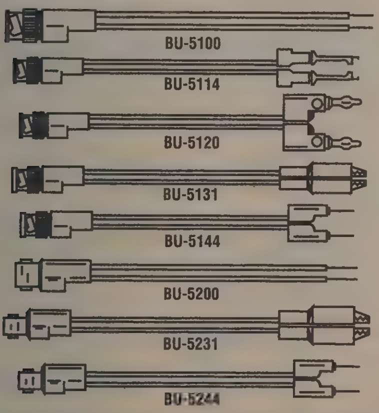
BNC Breakouts



Series 5100 BNC Male Breakouts and Series 5200 BNC Female Breakouts feature tarnish resistant plated brass body, gold-plated center contact. Types BU-5100 and BU-5200 are BNC Male/Female to tinned end wires. Types BU-5131 and BU-5231 feature BNC to alligator clips. Types BU-5144 and BU-5244 feature BNC to 0.080" pins. In addition, male only BNC connectors are available to "Clipper" Test Leads (Type BU-5114), and to standard banana plugs (Type BU-5120). All Breakouts are four inches (4") long. Wires and terminations are color coded red and black for easy identification.

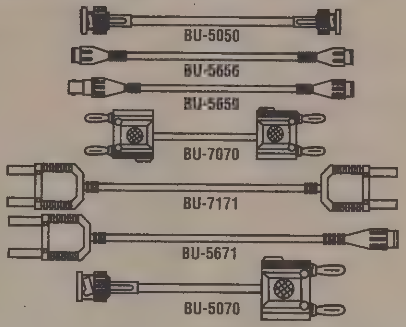
BNC and Banana Interconnects



Type BU-5050 has BNC Male Connectors at both ends. Type BU-5656 is the same except features fully insulated BNC Male Connectors. Type BU-5659 is a BNC Male-Female coaxial cable. Type BU-5070 is a BNC to Banana cable assembly. Type BU-7070 has dual banana plugs 0.75" OC on coax. Type BU-7171 features shielded dual banana (0.75" OC). Type BU-5671 combines the insulated versions of both the BNC Male and double banana into the same assembly. All on RG-58 (50 Ω) cable.

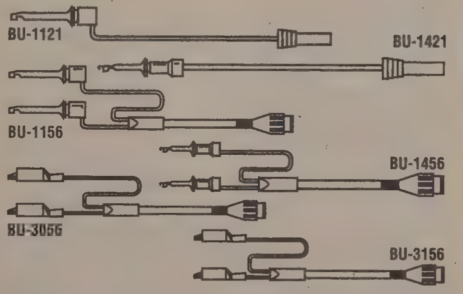
Safety Test Clips



Type BU-1121 consists of a clipper to shielded banana plug. Type BU-1421 includes a mini-micro clipper to shielded banana plug useful for connection to fine wiring. Types BU-3056 and BU-3156 are dual alligator clips and mini-alligator clips, respectively to completely shielded BNCs. Types BU-1156 and BU-1456 are clippers and mini clippers, respectively to completely shielded BNCs.

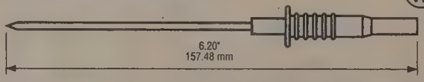
BU-26130 Ultra Tech Test Prod



Accepts both safety and uninsulated 4 mm banana plugs. The high quality polished stainless steel prod tip easily pierces lacquered and oxidized contact points up to 1000 V. Insulated body with safety shock guard collar reduces the risk of contact with voltage carrying parts. The slim-line prod design with clear Kynar® insulated sleeve allows for easy testing in confined areas. **Mech. Connection:** 0.16" (4 mm) nickel-plated brass banana jack.

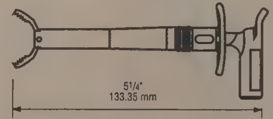
BU-20434 Right Angle Insulated Plunger Jaw Clip — 1000 V, 15 Amp



Powerful jaws hold thick wire and cable, ground leads and rails, even screw heads, securely to make work easier, more accurate. Depress the plunger and the steel jaws extend 0.48" (12 mm) and open to 1" (25 mm). The right angle banana jack accepts ultra-flex leads and numerous other insulated and conventional banana plugs. The plunger body is fully insulated and the jaws are nickel-plated steel. **Mech. Connections:** 0.16" (4 mm) insulated right angle banana jack.

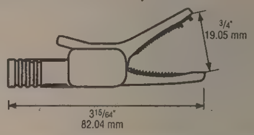
BU-65 Safety Crocodile Clip — 34 Amp



Fully insulated and molded from high-strength, glass-filled nylon. Plastic shrouds completely cover metal parts. Rated to 1000 V. The hinge and spring design permits wide jaw opening and high clamp pressure from a comparatively low-profile clip. A sharp tooth in the lower jaw of the clip prevents it from falling off when in operation.

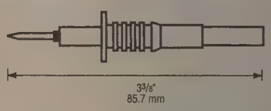
860-7661. BU-65-2. Red ....**EACH 4.15**

BU-26106 Insulated Plug-On Test Prod with 8-32 Thread



Accepts 4 mm insulated banana plugs. Positive contact up to 1000 V is provided by the high quality 0.08" (2 mm) stainless steel test point. The collar is flat on one side to prevent rolling. The insulated body reduces risk of contact with voltage carrying parts with a tough safety shock guard collar. 0.16" (4 mm) nickel-plated brass banana jack.

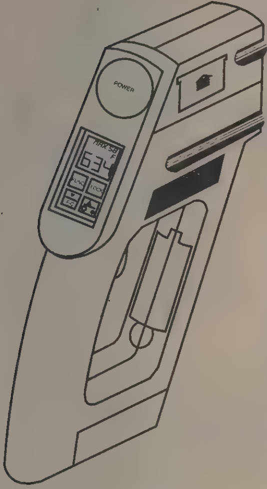
Handheld Infrared Thermometers

— NEW —



With a combination of powerful features, the new portable and rugged OS520 series infrared thermometers offer solutions for many non-contact temperature measurement applications. Emissivity range of 0.1 to 1.0 is adjustable in 0.01 increments, provides versatility when measuring a variety of surfaces. A custom backlit LCD display provides dual digital display of current and max. or min. temperatures simultaneously. This provides the user with more information at a glance. The OS520 also features a high alarm setpoint, providing both audible and visual indication of the alarm status. The standard 1 mV per degree analog output allows interfacing with data acquisition equipment, including chart recorders, dataloggers and computers. The standard accuracy is ±2% of reading or 3°F (whichever is greater). Unit shown with optional laser sight.

SANTRONICS DC Detector

Applications

- Automotive
- Trucks/RVs
- Marine
- Heavy Equipment
- Telecommunications
- Industrial Controls
- Aviation
- Farm Equipment
- Office Equipment
- Any Other 6-50 DC Volt System

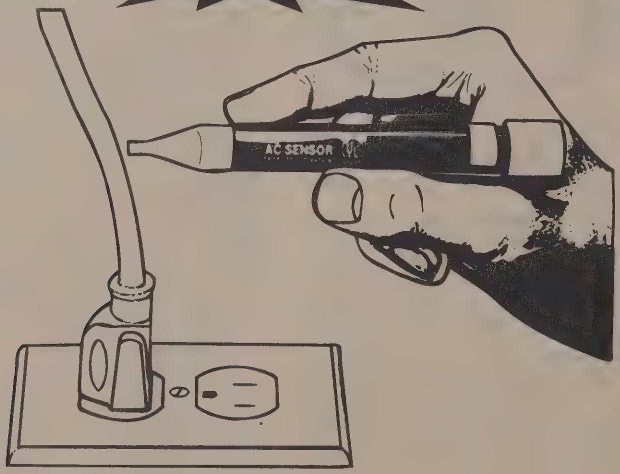
Advantages

- Buzzer — Provides Audio Indication of DC Voltage
- LED Light — Will Never Burn Out
- Large Clip — Fits Ground Connection Points Small to Large
- Sharp Tip — Penetrates Fine and Heavy Wire
- Construction — Using the Finest Materials Available
- Stainless Steel Tip — Rust Proof
- Solid State Circuitry — Total Reliability
- Test Lead Wire — 20 Gauge Heavy Duty Heat Resistant
- Pen Sized — to Fit Comfortably in User's Hand
- 100% Manufactured in the U.S.A.
- Safe for Use on Computerized Vehicles

973-0006. Model 3315 .... **EACH 19.95**

SANTRONICS AC Sensor

THE CHOICE OF OSHA



Features of the Santronics AC Sensor

- UL Listed – Tested for Public Safety
- Outstanding Safety Instrument – Locates Defective Ground, Energized Circuits, Induced Voltage
- No Contact with Conductor Wire Required
- Senses Voltage Through Insulation
- All Outer Surfaces Are Non-Conductive for Safety
- Fits in Shirt Pocket for Convenience
- Excellent Circuit Tracer
- Electrician, Maintenance, Service, and Safety Personnel Need This Tool Daily
- Probe Glows Cherry Red in Presence of AC Voltage — No Skill Required for Operation
- Detects 110–600 Volts AC
- Guarantee Certificate with Each Unit
- ENERGIZER® Alkaline Batteries Included
- Product Manufactured, Printed, and Packaged in the U.S.A.
- Meets OSHA Requirements for Personal Verification in Lockout/Tagout Procedures

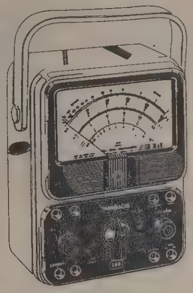
260 Series 8 VOMs



- ► Accuracy for the Lab, Rugged Construction for the Field
- ► Excellent for Adjustments Such as Nulling and Peaking
- ► Large Color Coded Scales
- ► AC Frequency Response to 100 KHz
- ► Zero RFI
- ► Standard and High Energy Overload Fusing
- ► Varistor Protected Meter Movement
- ► UL 1244 Listed
- ► Mirrored Scale
- ► Broad Range of Accessories and Probes
- ► Wide Range Capabilities
- ► Includes Test Leads and Batteries
- ► Overload Protection Circuits — Models 260-8P, 260-8PRT, 260-8XPi
- ► Audible Continuity Checking — Models 260-8P and 260-8PRT

Traditional design, rugged reliability and excellent performance keep the 260s on the bench of generations of engineers. The 260-8 series reflects commitment to provide the best combination of quality, technology and affordability. Needs no external power, avoids common mode problems, no interference or triggering of external sensitive circuits, no RF radiation. Offers reliable and rapid checks for semiconductor junctions and forward/reverse resistance tests. The 260-8 series is UL listed and continues the tradition of practicality and reliability which made the 260 the best known VOM of all time. All versions have mirror scale for parallax elimination, allowing you to make more accurate measurements.

Specifications. DC Volts. Range: 250 mV, 1 V, 2.5 V, 10 V, 25 V, 50 V, 250 V, 1000 V. **Sensitivity:** 20 K Ohms/Volt. **AC Volts. Range:** 2.5 V, 10 V, 25 V, 50 V, 250 V, 500 V, 1000 V. **Sensitivity:** 5 K Ohms/Volt. **Resistance Range:** x1, x100, x10K. **DC Current Range:** 50 µA, 1 mA, 10 mA, 100 mA, 500 mA, 10A. **AC Current Range:** up to 250 A AC with amp-clamp accessory probe (not supplied). **Decibels Range:** –20 dB to +50 dB (5 ranges). **Continuity Test (260-8P and 260-8PRT Only):** Audible sound when a resistance of less than 150 ohms is measured between the probes. **Meter Movement:** taut band, self-shielding, annular, 100° arc, 4.2" length, color coded, mirror backed for parallax elimination. Direct reading amp-clamp scales. **Overload Protection:** Models 260-8 and 260-8PRT — one 1 A/250 V fuse and one 2 A/600 V fuse; Models 260-8P and 260-8PRT — resettable circuit breaker. **Dimensions:** 7"H × 5.5"W × 3.1"D. **Weight:** 3 lbs.

228 Leakage Current Tester

► **Meets New ANSI Specifications C101-1992**

Model 228 is a special purpose AC/DC milliammeter designed to measure hazardous currents (leakage currents, or touch currents) which may appear when a person touches the surfaces of electrical or electronic equipment. The 228 meets the guidelines set forth in: IEC-930, ANSI C101-1992, UL 1459, and IEC 1010-1. This unit has special networks for burn hazard, react response, and let go response. Measures leakage current and matches the human body's decreasing sensitivity to the sensation of electrical shock as the frequency increases. It has an integral RMS reading/measuring device and output for measuring peaks on non-sinusoidal waveforms.

Insulation Testers — Battery Operated

- ► Three Types Available: 0-5000 V
- ► Push-to-Read/Lock-On Feature Saves Batteries
- ► No Hand-Cranking Required
- ► Neon Scale Selection Indicators

Ideal for high voltage, non-destructive insulation tests on electrical installations, machines, equipment and transformers. Neon indication for range selection. **Specifications. Accuracy:** Megohm ranges — ±1.5% fs length. Comes complete with batteries, two plug-in insulated test leads, probes, carrying strap, and operators manual.

919-0405. Type 12504. Model 405-2, 0-5000 V	**EACH**	**2186.67**

Environmental Testers — Sound Level Meters

Meets ANSI S1.4-1983 (R1976) and IEC 651specifications. Meters are type S2a. Solid state construction housed in rugged, high-impact plastic case. Model 884-2 offers 40-140 dB range, in 10 dB increments, and offers 'A' weighting. Model 886-2 offers 40-140 dB range, and has 'A-B-C' weightings, selectable by push-button. Model 899 is an Impulse Sound Level meter, for more accurate monitoring of short duration sounds. All models have omnidirectional condenser, type L size microphones. All sound level meters shipped with carrying case, wind screen, batteries, calibration screwdriver, and operators manuals.

Environmental Testers — Sound Dosimeters

Simpson Model 897 Dosimeter Sound Measuring System computes dosage and records up to 31 hours of data at one minute intervals. Use the 897 for taking measurements, or viewing printed reports using your PC computer/printer. Used as a sound level meter, the 897 provides a quick survey of targeted areas and identifies suspect locations. The SMS-2 kit includes dosimeter, calibrator, batteries, parallel and serial cables, AC adapter, wrench, and case.

Environmental Testers — Microwave Leakage Tester 380-2

This battery-operated direct reading portable instrument meets the measurement requirements of the Federal Performance Standard for leakage from microwave ovens. Used for pre-testing by manufacturers and for in-the-field checking of commercial, industrial and institutional installations by professionals, this unit is completely self-contained with readings in mW/cm2. It measures the amount of microwave frequency leakage at 2450 MHz. **Specifications. Power Density Reading Ranges:** 0-2.5-10-25-100 mW/cm^2. Fast — 1.2 sec. max.; Slow — 3.0 sec. max. **Weight:** 0.8 lbs. **Power:** One 9-Volt batteries. **Supplied With:** Probe, foam spacer, battery, owners manual, carrying case.

TFS3031 TekRanger™ Mini-OTDR

- One-Button Automatic Fiber Analysis
- Large, High-Resolution Display
- "Real Time" Testing
- Easy-to-Change Wavelengths
- 5 Meter Singlemode Dead Zone
- 8 Meter Multimode Dead Zone
- .02 dB Loss Threshold
- 32 dB Singlemode Dynamic Range
- 26 dB Multimode Dynamic Range
- Measurements Reported: Splice Loss, Reflectance, Link Loss, Fiber Attenuation, Distance to Events
- Shock, Water, And Dust Resistant
- Echo Detection
- Compatible with: FiberMaster, FMTAP, PC Spreadsheets
- Internal Memory for 100 Waveforms
- Software Upgradeable in The Field
- 4 Hour Battery Charge Time
- RS232 and Parallel Ports
- 3.5 Inch Internal Floppy-Disk Drive (Optional)
- Multimode/Singlemode (CCITT G.652) in One Unit (Optional)

The TFS3031 TekRanger™ Mini-ODTR with IntelliTrace™ Automated Fiber Analysis System is a rugged, easy-to-use, mini-optical time domain reflectometer (OTDR) built to stand the rigors of field work, while providing precise measurements on singlemode or multimode optical fiber systems.

The location, reflectance and loss of every splice in a system appears quickly and clearly on the large 7-inch display screen. The TFS3031 is the only mini-OTDR that can report a splice 30 meters away while also finding splices more than 100 kilometers away at the push of a single button.

The IntelliTrace Advantage. IntelliTrace technology automatically adjusts acquisition parameters to provide the best possible resolution, while maintaining the necessary dynamic range for accurate measurements. The various pulse widths used during the acquisition result in a much more accurate waveform.

Easy to Operate. Operation of the TFS3031 with IntelliTrace Automated Fiber Analysis System is simple and quickly learned. One-button operation brings up easy-to-read traces on the display screen along with an event table, indicating everything about a splice.

Optional Floppy Disk. Test results are stored in the TekRanger Mini-OTDR's ample internal memory or collected on the optional floppy disk. The data, uploaded to a PC, allows further analysis with FMTAP Trace Analysis Software. The data can also be used in the full-sized Tektronix FiberMaster OTDR.

Specifications

Optical Characteristics: 850 nm optical output — 850 ±20 nm; 1300 nm optical output — 1300 ±20 nm; 1310 nm optical output — 1310 ±5 nm; 1550 nm optical output — 1550 ±10 nm. **Loss Threshold:** .02 dB minimum. **Loss Resolution:** .001 dB.

Dynamic and Measurement Range

	Dynamic Range SNR=1	Measurement Range Bellcore: GR-196-CORE
850 nm (opt 01)	26 dB	20 dB
850/1300 nm (opt 03)	26/25 dB	20/19 dB
1310 nm (opt 04)	28 dB	22 dB
1310/1550 nm (opt 06)	28/26 dB	22/20 dB
1310/1550 nm (opt 08)	32/30 dB	26/24 dB
1550 nm (opt 09)	31 dB	25 dB

Distance Measurements: Meters, feet, miles. **OTDR Distance Range Settings:** Singlemode — 1 to 160 km; Multimode — 1 to 40 km. **Distance Resolution (Intellitrace):** 25 cm-20 m. **Field Usage:** Shock, water and dust resistant — tested to Bellcore mini-OTDR TR environmental specifications (i.e. 30-inch drop, shock, etc.).

Dead Zone (Options 01, 03, 04, 06, 08)

	Event Detection	Loss Measurement
Singlemode	5 m	20 m
Multimode	8 m	15 m

Display: High resolution 640 × 480, 307,200 pixels; 7 inch, high contrast; operator switchable backlite. **Selectable Pulse Widths:** 850 nm Multimode — 1 m, 5 m, 10 m; 1300 nm Multimode — 1 m, 5 m, 10 m, 20 m, 50 m, 100 m; Singlemode — 1 m, 5 m, 10 m, 20 m, 50 m, 100 m, 500 m, 1000 m, 2000 m. **Memory Capacity:** 100 traces in internal memory (typical), 3.5 inch floppy disk drive (optional). **Output Ports:** RS 232 Serial, Centronix parallel printer. **Power Options:** AC (100-240 V, 50-60 Hz); 916 VDC internal NiCad rechargeable battery (8 hours of operation). **Safety:** Laser safety — Class I per 21 CFR 1040, Class I per CEI/IEC 825-1: 1993. **Ordering Information. TFS3031 TekRanger Base Unit Output Port Options:** Multimode Options — option 01 single wavelength 850 nm, option 03 dual wavelength 850/1300 nm; Singlemode Options — option 04 single wavelength 1310 nm, option 06 dual wavelength 1310/1550 nm, option 08 dual wavelength (extended range), 1310/1550 nm, option 09 single wavelength (extended range) 1550 nm. **Multimode/Singlemode Option Packages:** The following multimode/singlemode options can be combined into one instrument — 03 and 06, 01 and 06, 03 and 04, 03 and 08, 01 and 04.

TFP2A FiberMaster®
Optical Time Domain Reflectometer

- High-Speed Processing
- User-Friendly
- High-Resolution Color Display System
- Custom Configurable Design
- Dual Optical Plug-In Capacity Mainframe
- High-Resolution and Long-Range Performance
- Expandable Overview/Window Design
- Dual Trace Display Capability
- Automatic or Manual Mark Events
- Event Tables
- Pop-Up Menus
- Automatic/Manual Masking
- Cleanable/Interchangeable Optical Connector Adapter
- High-Resolution Internal Printer (Optional)
- Link and Event Return Loss Capability
- MS-DOS File Compatible
- Floppy Disk Drive
- Internal RAM (Optional)
- AT Compatible Keyboard Interface
- GPIB and RS-232C Interfaces
- PC Trace Analysis Software, FMTAP
- Remote Operation
- Language Options

Unlike any other OTDR on the market, the TFP2A FiberMaster sets a new level of performance and flexibility, providing faster, easier, more efficient solutions to fiber optic network testing requirements. FiberMaster is the only OTDR equipped to accommodate two dual-wavelength optical plug-in modules at the same time. Fully utilized, this feature gives you dual-wavelength multimode and dual-wavelength singlemode optical cable testing at the touch of a button. This allows testing of virtually any communications network, Telco, CATV or LAN without switching modules. FiberMaster is driven by a high-speed 32-bit processor that delivers clear, concise, accurate waveforms in a fraction of the averaging time taken by other OTDR systems which are based on traditional PC technology.

Characteristics. CRT Display. Size: 16.5 cm (6.5") diagonal. **Resolution:** 640 × 480 pixels. **Type (Color):** CRT with liquid crystal color shutter. **Cursors:** Selectable, dual independent. **Module Capacity:** Maximum 2 plug-ins providing 4 wavelengths. **Hardcopy Output. Internal Printer:** High-speed/resolution dot matrix, thermal. **Resolution:** 150 dots/in. vertical and horizontal (1.1 ratio to CRT display). **Print Dimensions:** 10.2 cm × 12.7 cm (4". × 5"). **GPIB to External:** HPGL Plotter and HP ThinkJet. **RS-232C to External:** HPGL Plotter, HP ThinkJet, Epson, Postscript. **Defaults:** Factory and user selectable. **Non-Volatile Memory. Mass Storage:** MS-DOS compatible. **Internal Floppy Disk Drive:** Size — 8.9 cm (3.5"); 1.44 MB or 720 KB. **Internal RAM:** Capacity — 1 MB, non-volatile. **Keyboard Interface:** AT compatible, 6-pin modular. **Display Range. Vertical System:** Vertical display range, one way — 1.0 dB to 100 dB; Loss readout resolution range — 0.001 dB to 0.01 dB. **Mainframe Horizontal System:** Distance display range — 1 m to 320 km; Distance measurement cursor resolution — 850 nm MM - 5 cm normal density, 1 cm high density; 1300 nm MM, 1310 nm SM, 1550 nm SM - 20 cm normal density, 10 cm high density. **Index of Refraction Range:** 1.4000 to 1.6000. **Distance Measurement Accuracy:** ±0.001% ± min. cursor resolution, ± uncertainty in fiber cal. factor. **Number of Stored Waveform Points:** 16 K max. (normal), 32 K max. (high density).

Ordering Information. FiberMaster with Color Display: Order TFP2A. **FiberMaster with MonoChrome Display:** Order TFP2AM. **Includes:** Operator's manual (070-7906-05); soft carrying case (016-1037-01); front panel cover (200-3566-00); power cord (161-0104-00). **Optics Plug-In Options (Multimode):** Opt. 01 — 850 nm MM; Opt. 02 — 1300 nm MM; Opt. 03 — 850 nm/1300 nm MM. **Optics Plug-In Options (Singlemode):** Opt. 04 — 1310 nm SM; Opt. 05 — 1550 nm SM; Opt. 06 — 1310 nm/1550 nm SM; For options 01-06 select one connector per option at no charge. **Connector Options (Multimode):** Opt. 20 — Biconic (119-4515-00); Opt. 21 — FCPC (119-4516-00); Opt. 22 — D4PC (119-4514-00); Opt. 23 — SMA906 (119-4517-00); Opt. 24 — STPC (119-4513-00); Opt. 25 — DIN 47256 (119-4556-00); Opt. 26 — Diamond 3.5 (119-4558-00); Opt. 27 — Diamond 2.5 (119-4546-00); Opt. 28 — SCPC (119-4518-00); Opt. 29 — SMA 2.5 (119-4517-00). **Connector Options (Singlemode):** Opt. 30 — Biconic (119-4515-00); Opt. 31 — FCPC (119-4516-00); Opt. 32 — D4PC (119-4514-00); Opt. 33 — SMA 905/906 (119-4557-00); Opt. 34 — STPC (119-4513-00); Opt. 35 — DIN 47256 (119-4556-00); Opt. 36 — Diamond 3.5 (119-4558-00); Opt. 37 — Diamond 2.5 (119-4546-00); Opt. 38 — SCPC (119-4518-00); Opt. 39 — SMA 2.5 (119-4517-00).

FMTAP FiberMaster
Trace Analysis Package 2.1

- Screen-Dumps For Printing on a Variety of Printers, or Importing Into Word Processor Documents
- Screen-Dumps to a File in BMP or TIFF Format
- Batch Printing of Waveforms
- Export of Waveform Data for Use with Spreadsheet or Word Processor
- Two-Way Event Averaging
- Automatic and Manual Event Marking
- Comprehensive Event Table
- Waveform File Searches with Selectable Tolerances for All Event Table Measurements
- Copy Established Event Markers for Documenting Redundant Fibers
- Link Return Loss
- Event Return Loss
- High Density Data
- Waveform Subtraction
- Waveform Averaging

FMTAP, Trace Analysis Software for the TFP2 FiberMaster™ and TFS3031 FiberMini™ OTDRs, allows you to use an IBM PC or compatible to display and analyze waveforms created by a FiberMaster or FiberMini OTDR. Use the FiberMaster or FiberMini to acquire the waveform data and save it to a floppy disk file. Then use the PC to manipulate the waveforms and perform many of the same kinds of measurements that are possible on the FiberMaster and FiberMini. **System Requirements. Processor:** 80286-, 80386-, or 80486-based IBM PC or PS/2 (or 100% compatible). **Operating System:** MS-DOS or PC-DOS 3.30 or later. **Base Memory:** 640 Kbytes RAM minimum, 580K available. **Extended or Expanded Memory:** At least 1 Mbyte required. **Graphics Adapter:** Color VGA. **Monitor:** Color VGA. **Fixed Disk Drive:** Two Mbytes minimum. **Floppy Disk Drive:** 3½ inch, 1.44-Mbyte or 5¼ inch, 1.2 Mbyte capacity, IBM compatible. **Mouse:** Two- or three-button Microsoft-compatible serial mouse. **Ordering Information. FMTAP:** FiberMaster Trace Analysis Package. **Includes:** Disk pack — contains one 3½ inch and one 5¼ inch floppy disk, FMTAP users manual (070-8433-02), FMTAP quick reference card (063-0828-02), FiberMaster utilities disk pack (063-1493-01).

Optical LED Source
TOP130 — 850/1300 nm

- Dual Wavelength — 850 nm and 1300 nm
- Excellent Long-Term Stability
- Selectable Output — CW or Modulated
- Three Modulation Frequencies — 270 Hz, 1 kHz, and 2 kHz
- >20 Hours Battery Life
- Universal (SOC) Interface
- Functions: MOD — Modulated Output Mode; CW — Continuous Wave DC Output Mode; FREQ — User Selectable Frequency - 270 Hz, 1 kHz, or 2 kHz

Optical Laser Source
TOP140 — 1310 nm,
TOP150 — 1550 nm,
TOP160 — 1310/1550 nm

- Stabilized Calibrated Output
- Hermetically Sealed Laser Diode for Longevity
- Selectable Modulation Frequencies — 270 Hz, 1 kHz, 2 kHz
- Universal (UCI) Connector Interface
- >36/100 Hours Battery Life (>50 Hours TOP160)
- Functions: MOD — Modulated Output Mode; CW — Continuous Wave DC Output Mode; FREQ — User Selectable Frequency - 270 Hz, 1 kHz, or 2 kHz

Optical Power Meter
TOP200 — 850/1300/1550 nm

- Relative dB Mode for Direct Attenuation and Insertion Loss Measurements
- 0.01 dB Resolution
- Set Reference for Different Wavelengths
- Saves References for Each Wavelength
- Universal, SOC Interface
- >100 Hours Battery Life
- Functions: dBm — Absolute Power; dB — Relative Power, Also Used to Save/Recall Reference Values; λ Select CAL Wavelength, Also Used to Set Default/CAL Wavelength; CAL — Calibrate Unit

Visual Fault Finder
TOP300 — 635 nm

- High Brightness
- Universal (UCI) Connector Interface
- Fiber Tracing
- Fault Location to Millimeter Accuracy
- Long Battery Life
- Solid State Substitute for HeNe Laser

TDS 460A
- **400 MHz Bandwidth**
- **Four Channels Each With 100 MS/s Sampling Rate**

Common Features
- **30 K Point Records Standard; 120 K Optional**
- **1 mV To 10 V/div Sensitivity**
- **Hi-Res Mode For Up To 12 Bits Of Single Shot Vertical Resolution**
- **8-Bit Vertical Resolution**
- **10 ns Peak Detect Mode For Glitch Capture**
- **Pass/Fail Waveform Testing**
- **Roll and Triggered Roll Mode**
- **25 Automatic Measurements**
- **3.5" Floppy Disk**
- **1.5% Vertical Accuracy**
- **GPIB Programmable**
- **Infinite and Variable Persistence**
- **High-Performance Video Trigger (Optional)**
- **FFT, Integration and Differentiation Package (Optional)**
- **Printer Pack (Optional)**

Applications
- **Biophysical Research**
- **Biomedical Research**
- **Electromechanical System Design**
- **Audio System Measurement and Analysis**
- **Manufacturing Test and Quality Control**
- **Power Supply and Power-Related Design**
- **Product Service and Maintenance**

TDS 400A Series
The TDS 400A Series high-performance four-channel oscilloscopes (TDS 430A, two channels) are well suited to electromechanical and medical research, circuit design, electronic service, and manufacturing quality control. They offer wide dynamic range, fast overdrive recovery, flat response, 1 mV/div. sensitivity, and calibrated DC offset. Bandwidths of 200 MHz (TDS 420A) and 400 MHz (TDS 430A and TDS 460A) with 100 MS/s sampling rate — coupled with record lengths to 120,000 points — provide acquisition power and flexibility.

Workhorse Power
Many powerful features have been integrated into the intuitive TDS 400A Series user interface. At slow sweep speeds, Hi-Res mode provides up to 12 bits of vertical resolution on single-shot events. A zoom feature magnifies waveforms for analysis of small details. Template testing, roll mode, and 25 automated measurements make these products work for you.

The TDS 400A Series scopes have sensitive, wide bandwidth triggers with AC, DC, LF Reject, HF Reject, and Noise Reject coupling modes. The optional video trigger has positive and negative sync, line rates to 64 kHz, selectable fields, interlaced or non-interlaced video, and individual line selection.

Advanced Performance
At timebase settings of 50 ms/division or slower, newly-acquired points roll onto the screen from the right, making slowly varying signals easier to view. A unique Triggered Roll Mode allows the user to view pretrigger information, then capture a waveform record when a trigger event occurs.

Twenty-five automatic measurements eliminate the counting of divisions and manual cursor measurements. The user can set reference levels. In addition, measurement gating allows selection of a specific part of a waveform for measurement. The Snapshot feature simultaneously makes all 25 measurements on any single waveform. At slow sweep speeds, digitizing scopes reach a point where the available record length limits the number of samples than can be retained per second. Most scopes react by saving a point every few points and discarding the rest — missing high-speed waveform details. Peak Detect Mode employs proprietary hardware to retain data about those "extra" points and shows detail up to the maximum sample rate.

Variable Persistence allows waveform points to decay gradually through a 16-level gray scale, providing "z-axis" information about rapidly changing signals. Limit Testing compares waveforms against a template on-the-fly, automatically stopping acquisitions or saving the waveform whenever the template is violated. Templates can be created and adjusted from the front panel or imported over the GPIB interface and saved in non-volatile memory.

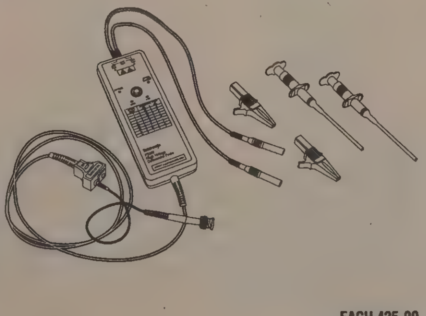
P5200 Differential Probe

- **1300 V Differential**
- **±1 kV to Ground (Each Channel)**
- **50X/500X Attenuation**
- **25 MHz**
- **Excellent Signal Fidelity**
- **Easy Connection to ICs and Bus Bars**
- **Safe for User and DUT**
- **UL Certified 1244**
- **IEC 1010 Certified**

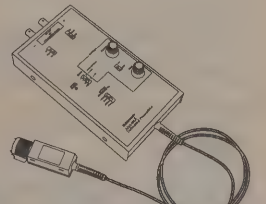


The P5200 enables users to safely make measurements up to 1300 V differential of floating circuits with their oscilloscopes grounded. The P5200 Active Differential Probe converts floating signals to low voltage ground referenced signals that can be displayed safely and easily on any ground referenced oscilloscope.

700-5200. Model P5200 .... **EACH 425.00**

ADA400A
Differential Preamplifier

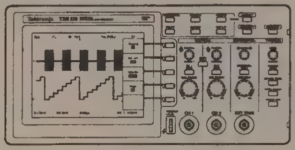
- **Active Differential Preamplifier**
- **10 µV/div. Sensitivity**
- **Typically 100 dB CMRR DC 10 KHz**
- **Integral Probe Power in TEKPROBE™ BNC**



The ADA400A Differential Preamplifier allows direct oscilloscope measurements of very low amplitude voltages and signals which are not ground referenced. The high impedance of both inputs eliminates the need to add additional ground points in the DUT, thereby avoiding circulating currents which disturb the measurement or the circuit.

700-5205. Model ADA400A .... **EACH 995.00**

TDS 200 Series Digital Real-Time Oscilloscopes



- **TDS 210 — 60 MHz; TDS 220 — 100 MHz**
- **1 GS/s Sample Rate**
- **2 Channels**
- **Dual Timebase**
- **Cursors and Measurements**
- **Autoset**
- **5 Setup Memories**
- **2 Reference Waveforms**
- **Edge and Video Triggering**
- **5 Automatic Measurements**
- **Vector and Dot Modes**
- **Multi-Language User Interface**
- **Extension Modules for RS-232, GPIB Programmability, and Parallel Printer Interface**
- **Compact, Lightweight**

The 60 MHz TDS 210 and the 100 MHz TDS 220 Digital Real-Time Oscilloscopes offer an unbeatable combination of performance, reliability, and affordability. Fast, error-free measurement,s low cost, and a familiar user interface encourage analog users to move to digital oscilloscopes.

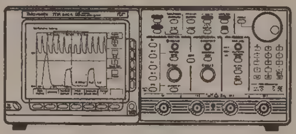
700-0920. TDS 220 .... **EACH 1695.00**

TDS 640A Digital Real-Time Oscilloscope



- **500 MHz Bandwidth**
- **2 GS/s Sample Rate on 4 Channels**
- **Time Interval, 2 ns Glitch, Runt, Pattern, and State Triggering**
- **1 mV to 10 V/div. Sensitivity**
- **Infinite and Variable Persistence**
- **Record Length to 2000 Points**
- **8-Bit Resolution 11-Bit with Averaging**
- **1.5% Vertical Accuracy**
- **FFT, Integration, Differentiation**
- **25 Automatic Measurements**
- **Full GPIB Programmability**
- **HDTV Triggering (Optional)**

The TDS 640A oscilloscope provides an excellent combination of affordability and high performance. It delivers full 500 MHz bandwidth and 2 GS/s Digital Real-Time acquisition on all channels simultaneously. Its intuitive interface combines dedicated controls with graphical displays, icon-based menus, and on-line help. The TDS 640A scope also offers extensive triggering capabilities and 25 automatic measurements. Includes: 4 each P6139A active FET probes, Reference Card (070-8711-01), user manual (070-8715-03), programmer's manual (070-8709-01), front cover (200-3696-00), U.S. power cord (161-0203-01), performance verification (070-9717-02).

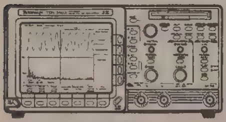
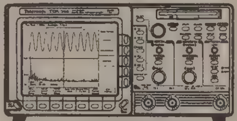
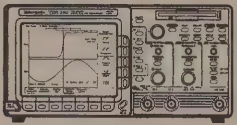
TDS 300 Series Digital Real-Time Oscilloscopes



TDS 340A



TDS 360



TDS 380

The TDS 300 Series oscilloscopes set a new price/performance standard. They are the first low-cost scopes with the power to acquire signals over their entire bandwidth with minimal aliasing, even when measuring high-speed transient and single-shot events. Their intuitive interface combines dedicated knobs with menu-driven digital functions. Twenty-one automatic measurements, FFT, information-enhancing display modes, and both edge and basic video triggering are standard. The TDS 360 and TDS 380 also include a built-in floppy disk drive.

Specifications. Signal Acquisition. Channels: 2. **Sensitivity:** 2 mV to 10 V/div. **Calibrated Offset Ranges:** ±1 V offset range — 3-99.5 mV/div.; ±10 V offset range — 100-995 mV/div.; ±100 V — 1-10 V/div. **Position Range:** ±5 div. **DC Gain Accuracy:** ±2%. **Vertical Resolution:** 8 bits. **Time Base System. Record Length:** 1000 points. **Horizontal Accuracy:** ±0.01%. **Roll Mode:** 0.1 s/div. **Acquisition Modes:** Sample, Envelop, Average, Peak Detect. Trigger System. **Trigger Types:** Edge, Video. **Trigger Modes:** Auto, Normal. **Video Trigger Formats and Field Rates:** Triggers on Field 1, Field 2, Any Field (noninterlaced systems), or Lines; from Sync-negative composite video; triggers on broadcast standard NTSC, PAL, or SECAM video, and other interlaced and noninterlaced video with horizontal line rates from 15 to 65 kHz (in 5 ranges) and field rates from 50 to 60 Hz. **Display System. Interpolation:** Sin(x)/x. **Mode:** Vector, Dots, Vector Accumulate, Dot Accumulate. **Format:** YT and XY. **Includes:** User Manual (070-9459-00), Reference (070-9434-00), NIST-traceable certificate of calibration, U.S. power cord (161-0230-01), and two each P6109B 10X passive probes for the TDS 340, two each P6111B 10X passive probes for the TDS 360 or two each P6114B 10X passive probes for the TDS 380. **Model TDS 340. Bandwidth:** TDS 340 — 100 MHz; TDS 360 — 200 MHz; TDS 380 — 400 MHz. **Sample Rate (Each Channel):** TDS 340 — 500 MS/s; TDS 360 — 1 GS/s; TDS 380 2 GS/s. **Time/Division Range:** TDS 340 — 5 ns to 5 s/div; TDS 360 and TDS 380 — 2.5 ns to 5 s/div.

Selectable Slope	No	Yes
External Time Base	No	Yes
Adjustable Trigger Level	No	Yes
Safety Certification	ETL, CSA	UL, CSA

CMC251

The CMC251 1.3 GHz Multifunction Counter measures the frequency of sine, square, and triangle waves from 1 Hz to 1.3 GHz. The CMC251 also provides period, totalize, and pulse width measurements. The counter has two input channels. Channel A is a standard 1 MΩ input for frequency measurements up to 100 MHz. Channel B is a 50 Ω terminated input for use in high-frequency systems. This counter is of interest to radio amateurs because of its ability to measure high-frequency systems. The temperature-compensated, crystal-controlled time base is stable to ±1 part per million per year.
700-0255. CMC251 .... **EACH 620.00**

CDC250

The CDC250 175 MHz Universal Counter measures frequency of sine, square, and triangle waves from 1 Hz to 175 MHz at input levels from 20 mV to 42 V peak. The CDC250 also provides period measurements, frequency ratio, time interval, and totalize measurement functions. The CDC250 has a ±1 ppm/year, temperature-compensated time base to ensure consistent accuracy. Service technicians will find the CDC250 useful as a standard for calibrating other equipment.
700-0260. CDC250 .... **EACH 545.00**

Safety Certification	UL, CSA	ETL, CSA

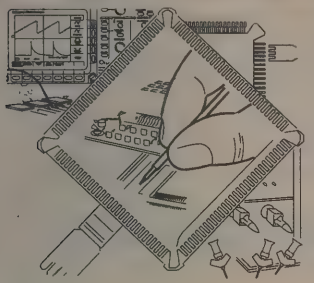
CFG253

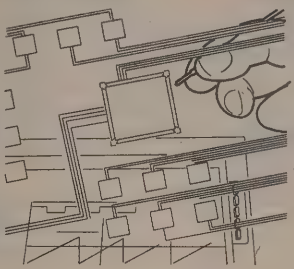
Function Generators produce sine, square, and triangle waves, and TTL signals for testing amplifiers, filters, and digital circuits. Sweep function can be controlled internally or with an external signal. Duty-cycle, DC offset, sweep rate, sweep width, and amplitude are all operator controlled. Bandwidth: 0.03 Hz to 3 MHz.
700-0253. CFG253 .... **EACH 420.00**

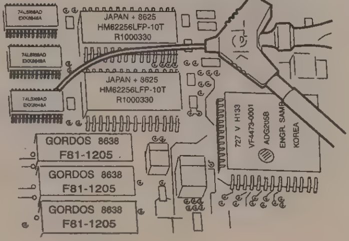
CFG280 11 MHz Function Generator with Counter

The CFG280 combines an 11 MHz Function Generator with a 1 Hz to 100 MHz Frequency Counter. The on board counter allows the operator to set the frequency output of the function generator precisely. This versatile instrument conserves both bench space and budget.
700-0280. CFG280 .... **EACH 1030.00**

Surface Mount Device Interconnects







Applications
- ► Research and Design
- ► Manufacturing Test Of SMD Circuitry
- ► Servicing Of SMD Circuitry
- ► Prototype Debug and Design

SMG50/SMT KlipChip™ Kits
- ► Access To 0.050" Centers PLCC, SOIC, and Other Packages PQFP100/132 PQFP Adapter Clips
- ► 386SX Attachment With PQFP100
- ► 68020/68030 Attachment With PQFP132
- ► 350 MHz Bandwidth
- ► Small Low-Profile Design Fits In Tight Spaces

SureFoot™
- ► Hand Probe Fine Pitch SMD Packages: 25 mil JEDEC; 0.65 mm EIAJ; 0.5 mm EIAJ
- ► For P656XA/AS

SMCK1/SMQK1 SOIC/PLCC Adapter Kits
- ► Assortment Of SOIC Or PLCC Clips
- ► Leads and SMT KlipChip™ Included
- ► Signal Insertion and Temporary Lead Jumpers Without Soldering

Surface Mount Device Probing and Interconnects
The increasing use of surface mount technology (SMT) brings many benefits to electronic circuit board (ECB) design and manufacture. Among these are increased circuit density, increased product reliability, and lower assembly costs.

Troubleshooting and device interconnection, however, have become more difficult due to decreased device size, tighter lead spacing and increased ECB densities. Tektronix' offering of the following SMT probing and inter-connect devices meets these demanding requirements.

SureFoot™ Probing 25 mil JEDEC, 0.65 and 0.5 mm EIAJ Packages
SureFoot™ (patent pending) is an integral probe tip and miniature guide that enables fault-free "hands-on" probing of fine-pitch SMD packages. Guided by the IC's leads, SureFoot's miniature plastic tines align the probe before electrical contact is made. The tines also form a shield between IC leads, preventing the probe tip from shorting adjacent pins.

SureFoot™ conforms to EIAJ (Electronic Industry Association of Japan) or JEDEC (Joint Electron Device Engineering Council) packaging standards, assuring quick and reliable probe contact with fine-pitch IC leads. Several color-coded versions of SureFoot™ are available, addressing the most common SMD packages with leads spaced on 0.65 mm (EIAJ) and 25 mil (JEDEC) centers. A crystal orange version fits the tighter 0.5 mm lead spacing of several EIAJ packages.

Style for Tektronix SMD Probes
Tektronix probes have replaceable probe tips. The basic contact of the new SMD probe family is a 25 mil socket that accepts square or round pins. SureFoot™ probe tips are available in styles to match each of these high-performance probe families.

Stock No.	Mfr.'s Type	Package Lead Spacing	Package Standard	Color Code	PER PKG./12

Tektronix offers the most complete line of isolation products to satisfy your high performance floating measurement requirements. The isolation product family includes three isolation instruments which provide a wide range of accurate and safe solutions to your measurement problems. We define floating measurements as measurements in which neither reference point is ground. We provide three isolators for making floating measurements — one of which will be most appropriate to your specific situation. All the isolators are third party safety certified.

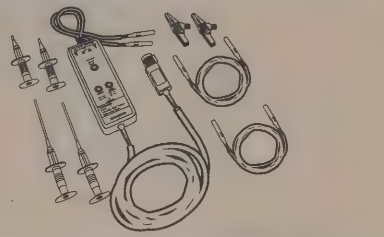
P5205 High Voltage Differential Probe — NEW —



- ► Probe Connects Directly to TDS Scope through TekProbe™ Interface
- ► 1300 V Maximum Differential Input Voltage
- ► ±1000 V Maximum Floating Voltage on All Ranges
- ► 100 MHz Bandwidth
- ► UL 3111 and IEC 1010 Safety Certified

The P5205 probe enables users to make floating measurements with the scope grounded, resulting in safer, more accurate measurements and higher productivity. The P5205 probe is ideal for power supply design, motor drive design, electric vehicle research, education, and field service. The probe is specifically designed for use with Tektronix TDS oscilloscopes. It can also be used with other oscilloscopes by utilizing the 1103 TekProbe power supply. **Specifications. Max. Differential Input Voltage:** 1300 V (DC + peak AC). **Bandwidth (50X Setting):** 100 MHz. **Switchable Attenuation:** 50X/500X. **Electrostatic Immunity:** >8 kV.

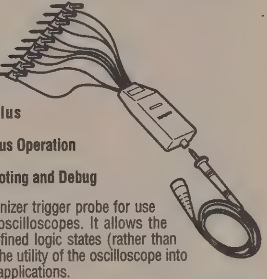
P6408 Trigger Probe



- ► For TTL and TTL-Compatible Logic
- ► 17-Bits (16 Data Bits Plus Qualifier)
- ► Synchronous and Asynchronous Operation
- ► Easy to Use
- ► Simplifies Digital Troubleshooting and Debug

The P6408 is a 16-Bit word recognizer trigger probe for use with analog and digital storage oscilloscopes. It allows the oscilloscope to trigger on user-defined logic states (rather than on analog levels), thus extending the utility of the oscilloscope into digital troubleshooting and debug applications.

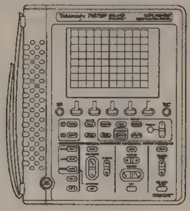
TekScope™ THS720P Handheld Digital Oscilloscope



- Harmonics Up to 31st
- Automatic Power Measurement with Statistics
- PWM Electric Motor Drive Trigger
- 100 MHz Bandwidth
- 500 MS/s Sampling Rate Per Channel
- Two Channels/Digitizers Plus External Trigger
- 3³/₄ Digit DMM with Datalogger
- Hands-Free Autoranging
- Roll Mode
- Extra Bright Backlit Display
- 8 ns Glitch Capture
- Independently Floating Isolated Scope and DMM Channels for Safety
- Full Floating Measurement Capability up to 600 VRMS
- Advance Trigger — Delay, Pulse, Video (Line Counter and Field Select)
- NiCd Battery and AC Adapter
- 21 Automatic Measurements
- RS-232 Programmability
- High-Voltage Probes Up to 1 kV
- Deluxe Soft Case

The THS720P TekScope™ Isolated Channel™ Scope/DMM is ideal for electric/power electronics applications. It combines a full-featured 100 MHz bandwidth and 500 MS/s sample rate Digital Real-Time oscilloscope with a True RMS digital multimeter n a rugged, battery-operated instrument. Scope and meter modes can operate simultaneously and independently on the same or separate signals. The high-resolution, backlit display and pop-up menus make it easy for users to take full advantage of the instrument's many features. These include cursors, video trigger, voltage and resistance measurements, and storage of waveforms, data and instrument setups.

The THS720P includes the following features specifically for electric/power electronics measurements. The THS720P can test and verify correct operation of motors, transformer efficiency, power-supply performance, and the effect of neutral current. It contains the powerful features of a modern scope to allow the user to troubleshoot/verify the operation of complicated electronic control circuits. The THS720P shares measurement features with the THS730A, THS720A, THS710 Scope/DMMs, which are ideal for electronic applications.

Specifications. Bandwidth: 100 MHz. **Sample Rate Per Channel:** 500 MS/s. **Channels:** Two. **Sensitivity:** 5 mV to 50 V/div. (to 50 V/div. with 10X probe). **Position Range:** ±10 div. **DC Gain Accuracy:** ±2%. **Vertical Resolution:** 8 bits. **Record Length:** 2500 points. **Time/Division Range:** 5 ns to 50 s/div. **Horizontal Accuracy:** ±200 ppm. **Roll Mode:** ≥0.5 s/div. **Autorange:** User-selectable. **Trigger Modes:** Auto, normal. **Trigger Types:** Edge, pulse, video. **Video Trigger Formats and Field Rates:** Odd field, even field, and line. **Motor Trigger:** 3 phase. **External Trigger Input:** 5 mHz TTL compatible. **Harmonics:** Up to 31st. **Setups:** 10 front panel setups. **Safety Certification:** UL 3111-1 Listed, complies with EN61010-1. **Power:** NiCd rechargeable battery pack with AC adapter (both included). **Battery Life:** Approximately 2 hours from full charge. **Display:** Backlit LCD. **Display Resolution:** 320 × 240. **Dimensions:** 6.95"W × 8.53"H × 2.00"D. **Weight:** 3.2 lbs. **Includes:** Two P5102 10X passive probes, user manual, standard meter lead set, NiCd rechargeable battery pack, AC power adapter, soft carrying case, cable and adapters for RS-232, NIST-traceable certificate of calibration.

PS280 Power Supplies

The Tektronix PS280 Laboratory DC Power Supply is a multifunction benchtop or portable instrument. This regulated power supply provides fixed 5 V output for powering logic circuits and two variable outputs for a wide variety of test and experimental uses. The PS280 contains two identical, independently adjustable DC power supplies that can vary from 0 to 30 V, and 0 to 2 A. Front-panel switches select one of three modes of operation: independent, series, or parallel.

The triple output PS2520G and PS2521G Power Supplies are versatile supplies suitable for many applications. The PS2520G has a single supply providing a maximum of 6 V and 3 A and two supplies providing a maximum of 36 V and 1.5 A. The PS2521G has a single supply providing a maximum of 6 V and 5 A and two supplies providing a maximum of 20 V and 2.5 A.

The supplies can be operated in one of three modes: independent, series, or parallel. In the independent mode, the output voltage and current of each supply are controlled independently. In the two tracking modes, the variable outputs are connected either in series or in parallel; the controls of the master power supply adjust the voltage or current of both power supplies.

The PS2520G and PS2521G are GPIB programmable. The GPIB command sets are SCPI compatible. Each power supply features 100 memories to store voltage and current limits for instant recall via the front panel or GPIB.

DMM

DMM150 — Pen Meter; CMM150 — Current Meter

The DMM 150 is one of the smallest and most versatile DMMs on the market. Easy to use, easy to carry, it's great for indoor/outdoor use, one handed operation and making measurements in tight places. It measures AD/DC voltage, resistance, continuity (with beeper) and diodes. For ease of operation it has both auto and manual range capabilities and both a 3.5 digit digital display and 65 segment analog bargraph. It also includes data hold, auto power off, and a low battery indicator.

The CMM 150 turns the DMM 150 into a 300 A digital current meter. The CMM 150 has a non-intrusive range of .1 A to 300 A and a 30 mm jaw opening with a 29 mm conductor diameter.

Instead of carrying and purchasing a separate DMM and current meter use the CMM/DMM 150 combo. The DMM 150 provides all of the features of a rugged DMM, while the CMM 150 turns the DMM 150 into a 300 A non-intrusive current meter.

DMM157 — Pocket DMM

The 157 is a full featured high value auto ranging DMM. It measure AC/DC voltage, AC/DC current, resistance, continuity (with beeper) and diodes.

DMM247/249 — Personal DMMs

The 249 Series are rugged state of the art meters enclosed in dust and water resistant cases. They both measure AC/DC voltage, AD/DC current, resistance, continuity (with beeper) and diodes. The 249 also has True RMS measurement for accurate measurement in the presence of harmonics

DMM252/254 — Professional DMMs

The 250 Series are state of the art meters designed for the professional. Water, dust and impact resistant all measurements are made with a high degree of accuracy and resolution. The meters have many uses and functions including digital meter, analog meter, frequency counter, recorder and capacitance tester.

All Tek Digital Multimeters are UL Listed and come with 3 year warranty.

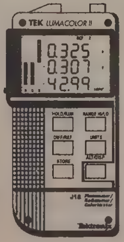
TekLuma™ Color Photometers

J17

- **Autoranging, Auto Zero**
- **RS-232 Interface (Output Only)**
- **Wide Dynamic Features**

J18

- **Real-Time Color Measurements**
- **Ten Memories For Storing Reference Colors (With J1810)**
- **RGB Bar Graph**
- **D6500 Kelvin Calibration**
- **Color Temperature Measurement**
- **Analog Output**
- **Full Control Of Measurements Plus Output Of Results (RS-232)**



Common Features

- **Interchangeable Pre-Calibrated Heads**
- **Accurate Spectral and Cosine Corrections**
- **Metric/English Conversions**
- **Large LCD With Backlight**
- **Rugged**
- **Handheld**
- **Adaptable To Many Light Measurement Needs**

The Tektronix J17 and J18 are handheld digital Photometers/Radiometers/Colorimeters for the laboratory, field, or production area. A J17/J18 System consists of a J17/J18 handheld meter and one of eight interchangeable heads. At the heart of the J17/J18 is a microprocessor capable of performing several functions: Metric-to-US conversion, auto-range, auto-zero, hold, and conversion between color coordinate systems. The J17/J18 can be used with a PC for automated testing and data recording. The J17/J18 are powered by a 9-volt battery. **Specifications. Interchangeable Pre-Calibrated Heads:** Yes. **Accurate Spectral and Cosine Corrections:** Yes. **Metric/English Conversions:** Yes. **Backlit LCD:** Yes. **Analog Output:** Yes, RS-232. **Digital Output:** J17 — No; J18 — Yes. **Programmable:** J17 — No; J18 — Yes, RS-232. **RGB Bar Graph:** J17 — No; J18 — Yes. **Reference Memories:** 10 with J1810 (J18 only). **Color TekMeter™ Measurements:** J17 — No; J18 — Yes. **D6500 Calibration (True White):** J17 — No; J18 — Yes.

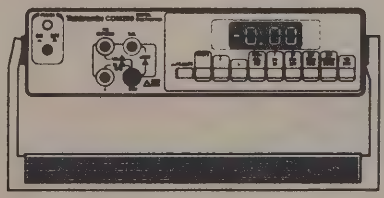
Model CDM250 Digital Multimeter



- **3½ Digit LED Display**
- **Diode Test**
- **Overrange Indicator**
- **UL, CSA**

The CDM250 Digital Multimeter measures and displays voltage, current, and resistance using a 3½ digit LED display. Sine wave alternating voltages and currents are displayed in RMS values. The CDM250 is safe and easy to use in the classroom and on the job. This meter has overload protection and is UL listed and CSA certified. Test leads are included. **Specifications. AC Voltage:** 500 V. **DC Voltage:** 500 V. **AC Current:** 10 A. **DC Current:** 10 A. **Resistance:** 20 MΩ.

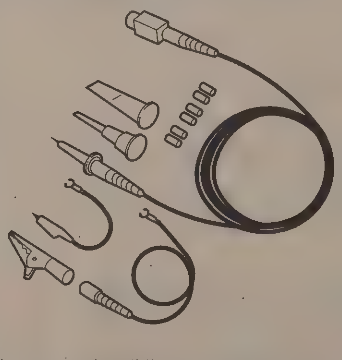
High Voltage Probes



P5100

- DC to 250 MHz
- 2,500 V DC+ Peak AC
- 100 X With Readout
- UL Listed 1244
- IEC 1010 Certified
- 7 To 30 pF Compensation Range

P6015A

- High Voltage — 20 kV DC/40 kV Peak (100 ms Pulse Width)
- High Bandwidth — 75 MHz
- Silicone Dielectric
- Optional 1000 X Coding
- Wide Compensation Range (7 To 49 pF)
- Heavy Duty Versatile Ground Lead and Clip

Peak AC

- Low Capacitance — 2.5 pF

Use Tek's 100X and 1000X high voltage probes to measure elevated voltages without damaging your probe, scope... or yourself. These high-performance probes provide low capacitance, high input impedance, and frequency response starting at DC. All Tektronix probes come with instruction manuals and the appropriate probe tips, ground leads, attachments and other accessories.

High Voltage Probe Feature Summary

Tek high voltage probes are compatible with a wide range of scopes. They can be used with any scope with nominal input capacitances of 12 pF to 47 pF and input resistance of 1 MΩ.

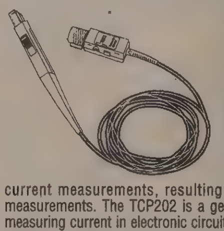
TCP202 DC Coupled Current Probe



- Probe Connects Directly to TDS Scope through TEKPROBE™ Interface
- DC to 50 MHz Bandwidth
- 15 Amps DC + Peak AC Current
- 50 Amps Peak Pulse Current
- 500 × 10^{-6} Amp * Sec Product
- UL, CSA, CE Marking

When combined with a Tektronix TDS oscilloscope, the TCP202 enables users to make direct readout DC and AC current measurements, resulting in accurate displayed and recorded measurements. The TCP202 is a general-purpose probe for displaying and measuring current in electronic circuits. It is ideal for power supply and motor drive design, and for device testing.

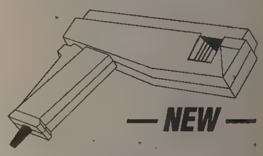
A6304XL Current Probe



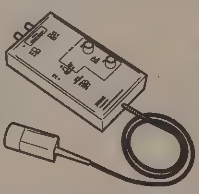
- 8 Meter Cable
- 500 Amps
- DC to 2 MHz

— NEW —

The A6304XL is for use with the AM 503B Current Probe Amplifier and is an AC/DC probe with a bandwidth of DC to 2 MHz. The probe is rated for 500 amps continuous and 700 amps peak. It comes with an 8 meter cable and a carrying case.

700-6304. A6304XL .... **EACH 2150.00**

ADA400A Differential Preamplifier

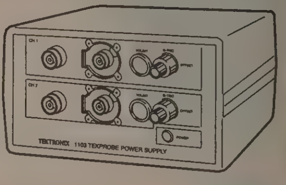


- Active Differential Preamplifier
- 10 µV/div Sensitivity
- Typically 100 dB CMRR, DC to 10 kHz
- Integral Probe Power in TekProbe™ BNC

The ADA400A Differential Preamplifier allows direct oscilloscope measurements of very low amplitude voltages and signals which are not ground referenced. The high impedance of both inputs eliminates the need to add additional ground points in the DUT, thereby avoiding circulating currents which disturb the measurement or the circuit.

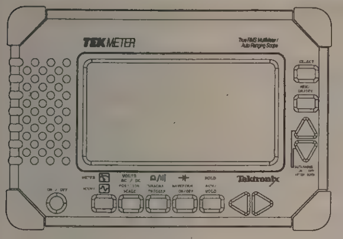
700-5205. ADA400A .... **EACH 995.00**

1103 Active Probe



The 1103 TEKPROBE™ Power Supply provides power for up to two P6205 Probes or other compatible probes. Also powers ADA400A Active Differential Probe.

700-1103. 1103 .... **EACH 745.00**



THM565 TekMeter™

The TekMeter Series combines the power of a true RMS digital multimeter and a 25 MS/s autoranging digital storage oscilloscope in one compact, simple-to-use, rugged, battery-powered unit. Designed for a wide variety of industrial applications, the TekMeter measures and displays signals from a few millivolts to several hundreds of volts. Its unique, autoranging scope tracks the signal and adjusts the instrument automatically. There's no need to be an expert scope user to get immediate results.

The simple interface allows access to numerous powerful and time-saving features such as automatic measurements, capturing and time stamping AC-line faults, calculation of transformer harmonic derating factor (THDF), stable triggering on complex AC-motor drive signals, measuring true power, plus several other DMM252 and scope functions.

A Unique Multi-Function Display
Unlike a traditional DMM, the TekMeter's large display tells you everything you need to know about what you're measuring. In addition to the numerical and analog bar readout you're used to seeing on a DMM, the display shows Max., Min., Max.-Min., Hold, and ΔHold all at once. You get more information about the signal, all on a single display.

Switch to the scope mode and TekMeter provides a waveform display similar to a traditional oscilloscope. The scope-mode display is autoranging, so it automatically scales and tracks as the signal changes, giving you hands-free operation. You can concentrate on the measurement, not the instrument, making measurements easier and faster.

Lots of Power in a Small Package
Even though the TekMeter easily fits in your hand, it packs more power and features than instruments many times its size. Its simple interface allows quick access to a host of features such as cursors, automatic measurements, true power measurements, Transformer Harmonic Derating Factor (THDF), and spike detect — all of which will help you get to the source of your problem more quickly. TekMeter can do anything you're doing now, and more. You get measurable results that get the job done.

Deluxe True RMS Multimeter with Dual (2) Channel Oscilloscope. **Digital Multimeter Mode:** True RMS VAC; VDC; Ω-Ohms; Audible Continuity Tester; Hold, ΔHold; Min., Max., Max. to Min. **Oscilloscope Mode:** Autoranging; Dual Channel; Spike Detect; Save Waveforms; Save Screens; ΔV, ΔT Cursors; Frequency; Line Test, Duty Cycle, Period, Voltage Disturbance; Current, Power and Power Factor*; Transformer Harmonic Derating Factor*; 3-Phase Test; Event Clock; Extended Save Memory; Backlit Display; Motor Test.
* Requires optional current probe.

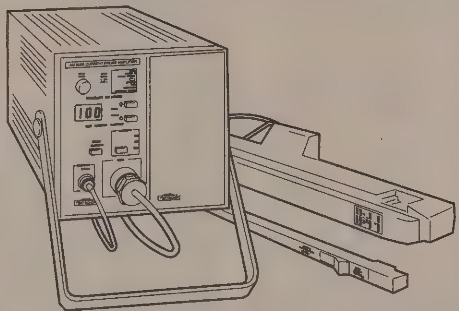
AM503S Current Measurement System



- **AC/DC Measurements**
- **With A6302 Probe: DC To 50 MHz; 20 A Continuous/50 A Peak; Split Core; Clips On To Conductors Up To 0.15" Diameter**
- **With A6303 Probe: DC To 15 MHz; 100 A Continuous/500 A Peak; Split Core; Clips On To Conductors Up To 0.83" Diameter**
- **With A6312 Probe: DC To 100 MHz; 20 A Continuous/50 A Peak; Split Core; Clips On To Conductors Up To 0.15" Diameter**

Applications

- **Switching Power Supplies**
- **Disk Drives**
- **Electronic Ballast**
- **Motor Drives**
- **Inverters**
- **All Mixed AC/DC Current Signals**

The AM503S Current Probe System is the most versatile current measurement system available. Since the probes incorporate both a transformer and a Hall Effect device, broadband AC/DC current can be measured simultaneously. Depending on the probe used, current from DC to 50 MHz and up to 700 A can be measured by clipping the split-core probes around the conductor. The AM 503S is truly a system, consisting of an AM 503B Current Probe Amplifier, a TM 502A two-wide Power Module, an A6302 Current Probe and a handy plug-in tool box. Options enable you to add or substitute an A6303 or A6312 Current Probe.

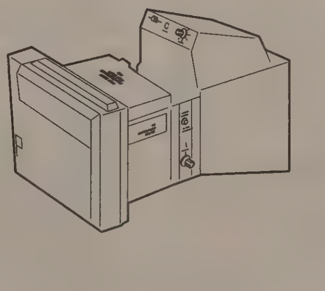
C-9 Oscilloscope Camera

The C-9 CRT Camera uses Polaroid film packs to document most CRT displays. A 3.25" × 4.25" pack film back is standard. An optional motorized film back is available to reduce handling. It automatically ejects a clean, dry, self-developed print. An optional flash unit is also available for scopes without graticule lighting.

Characteristics. Lens and Aperture: Fixed focus at f/11. **Magnification:** 0.55 or 0.73. **Geometric Distortion:** Less than 0.5%. **Shutter:** Electronic; timed mode from 0.1 to 5 seconds and manual exposure. **Power:** Eight AA alkaline batteries (not included). **Resolving Power:** At least 6 lines/mm at center, 3 lines/mm at the corners. **Safety:** UL Listed 1244. **Includes:** Camera Body without Hood (a hood is required), Instruction Manual. Order 070-8105-01
Opt. 1A — AutoFilm™ Motorized Film Back
Opt. 1F — Graticule Flash Unit for Use with Opt. 07 and/or Opt. 20
Opt. 04 — TDS 400 Series Scope Hood
Opt. 05 — TDS 500/600/800 Series Scope Hood
Opt. 06 — TAS 400 Series Hood
Opt. 07 — 7K Series Scope Hood
Opt. 11 — 11K, CSA, DSA Series Scope Hood
Opt. 20 — Portables (2000) Series Scope Hood

700-0009. C-9 .... **EACH 665.00**



TekTools Accessories

A605 500 Amp AC Current Probe

This "busbar" style clamp-on probe is a current/voltage transformer for digital multimeters and TekMeter. The A605 can measure RMS AC currents ≥4 amps and peak currents up to 500 amps over a frequency range of 48 Hz to 1 kHz. It provides a 1 mV output for each amp measured.
700-0630. Model A605 .... **EACH 85.00**

A610 500 Amp AC/DC Current Probe

This "busbar" style clamp-on probe uses a Hall Effect current sensor to provide a voltage output to digital multimeters. The A610 can measure RMS AC currents ≥2 amps and peak currents up to 500 amps over a frequency range of DC to 440 Hz. It provides a 1 mV output for each amp measured.
700-0635. Model A610 .... **EACH 195.00**

A621 1000 Amp AC Current Probe/BNC

This industrial style clamp-on probe has a BNC connector and a shrouded banana plug adapter so it can also be used on digital multimeters, TekMeter™, and scopes. The A621 can measure AC currents from 100 milliamps to 2000 amps peak over a frequency range of 5 Hz to 50 kHz. It provides a 1 mV, 10 mV, or 100 mV output for each amp measured.
700-0640. Model A621 .... **EACH 390.00**

A622 100 Amp AC Current Probe/BNC

This "long nose" style clamp-on probe uses a Hall Effect current sensor to provide a voltage output to oscilloscopes. It has a BNC connector and a shrouded banana plug adapter so it can also be used on digital multimeters and TekMeter. The A622 can measure AC/DC currents from 50 mA to 100 amps peak over a frequency range of DC to 100 kHz. It provides 10 mV or 100 mV output for each amp measured.
700-0622. Model A622 .... **EACH 415.00**

HC411 Thermal Printer

Battery operated thermal printer for use with TekScope. Also useful for many other portable printer applications.
700-0740. HC411 .... **EACH 470.00**

P5102 High Voltage Probe

100 MHz, high voltage probe for TekScope. Safety certified for up to 1000 volts and with the TekScope, can be floated safely to 600 volts
700-0760. P5102 .... **EACH 199.00**

THM5BAT Rechargeable NiCad Battery Pack

The Rechargeable NiCad Battery Pack is specially designed for the TekMeter. With 750 milliamp hours of capacity, the TekMeter Battery Pack has 50% more energy than regular NiCad batteries. Matched cells ensure that the battery pack delivers full power. Buy two battery packs and keep one ready to go with the THM5CHG charger.
700-0615. Model THM5BAT .... **EACH 45.00**

THM5CHG Quick Charge Battery Charger

Never be without power! Charge your TekMeter THM5BAT NiCad Battery Pack in one hour or less. The smart charger senses when the battery pack is fully charged and shifts into trickle charge mode to keep it fully charged, maximizing the life of your battery pack. A wall-mount transformer and a cigarette lighter adapter are included.
700-0545. Model THM5CHG .... **EACH 145.00**

THM5AC AC Power Adapter

The AC Power Adapter allows continuous operation of the TekMeter from an AC power source. The specially designed wall-mount transformer supplies power directly to the TekMeter battery compartment while maintaining the 600 V/floatability specification.
700-0650. Model THM5AC .... **EACH 50.00**

THM5HCA Protective Transport Case

The Hard-Sided Transport Case provides heavy duty protection for transport of your TekMeter and all its accessories.
700-0610. Model THM5HCA .... **EACH 67.00**

THM5SCA Soft Case

The Soft Case has an adjustable neck strap which frees you to make measurements that require both hands. A thumbscrew holds your TekMeter securely in the padded case, so even it tipped upside down it won't fall out. The Soft Case is also a carrying case with handle. There's space inside for probes, probe attachments, and a pocket for notes or reference guides.
700-0605. Model THM5SCA .... **EACH 75.00**

THMCOM1 Communications Pack

The Communications Pack provides an AC/DC cigarette lighter adapter, RS-232 cable, PC-link software, and a flip-out stand.
700-0620. Model THMCOM1 .... **EACH 320.00**

THS7BAT Battery Pack

The rechargeable NiCad battery pack is specifically designed for the TekScope. Used with the battery included in the TekScope and the recharger (THS7CHG) the user will always have a charged battery for operation of the TekScope. The battery pack will provide power for TekScope for longer than it takes to recharge the second battery pack.
700-0725. THS7BAT .... **EACH 54.00**

THS7CHG Battery Charger

Battery charger for the THS7BAT. This will provide a complete recharge in the THS7BAT in less than 2 hours. Also included is an adapter to plug the charger into 12 volt cigarette lighter.
700-0730. THS7CHG .... **EACH 179.00**

THS7HCA Hard Case

The hard case is designed for safe transport of the TekScope and has room to also include the HC411 printer, the THS7CHG charger, an extra battery, extra probes, both voltage and current. Safely transport your complete set-up.
700-0735. THS7HCA .... **EACH 135.00**

TXMDXPB Deluxe Probe Set

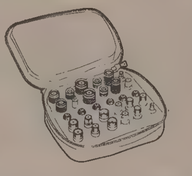
The Deluxe Probe Set consists of four high-temperature, silicone-insulated probe leads with matching attachments. Each set includes a very sharp test point useful for piercing conformal coatings or corrosion that might interfere with accurate readings. The set also includes two mini-plunger clamps for hands-free operation, one red hook-style test clip, and one black wide-jaw alligator test clip for secure attachment to ground.
700-0600. Model TXMDXPB .... **EACH 99.00**

Instrumentation Adapter Kit

Individual pieces are the same as the TPI 3000A shown to the right. Kit contains 2 male and 2 female types BNC, N, TNC and SMA plus 4 Universal Interfaces — 20 pieces in all.

955-4000. Model TPI 4000 ....**EACH 98.00**

TPI 3000A Coax Adapter Kit



The TPI 3000A Kit includes male and female connectors of all eight types. Any adapter can be created on the spot, in just seconds. Simply screw any combination of 24 connectors to one of the 6 Universal interfaces. No soldering or crimping is needed so connectors can be used over and over again in different combinations. All contacts are gold plated. Connector bodies are silver plated, machined brass with teflon insulation. The zippered, soft leather case protects and organizes the collection. The TPI 3000A Coax Adapter Kit contains 2 male and 2 female types BNC, TNC, N and UHF; 1 male and 1 female types SMA, Mini-UHF, F and RCA; and 6 Universal Interface Connectors. Spare pieces can be ordered individually.

955-3000. TPI 3000A. Entire Kit ....**EACH 150.00**

Repairable Oscilloscope Probes — 250 MHz, 300 MHz

These probes fit all oscilloscopes with BNC connectors. They are intended for use by professional engineers and technicians who need accuracy and durability at an economical price. Cables are thin and flexible so they bend for easy handling, but they don't break. Modular probes screw together without soldering for instant, on-site repair. Performance criteria such as 1.2 nanosecond risetime and less than 3 percent overshoot assure precise measurements. Model numbers ending with AP have the activator pin for readout or automatic scale factoring.

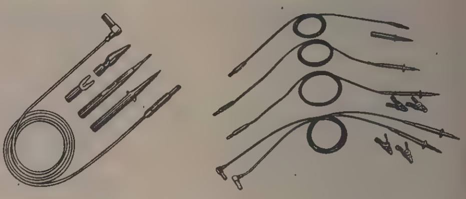
*Switchable Probe.

Multimeter Silicone Rubber Leads



All cables are silicone-rubber insulated. Soft, flexible when cold and burn-resistant. Durable. Wrap right angle versions around meter for stowage. **Max. Voltage:** 1000 VRMS. **Max. Current:** 10 A. Plug-on accessories for TLS series include 2 standard probes, 2 hook probes, 2 alligator clips and spade lugs. TL 1000 has banana plug on measuring tip to accept push-on accessories and is supplied with 2 deluxe insulated alligator clips. TL 1500 has spring-loaded safety sleeves. **Suffix letter "R" indicates right angle plug.**

955-1117. Model ADF25A ....**EACH 375.00**

Repairable Oscilloscope Probes — 100 MHz, 200 MHz

Design improvements provide superior performance in an economical probe. New circuitry gives faster risetime and sharp pulse response. A rubber seal around the compensation screw and silicone insulation on the circuitry seal out moisture. Soft, slotted strain reliefs and better crimping prolong cable life.

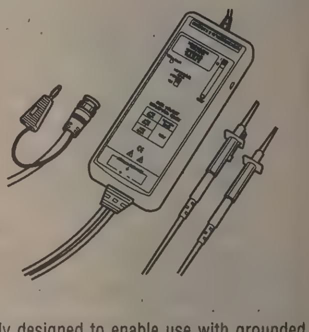
ADF25B High Voltage Differential Probes — NEW —

- **IEC 1010 Approved for Safety**
- **Wide Bandwidth DC –25 MHz**
- **Up to 2500 VRMS Differential Inputs**
- **High Common Mode Rejection**



Permits conventional grounded oscilloscopes to be used for the display and measurement of multiple floating signals with high common mode voltages. The ADF25B will accept up to 2500 Vrms differential and common mode voltage. The probes can withstand their rated common mode voltage on either attenuation range without damage. It is therefore possible to observe small signals superimposed on large common mode voltages by selecting the lower attenuation range. This is useful, for example, in measuring and observing small gate signals of semiconductor devices which may be several hundred volts above ground. Although the probes are primarily designed to enable use with grounded oscilloscopes, they may also be used with insulated or battery-operated oscilloscopes; but with such scopes the probe output lead still must be grounded using the ground lead supplied.

Input Voltage Max. Differential: ±350 V DC Inc. Pk AC @ 50:1 or 250 VRMS; ±3500 V DC Inc. Pk AC @ 500:1 or 2500 VRMS. **Common Mode Maximum:** ±3500 V DC Inc. Pk AC or 2500 VRMS. **CMRR (Typical):** 50 Hz — –80 dB; 20 kHz — –60 dB; 200 kHz — –50 dB. **Bandwidth:** DC –25 MHz (–3 dB). **Accuracy:** ±2%. **Risetime:** 14 nS. **Input Impedance:** 10 MΩ — 5 pF each side to ground; 20 MΩ — 2.5 pF between inputs. **Output Voltage:** ±7 V (minimum 2 KΩ load). **Offset (Typical):** <±5 mV –10°C to +40°C. **Noise (Typical):** 1.5/2.5 mV. **Output Source Impedance:** 1 Ω @ 1 kHz, 8 Ω @ 1 MHz. **Operating Temperature:** –10°C to +40°C. **Power Requirements:** 4 × AA cells or 6 V DC/60 mA Mains adapter (not supplied). **Input Leads:** 95 cm double insulated silicone rubber terminated in sprung hooks. **Sprung Test Hooks:** Permanently attached to input cables. **Output Cable:** 95 cm RG58 C/U terminated with standard BNC Plug. **Weight (Less Batteries):** 500 gm (1.1 lbs.). **Dimensions (L × W × W):** 202 mm × 77 mm × 36 mm (8.0" × 3.0" × 1.4"). **IEC 1010 Compliance:** Category III up to 1000 VRMS. Above 1000 VRMS Type 2 secondary circuits (where the primary is Category III).

955-1118. Model ADF25B ....**EACH 585.00**

3000 A/D, 6000 A/D Series Power Supplies

General Specifications
Output Voltage: Zero to rated voltage continuously variable with front panel voltage knob. **Output Current:** Zero to rated current continuously variable with front panel current knob. **Line Regulation:** CV — ±0.01% +2 mV; CC — ±0.01% +2 mA. **Load Regulation:** CV — ±0.01% +2 mV; CC — <10 mA at 100 W; <15 mA at above 100 W. **Ripple and Noise:** CV — <0.5 mVrms at 100 W; <1 mVrms at above 100 W; CC — <1 mArms at 100 W; <3 mArms at above 100 W. **Transient Response:** <100 µS to within 0.1% of set voltage (50% to 100% load change). **Output Impedance:** <2 mΩ +2 mH. **Operating Range:** 0 to 40°C ambient temperature. **Display Accuracy:** Analog Meter — 3% of full scale; Digital Meter — ≤0.1% +2 digits. **Overload Protection:** Automatic crossover from CV to CC mode. **Series Connection:** Different models can be chained to increase output up to 240 VDC. **Parallel Connection:** Another same model can be paralleled to increase output to 24 amps. **Power Requirement:** 100/120/220/240 ±10% VAC, 50/60 Hz single phase. **Supplied Accessories:** Power cord, hook-up leads, instruction manual.

Model 6000 A/D Series Specifications
5 V/5 A Fixed Supply. **Regulation:** ≤10 mV. **Ripple and Noise:** ≤2 mVrms. **Output:** 5 V ±0.25 V. **Tracking Accuracy:** ±0.2% +10 mV. **Operation Mode Switch. Independent:** Two fully independent variable supplies at rated voltage and current and a fixed 5 V/5 A supply. **Series:** One variable supply with 2X rated voltage output at rated current. Or, one dual polarity tracking supply with rated output and current. Plus a fixed 5 V/5 A supply. **Parallel:** One variable supply with rated voltage at 2X rated current and a fixed 5 V/5 A supply.

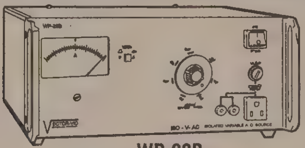
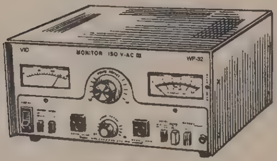
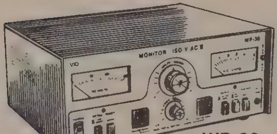
WP Series Isolated AC Power Sources



WP-29B



WP-30



WP-32

Designed to isolate equipment and circuits from the AC power line. Useful for safe servicing in the school, lab or shop, to help the service transformerless AC-operated equipment and devices with intermittent troubles and hazardous equipment. **Maximum VA Continuous:** 1050. **Maximum Leakage:** 0.01 mA. WP29B, WP30 and WP32 feature variable and fixed isolated AC outputs, leakage of less than 0.2 mA, audible leakage test, and adjustable current limiting. 105/130 VAC, 50/60 Hz for all models.

Stock No.	Mfr.'s Type	Output	Ratings	EACH

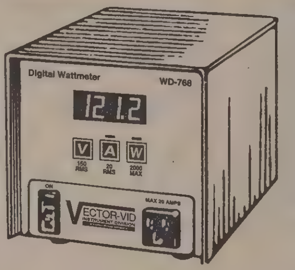
AC/RMS Digital Wattmeters



WD-766A and WD-767 Wattmeters

AC/RMS Digital Wattmeters. LED display and indicators. Measures RMS voltage and current, and apparent power. Operates directly from 120 VAC line. **Specifications. Line Voltage Input:** 105 to 150 VAC. **Power Factor:** .5 to unity. **Amp Accuracy:** ±1% ±1 digit. **Watt Accuracy:** ±1% ±2 digits. **Frequency Response:** 40 Hz to 5 KHz. **Model WD-766A.** 1 KW, 10 A. 3-digit display. **Max. Current:** RMS — 10 A; Peak — 20 A. **Max. Power:** 999 W. **Volt Accuracy:** ±1% ±1 digit. **Resolution:** 1 V, .1 A, 1 W. **Model WD-767.** 2 KW, 20 A, 3.5-digit display. **Max Current:** RMS — 20 A; Peak — 35 A. **Max Power:** 1999 W. **Volt Accuracy:** ±.75% ±1 digit. **Resolution:** .1 V, .01 A, 1 W. **Dimensions:** 5.75 × 5.8 × 8.5" (14.6 × 14.9 × 21.6 cm). **Weight:** 4 lbs. (1.8 kg).

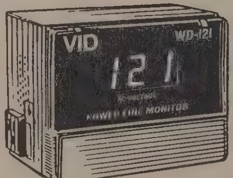
901-0767. Model WD-767 .... **EACH 560.00**

WD-768 Wattmeter

The WD-768 Wattmeter is designed to provide quick, accurate, and direct measurement of RMS voltage, current, and apparent power. The WD-768 combines measuring versatility and accuracy in a compact, low cost unit. This unit incorporates three discrete analog output channels, one each for volts, amps, and watts. This feature allows independent monitoring of all three functions without regard to the front panel display selection. The WD-768 is designed to operate directly from the 120 VAC line, and line voltage can be measured up to 150 VAC. The WD-768 measures RMS current to 20 A RMS and power to 1999 W.

901-0768. Model WD-768.. **EACH 770.00**

Power Line Monitors



WD-121A

- ► **High Accuracy**
- ► **Easy to Read LED Display**
- ► **Reveals Voltage Fluctuation**
- ► **Indicates Brown Outs**
- ► **50 to 60 Hz Frequency**
- ► **±2% Accuracy**

WV-120D

- ► **Large, 3 Color Scale**
- ► **True RMS Readings Even on Distorted Sine Waves**
- ► **Fast Meter Action Shows Bounces and Fluctuations in Line Voltage**
- ► **25 to 400 Hz Frequency**
- ► **Accuracy: ±2% Center Scale, 3% Both Ends**

AC Current: 0-8 A max. **Size:** 4 × 5 × 3". **Weight:** 1.5 lbs.

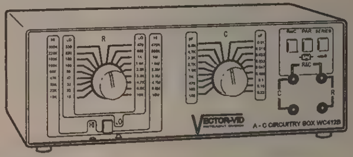
901-4621. WV-121A. 100-150 VAC........................ **EACH 229.00**

WC-412B R-C Circuit Box

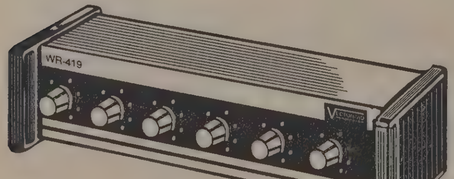


- ► **36 Resistor Values**
- ► **18 Capacitor Values**
- ► **10% Tolerance**

Offers 36 standard resistor values from 15 ohms 10 M ohms. 1 W power rating; tolerance +10%, and 18 capacitor values from 100 pf to .22 µf, 600 V rating tolerance ±10%. Selections are available individually, in series, or in parallel RC combinations. Switchable high or low resistance. Comes with plug-in test leads. **Dimensions:** 7 × 5½ × 2½" (17.5 × 13.7 × 6 cm). **Weight:** 28 oz. (340 g).

901-0412. Model WC-412B.. **EACH 172.00**

Decade Boxes



- ► **Accuracy 1% or Better**
- ► **Light Durable Construction**
- ► **High Quality Resolution**
- ► **5 Year Accuracy Stability**

Vector-VID's line of decade boxes feature the highest quality, aged standard resistors with a typical accuracy stability of five years.

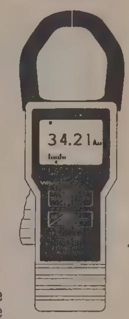
CPM Series True RMS Power Meters



- ► **True Power to 2000 kW**
- ► **Apparent Power to 2000 kVA**
- ► **Power Factor (cos ø)**
- ► **AC/DC Current to 2000 A**
- ► **AC/DC Voltage to 750/1000 V**
- ► **Resistance to 400 kΩ**
- ► **Frequency to 1000 Hz**
- ► **Surge/Peak/Average**
- ► **Analog Output**
- ► **Three-Phase Adapter**
- ► **RS232 Interface**
- ► **Scope Meter (Harmonic Analysis)**

The CPM Series clamp-on power meters combine the capabilities of many meters into one easy-to-use handheld instrument for power measurement when installing, maintaining, and monitoring electrical systems with traditional and nonlinear loads. Both the CPM2000 and the CPM2100 operate as a wattmeter, voltampere meter, and power factor meter, as well as an autoranging DMM with data hold, continuity, and diode test. Measurements are displayed on a 4-digit/4000 count display with a bar graph. Hall-effect sensors and a clamp-on jaw allow measurements without interrupting the circuit. Scope meter shows harmonics.

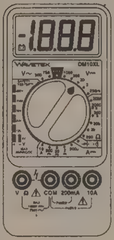
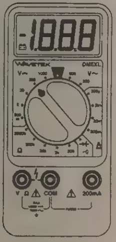
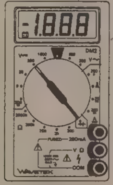
DM15XL



DM10XL



DM5XL



DM2

Pocket-Sized Digital Multimeters

General Specifications. Display: 3½ digit LCD, 1999 counts. **Operating Temperature:** 0° to 50°C. **Battery Type/Life:** NEDA 1604 9 V/300 hrs. alkaline (170 hrs., DM2). **Dimensions:** 6.1" × 2.8" × 1.3" (4.7" × 2.8" × 1", DM2). **Optional Accessories (XL Series):** VC20 padded vinyl carrying case; H10/H10Y protective rubber holster with tilt stand (black/yellow).

Special Features (XL Series). Safety Tester™. Detects and displays the presence of AC or DC voltage levels (positive or negative) through a series of LEDs. This feature does not use the multimeter's battery which means you can always ascertain a voltage presence even if the meter battery is dead. (DM10XL only) input warning beeper. This warning beeper indicates that the test lead is plugged into a current jack when the function switch is not set to a current range. A safety feature for both the meter and user. Safety test leads. Insulation on the test lead probe tips allows only 3½ mm exposure of metal for making those measurements in dense component areas. Fused 10 A current jacks. A safety feature previously found only in expensive DMMs, provides protection against meter damage. (DM10XL and DM15XL).

DM15XL. The DM15XL features a 20 MHz logic detector and also offers 28 measurement ranges, including AC volts to 750 V, DC volts to 1000 V, AC/DC current to 10 A (fused), resistance to 2000 MΩ, diode testing and a continuity beeper. Basic accuracy is 0.5%.

743-0010. Model DM15XL	**EACH 62.95**

DM10XL. The DM10XL provides 21 ranges, measuring AC volts to 750 V, DC volts to 1000 V, DC current to 10 A (fused), resistance to 20 MΩ, diode testing and a continuity beeper. Basic accuracy is 0.7%. Safety Tester™ quickly indicates live voltage levels with LEDs (6, 12, 24, 50, 110 and 220 V).

743-0015. Model DM10XL	**EACH 52.45**

DM5XL. The DM5XL provides 17 ranges to measure AC volts to 500 V, DC volts to 1000 V, DC current to 200 mA, resistance to 2 MΩ, diode test and continuity beeper. Basic accuracy is 0.8%.

743-0020. Model DM5XL	**EACH 41.95**

DM2. The DM2 is a smaller sized unit with full DMM capacity, measuring AC volts to 500 V, DC volts to 1000 V, DC current to 200 mA, resistance to 2 MΩ, and diode test. Basic accuracy is 0.8%.

743-0005. Model DM2	**EACH 29.95**

XT Series Mid-Size Digital Multimeters

General Specifications. Display: 3½ digit, 2000 counts. Designed to EN-61010-1/UL3111. **Dimensions:** 7.2 × 3.1 × 1.3". **Weight:** 11 oz.

23XT. Mid-size, full-functioning DMM, measures ACV/DCV to 750/1000 V, current to 10 A, fully fused, resistance to 2000 MΩ, diode and continuity tests, transistor hFe, TTL and CMOS logic and temperature to 1400°F/750°C and data hold, 550 VAC safety tester. Units shipped with K-type beaded wire thermocouple, test leads, multilingual operator manuals and spare fuse.

743-0024. Model 23XT	**EACH 89.95**

25XT. Mid-size, full-functioning DMM, measures ACV/DCV to 750/100 V, AC/DC current to 10 A, fully fused, resistance to 20 MΩ, capacitance to 20 mF (full capacitance meter with zero adjust cap slots), frequency to 40 kHz, TTL and CMOS logic and transistor hFe, data hold, test leads, multilingual operator manuals and spare fuse.

743-0026. Model 25XT	**EACH 99.95**

27XT. Mid-size, full-functioning DMM, measures ACV/DCV to 7500/1000 V, AC/DC current to 20 A, fully fused; resistance to 2000 MΩ, frequency to 20 Mhz, capacitance to 2000 µF, inductance to 20 H, both CMOS and TTL logic, diode and continuity tests. Multilingual operator manuals and spare fuse.

743-0028. Model 27XT	**EACH 119.95**

28XT. The ideal field service multimeter includes temperature to 2000°F/1300°C, capacitance to 20 mF, frequency to 20 kHz, resistance to 20 MΩ, TTL and CMOS logic, continuity and diode tests. Includes beaded type K thermocouple probe, test leads, multilingual manual, and spare fuse.

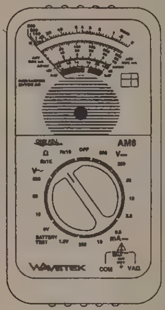
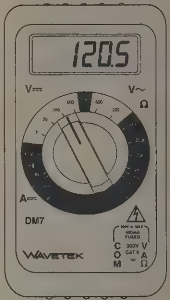
Analog and Digital Meters —NEW—



AM8



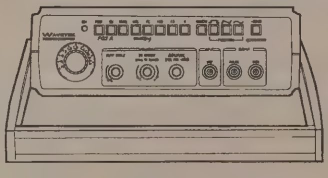
DM7, DM9

AM8. Analog meter, DCV 10/500 V, ACV 10/500 V, DC current 500 μA to 250 mA, resistance Rx1 kΩ/1 MΩ, battery tester 1.5 V, 9 V. **Dimensions:** 5.1 × 2.6 × 1.7". **Weight:** 6.7 oz.
743-0008. AM8..........**EACH 14.95**

DM7. 2000 count, DCV 2/500 V, ACV 200/500 V, DC current 200 mA, resistance 2000 Ω/200 kΩ, battery tester 1.5 V, 9 V. **Dimensions:** 5.5 × 3.1 × 1.6". **Weight:** 8.2 oz.
743-0007. DM7..........**EACH 19.95**

DM9. 4000 count, DCV 40 mV/600 V, ACV 40 mV/600 V, DC current 40 mA/400 mA, resistance 400 Ω/40 mΩ, battery tester 1.5 V, 9 V. **Dimensions:** 5.5 × 3.1 × 1.6". **Weight:** 8.2 oz.
743-0009. DM9..........**EACH 39.95**

FG2A Function Generator

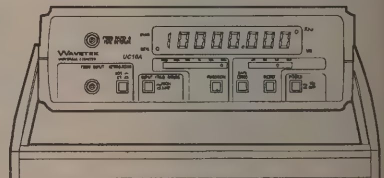


- Five Outputs — Sine, Square, Triangle, Ramp, and TTL
- Seven Ranges — 0.2 Hz to 2 MHz
- VCF Input (Voltage Controlled Frequency)
- DC Offset Control
- Duty Cycle Control
- One Year Warranty

The FG2A, a versatile general purpose signal source, has five different outputs that can be modified with variable duty cycle and DC offset controls. The VCF input allows the frequency output to be controlled by a DC voltage. The FG2A is shipped with two test cables. Two switchable 20 dB attenuators permit easy setting of low-amplitude signals.

743-0800. FG2A..........**EACH 244.95**
743-0805. RTL1. Replacement test leads for FG2A, FG3B, UC10A. BNC to alligator clips (2 each)..**EACH 27.95**

UC10A Universal Counter

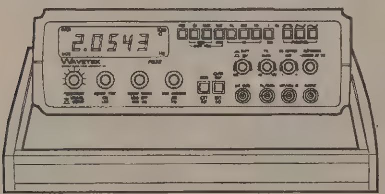


- Universal Counter from 5Hz to 100MHz
- Measures Frequency, Period, Frequency Ratio, Time Interval, Unit Count
- Large 8-Digit LED Display
- Self-Checking Capability
- Highly Accurate Readings
- One Year Warranty

The Model UC10A Universal Counter has six measurement functions and four gate time selections to make it a counter that's universal for a wide variety of applications. The UC10A has a large LED display, reset capability and signal attenuation. The UC10A is shipped with two test cables.

743-0815. UC10A..........**EACH 389.95**

FG3B Sweep Function Generator

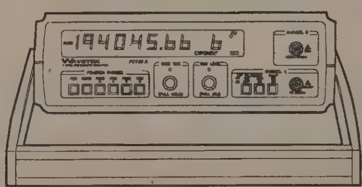


- Six Outputs — Sine, Square, Triangle, Ramp, TTL, and CMOS
- Seven Ranges — 0.2Hz to 2MHz
- Sweep Generator — Linear or Log Sweep
- Modulation — AM or FM
- Built-In 100 MHz/5 Digit Counter
- One Year Warranty

The FG3B with six different outputs, sweep generator, modulation, and built-in frequency counter is the bench top instrument that does it all. Any output can be modified with the variable duty cycle and DC offset controls. The FG3B provides logarithmic or linear sweep of any signal output, amplitude or frequency modulation with internal or external signals and a frequency counter that may be used as a stand-alone counter for measuring external signals up to 100 MHz. The FG3B is shipped with two test cables.

743-0810. FG3B..........**EACH 489.95**

FC130A High Frequency Counter

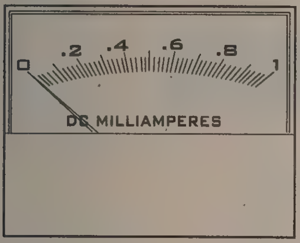


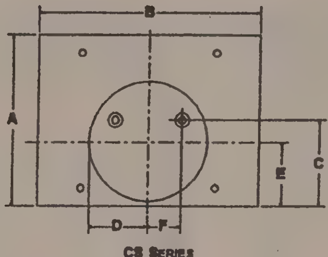
- 1.3 GHz Frequency Counter
- Measures Frequency, Period and Rate Per Minute (RPM)
- Large 8-Digit LED Display
- High Sensitivity and Resolution
- Built-In Self Diagnostics
- One Year Warranty

The Model FC130A is a microprocessor-controlled frequency counter that measures signals from 0.01 Hz to 1.3 GHz with up to 10 mV sensitivity. The FC130A is capable of monitoring transmitter output frequencies with a simple whip antenna due to its high sensitivity and broad frequency range. The FC130A is shipped with two test cables.

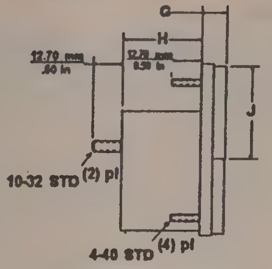
743-0820. FC130A..........**EACH 599.95**

Allied® 2½ and 3½ Panel Meters

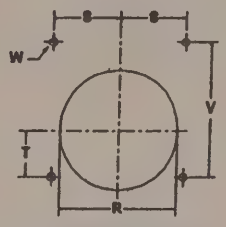




CS Series
(Rear View)



Side View



CS Series Panel Cutout
4 Stud Mount

American-made panel meters feature full scale accuracy of 2%, shielded meter movements with easy to read knife edge pointer. 100° pointer arc offers enhanced resolution; rugged taut-band suspension. All have 4-40 mounting studs. These surface mount meters can be readily mounted behind the panel with optional Bezel Mounting Kit listed below. Unique small barrel design significantly reduces space behind panel although these meters will also fit in standard American National Standards Institute (ANSI) 2½" and 3½" panel cutout.

2% Accuracy Panel Meters

S Series Surface Mount. These clean-cut meters with straightforward design and pleasing aspect ratio are leaders of the line and will add distinction to any instrument or controll panel. Meet or exceed performance required of ANSI C39/1-1981. **Accuracy:** ±2%. **Tracking:** ±1½%. **Repeatability:** ±0.5%. **Response Time:** 1.5 seconds max. for all ranges except 0-50 µA which is 3.0 seconds max. **Scale Arc:** 100°. **Shielding:** Self shielding — no special calibration needed for steel or nonferrous panel mounting, including iron vane meters. Specifications are percent of full scale. Custom scales and special inputs available as custom orders. Bezels available for window mount. Large quantity pricing available.

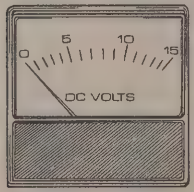
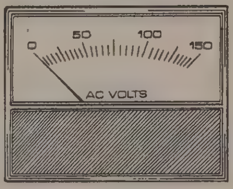
M Series Economy Moving-Magnet Panel Meter



OMS and MSQ Series

ME Series



3MAS Series

- Features 5% Accuracy of Full Scale
- Rectangular, Square, or Edgewise Configuration
- Flush or Surface Mount without Modification
- Precision-Molded Covers and Cases; UL Recognized Plastic Optional

Quality meters feature high-torque, powerful ballistic movements that permit mounting in steel panels without special calibration and production-engineered mounting and electrical connections. OMS and MSQ series square meters are 1½" and 2½" units with operating zero adjusters and scales printed on translucent plastic. ME series edgewise meters are 2" long units that are interchangeable with many d'Arsonval meters. Feature flush-to-panel covers — no disfiguring bulge. 3MAS series rectangular models are 3½" meters with operating zero adjusters and scales printed on translucent plastic, permitting diffused lighting. All M-series meters operate in a temperature range of 0°C to +50°C.

BGE™ Elliptical Bargraph with Single or Dual Inputs

The BGE series elliptical LCD bargraph/digital panel meter utilize chip-on-board and surface mount technology. Fast response (25 times per second) 100 segment, 3½" long bargraph with 1% accuracy. Independent 3 digit (±999), seven segment, 0.34" display (updated 2.5 times per second) gives accurate readout of a second signal input with 0.1% accuracy. Digital readout has selectable decimal point. The input signal to the bargraph and digital display is 0 to 200 mVDC with the resultant display of 999 digital counts and 100 segments of the elliptical bargraph displayed. The dual displays can monitor either two separate input signals or they can used to monitor one input signal. The backlit display is readable in sunlight or low ambient lighting. The dual displays share either 5 VDC or 9 VDC power. Power consumption is 165 mA (nominal) for red displays and 115 mA (nominal) for green displays. Three different displays available — green segments on dark background; red segments on dark background; and green background with dark segments. Standard labeling is 0 to 1000 units on the bargraph and no label on the digital readout.

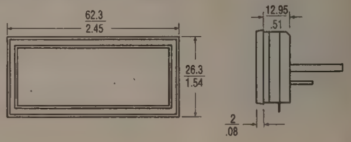
*All back lighting requires 5 VDC power.



Big-Little™ LCD Digital Panel Meters

BL series DPMs feature 3½ digits that read 1999 full scale. BH series DPMs feature 4½ digits that read 19999 full scale. Big-Little digital meters feature ½" high digits on high contrast liquid crystal display. **Specifications. Accuracy:** BL @ ± (0.1% of full scale + 2 counts). BH @ ± (0.15% reading + 1 count). **Resolution:** 1 part in 2000 or 20000. **Decimal Points:** User selectable. Auto polarity (–) displayed. **Mounting/Wiring:** BL and BH100 are window mounted with 13-pin terminals; BL and BH130 are bezel mounted with 13-pin terminals; BL176 are flat pack DPMs with solder pad connections. 176-BK is bezel mounting kit for flat pack DPMs. Thirteen pin connector for BH and BL series meters is #00-939033-091.

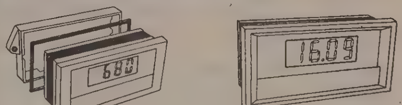
2000 Series Industrial Digital Panel Instruments



Fits industry standard ⅛ DIN panel cutout. Depth behind panel less than 1". Meets NEMA 4, 12, and IPC 55 requirements for splash-proof and hose down. Auto polarity. Overrange indication. Common mode rejection greater than or equal to 100 dB at 50-60 Hz. 7 segment, 0.5" high, back lit 3½ digit LCD display is readable in sunlight or under bright lights. High impact resistant polycarbonate case. **Specifications. Operating Temperature Range:** –20°C to +60°C. User selectable decimal point and built-in screw terminals. All units require 115 VAC power except Loop Powered Process Meters.

DC Volts and Amperes

Accuracy: ± (0.1% + 1 count) typical. Green backlit background with dark numerals.

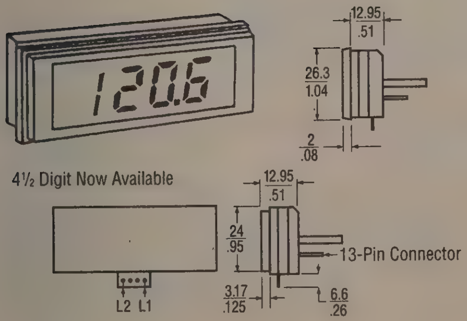
Big-Little™ Backlit Digital Panel Meters



Series BH/BL300 have dark numerals on a green backlit background; Series BH/BL500 have red backlit numerals on a dark background. Easily visible in dark areas or bright sunlight. The BH series DPMs feature 4½ digits that read 19999 full scale; BL series DPMs feature 3½ digits that read 1999 full scale. These Liquid Crystal Display DPMs utilize LED backlighting; have an operating range of –20°C to +60°C; user selectable decimal point; ½" high numerals; and autopolarity. The backlight power (isolated from the meter) is 5 VDC with power consumption of 165 mADC nominal for the red backlighting and 115 mADC for the green backlighting. Select between 3½ and 4½ digits; green or red backlighting; window or bezel mounting.

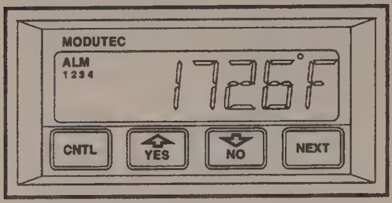
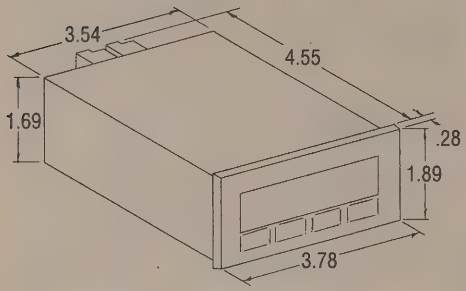
Genesis® Microprocessor Based Digital Controller





Powerful 16 bit microcontroller is ideally suited for process control. User adjustable parameters are stored in nonvolatile EEPROM. NEMA 4 meter requires less than 5" depth behind panel. Illuminated alphanumeric LCD display is 0.5" high, four and one-half digit with dummy zero. Isolated input, outputs and power supply. Peak and valley hold; open sensor and over range indication. Power supply operates from 85-265 VAC or 90-300 VDC. Outputs include up to 4, Form C Relays (7 Amp/250 VAC) for alarm and/or control. Optional plug-in cards are available for proportionate volt/milliampere output and computer communications. User adjustable max. resolution; dummy zero (0, 1 or 2); decimal point (5 places); security lockout; output configuration; hysteresis; and mode of on-off control. **Temperature Units Offer the User the Ability to Select:** Degrees F or C; type J, K, or T thermocouple for temperature measurements from –450°F to 2500°F; RTD measurements from –328°F to 1472°F with 1.0° or 0.1° resolution. **Accuracy:** DC voltage — ±0.005% FS; DC current — ±0.05% FS; Tempco of RTD — 0.03°/°C. The Genesis® meters are available with bright red numerals on a dark background or dark numerals on a green background.

Universal Selectable Industrial Digital Panel Instruments

These DPMs provide the ability for the user to switch select range and scale to display the input signal in engineering units. **Depth Behind Panel:** less than 1". NEMA 4, 12, and IPC 55 case with built-in screw terminals of impact resistant polycarbonate. 0.5"-7 segment, backlit 3½ digit LCD display is readable in sunlight or low ambient lighting conditions. **Common Mode Rejection:** ≥100 dB @ 50-60 Hz. **Operating Temperature Range:** –20°C to +60°C.

DC Volts and Amps

Calibrated to the input range and display shown. All may be re-scaled by user to any DC amp or voltage input. Zero adjustment for either 4-20 mADC or 1-5 VDC is –1000 to +1500 counts. Zero adjustment for non-offset inputs is –1500 to +1500 counts. Full scale span adjustment for all ranges is 0 to 2000 counts. All DC units require 115 VAC external power and have dark numerals on green backlit background.

AC Volts and Amps

True RMS measurement and designed for either power or instrument applications. Power ranges are for full scale inputs from 20 to 250 volts AC or 2 to 5 amps AC. Instrument ranges are for full scale voltage inputs of 200 mVAC to 20 VAC or full scale amperage inputs of 200 mAAC to 2 AAC. Both power and instrument units can be re-scaled by the user to any input, within their designated range. The universal AC units are available with dark numerals on a green backlit background or bright red numerals on a dark background. Require external, user selectable, 115/230 VAC power.

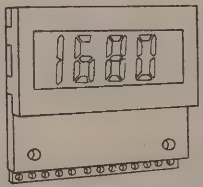
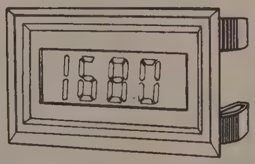
Miniature Digital Panel and Process Meters with Set Point Capability



Window Mount



With Bezel Kit

3½ digit, backlit miniature panel and process meters require 1.3" × 0.75" (window mount) panel space with a depth behind panel of <0.70". Feature 0.3" illuminated LCD digits. **Conversion Rate:** 2.5 times/second. Autopolarity. 3 selectable decimal points. **Operating Temperature:** 0°C to 60°C. Bezel mounting kit available for front of the panel mounting.

Panel Meters

Input: 0-200 mVDC. **Accuracy:** 0.25% +1 count. CMR >86 db, 50-60 Hz. **Input Resistance:** >100 Mohms. **Power Requirement:** ±5 V @ 150 µA; 9 V (isolated) @ 150 µA.

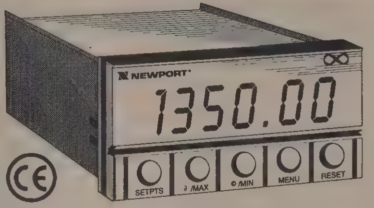
Infinity™ Series 1/8 DIN Indicators/Controllers



- ► High Accuracy, 6-Digit, 14-Segment LED
- ► Optional 7 A Dual Relays
- ► Optional Scalable Analog Output
- ► Optional Serial RS-232 or RS-485 Communications

High accuracy 6-digit panel meters allow user to select various input signal via front panel pushbutton and jumpers. NEMA-4 front panel, security lockout. For INFP and INFS units there is a choice of 10 or 24 VDC sensor excitation. Inputs can be scaled to engineering units. The INFs come with 4 programmable open-collector outputs for setpoint or alarms, read rates up to 13/sec, high accuracy, peak/valley detection with memory. Standard ⅛ DIN case panel cutout. Strain models have Auto Tare.

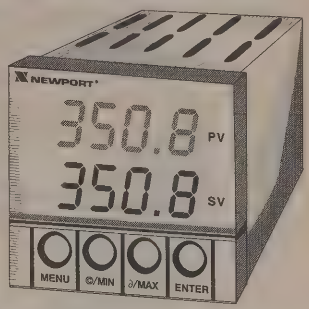
ICN77000 Micro-Infinity™ Series 1/16 DIN Autotune Temperature/Process Controllers



2 Versions Available

- ► 1/16 DIN Cutout with 2.1" Square Bezel, NEMA 4 Protection
- ► 1/16 DIN Bezel and Cutout, NEMA 12 Protection

The ICN77000 Series meters feature a large, dual display, front panel configuration, and selectable temperature/process inputs. Available in single and dual output configurations, the ICN77000 meters are available with relay, SSR, DC pulse, analog voltage or current outputs. A single alarm is standard. Options include a second alarm, RS-232, RS-485, analog output or remote setpoint selection. Please specify options at time of order.

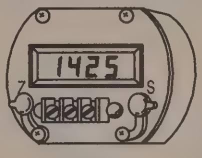
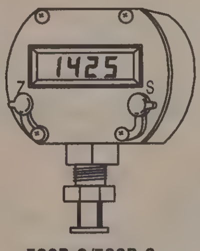
Two-Wire Process Indicators

— NEW —



508B-1



508B-2/508B-3

558B

- ► LCD Display Indicators
- ► Process Variables: Pressure, Flow, Temperature or Level Depending on Sensor and Application
- ► Powered by 4-20 mA Input Signal and Jumper Selectable for 1-5 and 10-50 mA Input Signal Applications
- ► 3½ Active Digit Display to ±1,999 with Selectable Dummy Right Hand Zero for Displays to ±19,990

The 508B series is housed in a NEMA-4 die-cast metal housing, weatherproof to 5 psi with a temperature range of −40°F to +85°C. The 558A fits ⅛ DIN cutout with a temperature range of 0° to +55°C. Supplied with 3-pole mating socket connector with screw clamps for wire sizes 26-16 AWG for connections to 3-pole male header on circuit board.

Stock No.	Mfr.'s Type	Description	EACH

Infinity™ C True RMS Meter

- ► 4-Digit, 14-Segment Red LED
- ► High 0.1% Of Reading Accuracy
- ► AC Current and Voltage Ranges
- ► Smart Filtering Detects The Difference Between A Spike Or Process Change
- ► Front Panel Configuration
- ► Peak and Valley Detection and Memory

The INFCAC true RMS meter represents an advance in AC monitoring and control. The two models available are an AC voltmeter and an AC ammeter. The INFCAC has broad scaling capabilities for most applications. Easy plug-in rear panel connectors make installation/removal quick and easy. The range can be changed via the front panel or via the serial communications option. Security is provided by an internal hardware lockout.

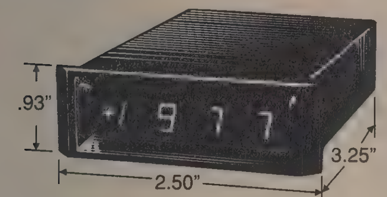
*Note: relay and analog outputs must be specified at time of order. 230 Vac, green display and serial communications available upon request.

PM Series Miniature Panel Meters — Voltage, Current, Ratio Meters



- **Small Stackable Case**
- **Multiple Options**
- **0.3" Red LED Display (Green and Yellow Optional)**
- **Automatic Zero and Polarity Indication**
- **Special Scaling and Zero Offset Option Available**
- **Presettable Decimal Points**

The PM Series full-functioned miniature digital panel meters are suited for Voltage (DC or AC), Ratio or Current applications. They feature DC reading (Model PM-352 has an AC reading option) as well as DC or AC power options. Highly accurate (from 0.1% to 0.02% full scale), with rapid update rates (three readings per second), MUX/BCD output on same models. **Common Mode Rejection Rates:** 80 dB min. **Normal Mode Rejection Ratio:** 40 dB min. **Warm-Up to Rated Accuracy:** 10 seconds. Connector, if required, must be purchased separately.

Model PM-349 3½ Digit LED Voltage Meter

Stock No.	DC Voltage Range	Digits	Input Impedance	EACH
667-8000	200 mV	3½	100 MΩ	92.00
667-9997	2 V	3½	1000 MΩ	72.00

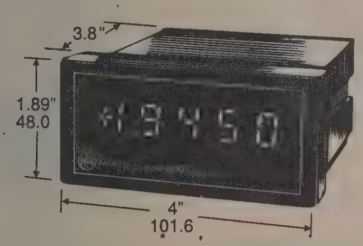
RM-Series Panel Meters — Voltage, Current, Ratio, or Ohms



- **High Accuracy (From 0.1% to 0.02% Full Scale)**
- **Automatic Zero and Polarity Indication**
- **120 or 240 VAC Power Input Optional**
- **Special Scaling and Zero Offset Available**
- **Bright Red 0.56" LEDs (Green and Yellow Optional)**
- **0.6" LCD on RM-351 and 0.4" LCD Display on RM-453 Model**
- **+5 Vdc Power Standard (+5, 12, 24, 28 and 18-34 Vdc Isolated Optional)**

Ideal for OEM and replacement applications. New large 0.8 inch LED display available on RM-350 model. 2000 variations, sized to industry standard case (1/8 DIN/NEMA cutout). Meter standard is DC powered and DC reading. AC power and/or AC reading option can be ordered. **Accuracy:** 0.1% to 0.02% full scale. **Update Rate:** 3 readings per second. **Common Mode Rejection Rates:** 80 dB min. **Normal Mode Rejection Ratio:** 40 dB min. A presettable decimal point to any of 3 or 4 locations. **Warm-Up to Rated Accuracy:** 10 seconds. **Operating Temperature:** 0°C to 50°C ambient. MUX/BDC output on some models, choose Edge Connector (EC) or Terminal Block (TB).

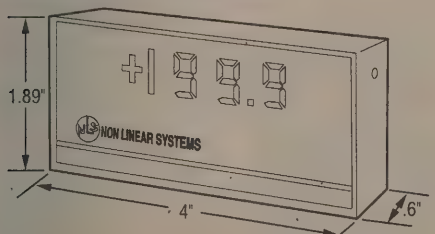
X-Series Low Cost Digital Panel Meters DC Volt and DC Ammeters



- **Short Depth, Only ½ Inch Behind Panel**
- **Accuracy from 0.2% to 0.1% Full Scale**
- **Automatic Zero and Polarity**
- **Bright Red 0.56" LEDs (Green or Yellow Option)**
- **Special Scaling and Zero Offset Available**
- **Pin Connector**

The X series meters are low-cost, short depth that are ideal for shallow equipment. Select 100 mV to 1000 V ranges depending on the model, all meters have a presettable decimal point, also a connection for external reference supply. **Update Rate:** 3 readings/second. **Power:** +5 Vdc ±5% (at 200 mA for X-32 and X-34, 6 mA for X-37). **Weight:** approximately 2 oz. **Operating Temperature:** 0°C to 50°C ambient. **Case Size:** 1.9"H × 4"W × 1.1"D (0.5" behind bezel). Connector, if required, must be purchased separately.

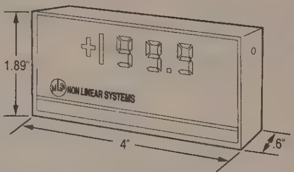
Alert Meter™ Color Changing LED Display — *NEW* —



- ▶ Colors: Green, Orange, and Red
- ▶ User Set the Input Values for the Three Colors
- ▶ 3½ Digit 0.6" Color Changing LEDs
- ▶ DC Powered at +5 VDC
- ▶ Short Depth ⅛ DIN/NEMA Case (1.9"H × 4.0"W × 1.2"D)

The new NLS® Alert Meter™ is a unique visual alarm digital panel meter, with input values at which color changes occur set by the user. Low priced, too.

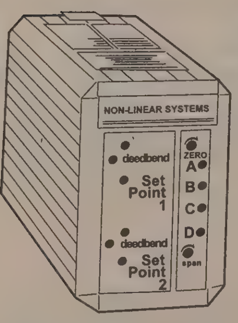
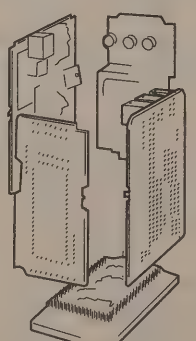
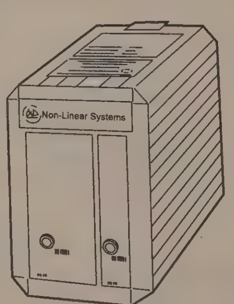
Series 8000 Signal Conditioners/Isolators — *NEW* —







- ▶ Industry Standard Plug-In Modules (Optional DIN Rail Mount)
- ▶ Integral Power Supply for Full Isolation
- ▶ Fully Pre-Configured for True Plug and Use
- ▶ All Standard Inputs and Outputs
- ▶ Three Year Warranty
- ▶ UL Recognized Component

The 8000 Series signal conditioners/isolators use a unique modern modular design to provide the greatest possible user versatility. Just plug-in pre-configured input card on the motherboard of an output-power supply for a fully functional unit. For maximum usability, all cards are pre-configured and calibrated, but can be readily scaled to user specific ranges or applications. The Series 8000 gives you one unit that will perform the tasks of up to three conventional models with up to 70% cost savings.

True isolation is achieved through the use of an integral high performance power supply in each unit. A wide choice of outputs including standard 0 to 10 volt, 4 to 20 mA, single and dual alarm trips are available. Inputs include DC and AC voltage and current, frequency or pulse, and linearized temperature. Units are standard with 120 VAC, 5/60 Hz power and can be easily converted to 240 VAC, 50/60 Hz. A +9 to +30 VDC power supply which replaces the 120 VAC or 240 VAC supply is available as an option. Call for more information.

Model 350 Edgewise Meters

Model 350. DC types are moving magnet. AC types incorporate a rectifier. Mount in rectangular hole, $1^{21}/_{32}$" x $^{17}/_{32}$". Accuracy within ± 5% of full scale. High temperature polystyrene case. $1^{1}/_{16}$" scale length. Black escutcheon plate.

Model 850 Rectangular Panel Meters

Model 850. $2^{1}/_{2}$ inch rectangular panel meters have snap-on plastic crystal and an accuracy of ± 5% of full scale. DC types have moving magnet (bridge-type) design. AC types double-vane repulsion jeweled bearing. To order conventional panel meters which mount in $2^{5}/_{32}$" dia. hole, replace "X" in stock no. with an "8". To order behind the panel meters, replace "X" in stock no. with a "6". (**Note:** These meters may be mounted either in front of the panel thru a $2^{5}/_{32}$" dia. hole or from behind the panel thru a rectangular cut-out.) Behind the panel mounting hardware not supplied. ***External current transformer required.**

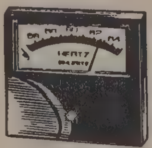
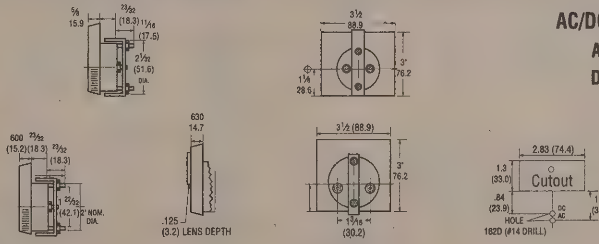
Model 750 Rectangular

Model 750. Accuracy within ± 5% of full scale. DC movements have moving magnet design. AC types have high torque repulsion vane design. Both AC and DC types have jeweled bearings. Polystyrene meter fronts. To order conventional panel meters which mount in $2^{5}/_{32}$" dia. hole, replace "X" in stock no. with "7". To order behind the panel meters, replace "X" in stock no. with "5". (**Note:** These meters may be mounted either in front of the panel thru a $2^{5}/_{32}$" dia. hole or from behind the panel thru a rectangular panel cut-out.) Behind the panel mounting hardware not supplied.





AC/DC Terminal Location

Line Voltage Tester Model 79406LT

Test single outlets with or without accessories. Simply insert the thru-plug into an outlet, read and note the line voltage, then plug in the appliance to be tested (i.e., air conditioner, test equipment, microwave, appliance, etc.) into the thru-plug. A sustained voltage drop of 5 volts or more indicates a problem that should be investigated. Cord is permanently attached to an all-plastic-case meter. Safe, fast readings. Pocket size. **Range:** 0-150 VAC.

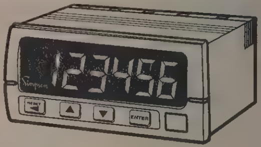
660 Series Counters



- Available May 1997
- Counts Up or Down
- Accepts Input Count Rates Up to 10 kHz
- Large Tactile Buttons for Easy Programming
- Verbal Programming Prompts, No Symbols
- Broad Range Scaling Using Front Panel Buttons
- Up to Two Presets
- Optional Field Replaceable Relay Cards
- Optional 12 VDC (100 mA) Excitation Output
- 6-Digit, Bright Red LED Display
- Rugged Case, IP65 Front Bezel
- Screw Terminal Connectors for Simple Hook-up
- 120 VAC Power Supply

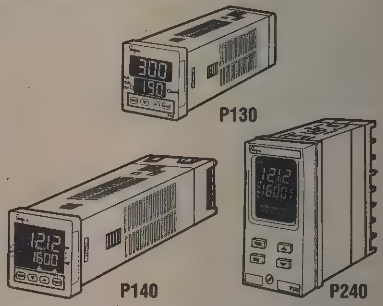
PID Temperature Controllers

Phoenix Series PID Controllers



- Choice of 1/16 DIN (P130, P140) or 1/8 DIN (P240)
- SMART Tuning Auto-Tune and Continuous Adaptive Adjustment of Control Parameters
- Easily Programmed From Front Panel
- Two Control Outputs for Heat + Cool Control or Heat/Cool + Alarm
- Up to 3 Independent Programmable Alarms
- Wide Variety of T/C, RTD and Linear Inputs Accepted
- Dual Display Shows Both Measurement and Set Point Values
- P130 Has 3 Digits; P140 and P240 Have 4 Digits
- Screw Terminal Connectors With Safety Cover
- Password Protection Prevents Undesired Access
- IP65/NEMA 4X Front Panel Protection
- Optional Heater Break Detection (P140, P240)
- Auxiliary Set Point Available
- 100-240 VAC Power

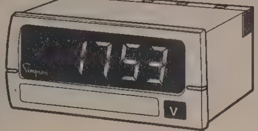
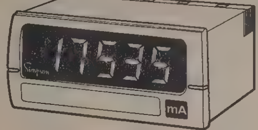
1/8 DIN Indicators

Falcon Series 3½ and 4½ Digit Indicators



F35



F45

- F35 Has 3½ Digits; F45 Has 4½ Digits
- DC, AC, and AC TRMS Voltage/Current and Temperature Ranges
- 120 VAC Power Supply Standard; 220 VAC or 9-32 VDC Optional
- Large, 0.56" (14.2 mm) High, Red LED Display with Automatic Zero and Polarity Indication
- Screw Terminals Standard for Easy Installation
- Short, 3.12" (79 mm) Deep, 1/8 DIN Case
- Direct 5 AAC Input for Use with Donut Current Transformers
- Broad Range Scaling and Adjustable Zero Offset for Process Inputs
- Optional 12 VDC or 24 VDC Excitation Output

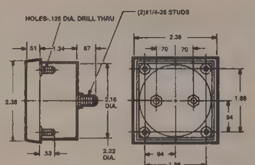
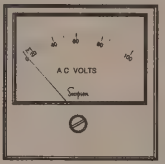
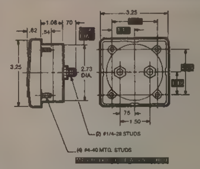
Century Panel Meters







Century meters have phenolic cases with glass windows with distinctive case styles and are UL Recognized. All Century DC meters have self-shielding movement (calibration is not affected by stray magnetic field or magnetic mounting). The listed AC meters have the iron-vane type movements and are calibrated at 60 Hz. Other meter sizes and ranges are available, call Allied for details.

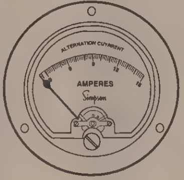
Round Panel Meters



Two different sizes, 2½" and 3½", are available in this popular style. Round meters have phenolic cases with glass windows and are UL recognized. All DC versions have a self-shielding movement (calibration is not affected by stray magnetic field or magnetic mounting). AC meters listed have an iron-vane type movement and are calibrated at 60 Hz. Call Allied for sizes and ranges not shown.

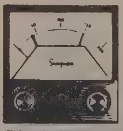
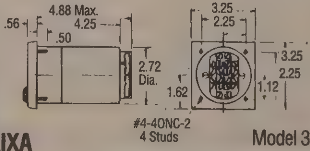
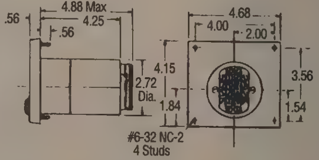
Controllers





3½" Model 3323AIXA

4½" Model 3344AIXA



Used for a wide variety of control alarm, and limit applications. Metal cased "Rugged Seal" construction withstands rigorous environmental conditions. DPDT relay contacts for each control point rated at 5 amps, 115 VAC. Fail safe circuitry open relays in event of power failure. Meter power is 108-132 VAC, 50-400 Hz. Other sizes and ranges available — call Allied for details.

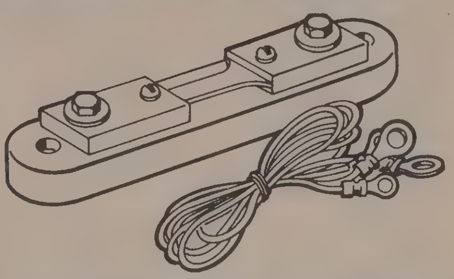
Portable Shunts For DC Ammeters



These shunts are adjusted for a 50 millivolt drop for use with analog and digital panel ammeters where external shunts are required. Portable shunts have phenolic bases and accept up to 200 amperes. **Accuracy:** ±1%. 5-foot leads (0.065 ohms) are included.

Current Transformers and Transducers

Current Transformers are similar to Donut Current transformers, except that the Transformers have terminals instead of secondary leads. These are ideal for use with a digital AC Ammeter, and can be conveniently mounted to a panel or fixture.

Current Transducers monitor high AC Current signals and emit a 4-20 mA signal. This signal can be sent over long distances (up to 1000') to a digital Process Indicator in a remote location.

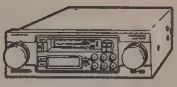
Intercoms and Amplifiers

BOGEN
COMMUNICATIONS, INC.

Intercoms

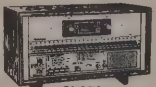
PI-35A and SI-35A

- Instant Two-Way Communication with Master Station
- Color Coded for Easy Operation
- Instant EMERGENCY/ALL ROOM Announcements
- Separate 35-Watt Program Channel



CR-100

PI-35A



SI-35A

Both have built-in 20-Watt intercom and 35-Watt program amplifiers. Calls from a remote station equipped with the CA-10 Call-in switch are announced by light annunciation and tone signal. Finished in simulated walnut veneer. **Specifications. Output:** Balanced 25 VCT line. **Power Requirements:** 120 V, 60 Hz AC; 100 W maximum. Model PI-35A provides communication with up to 25 remote locations. Model SI-35A provides communication with 25 to 75 remote locations.

Power Amplifiers

The BPA and HTA Series are designed to fulfill power amplification requirements with high quality and reliability. Inputs are high impedance, unbalanced, convertible to low impedance, balanced or unbalanced, with optional TL600 transformer. Designed for continuous heavy-duty operation. The amplifiers are thermally protected to prevent damage due to excessive temperatures. Accessory rack panel kits permit mounting in a 19-inch equipment rack. (RPK-53, RPK-54 for BPA-60, BPA-125, respectively).

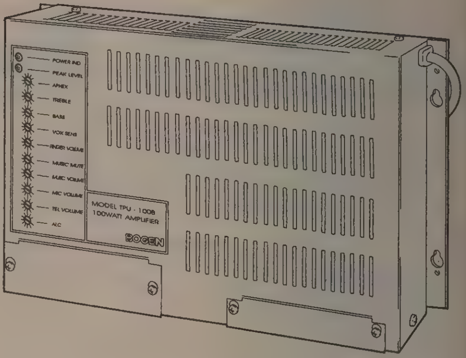
TPU-A and TPU-B Series Amplifiers



- ► **Built-In Telephone Line Input Transformers**
- ► **Screwdriver Adjustable Controls**
- ► **Wall or 19" Rack Mounting**

Four Models and Power Levels Available: TPU-15A — 15 watts, TPU-35B — 35 watts, TPU-60B — 60 watts, and TPU-100B — 100 watts. Inputs for 600-ohm balanced telephone line, LO-Z balanced microphone, and background music source. **Choice of Outputs:** 16-ohm, 25 VCT, 25 V, 70.7 V, or 100 V outputs, balanced or unbalanced. Choice of RCA jack or screw terminals for Music source (unbalanced). Volume controls for Tel channel, MIC, Music, and Ringer. Ringer circuit activated by contact closure or 90 V ring signal. Variable music mute with adjustable Mute level control. Signal-activated paging channel with VOX sensitivity and ALC adjustments. Aphex Aural Exciter® Circuit with on/off switch and effect adjustment. Bridging jacks supplied to a double number of inputs and outputs. Output (RCA jack) to line-matching transformer (WMT-1A).

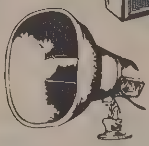
ASWG-1



AH-5A

Amplified Speakers and Horns

Amplified speakers eliminate the need for a centralized amplifier and provide individual volume adjustment of each location. They are easy to install and interface with any phone system, via the SAM or PAM access modules.

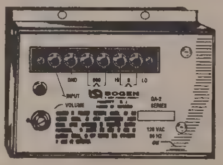
Model AS-1. 8", 45 ohm cone speaker with compact IC amplifier and volume control. 1 Watt output and operates on 24 VDC. **Weight:** 2 lbs.
733-2325............**EACH 35.90**

Model ASWB-1. For wall mounting, consists of the AS-1 in the attractive WB8 baffle. **Weight:** 8 lbs.
733-2335............**EACH 52.02**

Model ASWG-1. For recessed ceiling installation. Features an aluminum baffle finish in white enamel. **Weight:** 3 lbs.
733-2330............**EACH 42.43**

Model AH-5A. Amplified horn speaker for use outdoors or in high noise locations. 5 Watts output, operates on 24 VDC and is equipped with a volume control and mounting bracket. **Dimensions:** 8 × 8 × 9". **Weight:** 4½ lbs.
733-2435............**EACH 110.98**

GA-2 Music-On-Hold Amplifier

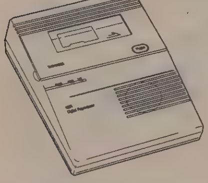


Compact, reliable, 1½ Watt amplifier. Excellent for feeding "music-on-hold" to a telephone system. It has a high-impedance input that is available at both a phono jack and screw terminals. 8 Ohms or 600 Ohms output. Only 50 mV input is required for full output. **Power Consumption:** 4 W, 120 V, 60 Hz. **Dimensions:** 5½ × 4⅛ × 2¼". **Weight:** 1 lb.

733-1113. Model GA-2............**EACH 99.55**

Digital Announcement Equipment

— NEW —



The Bogen HSR Series consisting of the HSR-4, HSR-6, HSR-8, and HSR-12 utilizes advanced digital circuitry to provide the best sounding and most reliable On Hold messages available in 4, 6, 8, and 12 minute memory length versions. The HSR announcers employ a state-of-the-art digital design to achieve a full 64 Kbps digital toll quality sampling rate. In addition, a specialized audio editing circuit creates seamless audio with no "dead air".

The HSR Series employs full microprocessor control, requiring the owner to merely insert the cassette into the housing. The HSR's automatic operation assesses the start and stop point of the audio, sets record levels, downloads, and goes into play mode automatically.

All models offer a choice of 8 ohm/1 watt or 600 ohm line output and are compatible with most telephone and audio systems. They feature LED indicators for Power On, Load, and Play and are furnished with a 12 VAC power supply. Wall or tabletop mounting. **Dimensions:** 7⅞" × 6⅜" × 2⅞. **Shipping Weight:** 4 lbs.

Microphone and Line Plug In Transformers

WMT-1A

WMT-1A may be used as input-matching transformer to connect telephone systems to aux. input of most Bogen public address amplifiers for telephone paging. It may also function as output-matching transformer in feeding special program material over 500/600 ohm telephone line for transmission to a local broadcast studio. May be used with any amplifier having a 25-Volt output terminal.

733-1107. Model WMT-1A............**EACH 29.34**

Power Supplies

Bogen power supplies can be plugged into any convenient 120 VAC/60 Hz electrical outlet. Up to ten AS-1s can be driven by a single PRSASA Power Supply. For larger systems, or those which incorporate amplified horns or zoned paging, the PRS-624DA Power Supply is recommended.

Model PRSASAC. Provides 24 VDC regulated and filtered output at .5 amps. U.L. listed. **Dimensions:** 2¾ × 4½ × 2½". **Weight:** 2 lbs.

FM/AM Receiver

- ► **35 Watts of Power — Enough for Most Receiver Installs**
- ► **4 Zone Selection — Allows End User to Select Areas to Page Plus an All Call**
- ► **Three Rack Space — Great for Both Rack and Shelf Mount Applications**
- ► **Rack Mount Kits — Available for Standard Rack Installations**

Versatile receiver that features high quality mono reception on both FM and AM bands. Microphone precedence circuitry permits double duty for paging. This receiver may be rack-mounted with optional panel kit **RPK-47**.

Model RM-350D can provide music for up to 100 speakers. **Power Output:** 35 W. **Output Impedance:** 4, 8, 16 Ohms, 25 V, 70 V lines, tape/booster. **Power Consumption:** 100 W, 120 V, 60 Hz. **Dimensions:** $12 \times 10\frac{3}{8} \times 3\frac{5}{8}$". **Weight:** 20 lbs.

Cameras

CVC-150 Camera

Rugged, black metal case houses this 1/3" CCD camera requiring only 0.3 lux of light. Built-in electronic iris control has 400 line resolution and uses a C or CS mount lens, supplied with CS/C adapter ring and 12 volt DC power supply. (Lens sold separately). **Specifications. Image Device:** 1/3" CCD image sensor interline transfer 512 H × 492 V picture elements. **Scanning System:** EIA standard 525 TV lines 60 fields/sec. **Interlace:** PLL 2:1. **Synchronizing System:** Internal. **Resolution:** Horizontal — 400 TV lines; Vertical — 350 TV lines. **Shutter Control:** Auto 1/60-1/10,000 sec. **Auto Shutter/Iris:** Optional by slide switch and four pin connector (for auto iris lens). **Lens Mount:** C or CS mount, CS/C mount adapter ring included. **Scanning Frequency:** Horizontal — 15.75 KHz; Vertical — 60 Hz. **Minimum Illumination:** 0.3 lux (with F: 1.4 lens). **Video Output Level:** 1.0 Vp-p, 75 ohms composite, BNC connector. **Video S/N Ratio:** Greater than 45 dB. **Outputs/Connections:** BNC — Video; DC jack — Power. **Operating Temperature:** 14°F-130°F. **Humidity:** Within 90% RH. **Power Requirements:** 12 VDC supplied by AC adapter; UL and CSA listed. **Power Consumption:** 100 mA. **Weight:** 11 oz. **Dimensions:** 1 5/8"H × 2 1/8"W × 4 3/8"D. **Housing:** Black metal case. **Camera Mount Thread:** 1/4" top and bottom.

CVC-300 Camera with Audio Output with Built-In 4 mm Lens

Only 1 1/4" thick, this 1/3" CCD camera offers great observation capabilities. Actually 3 1/4"H × 2 1/4"W × 1 1/4"D, this unit weighs a mere 3.7 oz. Built-in 4 mm lens with electronic iris automatically compensates for all light conditions with only a minimum of 0.1 lux. This 400 line resolution compact camera comes in a weather resistant case and can withstand temperatures from –4° to +122°F. A 12 volt DC power supply and mounting bracket are included. **Specifications. Image Device:** 1/3" CCD image sensor interline transfer 512 H × 492 V picture elements. **Scanning System:** EIA standard 525 TV lines 60 fields/sec. **Interlace:** PLL 2:1. **Synchronizing System:** Internal. **Resolution:** Horizontal — 400 TV lines; Vertical — 350 TV lines. **Shutter Control:** Auto 1/60-1/10,000 sec. **Auto Shutter/Iris:** Built-in. **Lens/Angle of View:** 4.3 mm lens, horizontal — 74°; vertical — 53°. **Scanning Frequency:** Horizontal — 15.75 KHz; Vertical — 60 Hz. **Minimum Illumination:** 0.1 lux infrared LED (200-300 lux for best picture). **Video Output Level:** 1.0 Vp-p, 75 ohms composite, RCA connector. **Video S/N Ratio:** Greater than 45 dB. **Audio Output Level:** 300 mV at 600 ohms. **Outputs/Connections:** RCA — Video; DC jack — Power. **Operating Temperature:** 0°F-122°F. **Humidity:** Within 90% RH. **Power Requirements:** 12 VDC supplied by AC adapter; UL and CSA listed. **Power Consumption:** 100 mA. **Weight:** 4 oz. **Dimensions:** 3 1/4"H × 2 1/4"W × 1 1/4"D. **Housing:** White ABS molded plastic. **Camera Mount:** Universal mounting bracket included.

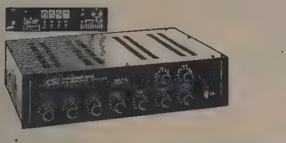
120 Watts RMS P.A. Amplifier



Features

- Heavy duty heat sinks
- 4 microphone inputs with lock-in cannon connectors. Can be used with balanced or unbalanced, high or low impedance microphones
- 2 aux. inputs
- 1 magnetic phone input
- 1 equalizer input
- Separate volume control for each microphone and aux. input
- Master volume control
- Separate bass and treble control
- 4, 8, 16 ohm outputs, screw terminals
- 25 and 70 volt outputs, screw terminals
- 2 RCA speaker outputs
- 1 booster/tape output
- Built-in priority paging
- Separate on.off switch

Specifications

Power: 120 watts RMS @ less than 50% distortion. **Frequency Response:** 50 Hz to 15 KHz. **Noise:** Mic—60 dB, Aux.—75 dB. **Sensitivity:** Mic—0.3 mV, Aux.—0.3V. **Tone Controls:** Bass—±15 dB @ 100 Hz, Treble—±15 dB @ 10 KHz. **Power Req.**: 120 VAC, 50-60 Hz, 230 W. **Dimensions:** 4 1/4" (H) x 17 1/4" (W) x 11 1/2" (D). **Weight:** 33 lbs.

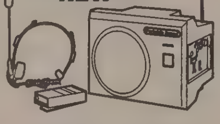
PAW-100 CSI — 20 Watt Portable Wireless Amplifier

— NEW —



- Includes Wireless Headset and Lapel Mic with Belt Pack Transmitter
- Complete Self Contained Portable PA System, Great for Lectures or Demonstrations
- Additional Mic/Aux Input, Can Work with CSI Wireless Microphone
- Recorder/Line Level Output
- Operates on AC 110 or 220 Volts or DC 12-18 Volts
- Battery Included with Wireless Transmitter
- Optimum Operating Range: 60-130 Feet
- 7$^1/_2$"H × 9$^1/_2$"W × 6$^3/_8$"D
- Weight: 5.5 Lbs.
- High Performance
- VHF Frequencies Available: Channel A — 171.90 MHz; Channel B — 184.54 MHz; Channel D — 209.82 MHz; Channel F — 203.30 MHz
- 20 Watt Audio Output

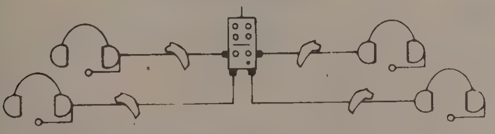
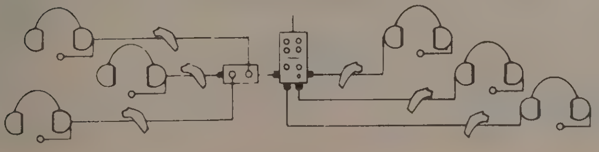
Belt Station required for each headset. All headsets shown are interchangeable throughout system.

Typical Series 3400 Applications

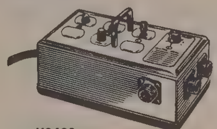
Two to Four Headsets



Five to Six Headsets

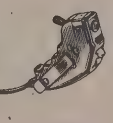


Series 3400

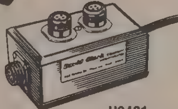


U3400

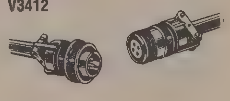
U3410



V3412



U3401



C34

This System operates on standard 110 VAC current and can easily be converted to 220 VAC. Up to 32 Headsets may be connected at one time using belt stations and remote junction modules. Four conductor shielded cables provide shielding from electrical and radio frequency interference.

U3400 Master Station
The heart of the Series U3400 Communication System. It contains the power supply, amplifier and impedance selector in a single, sturdy metal box. There are four output connectors, 12 ft. grounded power cord, roll bar/carry handle, master volume control, and system On/Off switch. Belt Stations connected to four outputs form a four-man communication system. See Application No. 1 below. Remote Junction Modules connected to these outputs may further expand the system. See Application No. 2 below. **Specifications. Input:** 110-125 VAC, 60-50 Hz. **Output:** 24 VDC. **Max. Current:** 1/2 amp. Dimensions: 4¾ × 9½ × 4¾".
535Q7000. Model U3400 .... EACH 822.28

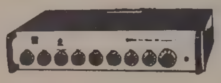
U3401 Remote Junction Module
Used for additional Belt Station connections. Will provide three Belt Station connections or two Belt Station connections plus another Remote Junction Module or extension cord. Your system arrangement will accommodate a maximum of 32 headsets. See Application No. 2 below.
535Q7005. Model U3401 .... EACH 278.80

U3410 Belt Station
Serves as a preamplifier and interfaces between Headset and system. EVERY HEADSET MUST BE PLUGGED INTO A BELT STATION. Belt Station then connects to a Master Station or Remote Junction Module, either directly or via extension cords. Unit features headset jack, individual earphone volume controls, push-to-talk or lock microphone button, belt clip, 12 ft. cord with connector.
535Q7010. Model U3410 .... EACH 249.90

V3412 Vox Belt Station
May be used in place of U3410 Belt Station. No buttons to press for hands-free operation. Voice activated start/stop transmission. Has Vox sensitivity control, headset jack, listening volume control, Vox override push to talk button, belt clip, 12 ft. cord with connector.
535Q7015. Model V3412 .... EACH 349.22

C34 Extension Cords
With screw-on-type connectors. Four conductor oil resistant cords are used to connect all components: Master Station, Remote Junction Modules and Belt Sanders. Number after dash indicates length in feet.
535Q7020. C34-12 .... EACH 132.60
535Q7025. C34-25 .... EACH 156.40
535Q7030. C34-50 .... EACH 193.80
535Q7035. C34-100 .... EACH 285.60

Pro-120 120 Watt PA Amplifier



With priority paging. **Specifications. Power Output:** 120 W rms. **Frequency Response:** 50 Hz to 15 kHz. **Noise:** mic — –60 dB; aux. — –75 dB. **Sensitivity:** mic — 0.3 mV; aux. — .03 V. **Tone Controls:** bass (100 Hz) — ±12 dB; treble (10 kHz) — ±12 dB. **Front Panel Controls:** 4 mic volume, master volume, (2) aux. volume, bass, treble, mag. phono volume, power on/off. **Inputs:** mic 1, 2, 3, 4 (balanced or unbalanced); HIZ; LOZ; (2) aux. –100K; mag phono; equalizer. **Outputs:** 4, 8, 16 ohms, 25 V and 70 V (balanced or unbalanced), booster/tape, screw terminals, speaker jacks. **Power Requirements:** 117 VAC, 50-60 Hz, 230 W. **Dimensions:** 3½"H × 17¼"W × 11"D. **Weight:** 33 lbs.

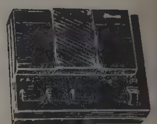
FM Wireless Intercoms



- Two Way "Hands-Free" Voice (VOX) and Manual Operation
- Operates Room-to-Room or Between Houses on Same AC Electrical Wiring; No Installation Is Required
- Any Number of Stations May Be Operated on Same Line
- Each Intercom Unit Is Plugged into an AC Outlet and Uses the House or Office Electrical Wiring as a Message Path
- Ultra-Sensitive FM Circuitry with Separate Microphone and Speaker Provides Dependable Clarity of Voice Transmission
- Instant "ON" Operation Assuring Dependable Service; No Warm-Up Time Required
- All Stations Are Equipped with "Call" Button for Signaling, Lock Buttons for Continuous Monitoring of Baby, Sickroom, etc.
- All Models Are Fully Compatible with Each Other
- Can Be Used on Desk, Table, Counter or Wall Mounted
- Cabinets Are of High Impact Plastic with Woodgrain and Charcoal Brown Colors — 6"W × 5"D × 2"H; Weights 1 lb.

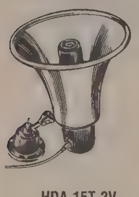
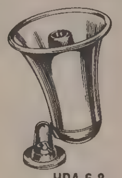
Multi-Purpose Speakers



HDA-15T-2V
HDA-30T-2V



HDA-6-8
HDA-10-8
HDA-10-8XL

Model HDA-15T-2V. Power 15 watts, power taps 25 and 70.7 volt lines — 15, 7.5, 3.5, 2.0 watts, 8½" bell diameter. Ruggedly constructed of aluminum with baked enamel finish. Anyone can hook up a multi-horn P.A. system with "Multi-Tap" Speakers, with built-in matching transformer. They are equipped with four different power selections on each horn. All you have to do is select the power you need. Comes complete with 18" speaker wires.

790-7605. HDA-15T-2V. **1-5**	**EACH 72.00**
6-Up	**EACH 66.07**

Model HDA-30T-2V. Same as HDA-15T, above, Power 30 watts, power taps 25 and 70.7 volt lines — 30, 15, 7.5, 4.5, watts, bell diameter 10". Recommended for higher powered system.

790-6000. HDA-30T-2V. **1-5**	**EACH 90.31**
6-Up	**EACH 81.71**

Model HDA-6 8 Ohms. Outperforms all directly competitive speakers in its size and class. Rated at full 15 watts continuous duty. Speaker has 6½" diameter bell and is 8" long. Smooth response and very high conversion efficiency. Full-range swivel mount with positive locking action. **Weight:** 4 lbs.

790-6150. HDA-6. **1-5**	**EACH 43.00**
6-Up	**EACH 37.00**

Model HDA-10 8 Ohms. Higher power version of HDA-5 and HDA-6 with improved low frequency response. Rated at 30 watts continuous output, it has a 10" diameter bell. Produces a sound pressure of 124 dB or double the efficiency of speakers of the same size and input rating. Good wide-range response. Full-range swivel mount with positive locking action. **Weight:** 5 lbs.

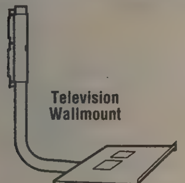
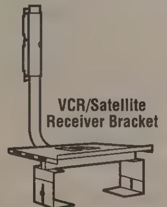
Television Wall Mounts

— NEW —





New space-saving television/monitor mounts are ideal for today's home or office. As space becomes more valuable in every room, GC mounts provide a modern alternative to bulky TV stands and home entertainment centers. By attaching your TV to a GC mount, you will save space while adding to the decor of your bedroom, den, office, bar or any room in the house. The high-tech black, scratch resistant finish complements today's contemporary lifestyles and television designs.

In addition to saving space, GC wall mounts make watching TV easier. The 10° shelf tilt angle and the 90° left/right swivel lets you position the television for optimum viewing from any point in the room. GC wall mounts fit most 13", 19/20" and 25/27" televisions and monitors.

25"/27" Ceiling Mount/Television Mount

Tray Width: 25". **Max. Depth of Set:** 19½". **Load Rating:** 125 lbs. **Fits:** Most 25" and 27" sets. **Color:** Black.

Tele-Check Modular Line Tester

Telephone Line Tester
GC
Green means correct wiring
Red means reversed polarity
no light means not operational

Analyzes modular phone line problems. Tester inserts into modular jack or in receptacle which holds line wire in network interface panel. Provides visual indication of the type and location of the phone line problem. Eliminates costly unneeded telephone service calls.

796-9450. 30-9451	EACH	9.86

Combination Telephone/Coax Wallplate

Specially designed wallplate allows hookup of both modular telephone wire and coax cable from one location. (4-conductor)

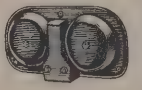
796-9732. 30-9732. Ivory	EACH	2.53

Twisstop™

Prevents handset cords from becoming twisted and tangled by allowing the handset to rotate freely. Compatible with all modular handset cords. Swivel rotary action spins the cord around to its original position, without decreasing sound quality.

796-9310. 30-9310	EACH	11.09

Outdoor Telephone Bell



The outdoor telephone bell is a loud mechanical bell. Weather resistant molded housing for use indoors or outdoors, ideal for factory, farm, porch or garage or in any noisy environment. This telephone bell is line powered and uses a modular jack for simple installation. FCC registered.

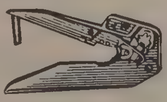
796-9835. 30-9835	EACH	58.94

Telephone Extension Ringer

Telephone ringer installs with modular connections. Ideal when in a remote location such as the basement, garage, patio or laundry room to alert the individual of a phone call.

796-9820. 30-7520	EACH	32.08

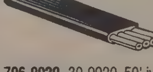
Modular Crimp Tool



Makes it easy to install modular plugs on 4-conductor modular line cord. Has built-in wire stripper.

796-9950. 30-9951	EACH	8.80

Stranded Flat Modular Line Cord



26-gauge Silver or Ivory-jacketed line cord with color-coded wires. Use with telephone modular plugs.

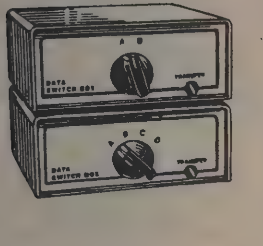
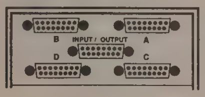
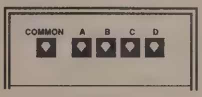
Computer Data Transfer Switches





45-2005



45-2064

Data Switches

Data switches permit computer users to share printers, modems, etc., providing economy by decreasing the amount of equipment needed. All GC data switches are data-transparent and all lines are switched "straight-through". This permits using an A/B switch to a printer with two computers, or using two printers with one computer, and so forth.

This series of switches is built in sturdy steel cases for excellent shielding characteristics and durability. Switches are sealed and contacts employ precious metals. For use with printers, modems, plotters, etc.

Switch Types. Standard switch types...one printer may be switched between two (A/B) or more (A/B/C/D) computers (or vice versa). X-Switch — Two computers can share two different printers (or any peripherals) and connections are changed with a flip of a knob.

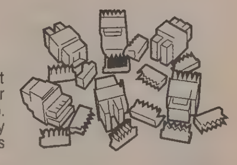
Network Communications

Modular IDC Connectors — Category 5



► **Category 5 Transmits Up to 100 Megabytes of Information Per Second**

Insulation displacement contacts for 22 to 26 AWG wire. Allows for convenient termination of twisted pair cable. 50 microinches of gold plating or modular contacts. Complies with IEEE standards 802.3 (10BaseT) and 802.5 (Token Ring). These connectors are designed to snap into patch panels and wall plates. A variety of colors allows flexibility in wiring configurations. TIA and AT&T wiring schemes are easily accepted by these connectors.

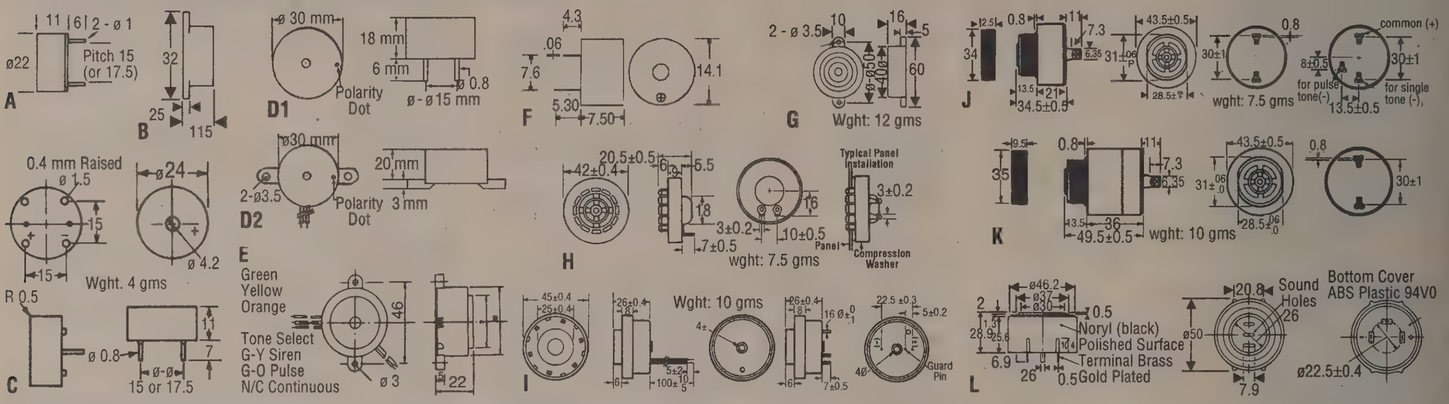
Piezo Electric Buzzers with Internal Circuitry



These INTERVOX devices were developed with circuits so they can easily be used by applying your D.C. voltage source. Their clear penetrating sound quality enables these buzzers to be used in applications such as fire and burglar alarms, smoke detectors, and medical instruments.

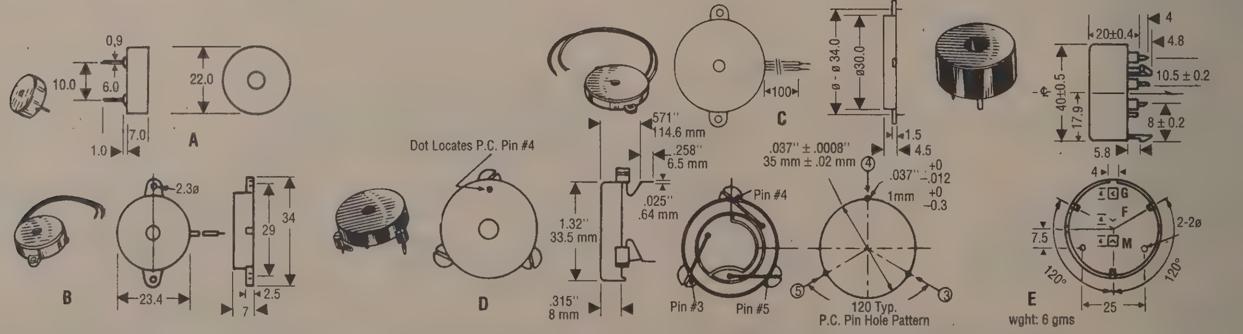
External Drive Piezo Buzzers



Because of their low profile housings, these INTERVOX devices can be easily mounted in limited space designs. Their clear, penetrating sound quality enables them to be used in virtually any application.

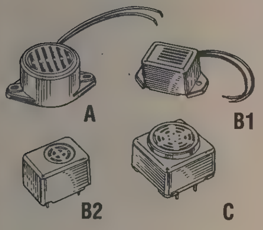
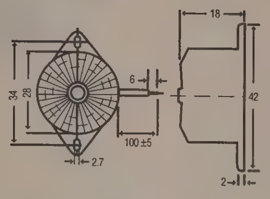
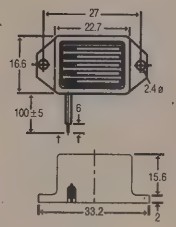
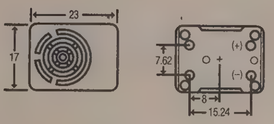
Electronic Buzzers



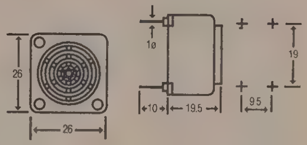


A wght: 18 gms





B2 wght: 7.5 gms



C wght: 15 gms

These INTERVOX devices are designed to eliminate arcing and Rf noise commonly found in electro-magnetic type buzzers. They provide a low frequency sound that is easily recognized making them ideal for applications such as Industrial Controls, Auto Warning Devices, Test Apparatus, Appliance Timers, Intrusion Alarms.

These INTERVOX devices are small and lightweight enabling them to be used in equipment where space is extremely limited. Many of these types are sealed with removable tabs for designs requiring wave solder and washing operations. In addition the BST1811P series is available with a carrier tube suitable for automatic insertion. Typical applications include Pocket Pagers, Counters, Monitors, Scanners, Computer, Peripheral equipment.

Miniature Speakers

These INTERVOX devices were designed with a wide frequency range. Available in rare earth, alnico and ferrite magnets. These products are suitable for applications such as computers, modems, digital communication, queuing annunciators and intercoms.

Sonalert and Minilert Audible Warning Devices

MALLORY

Compact Sonalert II Audible Signal

Miniature piezo audible signal uses standard printed circuit mounting. Has low power consumption. Suitable for fire alarm, call buzzers, car alarms, clocks, and cash register applications. Will accept from 3 VDC to 20 VDC at 16 mA (max). Units are available with optional wash label sealed for wave soldering on special order. Manufacturer literature is available upon request. **Frequency:** 3.4 ±0.5 kHz. **Sound Pressure, dB at 2 Ft.:** 75 dB min. at 12 VDC. **Input DC Voltage:** 3-20 VDC. **Current (mA) at 12 VDC:** 16 mA max. Sealed for wave soldering on special order.

Volume Control for Mallory Sonalerts

A cost effective volume control for all Mallory SC Sonalerts using the classic screw neck. Unit consists of three component parts. The baffle plate snaps into the Sonalert's grill. The shutter is easily mounted with a screw (provided) and has flanges that can be gripped to adjust the volume of the Sonalert. The screw is tightened to hold the shutter in position. This unit allows the output of the Sonalert to be controlled. It can be assembled to the existing Sonalerts in the field while they are mounted.

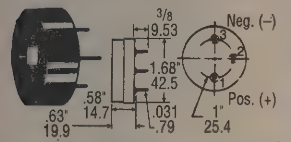
PC Board Mounted Sonalert Signal



Low profile pin mounted signal. Suited for insertion and soldering into printed circuit boards. May be hand or wave soldered. Audible signal is 2900 Hz medium loud and is available as continuous tone, fast pulse, or slow pulse.

Sonalert® Solid-State Audible Warning Device

Emits penetrating signal at min. current. Solid-state circuit — no arcing — no RF noise, no mechanical wear, lowest failure rate with max. efficiency. Compact, lightweight, versatile — consumes less current than normal indicator light. Ideal for use as safety device. Alerts to mechanical malfunctions in cars, communications, computers, fire signals, medical electronics, etc. Sonalert signals may be powered by many electrical sources ranging from single cell batteries to industrial power lines. Little electrical power is required making them ideally suitable for portable battery operated equipment. This low power feature allows the Sonalert signal to be turned on or off with a low power transistor, SCR, or integrated circuit. Completely solid state with no moving parts, no arcing, and mechanical wear, the Mallory Sonalert signals should give you many years of trouble-free service. **Temperature Range:** –20°C to +65°C. Self-extinguishing black nylon case, 1.687" dia. (length in table). **Weight:** 8 oz.

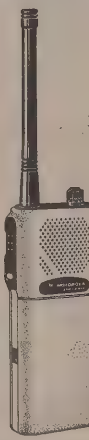
These rugged handheld/jobsite radios are productivity builders for such typical applications as: security, plant/property maintenance, warehouse operations, construction, property management, athletics and wherever job coordination is desirable.

Each radio comes complete with antenna, removable belt clip, rechargeable battery, battery charger, operator manual, FCC licensing information and features transmit/battery status indicator and automatic squelch.

Range: 1 watt-up to 2 miles, 2 watt-up to 2.25 miles (flat terrain with few obstructions). **Durability:** Pass 5 year accelerated life and 4 foot drop to concrete tests. **Battery Charge Life:** VHF-13 hrs., UHF-8 hrs. based on 90/5/5 usage. **Frequency:** VHF models — SV21D, SV21CD, SV11CD, SV12CDT-Blue DOT, SV22CDT; UHF models — SU21D, SU21CD, SU22CDT. Other frequencies available on special order. **Frequency Conversion to MHz:** Blue=154.57, Green=154.60, J=467.7625, K=467.8125. **License:** FCC license required(information furnished with radio). **Warranty:** 1 year (limited) replacement.

Spirit SV11



Each Spirit radio comes fully equipped and ready for use. Each Spirit radio has:

- **1 Watt of Transmit Power in the VHF Frequency Range**
- **1 Channel**
- **Open Squelch (Convertible to Coded)**
- **10-Hour Charging Adapter**
- **Transmit Battery Status Indicator**
- **Removable Belt Clip**
- **Rechargeable Battery**
- **6.2" × 2.5" × 1.2"**
- **11.1 Ounces**

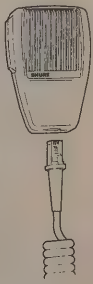
(1)This is a "power strip" for six HTN9026R Desktop Chargers. Chargers must be purchased separately. (3) For use with Headset with Microphone HMN9408 or Earpiece with Microphone BDN6774. (5) For use with nylon carry cases.

590T Transistor Amplified Dynamic SHURE



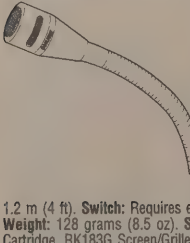
This rugged handheld microphone features a Shure dynamic cartridge. Tailored frequency response provides optimum voice articulation while it discriminates against other sounds. The 590T is ideally suited to a wide range of mobile installations. The unique replaceable ModuLink cordset system makes the 590T a workhorse that is easy to service. The microphone itself is designed to provide trouble-free service even under the harshest conditions.

Specifications. Frequency Response: 200 to 4,000 Hz. **Impedance (at 1kHz):** 200 ohms (non-amplified mode). **Recommended Load:** Greater than 500 ohms. **Non-Amplified Output. Level (at 1 kHz):** 1 5.8 mV (–36.0 dB=1 V/100 microbars). **Amplified Output. Level (at 1k Hz):** 0.32 V(–10 dB, 0 dB=1 V/100 microbars) for a DC Supply Current of 2.5 ±0.25 mA. **PTT* Switch:** Million-Cycle Plus™ leaf-type. **Cable Type:** Detachable 5-conductor, 1-shielded, coiled, with 8-conductor (6 used) modular telephone type connector. **Cable Length:** 1.2 m (4ft). **Replacement Parts:** 90A4056 Cartridge, 90A4040 Printed Circuit Board Assembly; 90A3543 Switch Assembly. **Optional Accessories:** RK6MB Mounting Bracket.

*Push to talk.

944-0590. Model 590T..**EACH 42.30**

562 Noise-Canceling Dynamic

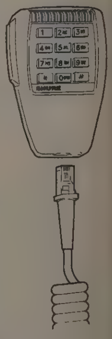


Designed to withstand abnormal moisture and temperature conditions, the 562 is perfectly suited for high-noise environments found in some mobile dispatch operations, such as numerous dispatchers in close quarters — even in situations where there is so much noise the dispatcher cannot hear himself talk. Excellent voice reproduction, highly intelligible speech communication and ruggedness. The 562 fits Shure goosenecks (not supplied) with ⁵/₈" diameter.

Specifications. Frequency Response: 100 to 6,000 Hz. **Impedance (at 1kHz):** 180 ohms. **Recommended Load:** 1,000 ohms. **Output. Level (at 1 kHz):** 0.06 mV (–84.0 dB, 0 dB=1 V/microbars). **Cable Type:** 2-conductor shielded. **Cable Length:** 1.2 m (4 ft). **Switch:** Requires external switch (not supplied). **Dimensions:** 67 mm L × 34.6 mm Dia. (2⁵/₈ × 1³/₈ in.). **Weight:** 128 grams (8.5 oz). **Supplied Accessories:** No. 4 Allen Wrench. **Replacement Parts:** 70A292 Cable, R90 Cartridge, RK183G Screen/Grille Assembly, 31A1238A Case. **Optional Accessories:** A1WS Windscreen, A12 Mounting Flange, A13HD Heavy-Duty Mounting Flange, Any length Shure ⁵/₈" gooseneck.

944-0562. Model 562..**EACH 74.75**

885TT — Quality That's Affordable SHURE



- **Continuous-Tone Dialing**
- **Illuminated Keypad**
- **Positive Tactile-Feel Keys and Audible Confirmation Tone to Help Make Number Entry Easy and Accurate**
- **Externally Adjustable Audio and DTMF Levels for Easy Installation**
- **Tailored Frequency Response and Top-Talk Sound Channels™ Provide Optimum Clarity and Intelligibility**
- **Million-Cycle Plus™ Leaf Switch — a Shure Exclusive, Giving You Longer Trouble-Free Use**
- **Virtually Indestructible Armo-Dur® Case**

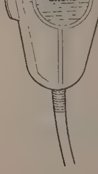
The new 885TT gives you an unbeatable combination of economy, dependability, audio quality, and ease of use. It's a manual-dial DTMF microphone that sets new standards for quality and economy.

Specifications. Frequency Response: 200 to 4,000 Hz. **Output. Level (at 1 kHz):** –5.0 dB (0 dB=1 volt per 100 microbars) for a DC Supply Current of 2.3 mA. **DTMF Output. Level:** 1.1 volts peak-to-peak. **PTT* Switch:** Million-Cycle Plus™ leaf-type. **Cable (optional):** Detachable, 1.4 (48 in.) 5-conductor (1 shielded) modular telephone type connector. **Optional Accessories:** RK6MB Mounting Bracket (3 in kit).

*Push to talk.

944-0885. Model 885TT..**EACH 148.50**

527C — Transistorized Dynamic — *NEW* —



Tailored frequency response for clear, crisp voice reproduction. Built-in transistor amplifier matches carbon-type input circuitry and also provides sufficient output signal to permit use up to 100 feet (30 m) of unshielded cable. Extreme ruggedness and very intelligible response make the 527C ideal for all emergency service mobile installations, as well as transportation, utility, forestry and radiotelephone.

Specifications. Frequency Response: 300 to 5,000 Hz. **Recommended Load:** 220 ohms to 2.2 kilohms. **Output Level (at 1 kHz):** 0.28 V (–11.0 dB, 0 dB=1 V/100 microbar). **PTT* Switch:** Million-Cycle Plus™ leaf-type. **Cable Type:** 4-conductor, coiled. **Cable Length:** 1.8 m (6 ft.). **Supplied Accessories:** RK6MB mounting bracket.

*Push to talk.

CAT Communication Headset for Computer Audio and Telephony Applications

Now there is a lightweight, portable, and private alternative to PC microphones and speakers. Plantronics CAT (computer audio and telephony) headsets enable you to work with computer telephony integration (CTI), voice recognition, personal conferencing, business audio, and multimedia applications. Plantronics CAT 132 communication headset is extremely lightweight and can be put on and off in seconds. Instead of broadcasting personal messages or other sound files by playing them over speakers, you can use Plantronics headsets for private communications. Our CAT series of products reduce disruptive noise pollution and eliminate the desktop clutter that comes from PC speakers and microphones.

The CAT 132 is a high-performance headset featuring a boom-mounted, noise-cancelling microphone that dramatically reduces background noise for clear CTI or personal conferencing communications. With the CAT 132 you get high performance in a sleek, lightweight design.

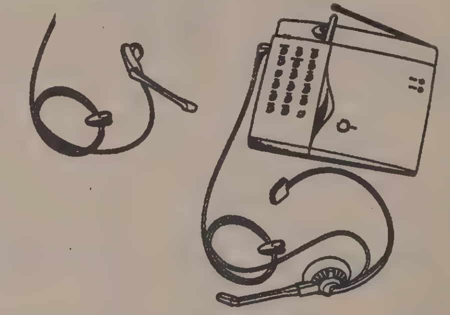
CT-460 Hands Free Cordless Telephone



A single-line cordless telephone that lets you move about and converse hands-free, while handling any task easily and efficiently. Perfect for the office — or even at home.

Two headset designs — a cushioned earbud headset that easily slips into either ear using just one hand, and an adjustable headband-style headset for maximum stability and all day comfort. Palm-sized remote with full phone functions including on/off and mute controls, volume and ringer controls, redial/pause, flash, tone, channel select. Ten number speed dial which can accommodate up to 16 digits each. Base unit with headset holder, ringer volume control, and tone/pulse switch. Ten frequency channels in the 46/49 MHz band for optimum call clarity. One-way paging from base unit to remote. 65,000 digital security codes to prohibit other phones from calling out through the same base unit. Holster belt clip and neck strap options for wearing remote unit. Wall mount option to eliminate desktop clutter.

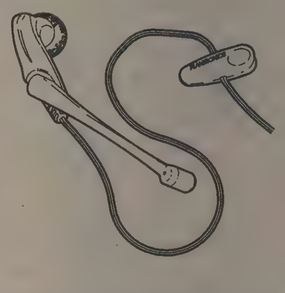
Plantronics FreeHand™



- Cushioned Earbud Receiver Slips On and Off Instantly
- Unidirectional Noise-Cancelling Microphone Reduces Unwanted Noise Up to 75%
- Lightweight — Under 1/2 Ounce
- Plugs Directly Into Your Existing Phone in a Moment
- Patented SoundGuard® Circuitry Offers Safety Beyond OSHA Levels
- 6' Cord for Freedom of Movement
- Full Two-Year Warranty

Finally, a high performance headset for professionals that slips on and off instantly. A handset replacement that makes sense. Independent professionals like you can now get a grip on work again. The Plantronics FreeHand™ is uniquely designed to let you work the way you want. Use the computer, take notes, look for papers with both hands while you're on the phone. It's comfortable, looks and sounds great. And the FreeHand is a breeze to put on, take off — and hooks up to your phone in a moment. There's no headband, no eartip — nothing to get in the way of your work. When you're ready to make or answer a call, just slip the cushioned earbud receiver on the outside of your ear. It's that easy and fast. Now you'll have both hands free to take notes, refer to documents or work at your computer. Sound quality you've got to hear to believe. The Plantronics FreeHand boasts sound equal to your regular phone. Only you will know you're using it. And it's better than an annoying speakerphone. Plus it's private. The Plantronics FreeHand is compatible with all major business phones and plugs in instantly with a modular adapter (included). It comes complete with volume control, handset/headset switch and a mute button.

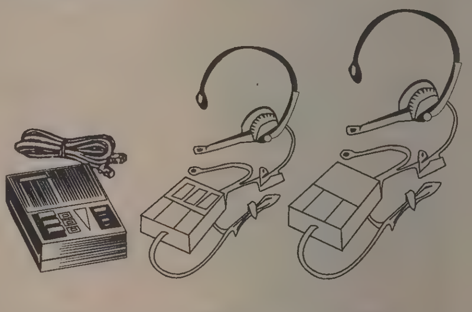
SP™ Modular Headsets for Standard Telephones



SP-02 SP-04 SP-05

The SP™ Modular Headset makes time on the telephone in your office or home a lot easier. It frees both hands so you can write, type, or perform household chores while talking on the phone. SP™ headsets are made by the world's largest supplier of modular headsets for standard telephones. Each headset is user-installable and works with traditional style touch-tone or rotary desk telephones with modular handsets. These phones normally have "bell" rather than electronic tone ringers. All headsets feature single, lightweight earpad, adjustable headband and boom-mounted microphone. SP™ gives you superior comfort and performance at low cost.

Model SP-02. Designed for use with electronic telephones.

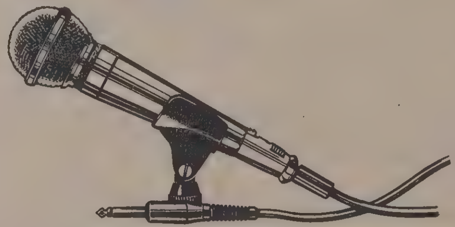
910-0021. Type 33-1070 .... **EACH 49.99**

Highball Dynamic Mike



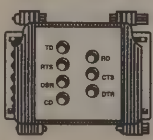
Model 33-984. Rugged, high-performance mike has 80-15,000 Hz response with emphasis on "presence" for clean, articulate, natural sound. Ball windscreen minimizes breath "pops" and rubber anti-shock ring withstands rough handling. Unidirectional pattern helps control unwanted sounds and feedback. On/Off switch. High (10 K) and low (600 ohm) impedances with balanced low Z capability. With XLR-type connector, 16' heavy-duty cable, and stand adapter.
910-0017. Type 33-984 .... **EACH 59.99**

Wide Range Speakers

For all kinds of new or replacement use. 8 ohms. **Size:** 3". **Power Cap. (Watts):** 2.0. **Magnet Wt.:** 0.4 In. Oz.

910-0112. Type 40-248 .... **EACH 3.99**

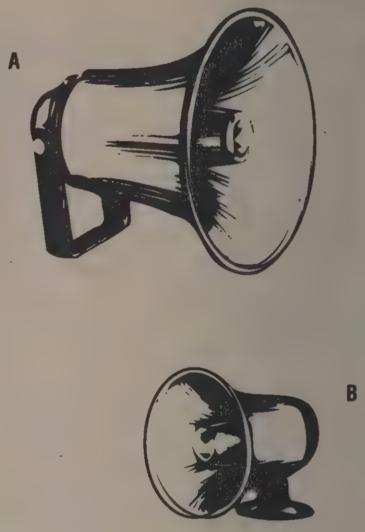
RS232 Testing and Connections



RS232 Mini Tester. Diagnose interface problems yourself, without costly repair calls. Dual-color LEDs indicate status of TD, RTS, DSR, CD, RD, CTS, and DTR lines. Connects inline.

910-9034. Type 276-1401 .... **EACH 14.99**

Multi-Purpose Powerhorns



These weatherized PA, music and paging speakers are waterproof, dustproof, shockproof and resist rust with years of quality performance, indoors or out. Choose the size that's right for your application, either 4", 5", or 8". All 8 ohms, includes mounting bracket.

A. 8" Horn. 15 watts.
910-2123. Type 40-1239 .... **EACH 34.99**

B. 5" Horn. 8 watts.
910-7097. Type 40-1236 .... **EACH 21.99**

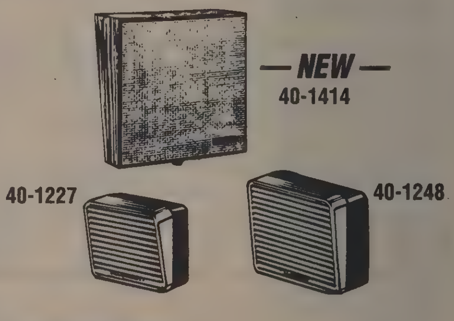
Super PowerHorn® Speaker

► **Extra-Wide 275-14,000 Hz Frequency Response**

Model 40-1307. High-efficiency design for maximum sound fidelity for speech and music. Engineered for years of reliability. Weatherized molded housing, metal swivel base. 40 watts. **SPL:** 110 dB (1W/1M). 11 × $6^{1}/_{2}$ × $8^{1}/_{2}$".

910-1307. Type 40-1307 .... **EACH 41.99**

Speakers



8" Wall Mount Speaker

Perfect for paging or background music in an office or retail space. Mounts easily on wall, has a full-range 8" driver and built-in volume control. Handles 10 watts max. **Impedance:** 8 ohms. Rated 92 dB (SPL at 1 W/1 M). $10^{1}/_{4}$" × $10^{1}/_{4}$" × $4^{3}/_{4}$".
910-1414. Type 40-1414 .... **EACH 24.99**

Indoor/Outdoor

Keyhole slots and hardware for easy wall mounting. Moisture-proof. 8 ohms.

4" Speaker. $4^{3}/_{4} \times 5^{1}/_{2} \times 3$".
910-7090. Type 40-1227 .... **EACH 16.99**

$6^{1}/_{2}$" Speaker. $4^{1}/_{2} \times 8^{1}/_{4} \times 3^{7}/_{8}$".
910-2121. Type 40-1248 .... **EACH 27.99**

Color Cameras — *NEW* —

- All Sanyo Color Cameras Have the Same Dimensions of 2.2" (W) × 1.77" (H) × 3.92" (D) without Lens; Approx. Weight: 11.6 Oz; All Have Metal Cabinets Therefore None Are Affected By Magnetic or Electrostatic Fields

Models VCC-3912 and VCC-3924

- 1/3" CCD Color Image Sensor
- 330 Lines Horizontal Resolution
- Backlight Compensation and Electronic Iris
- 8-Mode High Speed Electronic Shutter 1/60, 1/100, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/10000 Sec.
- CS/C Mount (Adapter Supplied)
- Internal Sync.
- 12 VDC Power Adapter Supplied (Model VCC-3912 Only)
- Operates on 24 VAC and Requires a 24 VAC Power Source — See Pelco #TF2000 or #MCS40 (Model VCC-3924 Only)
- Power Consumption: 3.5 W (Model VCC-3924 Only)

912-0005. VCC-3912 .... EACH 620.50
912-0002. VCC-3924 .... EACH 539.09

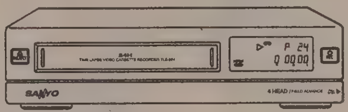
Models VCC-3972 and VCC-3974

- 1/3" CCD Color Image Sensor
- Greater Than 460 Lines of Horizontal Resolution
- Scene Illumination Needed: Less Than 2 Lux (F1.2 Lens)
- Auto White Balance and Auto Color Tracking Through the Lens
- Backlight Compensation and Electronic Iris
- 8-Mode High Speed Electronic Shutter 1/60, 1/100, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/10000 Sec.
- Internal and External Sync (Automatic Switching)
- Y/C Signal Output
- CS/C Mount (Adapter Supplied)
- 12 VDC AC Adapter Supplied (Model VCC-3972)
- Requires 24 VAC to Operate and Requires a 24 VAC Power Source — See Pelco #TF2000 or #MCS40 (Model VCC-3974 Only)
- Power Consumption: 3.7 W (Model VCC-3974 Only)

912-0008. VCC-3972 .... EACH 780.30
912-0010. VCC-3974 .... EACH 697.00

Time Lapse Recorders — *NEW* —

- Multiple Recording Modes of 2, 12, and 24 Hours on a T-120 Tape All of Which Permit Audio Record
- Field Record and Field Playback
- Timer Recording Can Be Used on Daily or Weekly Basis
- Alarm Recording
- Built-In Microprocessor with Calendar Function
- Special Security Function Locks All Buttons
- Auto Head Cleaning
- 30 Days Backup Power for Clock Memory
- Alarm Counter
- Daylight Savings Time Adj.
- Dimensions: 14.2" (W) × 3.35" (H) × 13.3" (D); Weight: 12.6 Lbs.
- Operating Temperature: 40°F to 105°F



- Power: 120 VAC/60 Hz
- Power Consumption: 24 W (Approx.)
- 19" Rack Mount Available
- Capable of 3 Days of Time Lapse Recording with the Additional Speeds of 48 Hours and 72 Hours (Model TLS-972 Only)

912-0924. TLS-924 .... EACH 822.70
912-0972. TLS-972 .... EACH 953.75

Monitors

Black and White Monitors

UL and DHHS listed. FCC RFI compliance video monitors offer high resolution and solid state circuitry. Flip-open control cover, DC restoration switch, Hi Z-Lo Z termination switch, video input bridging, and a regulated power supply with isolation transformer, all encased in a rugged metal cabinet. Optional rack mounts are available to mount in standard EIA 19" space. **Controls:** On-Off, Brightness, Contrasts, H-Hold, and Impedance. Also features quick start without pre-heating and recessed hand grips for portability. **Specifications, Input Signal Range:** 0.5 to 2.0 Vpp. **Horizontal Resolution:** 900 lines, nominal. **MTBF (Less CRT):** 15,000 hours. **Light Output:** 25 FL Min. **Geometric Distortion:** 2.0% Max. **Connectors:** 2 BNC Video In, Video Out. AC- 3 pin UL approved plug.

Color Monitor

High resolution CRT with comb filter reproduces 450 horizontal lines of resolution (Y/C), or 330 lines composite. Its metal cabinet construction reduces interference from outside noise. Degaussing yields minimal magnetic build-up for superior performance. Optional rack mount is available to mount in standard 19" space. A built-in speaker with front-panel volume control is provided.

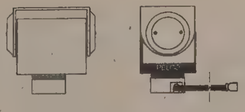
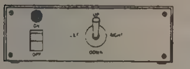
Pan/Tilts and Accessories, Indoor/Outdoor

Light Duty Pan/Tilt



PT175-24P. Light duty, indoor/outdoor pan/tilt engineered to handle camera/lens combinations weighing up to 20 lbs. (9.08 kg) and is capable of auto/random scan operation when used with the MPTA24DT control.
913-0175. PT175-24P .... EACH 1077.00

PT270-24P. Measures only 7³/₄" high, 8" wide, and 4¹/₂" deep. Ideally suited for indoor operation, use where space is at a minimum, or for discreet enclosure applications.
913-0270. PT270-24P .... EACH 682.00



Pan/Tilt Control

MPT24DT. Control is designed for use with PELCO 24 VAC, pan tilts. An 8-position joystick controls the up, down, left, right movements of a single pan/tilt. Movements can be controlled individually or simultaneously (i.e., left/down, left/up, etc.) by positioning the joystick diagonally between the two desired functions.
913-0024. MPT24DT .... EACH 260.68

Scanner and Lens Control

MPTAZ24DT. Integrate pan/tilt, scanner and motorized zoom lens functions into one desk top control and are for use with 120 VAC, 230 VAC, and 24 VAC pan/tilts or scanners.
913-0025. MPTAZ24DT .... EACH 548.00

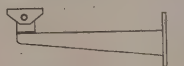
Environmental Enclosures

EH3512/EH3512-2. Designed for use with 2/3" and 1/2" format cameras and fixed focal length lenses or motorized zoom lenses with or without auto-iris operation.
913-3500. EH3512 .... EACH 103.00
913-3505. EH3512-2. 24 VAC heater/blower. 40 watts .... EACH 251.75

Environmental Enclosures (continued)

EH4718 Series. Designed to accept CCD cameras with either fixed focal length lenses or motorized zoom lenses (up to 10×). 19" long.
913-4718. EH4718 .... EACH 171.00

EH4718-2. Designed to accept CCD cameras with either fixed focal length lenses or motorized zoom lenses (up to 10×). 24 VAC heater/blower, 40 W. 2'. 20"-50" long.
913-4719. EH4718-2 .... EACH 337.98



Enclosure Mounts

EM22. Designed and engineered for use with various PELCO enclosures. The EM22 mounts to a wall or other vertical surface and features a cast aluminum wall arm which minimizes undesired horizontal movement.
913-0022. EM22 .... EACH 85.00

Camera Mounts

CM1700. Light duty, universal mount primarily designed for ceiling or pedestal mounting of CCTV cameras, but can also be used as a wall mount.
913-1700. CM1700 .... EACH 45.00

TB1700. Specifically engineered for attaching the mount to the "T" rail found in most false ceiling installations.
913-1705. TB1700 .... EACH 45.00

Sequential Switcher

VS5004/VS5008. The VS5004 is a low cost desktop, sequential switcher designed to manually or automatically switch four (4) cameras to one (1) monitor and respond automatically to alarm inputs. The VS5008 is an 8-position sequential switcher with dual output and alarm function.
913-5004. VS5004 .... EACH 286.90
913-5008. VS5008 .... EACH 384.76

VS5104/VS5108. Same features as the VS5004/VS5008 except they are homing switchers having one (1) monitor output and no alarm capability.
913-9835. VS5104. 4-Position ....EACH 167.20
913-9840. VS5108. 8-Position .... EACH 287.47

Camera Lens' — *NEW* —

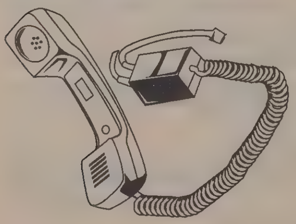
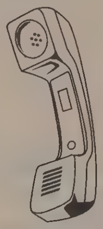
Noise Censor Series

PLANTRONICS WALKER



W6-UNI-K-NC

Noise Censor "NC-1" G-Style Replacement Mic



W6B-NC

Noise Censor is a family of noise-cancelling products designed for telephones that are located in noisy or hard-to-hear areas. The W6-UNI and W6B are compatible with virtually all telephones. The W6-UNI and W6B replace all K-style handsets with modular connection. The NC-1 is a noise-cancelling microphone replacement for carbon mics in "G" style handsets.

Allied Control Transformers

Automation types for high-speed automatic equipment. Adapted to relays, pilot lamps, solenoids, small motors, etc. Also use in high current, low voltage power supplies. Secondaries have two identical windings for series or parallel operation. Primaries operate from either 115 or 230V, 50/60 Hz.

D

Allied transformers are specially built to Allied Electronics' high standard for quality, stability and long-term performance. Laminated cores of silicon iron electrical grade steel. Insulation is non-corrosive Class A. Temperature rating 105°C continuous operation. Superior permeability at high inductances, with low coil loss. Coils of high quality film insulated copper magnet wire. PVC leads are fast stripping and provide protection from oil, ozone and abrasion. Cold rolled steel covers provide protection to coils. Finished in semi-gloss enamel for good appearance. Compare prices and specifications and you will find that Allied transformers are your best buy.

Allied's Own Power Transformers

For new equipment or replacement use. All types listed are shielded except those indicated by ‡. Have 6" flexible color-coded leads for easy installation. Plate windings are center-tapped except *half-wave type. 6.3 volt windings are center-tapped except † not center-tapped. All have primaries for operation from 110-120 volt, 50/60 Hz AC, except for **60 Hz AC only.

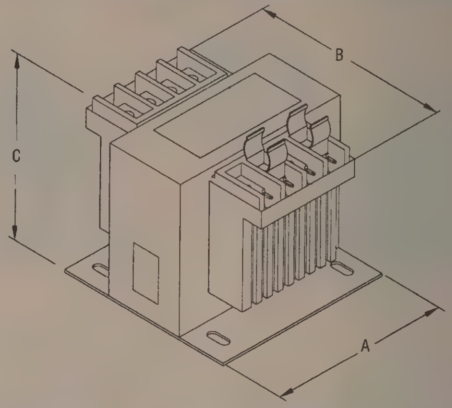
PT Series Machine Tool Control Transformers



The Hammond "PT Series" of machine tool control transformers are specifically designed for high inrush applications requiring reliable output voltage stability. They meet industrial applications where electromagnetic devices such as relays, solenoids, etc., are used. The PT series features an all new "Molded Construction". The transformer core and coils are first vacuum impregnated with "VT (vinyl-tolene) Polyester Resin", and are then molded in a flame retardant polyester filler which seals the core and coils against moisture, dirt and other airborne contaminants while still providing superior strength and durability. All single secondary units are supplied with factory installed secondary fuse kits. These units operate from 50/60 Hz AC power, and are listed by both UL and CSA. The molded terminal blocks allow for easy primary or secondary fusing to meet UL 508 requirements. PT Series control transformers will be CE Marked and will have finger guards available in early 1997.

► Primary: 240/480, 230/460, 220/440 **► 50/60 Hz**
► Secondary: 120, 115, 110

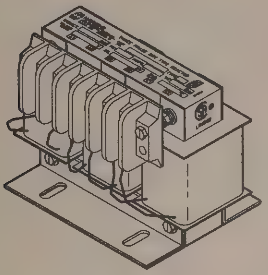
3 Phase Line Reactors — *NEW* —



Hammond Line Reactors are designed to reduce or eliminate most line problems. This includes nuisance tripping, harmonic distortion, line notching etc. In addition, performance, life expectancy and efficiency of both the motor and drive components will be extended and enhanced. These line reactors feature; core and coils of the highest quality and performance, superior insulation system, full "VPI" Impregnation using VT Polyester Resin and custom brazed connections. Both open and enclosed style line reactors are available and are recognized by UL and certified by CSA. They are built in accordance with UL 508 and UL 506.
